For those Lesbianists hiding among you who do not wish to surrender, you Lesbianists will find we are not going to be acting kindly towards you. All of you Lesbianists, where ever you are in Washington DC, or hiding underground, or in Paris, or in Rome, Peking, and so forth, you will be dealt with harshly, as we need to put a stop to your activities, and a "maybe" is not acceptable in this case. We are not going to allow you to continue your chaotic, nonsensical, violent activities one moment longer, and we will blow you up flying high up into the sky, and off the ocean ledge down below you, in Washington DC, as we sink your Washington DC area into the ocean, along with all of Northern Virginia, and the ocean coastal area of Maryland and Baltimore, along with large parts of the states of Virginia and Maryland, out to West Virginia, as that area settles down into and below the waves of the Atlantic Ocean, after we bomb it with one or more of my fracturable rocks weapons for mass removal of Lesbianists from the face of the earth and from their hiding places under the surface of the earth. The Lesbianists in the Washington metro area and hiding under it, had all better surrender to my kids, or they will all get their pants and clothes blown off and shredded from their bodies, if they do not, as they are given a free ride out and up into the upper atmospheres of our planet, and then, beyond. All other Lesbianists had better surrender, too, or they risk getting a free ride out, as well.

Deep Sea Ocean Trench Off The East Coast Of The United States

There is a trench that extends south wards from Washington DC, some times reaching 25 miles out in some places, and in other places, it reaches out to eight hundred miles from the shore. In the north, it reaches out in some places, 85 miles out to one hundred and twenty five miles out, to three hundred and fifty five miles out, to eight hundred miles out in some places, in the south.

It is fifteen miles deep when you go out forty five miles off the coast from Washington DC and from the Chesapeak Bay. The ledge bottom is found about three and one half miles down, and the mouth of the opening continues for ten miles, approximately, downwardsly, on the western side of the trench. The It has a gaping mouth, and it opens up and lets ocean water inland, under the continent, eighty five miles down below Washinton DC, three to six to eight miles wide, from top to bottom, from the underside of the top of the mouth, the bottom of the ledge, to the bottom of the mouth. From under the nation's capital, to the south, it travels to over eight hundred and eighty five miles. To the north, it travels three hundred and thirty five miles, to six hundred and fifty miles, to about nine hundred and fifty nine miles, inland under the continent, depending on where you wish to locate the edge of it under the continent, northwardsly. It travels to the west, inland, three hundred and thirty five miles, to just over eight hundred miles, depending on where you find the edge of it. It travels

inland further westardsly, the further you travel north. It is slightly over one thousand and eight hundred miles from north to south, in total, as you'll discover, once you explode enough, and after you explode large enough fracturable rock bombs, over Northern Virginia, Maryland, Washington DC, Baltimore, covering the metro area vicinity.

The U.S. Navy, and the U.S. Coastguard know about the trench, or parts of it. They are not allowed to discuss it with anyone. No one is allowed out there, to research it as it is off limits to just about every one. Some navy personel of high rank, and coast guard personel of high rank, are allowed out to take soundings, every now and then, with their Lesbianists' staff members, and Lesbianists' personel in the Navy, and in the Coast Guard. The Soviets, at least, Boris Yeltzin, Vladmir Putin, Mikhael Gorbachev, and Zelda Gorbachev, know about it, and so do all the other Lesbianists. They can confirm it, if they wish to play ball with me, and if they wish to save their asses, after they decide to surrender to my children.

The Shelfs Systems And Trenches Systems

The shelf estends to under Lexington Kentucky, at about ten miles below it. It is five miles up under Chatanooga Kentucky. It is five miles below Washington D.C., in some areas. It is three miles below Baltimore Maryland, in some parts of the city. It is eight miles up below Pittsburg, Pennsylvania. It is fifty five miles up below, or under, West Chesterfield, New York. It comes up to eighteen to thirty miles below McLean Virgina. It is eighty eight miles below Norfolk, and the mouth, downwardsly, is five to ten to fifteen miles wide open, in a downwardsly direction. It some areas, it can be found below Ohio, and under Indiana. It crosses under the West of Kentucky, and into the south of Illinoise, five to ten, to thirty miles. It is a variegated trench system. It extends to Tennissee, parts of North Carolina, Mississippi, Alabama, Georgia, South Carolina, and to under parts of Northern and Western Florida, and is open out and into the Gulf of Mexico. The whole area of Eastern U.S.A., is sitting on an open shelf, trench system, and there is water passing below it, and out into the gulf, in several areas, over to eighty five miles west of Corpus Cristi, Glen Garden, population eight hundred and fifty, which south of Galveston, and north of Corpus Cristi, between the two cities. There is a mouth eigty five miles south of Tampa Bay, Florida, in the Gulf of Mexico. There are several openings or mouths to the underground fault line system, and deep sea ocean trench system, and shelfs systems, and water is passing from the Atlantic to the Gulf of Mexico. There is also a trench system in the north, under Niagra, that extends southwards, several hundred miles, and it has many branches to it, and it extends into this system of shelfs, trenches, and under continental water flows.

Side Bender Currents

What is a side bender? It is a current comeing out of the mouth of an opening, from under a continental shelf system, that allows waters to flow out. As the water flows out of the mouth, the outlet current of water, it flows very forcefully in an outwardsly direction, and it pushes the water out with great force, generally. If a submarine is traveling in the vicinity of a side bender, the submarine may get hit broadside, and that will often turn the submarine topsy turvy, and around facing the opposite direction it was traveling in, or another direction, not the one it was traveling in, most often. The crew will get swung about inside the submarine, and they will fly through the cabin, and pounce off the floor to the ceiling, and hit the ceiling, and then hit the sides of the corridor they were walking along in, and finally end up on the floor when the submarine rights itself, with its balast, and you'll get many sprained or stretched ligaments, and broken bones, arms, wrists, fingers, legs, knees, ankles, feet, toes, necks, backs, hips, spinal injuries, and other injuries. It can leave a crew of a submarine nearly one hundred percent, injured and in a ship's hospital, or a Navy or military hospital for recovery. Side benders are often called upwellings of currents by the Navy, but that is not generally the case as they are not upwellings, but they are side pushing currents, that come flowing out from under continental water flow openings, horizontally. There may be some upwards lift involved, if there is a reason, such as a mouth is angled at a slight sloping angle, as it releases the flowing waters out from its tube like cavity or hole.

Crew members and military passengers of Naval submarine vessels are generally told not to talk or discuss any thing about side benders with non Navy persons, and with persons unrelated to their ship or unrelated to their ships voyage, as the governments of the world, do not want any one to find out about side benders, and they do not want people, geologists, marine geologists, undersea deep sea ocean studies researchers, or others, to research and investigate side benders. It's a big secret, these side benders, and that's what the marines, and the navy personel are sworn to keep, or face a fireing squad, on insubordination, or on some trumped up charge of spreading naval secrets, acting as a foreign spy and receiving money, or something like that. Naval personel will generally obey orders, and not discuss side benders, or other 'secret' information, with any one, as they risk losing their job, and they might face a fireing squad, or a hanging patrol, sometimes called a marching platoon, or a hanging platoon, a group of soldiers commissioned to carry out orders to hang some one who is in the military. If you pay a naval officer or enlisted person, or other person with Naval submarine duty, such as some marines, and others, enough money, they may be willing to share some information on side benders, and information about what they know about side benders. Some persons who have had Naval submarine duty, may genuinely not know any thing, such as crew members who are never assigned to submarines that travel near side benders, on a regular basis. Some times family members of enlisted persons and of Naval officers, are allowed to travel on submarines, for fun and excitement,

as a special reward for their papa's or mama's duty on a submarine. Some of these family members have also had some experience with side benders, such as those who have traveled on submarines along the Marianna's trench, or other trenches, not listed, neccessarily on global maps, but none the less, which are there, and that are near shelfs systems under sunken continental shelfs, or under sunken continents, but that eject streams of water, nonetheless.

Our maps and globes of the world are incorrect, the ones we buy through bookstores, or from map publishers, as nothing that would indicate sunken continents, large sunken islands, and related trenches, or other related features, are not going to be indicated on them. The Lesbianists do not want you to find out information that could provoke you into researching, under water features, that they do not want you to know about, as your fictious understanding they have taught you, of the surface of this planet, and its history, is bogus, and any thing that would conflict with that, is certainly not going to be indicated on a map they would publish, and the map will be wiped clean of all traces of any thing that conflicts with the 'global' history of the earth, as the Lesbianists teach it, in geology courses for high school students, and below, and above. The global geological history they teach must coincide with their fictious propaganda about Adam and Eve, and "Lucy" the ape woman, the supposed mother of all people living on this planet, and about this earth being only 9 billion years old, or thereabouts, which is a bold faced lie, and other such bullshit notions they have fed every one to swallow, and have forced them to accept, and that they force people to use as primal notions to base scientific research on. The geology of our planet is much more complex than the Lesbianists are letting on to, and there is much to learn about planetary geology, as these planets have been around a very long time, and many things have happened, over and over again to them, and many things have happened to our 'solar systems', and star formations, and star systems, that people need to know more about, to get a realisitic understanding of our universe, its history, and its many complexities. In time, we will learn much more about all these things, and you can attend courses that my children have set up for every one, to teach people about our universe. You need a day pass to visit, as I've explained about, before, and then you should swear in, and become a citizen of our country. We have yet to declare this planet ours, but in time, we will, once we have finished and put an end to the problems associated with the Lesbianists, all of their shenanigans, and their malarkying around. One day we will declare this planet ours, and my kids will take charge of everything, and they will appoint people to posts of duty, and to positions of responsibilities.

Making A Large Swimming Pool

People should begin moving off and out of the area, around the Nation's capital, Virginia, Maryland, Pennsylvania, West Virginia, and North Carolina. We'll have a big swimming pool there, with lots of,

mostly uninhabited, tiny islets, or hill tops and mountain tops, after all of the current residents die, and pass on and transel over to my Epcot Center, after one of our compatriots, or groups of them, detonate enough of my fracturable rock bombs. People will have to watch out for hungry sharks, after they swim inland, above the sunken landscape, looking for corpses to eat, and to scavenge, as lots of Lesbianists' corpses will come floating up from underground hangouts and cities of the Lesbianists, under those parts of the U.S., and from under the Gulf of Mexico, from under the sea floors of the Atlantic, from under the Niagra trench systems, and from under other trench systems in the Eastern U.S. This is not a joke, by the way.

Stagnasis

Salts kiddies in stagnasis is when the salts kiddies are in their salts kiddies crystals cages, in a hibernative state, in perfect equilibrium, to keep them alive and well, for as long as possible. Salts kiddies crystals cages sciences help you to understand many things about how things work in nature. Please read over my notes on my bulletin board.

Black Powder 'String' Fuses

Take a spool of sewing thread, and use Elmer's glue to coat the string, and run the string with a thin layer of Elmer's glue coated on it, through a bucket of black powder gun powder, which you can order in the mail, over the internet, or pick up at an antique musket or old style 'cap and ball' musket rifles and pistols retail stores.

Elmer's glue and gunpowder will combine to form a minor plastiques explosive, after the salts kiddies mix it up, eat each other up, pee and poop out lots of stuff that is highly explosive, as they get busy making babies, except when gunpowder is used in large quantities with Elmer's glue, to form a major plastiques explosive. Benzine will help this along, with diesel fuels, as well, and with chlorine, we can see some major plastiques explosives in the making, as mama's and papa's begin making lots of children, as they begin mixing it up, and as they all begin pooping and peeing out body fluids that is food for others, that will contribute to the powerfulness and explosiveness of the mixture.

After you make your string fuse, and let it dry out for a couple of weeks, then coat a rag or muslim cloth in oil, or grease, or a mixture of turpentine, gasoline, diesel fuel, and grease, with benzine, and make a paste, and use that paste to coat a thin cloth, such as a muslim cloth, and then let that set and dry for a few days, and then wrap a few sets of 'string fuses' together in a bundle, and place them inside the cloth. It will become a very powerful explosive, in itself, the more gun powder you use with it.

Test it, to see how fast it burns once it is wrapped in a cloth coated with a mixture of grease and fuels. The thicker the grease, the slower

it will burn. The thinner the grease mixture, by adding more turpentine, or benzine, or paint thinner, the more rapidly the fuse will burn. You will have a very powerful explosives cocktail, with this mixture, so be careful. You have to be very careful with what you combine, as you'll be bringing together very explosive elements, when you mix these fuels and liquids together with gun powder on a string.

A few string fuses, wrapped in a well soaked cloth, with a mixture of these liquids and the axel grease, will make a type of plastique explosive, that can be used as a shape charge, or a mouldable, or shapeable, explosive, that is good for blowing doors off hinges, such as at pharmacies, or banks, and for blowing locks on private homes' fences to pieces, such as can be found at the White House, at 1600 Pennsylvania Ave. Washington, D.C., at the entrances and exits gates of the White House where guards are on constant duty patroling the area for security purposes. An initial explosive, a detonated fracturable rocks bomb, small in size, may cause a concusive force to cause the guards to black out, and pass out, and then sleep for a while. Be very careful with the size of the bomb, as we do not want to level the homes and buildings surrounding the White House, or across from it in Layfayette Park. After you put them to sleep, with your initial blast, you can test the shape charge on the nearby fences, at the White House.

Black Powder 'Cap And Ball' Pistols

Most black powder cap and ball pistols and rifles, muskets, sellers and retail outlets can be found on the internet, and some gun shops carry black powder, as well as the detonating fireing caps, for black powder rifles, and pistols. Many of them do, and you can purchase the black powder and copper detonating, ignition caps, for useing in your cap and ball pistol, or musket, or other, more modern, hunting rifle, that allows you to use black powder, and detonating copper caps that slip on a small round fireing ignition nipple that is made out of steel, and has a hole in it, to allow the percussive explosives in the firing copper igniting cap to ignite on impact with the hammer on the weapon, when it slams down on it, and the flames from the igniting explosives mixture, glued to the inside of the firing copper cap, then ignite the black powder, that was rammed down the barrel, or packed and tamped down in a cylinder of a percusive black powder cap and ball pistol. The caps are fairly useless, unless you wish to add them to a fuel oils, chlorine formula, and let them sit in the fuel oils mixture, and that will help develop plastique, as well.

Higher Temperatures Develop More Useful Energies For Making Babies

The copper in the cap will also allow for a higher temperature in burning, when the fuels mixture ferments after a few weeks. Magnesium in the cap as well, will also help to raise the burning temperature of the fuels mixture, and with some black powder added, and with some chlorine added, your plastiques recipe will become even more useful. These higher temperatures will help to produce energies that will be

conducive to baby making among the fracturable, or rupturable, and percussive, rocks radiological salts kiddies. You can then add a handful or more of powderized amethysts, or turquoise, that you can purchase in bulk, on Ebay, for some small bulk quantities, and also emeralds are useful, as they all have fracturable rocks kiddies embedded in them, and fast asleep, in stagnasis.

Zircon Diamonds, And Other "Radio Active" Gem Stones, Etc.

Zirconium is a mineral that they use for the fake diamonds they sell with the trade name, Zircon diamonds, or Zirconium diamonds. You can powderize them, and use them for a good amount of fracturable rocks explosives, large and fast family making, salts kiddies, for a 'nuclear' party, and a send off to the eastern coast of the United States, before it is blown off the coastal ledge it sits upon, and then sinks below the ocean waves, if you strike it hard enough, with one or more of my fracturable rocks babies making, "nuclear" salts kiddies bombs. You'll need a few handfuls of Zicon diamonds, powderized, to make a nice fracturable rocks, babies making bomb. You can mix turquoise, emeralds that are mined and sold in bulk quantities on Ebay, amethyst, and the other rocks that I've mentioned, along with powderized 'sand' from the beach. Argentina, and Venezuela, Baha, and Southern California are good places to collect useful sands, full of fracturable rocks, salts kiddies, that a geiger counter will detect, if it is a sensitive enough geiger counter.

Geiger Counters And Their Usefulness

They are not too hard to build, but you will have to look in your Popular Mechanics magazines, for the details on how to build a "geiger counter". Some mining stores, and mining outfitters stores, may be a useful places to order or purchase a geiger counter, if you are on a family budget. You might find one on the cheap, on Ebay, that is still useable.

There are some kits available, if you look hard enough, to use to build your own geiger counter. A mining outfitters store, in South America, or in Central America, or in Utah, or in Nevada, may be able to help you locate a kit, to put together, if you go in there, and pretend you want to go out and look for interesting rocks, and you need some information on where to look for interesting rocks, so go to a mining outfitters store, or to a rock hounding club, or rock hounding retail store, for looking at beautiful stones that rock collectors, or rock hounds, have found, and made available at the store. Usually the store owner will have his or her suppliers, on name cards, and you can get in touch with them to get more information on where to look for interesting rocks to test with your geiger counter, since you are facinated by radioactive elements in rocks, and you are interested in finding some, for a collection you wish to start.

You might want to pick up some primer books, on minerals and rocks, gems, and gemstones, from Amazon online, or from a local book store,

such as Barnes and Nobel book store, which has a few useful books on rocks, mineral rocks, gems, and gemstones, that you can find when you are out rock hounding. Desert Outfitters in Las Vegas, a miner's outfitters store, that also provides useful tools to rock collectors, such as rock hammers, and hand held pick hammers, for chipping away at rocks, to see what is under the surface of the rock, or under the peel of it, the outer layer, as well as terrain maps, and outfitting supplies, tents, and sleeping bags, and so forth, has these types of books, and lots of maps, and maybe they can help you find useful kits to purchase, to build yourself a geiger counter. They also sell geiger counters for about three hundred and fifty dollars or so. Sears used to sell Geiger Counters, and they still can order them for you, I think, through their catalogs. On Ebay, you can find many reasonably priced Geiger Counters. How well the geiger counters work, the ones people sell on Ebay, I can't say, so you'll have to talk with sellers, and see what they say about the geiger counters they are selling to others on Ebay, or read about them in old copies of popular mechanics, and in trade publications for the mining industry.

Novice And Amateur 'Rock Hounding' Rock Collectors Clubs

On Sahara, east of Las Vegas Boulevard, there is a rock shop, which is about two and one half, or so, blocks down from the intersection, on the north side of the street, and they have information, as well as lots of primer books, on rocks, and on geiger counters, and where you can find them. They are well connected to the local rock and gem, minerals and gems finding, or rock hounding clubs. You can meet their members, and go out with them, on excursions, as they know where to find just about anything.

There are similar clubs in every major city, and in lots of smaller cities. Mining towns of course have lots of mining outfitters stores, and they probably have geiger counters for sale, so you can use it to find some very nice, fracturable rocks, along coastlines, or in ancient dry lakes and seas, sediments filled, rock hounding areas.

Decontaminating Your Self With Ocean Salts

Acidic ocean salts in ocean water will help eat up the radiological kiddies that find their way into your bodies, and that make you feel ill. It might take several weeks for initial recovery, with you taking large amounts, several teaspoons or more, as much as you can handle, in your diet, every day, for up to three to eight years, to thirteen years, for severe contamination, and for full recovery. Other things, such as nutmeg, and oregano, in a salty tea brew, will also help you, and marijuana in the salty tea brew, will further help you. Berries can also be of great benefit for recovery from radiological salts kiddies contamination.

My kids have a recovery kit, that will help you recover from an overdose of radiological salts kiddies, after a major birthing event, and that kit will help you fully recover. You need to join our

country, and swear in, and become a citizen, to be given one of these kits to help you for your recovery. They can provide you with information, of various kinds, once you swear in. They have you swear in as full time citizens, now, except in special cases.

Ancient Dry Lakes

There are many ancient dry lakes, up north, in the colder areas, of Manitoba, and around the edges of wet lakes, you'll find areas that dried out, a long time ago, and you'll find interesting things in the sediments deposits under the surface soils of the earth, that have covered most areas, and that come in to our atmosphere, and then deposit themselves onto the surface of our planet, as they are blown in on the solar winds. A few feet of top soil may cover the dry lake areas, around the edges of these lakes, and the soils depths may reach to twelve feet, to fifty feet, to sixty or to eighty of more feet, in some areas.

Once you hit the sediments layers, around the edges of these lakes, outwards to eight to fifteen miles, to thirty miles or further, out to up to eight hundred miles, as in the case of Lake Erie, and that lakes region, the Great Lakes, that all use to be one large salt water sea, but is now, a fresh water set of lakes, you can begin looking for the radiological bullets of the previous catastrophes in my universe, that shot out radiological salts kiddies, into the sediments rocks of mineral stones, and sand. Gravels might contain some "radioactive" fracturable rocks, and you can tell which are the useful ones, with a geiger counter. There are still salt water lakes up in Manitoba, Lake Huron, and some others, that used to be part of Lake Erie, and all part of the Great Lakes, when they were a large, salt water sea, but which are now, no longer part of that lake region system of lakes, as fresh water now fills up the Great Lakes from under ground water systems of fresh water flows.

Hydrolific Pressures From Water Falls

Hydrolific pressures, from water falls, primarily, help to erode and carve out and build the under continent open areas of water flows, that flow under the continents, and that dump their waters by traveling underground, in culvers, and channels, and in trenches systems, and then flowing out and into the oceans, resulting in side benders currents and flows.

Underground Lakes

Hydraulisis is one type of water pressures. Hydrolific pressures are those pressures created by water beating down, steadily, as water falls from higher to lower places, creating underground holes, and large open underground cavities, and water holding vessels, aquafirs, and underground lakes in the underground rock layers. Lots of cities sit on top of such underground lakes, on the crust of the surface of the earth, or very near to them. The lakes are often ovular and

rounded in shape, from top to bottom. Many former water falls, are now low lying, and flat, and there is no water fall on the river, except for minor, cascades, such as found in the Grand Canyon Rift Valley down the Colorado River, and out into the Baha area.

Baha Mexico

Baha is a good place to go looking for interesting, "radio active", or radiological rocks, fracturable rocks with radiological salts kiddies sleeping soundly, embedded into other rocks, after colliding with them, in a hail of radiological rocks bullets, after a planet or a galaxy, or a large nebular star system, or a cluster of them, were detonated, by some fool with a huge and powerful, home made bomb. This happened, often, in the past, and still, today, it happens, now and then. Bits and pieces of the radiological rocks will come flying in, and then embed themselves into other rocks, as I've explained about, before. We've had so many catastrophes in my universe, that our ancient rocks, are peppered with radiological rocks that are embedded in them. Off the coast of Baha, is a good place to go diving, looking for rocks that were washed off shore, as waters flowed down the Colorado River, trinities of aeons ago, when this planet was still a young planet, maybe about one fifth the way through its infancy, after reforming, again, after its last major impact that shattered it to pieces, for the umpteenth kazillionth, plus more, time. This shattering and reforming, has been going on too long to count, and obviously, there is a large amount of mixturing going on, with debris from other star systems, galaxies, nebulas, and so forth, floating in, and becomeing part of our planets, all around and about, on solar winds. You'll find rocks on the inside of the Baha coast, and on the outside, as well, and along the Baha coasts. You might have to dig down thirty of fifty feet, to a few hundred feet to find them, maybe eight hundred feet, or sixteen hundred feet, or further, but you'll eventually find something useful with lots of radological bullets embedded in the rocks.

Finding Good Rocks With 'Radiological' Salts Kiddies Bullets

You can find interesting rocks, also on high hilltops, such as in the Andes, the Himalaya's, the Swiss Alps, high mountains in Austria, and in Germany, high hill tops and mountains in Iran, maybe in Afganistan, and the very high hill tops, that are generally old hills, in many countries. They will usually have, if they are very old hill tops, lots of rocks scattered about that are very old, and that have lots of fracturable 'radiological' salts kiddies 'bullets', from previous detonations around my universe, and other related kiddies in them, as well. You can also find them along ancient river beds, and along dried up desert gulley washes, in the valleys between the mountains, in areas where tall, old mountains exist. You might have to dig down into the underlying layers of rocks to find really ancient rocks loaded and peppered with ballistic radiological 'bullets', tiny fragments of radiological materials that went shooting out upon detonation of

nuclear materials, elsewhere in my universe. Lava or basalt rocks, may also contain large numbers of radiological salts kiddies, and other types of kiddies related to radiological salts kiddies. Iron stone is a basalt rock, and samples of it may be loaded with radiological salts kiddies, etc. Geiger counters will let you know if your sample rock material is pacted full and loaded with the tiny radiological 'bullets', or just partially loaded with them, depending on the response from the geiger counter. Many types of radiological materials, the bullets fragments, may not register on current day geiger counters, as they are not set to the correct radiological energies frequencies and currents settings to be able to detect them in the rocks. There are many types of radiological rocks in my universe, and current day geiger counters are set to pick up the currents and frequencies of the energies from only a few types of them, and there are thousands of types of radiological materials, so the older the rocks that you find, the more likely that the loads of radiological materials in them will be high in not only the types of radiological materials the geiger counter can detect, but also, in the types of radiological materials the geiger counters are not set to the frequencies and energies currents of. Such samples of rocks materials with large amounts of fracturable rocks, radiological 'bullets' inside of them, will yield massive explosive potentials, if you raise the heats energies of your explosives formula, to near solar temperatures, as I've mentioned about.

Plastiques, Explosives, Radiological 'Bullets', 'Nuclear Detonations', And Decontaminating Yourself Of Radiological Salts Kiddies

Please see my web pages for information on making plastique, along with metals fragments, and high temperature burnoff minerals mixtures explosives to produce the energies needed to produce nuclear detonations. Field chemists and explosives experts should be consulted, as they will probably know more about the temperatures at which different metals and minerals burn at and they will be more helpful in providing you with accurate information on different alloys mixtures, and the temperatures they burn at, such as the new US Mint US dollar coins, that will burn at extremely high temperatures, at about one fifth to one third the temperatures of solar temperatures, when ground into fine dusts fragments, and then after fermenting them, and then mixing the fermented particles in with the petrol fuels, chlorine, and gun powder, etc., plastiques explosives formulas, as I've explained about, to some extent, in my notes on my Gurkian Age Gurkian Way bulletin board. Be very careful when testing, as you may find the results extremely hazardous. See my kids, for more information, as I've explained about, on my bulletin board. Ocean salt will help to decontaminate you of radiological salts kiddies. A two hundred pound man will need about three pounds of ocean salt on a daily basis, to live healthfully. To decontaminate yourself, you will need more than that, to properly get rid of the radiological salts kiddies in your bodies, after you've been working with radiological salts kiddies, and testing the explosives potentials, for some time.

See my bulletin board for more information on the 'salts kiddies sciences' to help you to understand what is going on in so called, 'nuclear detonations'.

Sledgehammering Continents And Land Areas Where Lesbianists Live, Hiding Below

Here are a few places to place some other fracturable rocks bombs on, to make them fall in, and collapse down onto the layers of rocks, below, and then puncture the ceilings of the cavernous cities the Lesbianists have made, down below those lower rocks layers. Topango in the South Pacific near the Marianas, the area midway between the Ryukyu Islands and Haha Jima, Chichi Jima, and Iwo Jima, where you will find a sunken continent, Wellington New Zealand, Peking, Falklands, Urals Mountains, Chile thirty miles north of Concepcion and eighty miles east of it, near the Argentina border, and the Kamchatka pennisula, which will split and collapse in the center of it, midway down the penninsula, if you hit it hard enough. Lesbianists will come floating up, if their bodies can fit between the tons of debris that will fall in on them, as you smash the land sites that sit on top of ocean shelfs, and on open lakes below the land, some miles down from the surface, in some cases, and further down, in other cases.

It may be hard or impossible to deliver a nice bomb below the ocean above or onto the top of the sunken continent below the ocean, between the Ryukyu Islands, or Okinawa, and the islands of Japan, called, Chichi Jima, Haha Jima, and Iwo Jima. If one can be delivered there, you'll crush the continent below the surface of the ocean, and that will cave in on the cities, there are more than one there, that are below the protected shelf layer of rocks, above the cities the Lesbianists have there, below the sunken continent, to live comfortably in. The other places aren't so hard to hit. It is just a matter of local interest, and urging of the people there, to take the correct action to help us to resolve this problem, of Lesbianists living below us, all around the globe, in their honey comb, bee hive like canival of cities.

A canival of cities, is a large collection of cities that is located in such a way as to make it easy to get from one place to another. They are conveneint for them to live in as they are well placed, and spread out evenly, using the full extent of the area, as efficiently as possible. The Lesbianists have a canival of cities under the lower rock shelf layers, that are above them, and that help to keep them protected, warm, dry for the most part, but not always, and that are conveniety located each one in a bee hive like, configuration, well placed, with a well designed, layout, with central cities, and with satelite cities. It is well designed and resembles in part, Melbourne Australia, which was laid out, planned and designed as a modern city. The Lesbianists of course, think Melbourne is puny compared to their accomplishments, and of course, with the technologies they had and have available to them, from time to time, they made good use of every

inch of space they have available to them, under the lower hard rock, but leaky rock layers above them.

My kids have places and locations maps of all the best places to locate your home built fracturable rock bombs, and so please pick up the information from them, after you have sworn in, as citizens of our country. Also, please see my earlier notes on the sciences that support a correct understanding of radiological particals based fracturable rocks explosives and other helpful and useful explosives you'll need to set off the fracturable, also called, rupturable rocks bombs, i.e., the so called 'nuclear' detonations.

Topsoils

Did you know that nearly 99.9999+ percent of the earth's crust, or mantle, is formed from space debris that has floated in on the solar winds? It's true. Only about 0.000001 percent of the top soil is from local vegetation, globally speaking. The rest of the top soil comes in from above, blown in on the solar winds, as debris from other planets that have been destroyed, crushed, or blown to pieces by idiots with very large bombs, that demolished whole galaxies, or multiples of galaxies, in a few milliseconds, as the instant they blew up, they were so well made, or constructed, and so powerful, they instantly blew up the whole area of galaxies the planet was located amongst.

If for instance, you fill up one third of the large tourist attraction, the meteor crater in Arizona, with one of these fuels and rocks bombs, and ignite it, you'll disentegrate all of the Milky Way, and some what more than that, in one attempt, by my estimation, if the fracturable rocks bombs were made well enough with the fuels bombs, to burn at near or close to, solar temperatures, and if there were enough materials in the fracturable rocks, to get lots of mama's and papa's making lots of babies, relatives, and others. There are lots of different types of salts kiddies in fracturable rocks, and there are other types of kiddies, the radiological kiddies, which are sometimes, but maybe are not always, grouped with the fracturable rocks kiddies. There are many types of kiddies living in radiological rocks. When we send high heats waves energies, and other types of energies into the fracturable rocks, we can get many types of kiddies to begin making babies. If we get enough of the different types of kiddies to begin making babies, we will have one fine and dandy, explosive shower of baby making events. You can get further information on this topic from my kids, and if you tell your friends to check in with my kids, and to swear in, and become citizens of my and my kids' new country, along with other people who are swearing in, and becomeing citizens of our new country, my kids will make certain that every one is protected, and no one is caught outside, when the bombs go off, as my kids will tractor you and all the other citizens in, with my kids advanced teletransportation technologies, before any one can get hurt by the bomb or bombs blowing up, locally, or in their areas. That means, my worker unionized kids are very quick on getting people into the

encapsulated living environment every one is living in, below the ground, that my kids built for every one to live in, until we get this problem straightened out, and until it is safely over with. People can continue to live in the encapsulated living environment, after it is over, as we are going to start a new economic and social system, and we are getting started, down below, where my kids are keeping the encapsulated living environment, well taken care of and well managed.

Later on, we'll worry about who comes out, and when, as we have plans for every one, to begin working inside the encapsulated living environment, which is very well designed, and bomb proof, of course. Once every one gets accustomed to the new way of living, in accordance with my religious principals, and in accordance with our new working and living programs, when people have saved up enough money, they can pool their money, and acquire a lease for land up above, on the surface, and then with more money, they can have nice places designed for them, and built for them, with your input and with your instructions. You will need to study designing homes, and layouts of homes, for large numbers of people, as you will be required to live in groups of people, as the old systems of living, one husband, one wife, and so forth, is out the window, and now we are going for group living, with many members to your groups. When you have got the maturity together to live in large groups, and to sexal with many people in large groups, then you will qualify, and then with lots of earned income, pooled together, you and the members in your group, can then move up and live on the surface, in your well designed home, which my kids will use their technologies to build for you.

This is how we are going to clean up our planet, and get started with a whole new system for living and working with each other, as GOD's children working and living together, begining here, and spreading, slowly, across and throughout my universe, as we bring others into our program, all across the universe, from end to end, from top to bottom, and from side to side, and in every nook and cranny of my universe. All of my kids, you, who I am speaking to, will learn to live and work together, supporting my worker unionized kids, in our new global, united, and universal society, we will begin to build, on this planet, first, and then later, every where else. I am the mother and father of all of you, and of all of my worker, unionized kids, as well, all of my kids who work for me, of course, and of all of my living beings, and of all of my animals. We are going to get this big family of ours, together, and we, the human beings, will begin to clean up our universe, by sexaling for a living, and with many other living by the points systems programs, and other projects. We will also begin to get our heads on straight with religious activitiating, in other words, by participating in religialing, in groups, or by oneself, in the encapsulated living environment, first.

As we move along, in time, we will develop our working strengths, and character, and some people will qualify, eventually, for working in my religious brigade, once they realize and understand who I am, i.e.,

GOD. Others, who do not give a darn about what I am doing, may do as they like, as long as they are citizens of our country, and as long as they enjoy what they are doing, and as long as they add to the welfare of all people in our society, universal wide, as we build it, larger and larger, for all of my children, no matter who they are. We will one day have all of my children, working for me, and if they do not like working for me, they still have to pay the fees for the resources they use, just as I have to, and that means, there is a charge for every thing we use, and it is detucted from our pay checks. Every one gets a pay check, if they work, and if they are disabled, they will get earnings to support them, for as long as they need to be supported, until they are regroverated, healthy, fit, mentally prepared, and willing and able to participate. Those who do not wish to participate, will work in jail cells, and prison cells, sexaling for a living, with animals, as I've mentioned before, and at carnival and entertainment centers and districts, we will eventually set up, first on and also inside of this planet, in 'encapsulated' carnival and entertainment parks, and later on and within, other planets.

We are going to have all my children working for me, eventually, as I've spoken about before, and in time, most people will wish to work, and when they are mentally prepared to work, they will enjoy their working, most likely, as sexaling for a living, is not a unwholesome way to earn a living, and it is a pure and holy way to earn a living, and a pure and holy way to spend our time, as part of our new working ethics environement. For more information on this, please see my worker, unionized kids, who handle the information hot lines, in our, and your, and their, as well, encapsulated, living environement, which they have built, maintain, and manage, for all of you, and which they are continuing to build and expand on, for the rest of you, who have not checked in with them, yet. My worker, unionized kids have their own places to live, inside of the molecules that are used in building your living environment, and in your bodies, and in the molecules outside your living environement, as well. They live in all of the molecules, all over my universe, and they work in them, as well. They have their own universes, that they live in, which are all contained with in the molecules in my universe. It is a little more complicated than that, and so see them for more information on it, if you are interested in learning more.

Disintegrating The Milky Way

The Milky Way is made up of not one galaxy, but of several thousand, of different sizes. We don't have the technologies to see too clearly to distinguish the different galaxies that are within the borders of the Milky Way, nebular star system and nebular star cluster system, another way of saying that the Milky Way is a collection of many nebular star systems. Nebular star systems can be considered similar to galaxies, but maybe not always, as there are exceptions to every thing in most cases, any way. We are of course part of the Milky Way, I suppose you could say that, but we are far out on the outer fringes

of it, and we are not any where near the center of it, and we have our own galaxy we are a part of, and it is not part of the Milky Way, so technically, we are not part of the Milky Way, although we might like to think we are, since it is an expansive set of star systems, and star clusters, nebular systems, and other types of solar bodies systems, and it covers over us, and beyond us, sort of over layering us. Be that as it may, we do not want to blow up or disintegrate the Milky Way, as we are in a way, part of it, or at least, we are encovered by it. Encover means to be covered over by something and encased within it, or to be encircled or surrounded by it.

Retraction

Tom Selleck is not a Lesbianist but he was a Lesbianist, until the Lesbianists killed him, after expelling him from their group, and after torturing him with their many heinous torture methods.

Captain Off The Bridge.

Lay Order Of People

I have no lay order of worshippers, who participate with me, in any thing, or in any way. Why? Because, that's like me, the captain of the ship, coming into a town of persons who I don't know, and then saying that I'm the authority over them. No one is going to listen to me, and no one should be expected to listen to me. I wouldn't attempt any such thing, and so as the captain of my ship, my religious order, I have no authority over lay persons. I have nothing to do with lay persons, what so ever. I will never have any thing to do with lay persons, unless they realize that I am GOD, and that I am the mother and father of all human beings, and all animals, and all living beings. No one is going to recognize me as GOD, for a long time, as no one has the karma to recognize and understand that I am GOD. Lay persons are free to do as they like, and I have no regulations concerning them, in my religious order. My children may have many regulations, for non religious order people, but I don't have any thing to do with that.

Donations For The Sake Of My Ministry

The only thing is, that, as I said before, if a person recognizes and understands that I am GOD, and that I am the Mother and Father of all human beings, all animals, and all living beings, then they are free to donate cookies to me, or clothes, or wearables, socks, and scarfs, or coats, sweaters, or slacks, neckties, and so forth, cakes, or cupcakes, baked items, or financial contributions, or chairs, and furniture, beds, linens, tables, office furniture, phones, phone lines wiring, electrical wiring, plumbing items, housing items, for building up a house, paved drive ways, mason or rock walls, surrounding the property, or a set of dormitories, or a prayer sexaling room, or a prayer ceremonialing room, or a swimming pool, sauna, bath house, toilet facilities, bathing facilities, laundering facilities, a root cellar, a molds and funguses workshop, a brewery workshop, or any workshop for helping to educate others, the land to build these things on, or money, or whatever. If some one recognizes and understands that I am GOD, then it is perfectly alright, to donate any types of items, or any thing of value, that would assist my ministry to get up and get

running. As yet, no one has understands or recognizes me as GOD, and that I am GOD, and the mother and father of all human beings, all animals, and all living beings, so as yet, I have not heard from one person, not a letter, or a phone call, other than an occasional wise cracking person, mischief maker, or a person or persons who are worried, and then complain to me, or rather, to my answering machine, typically, as I don't pick up the phone, now, as I had one person calling who was a bad kid of mine, and he was just looking for trouble, and since that, I just ignore all complaints, or wise crackers, or mischief makers, and so on.

Nollicking Foolish People

Some people do not like me wearing my GOd cap, that is one of those specialty base ball caps, but with 'GOd' written across the front of it, and they might hate me, especially some South American or Central American Hispanic types, who have primitive and backwards religions and filled with local lore and ancient tales of demons, and goblins, and gooney bears, or ghostly ghouls, or other superstitious ideas and notions of things that go 'boo!' in the night, and try to scare or hurt people, as there are plenty of folklorish tales of such things, in primitive cultures, that thrive, even at the current time, nowadays, in large cities, even, and these types of people might want to kill me, and when they knock on my door, with their gun in their pocket, or in their hand, machete or knife behind their back, I just ignore them, and I don't even bother to get up from my work bench, i.e., my bed, to see who is knocking at the door, as I know already, they have nothing to do with my monastic order, and because they have nothing to do with my religious ministry, or with my setting up my religious ministry.

Just last night, some group of people droped by, and banged on my door, with the tip or barrel of a weapon, and it was rather hard sounding, and I just ignored them, and after a few minutes, or so, they went away, and they haven't come back, yet. I don't think they will, and even if they do, I don't think it will amount to any thing, as I may have occaisonal visitors or harrasment calls, now and then, but that's all they are, and I just won't allow my self to be bothered by them as they are unimportant, and my goof ball kids, are just too nutty to figure out that I am GOD, and that they are my kids. Nevertheless, these goof ball kids are here or there, and I get lots of compliments about my hat, and usually, if not always, the person giving me the compliment wishes to steal the hat from me, and then rob me, in any other way, he or she can, and then beat me up, if he or she can. Well, I can't let these types of things get to me, and I just ignore them, as I walk by them, and I don't reply or return any statements to them, except a polite, 'thank you' if they gave me a compliment about my hat, but that's about all, and I might mutter something, like, and well, so that's just another one of my goof ball kids, or something to that effect.

Nollicking And Nollygaging

Nollicking means idiotic and foolish people who are wasting their time, for accomplishing nothing. It's like, nolly gaging, but nollygaging, is just wasting time, foolishly, and while you are nollygaging, you are looking for some way to make a profit, from your use of your time. Scanderously, you try to extort money from others, or force others to give you money, you do not have any right to. That's nollygaging, as I can recall, at the moment.

Goof Ball Kids, Their Mischievousness, And Maliciousness

Well, I have all kinds of kids, and many of them are malicious, if you give them a chance, so I just stay away from all of them, as I know most every one of my children, is malicious, from time to time, if given the chance, and I think that applies to all of them, regardless of their age, at some point in their life, they will commit crimes of one kind of another, against others, and not think much about it, except that, they just had to take care of that, as they wouldn't be happy, if they hadn't. Okay, so every one of my kids, at one time or another, will do goofey or goof ball things, and not think much about it. That's the way it is. There is nothing to be surprised about, as every one, and I don't care who they are, every one, does things they shouldn't do.

Me, personally, I get angry, and say nasty things, and make myself sound gruff, now and then, and maybe I shouldn't, but I just feel compelled to do that, when I have a righteous conviction that some one deserves my speaking up and telling them off. Well, you feel sorry about it, afterwards, if you hurt some one's feelings, but then that's the way it goes, and no one is perfect, so it's just. Let's try to live and let live, and live together in peace, and cut out the naughtyness, and stop the mischiefness, if we at all possibly can, and apologise if the opportunity presents itself. That's always the best way to handle things. Most people, after they kill someone, can't appologise, and young girls and boys, and older girls and boys, think nothing of killing people, or having some one killed, for them, and then of course, there is no way for any one to appologise to the dead person, since that person is in my Epcot Center. Well, we can't do too much about that, can we, but we can try to be kinder, and not kill as much as we feel we must to be happy.

More Than Ninety Five (95) Percent Of The Homicides In The World, Some Times As High As Ninety Eight (98) Percent, Or Even Higher, Go Unreported, And Are Therefore, Not Investigated

It's too bad that we kill others, and torture others, but that's the way my goof ball kids live in my universe, and despite what people might wish to think, to the contrary, it happens every day, in every city, town, hamlet, county, district, or where ever. My goof ball kids are killing people, right and left, and there are just so many deaths, the police don't hear the ninety five (95) percent of them, or so, as they never learn about it. The percentage of homicides the police do

not hear about, is perhaps just a little higher, but in any case, no one should be surprised, as that is how my goof ball kids get along with one and each other, and they have been getting along with one and each other, that way, for a very long time, already, so it will not stop, any time soon, and that's just the way things are, for now. The Lesbianists are responisible for just about eighty five percent of those homicides.

Labrynthine Cities Below Us Where Lesbianists Live, And Laugh At All Of Us

The Lesbianists living below us, in their cavernous, labryinthine cities, that are below the hard rock layers, well below the oceans, and other bodies of water, far below the continents, go around, and mess with every one, and they play with people, and they think they have the right to amuse themselves by useing the citizens of this planet, any old way they like. They go around, and set up phoney wars, and they watch the citizens of each country, kill each other, on their commands. The Lesbianists enjoy playing these kinds of games, and they set up civilization after civilization, and they bring it along, and help to develop it, and when they get it to a high enough level, they feel a sense of accomplishment, and then they watch and amuse themselves as they destroy what they built up, and the people who are living, unawares of them. The Lesbianists think it is funny, that the Lesbianists feed the lies about our universe, and the lies about science, to every one, and the Lesbianists think they have the right to bafoonerize every person who comes into our world, as a tummy baby, who is on his or her way in, and in fifty to eighty or so years, is on his or her way out.

Why Do Continents Sink? Why Do Land Masses Rise?

Load transference technologies, and partical transference technologies, redistribute the loads on the internal network of underground cities the Lesbianists live in, to keep them perfectly centered, when ever there is a major uplifting, or down plunging, of continental mass, rocks, and earth, that would cause continents to sink and continents or land masses to rise. Movements of 'earthen matter' or rocks and dirt is accomplished with load transference technologies, and other technologies, such as partical dismissive technologies, and partical remissive technologies. This way, a planet can move, inwardsly, as a continent sinks, after the underlying rock layers are washed away due to hydrolific pressures, and not destroy the underground labrythine cities. My kids also use the same technologies, and other technologies, for maintaining the integrity of their underground encapsulated living environment.

The sinking of the continent pushes downwardsly, and as it falls, it exerts high intensity pressures on the underlying layers of rocks, stones, pebbles, sands, sediments, clays, metals, minerals, and so forth. The pressures will normally push downwardsly, and outwardsly, and shifting of materials, occurs, and land masses rise, as a result.

When you have an underground city, or collection of them ringing the planet, when the pressures occur, and when the materials begin to shift, you redistribute the materials, using advanced sophisticated technologies, that will shift the particals in the directions they need to move, and distribute them so that they will not interfere with the structural integrity of the undergound labrynthine, and perfectly, geometricly laid out city dwellings and living habitats. It's high tech stuff, and so if you don't understand how partical dismissive technologies work, or if you do not understand how partical remissive technologies work, you will have a hard time understanding how this is accomplished. There are other technologies, that also must be employed, to work in an integrated manner with the partical dismissive and partical remissive technologies. All of these technologies, working in an integrated manner, will perfectly redistribute all the particals of rocks, and so forth, that need to be redistributed. The technologies keep the ring of cities perfectly centered within the earth. If there is a need for downsizing of the interconnected labrinthine layout of cities, that is also accomplished with these technologies. Downsizing may occur for any number of reasons. I've briefly explained what can happen as comets and asteroids pass by our planet, at amazing speeds, and that we can lose some or part of our planet, mountains, terrain, and lakes full of water, with a pass by, by a solartoid, or planetary sun, as it wizzes by at a phenomenal speed. Once the planet restabilizes, the downsizeing process begins. Even though there may be continental shifts, of uprising and down plunging events, and large, cometary passbys, with the technologies that are available to the Lesbianists to use, on a 'for lease' option, the integrity of the underground labrynthine layout of cities, is kept in tact, as best as possible. The technologies that accomplish this for the Lesbianists, that keep their cities perfectly situated, are not on lease, any more, and they have lost their lease on the technologies that would allow them to keep their cities perfectly protected, and perfectly centered. Some areas may not be too livable, for them, as leaky ceilings cause waters to accumulate, below, and they must trudge through salty ocean water, knee deep, in places, and in other places, the water is too deep to allow them safe passage down one tube, or trammel system transportation pass through tube, to a city or to cities which were previously accessable.

The Leases On Their Technologies Are Expiring

The leases on the technologies that they have been using, and that were assigned to them, after they swore in, and pledged to live on this planet, and pledged to sexal for a living have been expiring for some time, already, and will continue to expire for some time, to come. Because this was a newly formed planet, before they arrived, but after it recongealed, after it was shattered to pieces by a passing cometoid that ran smack into it, as I've explained about, or touched on, a couple of times, before, see my notes on the web, once the planet stabilized, and became a livable planet, they first needed to live underground, where they could live, and slowly over time, adjust

to the types of solar radiations, and other factors that they would need to adjust to to be able to one day come out from down underneath the surface of the planet and begin to live above ground. The rock layers, land, and bodies of water above shielded them from potentially harmful radiation. The living area below, also had built in protection systems to help protect them from the radiative energies that could harm them. After they adjusted to the conditions of the planet, they could come out, and as they continued to sexal for a living, other technologies would allow them to build large cities, for them to habitate in, as they continued in the sexaling for a living program. The cities that my kids built for them, that my kids have the permissions to use for these programs, are now down under the rock layers, all crumpled up, or they have passed into the molten core, and have been spewed out, as basaltic lava, as the Lesbianists did not hold to their pledge, and they broke the law, and the maintenance of their above ground cities, was terminated. With continental uplifitings, and downplungings occuring, over the long period of time, they lost their cities, and now they have only the underground, initial landing zone area, dwellings and habitats, that have down sized, some what, since their initial landing for occupation of this planet, in the sexaling for a living program. They broke all the rules, and they developed their own sham governments on this planet, and they went about, causing mayhem and destruction, every opportunity they got.

The leases that they signed on to, and that were assigned to them, that they had on the initial landing zone technologies, as well as all their other leases, that were assigned to them are now in the process of being cancelled. That means, that, their underground cities are being shut down, slowly over time, - thus the leaky roofs - and they will have to move out, and move to the surface, as the underground systems, begin to falter, shut down, and fail, one after another.

This happens to them, repeatedly, life after life, and the end result is they destroy them selves. The hideous, hungry animals they illegally brought from other planets will get lose, and then they will help to hurry the demise of their world civilization, which means, every one of the Lesbianists will die on this planet. After the Lesbianists destroy themselves, they will end up in my Epcot Center, and they will come back out as tummy babies, to tummy mommies and to tummy daddies, who have karma that matches up with theirs, and then they will repeat their old mistakes, again, and again.

As the usefulness of the Lesbianists' underground labrynthine cities declines, as leases expire on the technologies that were assigned to them, and as other leases, will also be expireing, over the next few years, to ten or twelve to fifteen years, to thirty eight years, to fifty nine to sixty to eight five years, and then finally, when the last of their leases expire, some time, not too long after that, up to two hundred to eight hundred years, or so, and then there are still a few that will remain active, until every one is expected to move out,

within a few thousand years, eight to eleven thousand years, as they must be given time to build up their own new civilization on the surface of the planet, where they can all live, together, now that the facilities below will be totally closed off, and shut down, and no longer useable to them, as they will be locked out, and prohibited from entering them. Once they are completely out, my kids will then remove all traces of the underground cities and underground facilities, so that there is no chance of any one ever useing them again. The Lesbianists will then begin living on the surface, full time.

Late Night Amusement Activities For The Lesbianists

Currently, as a regular sport or preoccupation, the Lesbianists go out regularly, at night on hunting parties, after exiting from below up through secret stairways, that lead up through police stations, and through fire departments, and through some military barracks, and through National Guard barracks, public buildings, government buildings, and through banks, hospitals, morgues, cemetary parks, national forests, BLM lands, private residences owned by Lesbianists, and through businesses owned by Lesbianists, and through twenty four hour a day businesses owned by Lesbianists, Walmarts, K-Marts, 'Toy's 'R Us', Wendy's, Jack 'n The Box, McDonald's, In-'N-Out' hamburger chains, sushi restaraunts, late night restaraunts, hotels, motels, churches, mosques, synagogues, military bases, public and private museums, BINGO establishments, pachinko parlors, billiards halls, gaming and gambling establishments, and many other Lesbianists' controlled facilities, buildings, and so forth, above ground, and they capture and abduct people, then bring them back into their underground lairs, and then the Lesbianists torture them, barbecue them, and then cannibalize them, for food, in their underground lairs. The Lesbianists enjoy torturing people, and eating them, and these abductions go on, regularly, all around the world, and the torturing, barbecuing, and eating of the above ground residents, below ground, goes on all around the world, beneath the surface of this planet.

There are over thirteen billion of them, and the number is even higher, still, as I did not have that number correct, either. It is higher than that, and that means there are a lot of hungry mouths to feed, in the future, after they lose their leases, unless they get a new civilization built, which they never do, as they do not like to work.

They will come out, at night, regularly, and abduct people, and then carry them into their underground lairs, and then cannibalize them. This will grow more and more busy, as they strive to remove every one they can from the surface of the planet. After they have removed enough people, they will begin to live on the surface in the homes, and cities that are there, already. There are too many Lesbianists to live comfortably on the surface of the planet, and they are too lazy to build their own civilization with homes, an economy, and so forth,

so they will inevitably begin warring against each other, until there are only a few left, and then they will meet their end, when their exotic and deadly animals that they brought here for their personal amusement, strike at them, and kill them, for food.

The only way one can find a way out of this predicament, is for each one of you to join my country, swear in, and become a citizen. The Lesbianists in turn, must surrender. If they do not, at a certain point in the future, we will begin to dismend them, and sent them to my Epcot Center. When that will occur, I don't know, but it could be as far off as a few thousands of years from now, as we have to give them the time, and a chance to build a new civilization, with homes, and parks, etc., working together with the people who already live on the surface of the planet. We cannot cut short the allowance they must be given, in fairness - as the leases continue to expire, and the leases protect them, to some extent - to make efforts to mix with the people on the surface, and to come clean, and to tell it all, and to appologize, and then to work in peace and harmony with the people who currently live on the surface of the planet. They will have to share their knowledge of the sciences, and they will have to help to educate every one, and they will have to teach the people who are living on the surface, the sciences that will allow people to regroverate their amoebes, and other cells in their bodies, and to rejuvenate their bodies.

There is not much chance of that happening and of gaining their cooperation, so we will have to be on our guard, and we will have to look out for ourselves, and make sure none of us are abducted by them as they attempt to diminish the population living on the surface of the planet by reducing the numbers of normal people living on the surface of the planet, as the Lesbianists begin to get busier, abducting people, and eating them, one after another, to make room for them selves, on the surface of the planet.

Never the less, my kids are not allowed to act prematurely, and my kids are not allowed to begin dismending them, just to stop them from doing what they typically do, after they lose their leases. So, it will be several thousands of years, before this topic comes up for discussion, and action is taken. These are not normal circumstances, and so the dismending of these people, may begin some time after their final leases expire, if they present them selfs as a problem to the rest of us, living on the planet.

Our War On The Lesbianists Must Continue

This means, we have a few options, here, and the best option is to just get rid of them, and destroy their underground cities, and destroy the Lesbianists, world wide, before the Lesbianists get much more of a chance to abduct, torture, and cannabalize the citizens living on the surface of the planet. Thus, our war is now only begining, and we must continue to eliminate them, as they will only cause mayhem, and destruction, for those of us, living on the surface

of the planet, as the Lesbianists abduct, and capture people, then torture and cannibalize them, in coordination with their Lesbianists friends, who run this planet. The Lesbianists' activities aimed at destroying the populations of the planet, is guaranteed to increase, as the years pass. That means, we must continue with our campaign to destroy the Lesbianists, and we must continue to work to bring an end to the control that they have, over every one on this planet. We can also concentrate on destroying the Lesbianists, underground, by dropping the home made 'radiological' explosives weapons down into the ocean depths, and down into the depths of the deeper lakes, onto the leaky ceilings below, where the Lesbianists are living, to crush them, and to drown them all. In the meantime, every one must join my country, and swear in, and become citizens of our new country, as I've explained about, before.

The Valderizing Lesbianists

The Lesbianists do not teach real science, or real geography, or real history, or real mathmatics, or real chemistry, or real anything, and they fool every one with their bogus religions that they either made up or corrupted, and valderized. Valderized means, they vandalized it, and sprayed grafitti all over it.

Well, that's the way the Lesbiansts get their kicks, and they are just a bunch of grown up children, valderizing every thing they can, and disrupting every thing, and every bodies' lives, just for their own amusement, and cruelish fun and games, such as feeding former Lesbianists to my abominant kids, who are need to be fed, and who are smart, and devious, and who destroy humans, and eat them up, and spit them out, and treat them terribly, while the Lesbianists watch on, in amusement, as they see people like Bill Gates, or Steve Irwin, and others, eaten up and then tortured, as I've mentioned about before. Valderize all they may, and be cruel all they may, we are all now finally finding out about their treacherous and horrid behavior, and now we are going to put a stop to it, permanently, and that means we will kill every one of them, and send them all to my Epcot Center, as I've explained about before.

Now we know we can cave in their cities, below the leaky hard rock layers, way down below, if we hit certain areas, hard enough, with a nice big hammer, such as one or more of my 'nuclear' bombs, the fracturable rocks kids bombs, with fuels oils, burning at extreme high temperatures, and with percussive shock forces, these, mixed together, will get my fracturable rocks kiddies, making lots of babies, and with a large enough fracturable rocks fuels chlorine, and metals that burn at high temperatures, nearing solar temperatures, we will see some very explosive 'family making' adventures, among my fracturable rocks kiddies, and their radiological relatives and friends.

We know where to hit some of their locations, to drop a few miles of more of continental shelf down onto the tops of their ceilings that will then fracture their ceilings, and cause massive damage, as oceans

of water fill up their labrynthine and very well laid out cities, below us.

Who Do We Kill, First?

Mr. George Bush, Jr., Mrs. Barbara Bush, Jr., Mr. George Bush, Sr., Mrs. Barbara Bush, Sr., Mr. Ronald Reagan, Mrs. Nancy Reagan, and lots of their friends, and nearly the whole crew of politicians in Washington DC, are all Lesbianists, and I want you to kill every one of them, and send them to my Epcot Center, and I want you to place the fracturable rocks bombs, in the right locations, and then drop a thick layer of continental shelf, down onto their ceilings, their ceiling that are below the water that is between us and them, and that is below our continental shelfs that we live on.

We can hear the water down below, if we have the right types of listening devices, and if you find the right places to place your fracturable rocks bombs over, then it may be easier to drop your continental shelf, down through the water, below you, and down further onto their ceilings, the hard rock layers below the water, that is below your continent, swirling about.

Now I want you all to study this, and find the right places to drop your continental shelfs, down through the water layers below you, and onto their ceilings, so as to smash their ceilings. I've given you some hints, already, as to where you can place the fracturable rocks bombs, and my kids also have given some people more information on that, and so we have lots of people, who are interested in solving this problem of the Lesbianists toying with you, one life of yours, after the next life of yours. It is time we brought their mischief, and non sense, and cruelty to a halt, and it is time we put on the brakes, and slammed down on the brakes real hard, and at the same time, slam down on the ceilings of the Lesbianists labrynthine cavities, below you, their cities that they have laid out in perfect symetrical, geometric shapes, like perfectly shaped, honey combed behives, with central cities, placed symetrically around the globe, in a perfect geometric layout, and with spokes or corridors reaching out symetrically, to other central cities, and to satelite cities, that they have well planned out, and have well laid out, perfectly, below you.

Hydrolific Pressures And The Labrynthine Cities Below Us

Because of the hydrolific pressures, they can never keep the ceilings, perfectly dry, and they are always in trouble, trying to fix leaks, here, there, and every where. Now it won't take too much to bring the whole place down on them, flooding them like rats in a cage, below the water line, as a boat slowly sinks with a rats' cage on a table, with rats in it, slowly into and below the ocean waters.

The ones above, such as George Bush, Jr. the current president of the United States of America, and his wife, and his supposed family and

relatives, and all his close Lesbianists' friends, should now all be killed, point blank, with your fracturable rocks bombs. I hope that is perfectly clear, and I hope you all understand what the situation is, and that it is an intolerable situation, and we are not going to allow them to toy with us, any longer, and we are not going to let them amuse themselves, any longer, and we are putting an end to their games, now.

DO YOU UNDERSTAND ME? I HOPE SO! AS A 'NO SIR!' WOULD BE UNACCEPTABLE.

Now that we know where we stand, we have nothing further to argue about, and so let's get to our tasks, as soon as we are ready, and prepared. Okay? Good.

Local Area Prayerful Collection Site

A collection site is where people gather to pray, and to sexal and to purify each other. It is not a site where people ask for offerings, or where people as for any thing else, involving money. It is a sexaling park, and a prayerful sexaling park. That is the meaning of collection site. A collection site is where people collect together, to sexal and purify themselves, and while they are at it, they make sexaling efforts to help to purify others, by shattering and showering out megawatts and tons of radiating, purifying energies.

We have a local area park, at the corner of West Tropicana Ave. and South Decature Blud., a local BLM piece of land, that some people like to camp out in, that I go out to, to bless, and to purify with my religious ceremonies, now and then. I claimed that area, and all other BLM lands that I could claim under Gurkian Law, and all other land on this planet, that I could also claim under Gurkian Law, such as other parks and forests managed by other government agencies, or private lands, supposedly owned by rich people, and lands around the world, that I have a right to claim, under Gurkian Law, and all that land, is now mine, under Gurkian Law, and I can use it in any way that I need to use it, regardless of what other people, think.

Aerobic Taichi Practice

I am busy, now and then, purifying that parcel of land, at the corner of West Tropicana Ave. and South Decature Blvd., with my religious ceremonies, that I conduct with my religious prayer hand signaling statements and with my use of my ability of arerobic Taichi, for religious ceremonies, as I seem to have recalled a lot of areobic Taichi, as well as some other forms of Taichi, that I knew, before, in previous lifetimes, but I am only interested in using it for practical purposes of religious hand prayer signaling.

I'm very clumsy when it comes to aerobic Taichi, but any way, I enjoy it, and it is good excercise for me, and the more I practice, the better I get, but it will be zillions of years, before I get any where near good at it. I practice the arerobic Taichi while I make my religious hand prayer signaling statements.

I don't teach Aerobic Taichi. I only use it for my prayer ceremonies, when I am on my feet, and not on my back, mostly, even though, I do use a short version form of it, while lying on my back, or, while I am on my side, I use a very short form of it. Anyway, it is fun to do Aerobic Taichi, and that makes my prayer ceremonies, for me, more fun. When other people learn to prayer signal, they will naturally pick it up, as well, as every one has studied to some extent, Aerobic Taichi, and other forms of the martial arts, and my kids will release the knowledge that is stored in your memory banks, as you need it, once you begin practicing, for women, as a priestess, or for men, as a priest. It is not like the Taichi you see people doing in China, or Taiwan. It is a specialized form of aerrobic Taichi for use while performing hand prayer signaling. It is not used for fighting, but it is the basis for Taichi, and you can train in martial arts, while employed as either a priestess, or as a priest, and it will be useful to you to know, before hand, as it will make practicing your martial arts, that much more interesting.

I'm not hiring any one, now, or just yet, or any time, soon, as far as I know, as my kids do all the interviewing, and I have nothing to say, about who comes knocking at my door, to be interviewed.

Campers, Camping, Sexaling And Purifying The Area, And Useing The Parcel Of Land That I Publicly Claimed For My Setting Up Of My Ministry

Now, on that parcel of land, there may be campers, now and then, who want to camp there, because they want to find out more about my religion, and so they come out to Las Vegas, now and then, and they camp out there, on that parcel of land, at the corner of West Tropicana Ave. and South Decature Blvd. Since that land is where I am going to set up my initial ministry, when the time for that comes, I am preparing it, with my religious purification ceremonies, and there doesn't seem to be any troubles, with any one telling me not to go up to my property, that parcel of land, and there is no one trying to tell me that I can not bless my property, that parcel of land.

Now, if other people wish to come to that parcel of land, and wish to sexal on it, and thereby purify that parcel of land, they are more than welcome to come to it, with their camper trailer, or caravan bus, and they can maneuver into the area, and set up a tent, and campsite, but there is no water, or any thing else, so you have to come prepared to rough it, if you wish to come in your camper van, or caravan bus, or in a camper trailer, or with a tent, or with other types of sleeping and living gear.

Straightening And Cleaning Up The Area

You can straigten up the area, and clean it up, and make it nice, for many people to pull into, to join together, and to sexal together, and with your purifying energies from your sexaling together, you are more than welcome to stay there, as long as you like, and as long as time permits, and as long as finances permit.

I have nothing there, except for my now and again, Aerobic Taichi practice and the energies that are imbued into the area, there, from my religious hand prayer signaling ceremonies. There are no structures of any kind, and I am sometimes there, busy purifying the area, with my religious ceremonies, so if you and your friends would wish to come to that area, and also help to purify it with your sexaling energies, than you are more than welcome to come and visit there.

Donating Your Sperm, Sexaling Spittle, Perspiration, Vaginal Juices, Titty Juices, And All Your Sexaling Juices

You men and boys may by all means, donate your sperm juices, sexaling spittle, and other sexaling juices, your perspiration you generate while you are sexaling, to the site, and you women and girls may by all means, donate your vaginal juices, your titty juices, your sexaling spittle, your perspiration you generate while you are sexaling, and all of your sexaling juices to the site, as they all will help to purify the property that I intend to set up my ministry on, as they all contain many, holy, pure, sacred, powerful cleansing energies, and GODLY energies in them, and they will help purify the land, and the environment for ages and aeons to come. All of your eroteming and orgasming energies will go shooting throughout your bodies, and they will find their way throughout your bodies, and out of your bodies and brains, and into the environment, and into your bodies' sacred and holy spillages, as I've discussed about before. Your bodies' spillages, as well as your perspiration, your pee, and your poop, not to mention all of your other juices that are produced as you sexal, erotem, orgasm, and phlumett, become pure, sacred, holy, powerfully cleansing, and GODLY, while you are sexaling, eroteming, orgasming, and phlumetting. Your pure, sacred, holy, powerfully cleansing, and GODLY energies find their way into all of your bodies' spillages, and so please donate them to the site, in appropriate manners.

Building A Latrine

Please employ some one to dig a latrine, and to fashion benches to sit on so as to be able to dump your poop, and pee your urine, into the latrine trenches. Manage the latrine, with care, and employ healthful, tactical, and sanitary techniques to use it safely. Provide hand rails, to grasp, so that no one will slip off and fall into the latrine. Provide barriers so that no one can accidentally fall into the latrine. Use your common sense when providing 'tactical' safety measures.

You need not fashion an over hang, as there is no rain to speak of, in Nevada. You do not need a supported roof, or enclosure, as they will only become stench ridden, and no one will enjoy useing them. There are to be no enclosure walls, or sides, or backs, so as to enclose the odors of the latrine, and confine them to an air tight area, where they can accumulate, and cause explosions, accidentally. They need only be deposited into a safely dug, latrine, and then allowed to filter down into the soil, and then allowed to vapor up into the

atmosphere, freely.

No doors should be used, and no barrier walls should be employed, when fashioning the outside framing of the latrine facility, itself. That means, there are no hiding places in the latrine, where people can hide, and be prevented from entering, or exiting from the latrine. Only hand rails need be supplied, and only barriers that are suitable for keeping people from falling into the latrine, need by provided.

Steps may also be provided, to a raised platform latrine, which is more sanitary to use, than a level to the ground, latrine. There should be no walls, and no blind spots when either ascending up the stairs or when descending down the stairs. Women, girls, men and boys, should all use the same facility, and there is to be no fraternizing. Fraternizing is playfully tearing up at the opposition, or at people who you do not like.

Tearing up at the opposition means, you are trying to over throw the person, and dispose of that person, into the latrine. Over throwing the person means to be using reckless abandonment when dealing with another. Reckless abandonment means to be recklessly risking the life and limb of another.

There will be no frolicking at the latrine site. Frolicking is when little boys, and big boys, and little girls and big girls, play around and provide possible hazzards to others. You will not behave in a hazzardous manner towards any one, at any time, or you will be asked to leave, and to not come back.

There will be no play time allowed for children, as this is a collection site, and that means it is a holy site for holy activities, so leave brats at home, and do not bring any one who drinks alchoholic beverages, or who acts unwholesomely, to the collection site. This is a private site, and a prayerful collection site, and that means, you are coming there, to pray, and to make love, and to sexal, as GOD's children, so as to purify the site. You are not allowed to act randomly and with reckless abandoment. Randomly means, without proper self control and restraint. This is not a gay fashion, show or parade, and we will not tolerate reclusive, or unwillingly unwholesome behavior.

Reclusive means, unwilling to participate for the stated purpose of purifying the area. Reclusive means, caution and carelessness is thrown out the window, and you are acting in an irresponsible manner.

Unwillingly unwholesome means, first, unwillingly means, non cooperative, private, or sordid. Sordid means you are acting in a selfish manner, and you are not acting in a responsible manner for self and for others.

Unwillingly unwholesome means, thusly, that you are acting in a selfish manner, irresponsible manner, uncaring towards others, and unwholesomely.

Unwholesome means, you do not care about the life and limb of others, and you would just as soon shoot a person you argue with, as talk to them for a friendly chat. Many of my kids, are very unwholesome, and will just as soon, talk to a person, as shoot the person. You will not act in any such manner.

Any unsafe or prohibited latrine construction will be ticketed on detection, by me, and you will be asked to rework the facility. That will be on the ticket, and please comply, if you and your friends who built it, will be so kind. If you do not rebuild it, you will be asked, with your friends, to leave the site, as you are acting in an irresponsible manner. You will not be allowed back to the site, without your showing proper repensive behavior. Proper prepensive behavior is an attitude of appology, as well as the acts of appology which means, you will take appropriate steps to see that the work is or has been redone, in the manner as required by safety laws, as stated by my children, under Gurkian Law. Either me, or my children, will leave the ticket, and you will be required to fix what ever it is you need to fix, or you will be asked to not stay and conspiriate at the collection site.

Conspiriate means, to participate freely with caution and care for the sake of others. Conspire is also the same, as conspiriate.

You will be asked to not stay and conspire at the collection site, means, the same thing. It means, you will not be permitted to participate freely with caution and care for the sake of others. That means, you will be asked to leave, and you will not be allowed to come back, if we, my children and I, and other attendents, as well, can at all help it.

Attendents are people who participate in the collection site activities, and they are people who take responsibility to make sure every thing is done, properly, and safely, with the sake and safety of others, in mind.

The Home Depot has many nice and useful janitorial equipments, and so it will not be difficult to build a safe and luxuriously clean, and handy, latrine, that is safe to use, for all people, of all ages.

Luxuriously clean, means, it is kept sanitary.

How do you keep a latrine, sanitary? You keep it clean and sanitary by venting the air out, freely, with no blind spots, either underneath or above, where pockets of air, and vapors can accumulate.

No partitions will be installed that will create a blind spot. A blind spot is an area where light can not penetrate. Therefore, your construction materials, must be perforated wood, or grated steel. You can weld together, if you know how to weld, a very nice, grated steel, latrine, that will be safe to use, by every one, of every age. You will need the correct strength of supportive steel poles, to handle the weights of the persons accessing the latrine, and of the latrine, as well. You will make certain to build it well, and to support it

well, with firm foundations, of concrete or steel plates.

Any deviation from safe practices for building latrines, will be torn down, disassembled, and the persons or person responsible will ethier be asked to leave, or will be asked to appologise to the memebers of the collection, sincerely. If the person acts in a responsible manner, and appologizes, sincerely, and appropriately, then the person will be excused, with out further, charges being leveled. Further charges will be leveled by my children, if my children detect further, reckless abandonment on the part of any person, participating and acting in a reclusive or recklessly abandoned manner.

Glue People Begun 'Cleaning' Agents

Cleaning the toilet seats of the latrine, will also help to keep the latrine luxuriously clean, and sanitary. You should clean the toilet seats and parts of the latrine, with common household detergent agents, as at this time, we have no choice but to use the unwholesome, Lesbianists' manufactured, ajax, spic and span, lysol, and other such 'glue people begun' agents. Glue people begun agents means, aerosols, and other unwholesome petrol fueled compacted or pressurized sprays, or detergents, that help the Lesbianists to begin the process of turning human beings into glue people. Glue people, in this instance, does not refer to glue, but it refers to tar. Tar is an adhesive substance, and their intent was and is to turn every human they can find into tar people.

We have no choice but to use the local distributors selection of cleaning agents, but in time, we will one day, have all that straightened out, after we demolish the Lesbianists' hideouts, under ground, and after we kill them all, or welcome them in, as 'surrenders', with appropriate, remorseful, penentant attitudes.

Removal Of Latrine Wastes And Disposal Of Latrine Wastes

Latrine wastes materials shall be removed, and supplied to local pig farmers, who can then use the materials, for feeding the animals. Pigs and hogs love to eat away at latrine wastages, and no one knows that. Chicken also enjoy eating human wastages, as well as ducks, geese, and other fowl. Horses and burroughs also enjoy human wastages, if it is healthy enough, with large amounts of vegetable mass in the diets of the human beings, whose wastages are carried to the farms for spreading about in the hogs and pigs, barrels. A barrel is a place where wastages are loaded, up into trucks for delivery to a sewage farm, or a place where farmers can use the wastages, that the hogs are finished with, as fertilizers.

Hogs and pigs use a roped off area, for eating wastages, and employees keep track of the unloaded wastages, and the spilled wastages from the hogs, and then the spilled wastages from the hogs, are then moved to a separate area, for pickup by carriers of farmers. Foods grown at farms using hogs and pigs wastages are useful and nourishing to humans, and

other animals.

No fees of any kind for loading and for carrying away wastes to hog and or also pig farmers, should be levied by truck drivers, as drivers will earn a tokenous gratitude tip from the hog and or also, pig farmer. An appropriate payment to the driver and deliverer of the human wastes to the hog and or also pig farmer, should be paid by the hog or also pig farmer, unless the farmer is cash strapped. Cash strapped hog and pig farmers may be given money compliments by the people at the collection site.

Money compliments are small awards, or minor payments, out of gratitude to the hog and pig farmer, for his or her useage of the human wastes from the latrines. Money should be collected, regularly, if hog and pig farmers are cash strapped, and then given to the hog and pig farmer, out of gratitude to him or to her, and presented, tokenously, or as a gift payment. How much should be paid, depends on the expenditures of the driver, for his or her services, and for the use of his or her, vehicle, and for its whollyfied maintenance.

Whollyfied means, the regular maintenance that will allow the truck or vehicle to run at tip top conditon or shape, for the life of the vehicle, figuring it proratively.

Proratively means, spaced out, and paid proratively, or over the period, at regularly spaced points in time, over the given span or the useful life of the truck.

Discussions regarding this, and discussions for compensations, should be held at the collection site, and at the delivery site(s) for delivery of human wastes, by all parties, concerned, regarding all of this, and the primary collection site attendants, the persons elected by the attending or participating persons, at the collection site, who show the greatest interest and sense of responsibilities, at the collection site and with regards to the collection site, and with regards to the collection sites' safe, healthy, and wholesome management, must attend the discussions, and must deliver their sound judgements as to who is to be compensated payments for their participation in the removal and distribution of the wastes from the collection site, to the hogs and pig farmers, and as to how much should be dispensed, per each removal and delivery of human wastes.

Participating persons at the collection site, should elect attendants, and the attendants should regularly check on all points for the safe management of the collection site. Participating persons means, persons who are there for sexaling, and for depositing their holy, pure, sacred, powerfully cleansing, and GODLY sexaling juices at the collection site.

Nevada Power, and all other vendors, are not participating persons, and should not be construed as participating persons, regardless of what they might wish to think, and if they have any complaints, I

authorise the killing of all persons who disagree, and persist in arguing that they are valid participants, despite their not participating in your holy sexaling, activities, as individuals, and not as company employees. No company employee, or personel of any kind, may participate, except as an individual, lone, and wholeseome, participating, sexaling agent.

A sexaling agent, is a person who is participating at the collection site to assist in the purifying of the parcel of land, on which I will build my ministry, with the assistance of my children, by their participating in sexaling activities, and by their depositing of their sexaling juices upon the grounds of the parcel of land.

How To Disperse Your Juices

Sexaling outdoors will normally require that persons are naked, and juices will naturally find their way to and into the ground. Men, boys, women, and girls, all must be naked, while sexaling outdoors, except for those persons who need to be on the move, such as male attendants, who will need to go around, periodically, checking on the points of interest, to maintain the soundness and integrity of the collection site, and of all things related to its operation and management.

Clothing

Clothes may be worn, at times while not sexaling, as particapating persons, decide.

Scarves, hats, and minor shawl like garments, Roman, Turkish, or Russian togas, or other comfortable sexaling apparel, for women and girls, to protect the dermal surfaces of the wearer of the scarve, hat, minor shawl, or other apparel, are allowed to be worn, while sexaling. We need every inch of dermal surface, bare and naked, if possible, or at least, accessible, to allow for maximum eroteming sensitivity, touching, massaging, tickling, and so forth, to heighten the erotic levels of excitement, and thrills, eroteming, orgasming, and phlumetting.

Men and boys may wear light weight garments, such as Roman, Turkish, or Russian togas, or other garments that do not interfere with access to sexaling buttholes, dicks, and so forth, for men and boys to be able to maximize their sexaling enjoyments, erotic attachments, their purposeful eroteming enjoyments, orgasming thrills, and pleasures.

Erotic Attachments

Erotic attachments refers to their titties, dicks, buttholes, mouthal holes, tounges, and other touch sensitive, eroticable and orgasmicable body parts.

Purposeful eroteming enjoyments means, their steady minded, determined, and sustained sense of attaining to the highest levels of

eroteming enjoyments possible.

Leveling The Area

Some minor leveling of the area, for maximum use of the area, as an automobile and camper trailer, caravan bus, travel trailer, campsite park, will need to be done.

There are many tiny hills, and a few large ones. There is much dirt that can be removed, from the middle of the site, all the way back to the rear edge of the site.

There is a hilltop trailor park, past the edge of the rear of the parcel, and there will need to be built a very durable, and strong retaining wall, to keep that hillside, shored up, and to keep the trailor park from crashing down the hill side, after slide begins, and creep causes the trailor park to fall into the open area, that will be needed to be excavated, all the way to the rear of the park.

The grade or slope of the hill, need not be steep, but can be at a relatively low angle of ascent. An angle of between ten to twenty five, to thirty degrees, in graduations, from front to back, can be accomplished, with little difficulty, and with no disturbment to the trailor park, or disturbment to the integrity of the trailor park.

We need not seek any permits for construction, as I do not recognize the Lesbianists' governments, on this planet, and if any person shows up who says he or she is a county or city planner, inspector, or whatever, you are to immediately kill the person, and deliver three fivers to the persons' head, as that person is a Lesbianist attempting to interfere in my religious activities.

All activities at the site are to be done, without any interference from any public or other authority, and all costs for all changes and alterations to the site are to be financed by the local construction companies, who are working on the hotels industry, and they will cease immediately their work on all construction, private housing construction, casino construction, and all other towers construction, or work construction, other than the basic infrastructure needed to support the present population of Las Vegas, Nevada.

We are taking over this town and you all will begin to prepare to vacate this town and hand over all of your construction equipment, now, or face your companies and your private persons destruction with my fracturable rocks bombs, begining with the New Orleans Hotel, and all related hotels, and casions, bars, and restaraunts. That means, every gambling establishment is to shut down, stop construction, and vacate this town, now, immediately, post haste, if you wish to live.

You will be destroyed if you refuse to follow orders. We are putting a stop to the non sense of the Lesbianists begining with Las Vegas, Nevada, Henderson, Pahrump, and all parts of Nevada and the Southwest.

You will disband your operations and hand over your companies, such as the water bureau, the power company, the gas utility company, and every other company, including all supermarkets, grocery stores, malls, and so forth, every last business in Nevada, and the south west, to the participants at the collecting site, to take over and then properly manage, until all residents of Las Vegas, remove themselves, to my kids facilities.

Is that understood? You are all resigning and moving into my kids place, underground, surrendering, and moving on for those who are not Lesbianists, but who wish to vacate this area, as this area is in whole, now, a religious grounds.

That means, that I will require the participants at the collection site to take over every thing, and to bring the news reporting stations to their knees, and force them to report the news, that every one is to retire to my kids underground, fortress, and they are all to remove them selves from Las Vegas, now, post haste, immediately, other wise, we will have a fractuable rock bombs throwing contest, to see who we destroy, first.

You must surrender all your holdings, owned property, equipments, and every thing else you call your own, and hand them over to the participants at the collection site.

Is that understood? "YES SIR!" had better be your answer, or you will find yourself on a one way ticket to my Epcot Center, with no return ticket, guaranteed, for however long it takes, to find you tummy mommies and tummy daddies.

I don't think there will be many volunteers, in the near future, as you are all abominant kids of mine, and the only kids people will ever bare, for some time to come, are abominant kids, and animals, and animal humans abominant kids, so I do not think you'll be leaveing my Epcot Center any time soon, if you resist and if you force us to kill you.

Is that understood every body? Good.

The penalty for not complying is death. Do you understand what I am saying? I hope so.

The Party Is Over In Las Vegas, And In The World

The party is now over, in Las Vegas, and at all casinos and gambling establishments, as we know you are all cheating, and we will kill every single last one of you to close you all down.

Who Is Staying And Who Is Leaving, Etc.

You will close down all of your establishments, world wide, and lock the doors on them, and then demolish them, post haste. Is that understood? I hope so. Either you do it, or we will do it. Do you understand that, now? I hope you do, because we are going to demolish every one of your establishments in this town, if you do not demolish

them, yourselves. Every last one of them, all houseing, except for those noted in my children's compliance statements, which you are all to recieve, all trailor parks, with some exceptions, all every thing is to be removed, with only the basic infrastrastructure for heating, lighting, water, sewage, medical, hospitals, medical clinics, pharmacies, and so forth, food markets, services industry, HUD, Welfare, SSI, and other operations for the welfare of persons who are here, who can not leave, or who will be staying for some time, and who will be needing the services of those agences, construction companies, lighting companies, electric infrastructure installation and maintenance companies, as well as gasoline supply and distribution vendors, diesel fuels supply and distribution vendors, restaraunts, and telephone. That means, all humans are leaving, except for those person who are to stay on, as indicated in my childrens' compliance statements, and except for those who wish to stay on and participate in spilling their pure, holy, sacred, purifying juices, and those wishing to participate in purifying my area, all of Las Vegas, Nevada, the valley and beyond, in time.

Rules For Hospitals And Clinics, Etc.

There will be new rules for hospitals, and clinics, and my kids will see to it, that the new rules, are followed. There will be other rules, as well, and my kids will see to it, that they are followed, as well, or persons who wantonly disregard them, will end up in prison, underground. My kids have not only a living environment, they have prisons, as well, jail facilities, and many other things. Check with them for a fuller list, of what all they have in the way of facilities, as many are very nice, and there are great possibilities for improving your health, and rejuvenating your bodies, etc.

My kids have a full list of who is to be leaving, who is to be staying, and by when people are to be leaving, and where persons staying, are to be moving to, as we clean up this area.

All of you had better check with my kids, especially, you Lesbianists, but not only them, you religious fanatics, as well, and every one else, of course, or you, especially the Lesbianists and religious fanatics are at risk here, but not too much, the others who are to check in with my kids, risk dying, perhaps, prematurely, and then ending up in my Epcot Center.

My kids also have lists of who the people are who will be recieving all the properties for taking them over, which properties need to be demolished, who will be demolishing things, and how to remove those things that you must remove, and to where you will remove them, and dispose of them, and in what manner you will dispose of them.

You will hand over every thing, and you will all comply, and those who are required to hand over their properties, after complying with removal demands, will hand them over, and then will move out and into my kids place, in accordance with the time schedule that my children

have for you to follow. You are required now to check in with my kids, get every thing sorted out, and learn all the details, and then comply.

Those who do not follow these orders risk an early and, fortunate for us, timely meeting with death, and entrance to my Epcot Center for a long stay.

Erecting A Partition Blind On West Tropicana Ave.

The roadway, West Tropicana Ave. runs east to west, and west to east, and it is advisable to erect a pertition blind, so as to not disturb traffic, that comes down the side of the road, the parcel of land sits on, at very fast speeds, with people rubbernecking to see what is going on, as many people will possibly end up flying into the area, with their automobile, truck, gravel carrier, or eighteen wheeler spinnning and turning over, out of control, and then sliding off the roadway and into the collection site.

The traffic is very fact on West Tropicana Ave., and with the interest of the local area residents, who will learn about the collection site, and the activities at the collection site, there will be many hazzards arrising as a result. Some persons may decide to stroll through the area, to steal purses, or wallets, or cameras, and so forth, as there are many poor, indigent, or hopelessly poor, persons, in the area, who do not have any work, and who can not feed themselves, and they need to steal things, to sell, to earn a living.

Such people should be spoken to, and fed, and then warned not to act in an unrighteous manner, which means, please do not steal things, or damage the property, or any thing on it, and please do not get into fist fights, over insults, and disagreements with participants, about who is GOD, and so forth. There are many impoverished persons from South America, and Central America, who only know their local area witch doctor's teachings on voodoo men and voodoo women, and who know nothing but folklorish stories about gouls and ghosts, and people, or ghostly gouls, i.e., people immitating 'gouls', or mean and rotten people, who go 'boo!', or try to scare and rob people, in the night.

Electricity, Lighting, Etc., To Be Supplied By Nevada Power Free Of Charge, Or Else

The partition blind should be sturdy, tall, and break proof, so that vandals can not break it down, or climb over it. Lights for use at night, with the proper permissions for an electrical hookup from the Power Company, Nevada Power Company, will be granted, and provided by Nevada Power, along with all other neccessary, needed, safety lighting hookups, to illuminate the area, fully, at night, so that it looks just like, or nearly like, daylight, or a well lit soccer areana at night, or a well lit professional baseball field, or football field, at night, and it will be given for free, lest we burn down Nevada Power, and kill all of their Lesbianists employees, and meter men, and

all of their tawdry workers, who we do not wish to deal with. That means, we will blow up their buildings, and kill them all, unless they give us the electricity that we require. If we need to kill them all, we will then acquire all of their holdings, and we will operate all of them, ourselves. Fair Warning has been given, and consider that as a done deal, unless you wish to visit my Epcot Center.

Meat Vendors And Hispanics From Central And South America

An air of friendlyness, but caution, should be used. Men and boys are there to protect the women and girls. So, please work in teams, and do not let individuals, who might get kidnapped, and sold off to meat vendors, for a few dollars, or pesos, as it is, in Las Vegas, as the majority of such kidnappings and sales of human beings to meat vendors, the Lesbianists chain stores, such as Colonol Sander's Kentucky Fried Chicken, Burger King, MacDonalds, Jack 'n the Box, Wendy's, In-'n-Out, Fat Burger, Taco Bell, Dell Taco, and all the other, fast foods vendors, is by the locally landed hispanics from Central and South America, who need money, to stay alive.

Erecting A Partition Along South Decature Blud.

South Decature Blvd. also has much traffic on it, and there will be lots of people, rubber necking, to see what is going on, so a high, partition wall, made of lumber, should be erected down the side of South Decature Blvd. to prevent all such incidents of rubber necking, and reckess abandonment, from occuring.

The partition should be about ten to thirty feet high, and should be well constructed. Why so high? We do not want people climbing over it, to sneak into the area, to steal things, and to fight with people, and to cause trouble, and to come looking for young girls, and young boys, and helpless, elderly folks, and uneducated to the whims and ways of the downtrodden, brutal, abominant kids of mine, walking the streets of Las Vegas.

Yes. They are abominant kids of mine, and the proof of that is that their children come out as monkey people, and orangutan people, and chimpanzee people, and if possible, the hospital whisks the baby away from its mother, and disposes of it, in the prep rooms, used for killing incoming, abominant kids of mine.

Drawings On Demolition, Construction, Etc.

My kids have construction drawings for constructing all the facilities needed at the collection site for all the facilities that will be needed. They have electrical drawings for lighting, etc., health, fitness, and wellness facilities drawings, latrine facilities drawings, showers facilities drawings, food and beverage eating and drinking areas drawings, and all other drawings related to all things that will be needed to be constructed, or altered in any way, for our project to proceed, including but not limited to, demolition of the cliffs, leveling of the entire area out to Harmon Ave. and up to

Flamingo, and back to Tropicana, as well as what is to be removed and leveled between Jones and Decature. There are a few minor exceptions, such as the building that I am living in. Who will move where, to consolidate staff at this project, and who will be moving out, at this project, and what will be leveled at this project, are all detailed in the program specifications, my children have. My present quarters, will be my place of residence, as things move along, and in time, in accordance with the schedule for construction, a temporary facility for me will be constructed near the area but between Flamingo and Tropicana, and somewhere between Jones and Decature. Please see them for details. After the area is purified sufficiently, and after all the areas to be purified, are purified, and my children will decide on when that is accomplished, my children will then activate the technologies, and acquire the resources they need, and then they will build a more permanent settlement arrangement for all people concerned, who are staying on, if they decide to stay on.

The partical dismissive technologies and remissive technologies, for foods, and medicines, and other items that are needed, for continued survival, and for all other required purposes according to the specifications for the sexaling for a living programs, will all be provided to the participants who wish to stay on, and houseing for them, as well, will also be included. Parks will go up, and so will many other locally needed facilities. Many things will disappear, as my kids will partical dismiss the things and structures they need to remove, as they construct the new area, for all persons staying on in Las Vegas. My kids have a list of all the names of all the persons who may, if they decide to, stay on in Las Vegas, and not all of them, are local people, so you should all check to find out whether you name is on the list or not. All other persons, who are to be moving on, and all persons who do not wish to stay on, here, will be required to move into my childrens' present facilities, which they will continue to expand as we continue our program on this planet. We will eventually clear every one out of the area, inside and outside of Las Vegas and the Valley, and surrounding areas, and the world over, except for the persons whose names appear on the list, as houseing can be provided above ground, for participants in the juices spilling and areas purifying operations, by my children, if those persons wish to stay on and participate.

All other people will be required to move into the facilities my children have, and are continuing to upgrade, and expand, in their encapuslated living environement, in which, many people currently live. Persons in the encapsulated living environment, may also attend the collection site area activities, and future clearing activities, for purifying the areas with their pure, holy, powerfully cleansing, purifying, cleericating [cle-er-i-cating], and GODLY energies filled, sexaling juices. Cleericating means, the same thing as clearifying. It is just a slightly different but related word from another a variant language of English, and to cleericate basically means the same thing as to clearify. When we get the areas, cleared enough, and purified

enough, my kids will then start building things for the participants. All others will move below ground, and live in the encapsualted living environement, until they have earned enough money, with their friends, as talked about earlier, to purchase a lease on land, and acuire the lease on resources needed, to build a home, etc., for a large group of people, who will be living together, and working together in the sexaling for a living programs, and so forth.

When Will This All Begin?

As soon as people begin to comply, we will begin our efforts to clean up Las Vegas, to begin with, and then, the rest of the world, and then, the rest of our universe. It will take a long time, as we need to spill our juices, the lay persons, anyway, for some time, to come, as our universe is quite large, and so is the rest of it, that we are going to be recovering.

My Spilling Of My Purifying Sexaling Juices, And My Spilling Of My 'Prayer Time' Purifying Juices

I spill my juices, only for religious ceremonialing activities, during certain relgious ceremonies, and I don't spill my juices, on the properties, as I'm not set up to spill my juices, on the property, now, and will not be set up to spill juices, until I find an excuse for that, and an excuse for performing a religious hand prayer signaling ceremony that will require my spilling of my juices. It's pretty hard to spill juices, when there are no other persons working with me, and I do not work with lay persons, unless they are confirmed by me, and so there will be maybe, some confirmations, but not neccessarily so, as I do not know who is going to wish to be confirmed, and by the way, who ever it is I confirm, must realize that I am the Mother and Father of all human beings, animals, and living beings, and the Creator of my universe. There are not that many people who understand that, except for my kids, my working, unionized kids, and so it will be some time, yet, maybe a few hundred or more years, before some one realizes, 'Hey, he IS the Mother and Father of all human beings, etc., etc., etc.,"

Spilling 'Prayer Time' Spittle Generated While Praying

Until then, I'll use my spittle juices if I need to drop or drizzel any juices, that I generate while I am religious hand prayer signaling, as I don't like or care for the idea of jerking off in public, to spill purifying juices, in public, regardless of the fact, that I am GOD, so it ain't going to happen, any time soon. When I find a authentic 'believer' who realizes and understand that I am GOD, and so forth, I'll begin my public spilling of sexaling juices. I don't mind it in private, but it is not going to happen in public.

Monkey Babies, Jimmy Carter, Oliver North, And The Lesbianists' Conspiratorial Bullshit Stories Of Adam And Eve, And "Jesus Saves"

Most people do not know this, but many births end in tragic loss of the child, because Jerry Falwell, Oliver North, Jimmy Carter, Ronald Reagan, George Bush, Jr. George Bush, Sr., and the rest of them, order and expect all the Lesbianists doctors to kill all babies born to people which do not look human. Doctors at birthing hospitals also comply, quietly, as it is hospital policy they can not break. If they go against it, they risk losing their job, and possibly losing their life. This is not a joke, and it is the Lesbianistgs policy of having all birthings in hospitals exactly for this reason, for disposing of non human looking babies, at birth, so that their bullshit creation by God, of a 'pair' of people, Adam and Eve, and that "Jesus Saves all good Christians", can not be contested, by logical proof of non human births to human being couples, or single parent women or girls. Abominant kids are born every day to my kids, on this planet, and they are all executed, or killed off by the local citizens, by their fright and fear of 'ghouls and ghosts' and 'goblins' in the night that go, 'Boo!'. These idiots, both the abominant South Americans, Central Americana, and all my other abominant kids, North American, Europeans, Russians, Chinese, Japanese, Thai, Philipine, and so on, must ask them selves why they are blessed with babies which are either not human or are abominant humans, or part animal humans. If they ask them selves these questions, they will find out the only answers are that these people born to them, are my children, and my children are born to them for reasons that have not been disclosed to them, before, by the clergical societies, i.e, the religions of the world, and by the other societies, set up by the Lesbianists, or by societies nurtured along as part of the Lesbianists' 'tragic comedy' of their toying with your lives for their humoring themselves, and for their amusing themselves. Once we get rid of the Lesbianists, and their ways of doing things, we will begin to see babies that are either not human, or are only part human, in animal bodies, and they will be born to all of you who are tummy mommies, and tummy daddies, if you birth enough children, to find out. How many is enough? About one in forty or fifty by my estimation, but depending on the person, it may be between thirty to eighty, from one person to the next. Take that to your pastor, and tell him or her, to stick it up his or her ass. It is the truth that animals are born to humans, all the time. Not only that, but abominant kids of mine, usually of the apey kind, but not always, are born to the 'normal' looking humans on our planet, and in our universe. We need not be afraid of these children, as animals, can be collected and put into zoos, and animal humans can be raised by the parents, or parent, in the case of a single parent. In time, we will adjust to this reality, and we will raise fine children, abominant animal humans, or human appearing abominant children. That means you are all abominants, and the Lesbianists are laughing at you, and at themselves as well, as they go around and kill and cravenly torture every possible person they can. We will put an end to their craven ways, and we will make a wonderful universe for all of us to live in, in peace, and serenity, once we get started practicing my religion, and once we begin erasing, sufficiently, our karma and our karmic markups, with your purifying sexaling energies, prayers, and other activities, such

as syncopated dance, syncopated excercise, syncopated sexaling, and so forth. You time it to the metronome at one thirty seventh, for now, and that will be fine. In time, we will get accurate metronomes, and then we will chance the pace, just ever so slightly, to push my kids along, as I explained about, for our wholesome and healthy universe, for all of us to live in, together with each other.

Punishment For People Who Practice Voodoo Religions Is Dismendment, I.E., Death

We will not be killing or executing children any more, at hospitals, or at homes, or in primitive, backwards towns and villages, or rural hideaway villages, where voodoo religions muster the people into peculiar states of mind, where they become entranced, and then begin mindlessly, acting like chickens, and birds, or fowls, or hippos, and so forth. There are too many of these types of so-called 'religions' in this world, and we are out lawing all of them, and punishment for adhering to them, will be a trip to my Epcot Center, as I have my children particle dismiss their bodies, and then dismend them, bit by bit, into their base components, and then have my children whisk them into my Epcot Center. We will bring every one up to the level of education every one needs to be at, to better understand my universe, and those who persist in abandoning their obligations, will be dismended with out further notice, after they are sent their last warning ticket, from my kids, in accordance with Gurkian Law. That also applies to the Lesbianists, and to every one else, who is unable to get the picture here, and get with the program. There will be no exceptions. And, this is not a joke. My kids have courses for you to educate your self in, to pull yourself out of the past Lesbianists' way of life and thinking, and into the new and current, reality, that we will be living in, for ever, from now on.

Local Businesses Will Have No Problems At All With The Collection Site And Will Have No Problems At All With The Activities Of The Faithful At The Collection Site

Walgreen's is across the street, on one corner, and Home Depot is on another corner. I don't think Walgreen's will have any problem with you using the site for your camping, for your meeting with others, for your sexaling with others, and for you and your friends' purifying sexaling activities in that park, i.e., the collection site. Home Depot, I don't think will have any problem with your use of the parcel of land, either, for those purposes.

What To Do If The Police Come?

Now, if the police come, and I'm there or not, I don't know what they'll say, but they have not got any right to say any thing to any one. Is that clear, Mr. Mayor of Las Vegas, and every one else in the area. I hope it is, as I am not going to stand for your interference or any one else's interference in my religion and in the relgious activities of people who wish to participate in my religion, sexaling

to purify my universe. IS THAT UNDERSTOOD, MR. MAYOR AND EVERY BODY ELSE? I HOPE IT IS! AS A 'NO SIR' WOULD BE UNACCEPTABLE!

Now that we have an understanding, I think there will be no problems, and if there are, I will see what I can do about it, by calling my kids up, with my religious hand prayer signaling ceremonies, to see what they can do for you, to help you out, and to break the backs on law enforcement officers, and the Mayor of Las Vegas, and every other person, Lesbianist or not, who tries to interfere with me, or who tries to interfere with the people practicing my religion. I will not stand for any interference from any one, including Mr. George Bush, Jr., the current president of the United States, or any one else, such as the Mayor of Las Vegas, or the Governor of Nevada, or the Nevada Highway Patrol, or the Nevada Sherrifs Dept. or the Las Vegas Metro Dept. or with any other persons or parties, such as the Las Vegas Gaming Commission, or any other Lesbianists' or Lesbianistic organization set up by the Lesbianists, and that means all you church goers, parochial school teachers, and students, and others, and if any one interferes with any one who comes to my ministry's claimed parcel of land that I am purifying for setting up my ministry, and if any one hassels any one there, than who ever is visiting the collection site, to help to purify it, you have my permission to kill the persons attempting to interfere in any way at all, on sight, with what ever you have to kill them with. Please dispose of their bodies in the nearest trash dumpster.

DO YOU HEAR ME? MR. MAYOR. YOU ARE A DEAD MAN IF YOU EVEN TRY TO SEE WHAT MY RELIGIOUS FAITHFUL ARE DOING, AND SO IS EVERY OTHER PERSON ON EVERY SCHOOL BOARD AND CHURCH OR OTHER LESBIANISTS' COMMITTEE. IS THAT CLEAR, EVERY BODY? GOOD!

You will not interfere with my religion, and with my religious faithful, and they will come to Nevada, and they will come to Las Vegas, and they will start sexaling on that property as they see fit. Does every body understand that? I hope so. Now. Non responsive persons, who ignore my statements, will find themselves in trash cans, and trash dumpsters, every where in Las Vegas, and any where else, where there is a convenient trash can or trash dumpster. There are lots of them around, and people are throwing dead people into them, every day, across the country and around the world, and they all end up in landfill sites, and so there will be no added charges for our using the statewide Nevada Silver State trash retainers and containers, for however many others who need to be killed, and for my religious faithful to then place them into the trash cans and trash dumpsters. No charges should be levied by any other Lesbianists' trash collection company, around the world, as they are all owned and operated by the Lesbianists, and we will not support them, in any way, what so ever.

If Mr. Mayor would like to be the first guest inside of one of the Nevada Silver State trash dumpsters, then he will try to interfere, in

person, and he will be shot, point blank, in the center of his head. You will then kill him with three fivers, to make certain he is on his way to my Epcot Center, for his next trip out as a tummy baby. If the Governor of Nevada wishes to interfere, then he does so at the risk of being shot, killed, and made certain he is dead, with three fivers, and then after that, he will be deposited into a local or state trash dumpster, either here, in Nevada, or in California, or Arizona, or where ever it is convenient to dump him into a trash can, trash container, or trash dumpster.

Lesbianists Enjoy Eating People, Who Are Alive, As Well As Eating The Bodies Of Those Who Are Dead

You should let the state's vice mayor of Las Vegas's office know, who was shot, killed, and confirmed dead, after depositing three fivers into his or her head, and then where the body is, and generally when the body was dumped, so that they can get an idea of how decomposed the body is, and whether or not the body is in a land fill site. They can then check on it, and verify that the body will make it to the land fill site, if it isn't already, there, where all the other bodies, are ending up, unless they have already happened to have beeb eaten up by the Mayor, or by the friggen Governor, or by the Sherrif, or by another Lesbianist.

All persons are free to travel to Las Vegas, and they are invited to stay at the parcel of land that I described, and they are invited to make it into a nice camper trailer area for recreational vehicles, or for what ever other types of outdoors camping vehicles, travel trailers, caravan buses, or any other types of camp site temporary stay, housing and living arrangements you would like to use the area for.

Every Game Of Chance, Gambling Machine, Or Slot Machine Is Rigged, In Every Casino Around The World, With Only A Few Exceptions

If you will all sexal, regularly, to the best of your abilities, and help me to purify the area with your sexaling, undisturbed by any one, and clean it up with your purifying energies, you are more than welcomed to come and enjoy the area, and see what fine attractions, will be leaving Las Vegas, in the not so distant future, including the gaming commission, with all their phoney, rigged gaming systems, that the Lesbianists control.

The Lesbianists' Articles Of Participation

The Lesbianists have every game that you can possibly rig, controlled by electronics devices, or by slight of hand, mechanics, who control the gaming rooms, and gaming halls, so that only Lesbianists win any money, that is worth mentioning about, and so that the Gaming Authorities, and the Mayor's office, and every other Lesbianist organization in Nevada, who has any one in their office, can then go and get the money the Lesbianist won, and get a percentage of it,

given back to them, as they have arranged to do that, as that is part of their oath, and part of their sworn promises to do, as that is written out in their articles of participation, their rules for living upsite, not down below, in the labrynthine cities, and every Lesbianist must follow those rules, and when they win the Megabucks, and every Lottery in the world, they must give back money to the Lesbianists, as every game of chance that is run in this world, except for bingo, is rigged. However, even Bingo is rigged, in some ways, by people switching cards that look like winning cards, while players are not looking, and by other naughty tricks.

Every Lottery In The World Is Rigged

Every lottery in the world, performs the drawing out of the balls before a live audience, in most cases, before they actually air the show, and they have illusionary tricks they play, with the technologies they have, and they sucker people out of their money, daily, around the world. Las Vegas is no different, and they sucker every one out of their money, except for the Lesbianists, and they let some people, win now and then, small jackpots, on the gaming machines, and then after a winning streak, they set the machines the person uses, so that the person can not win a dime. They have the technologies for rigging every machine in Nevada, and across the country and around the world, so next time you visit one of their casinos, be sure and detonate one of our bombs, you can make, and destroy that casino. Is that understood? I hope so, as every day, millions of people are being suckered out of their hard earned money, they pay taxes on, through the nose, till they are practically choking, and the Lesbianists take it, and support their folley and games. They also support their folley and games with your revenues, that they make sure you lose, at every casion, and at every gas station, with a convience store, that has gambling machines in it, for you to deposit you money into. Every lottery in the world is rigged, and so if you spend money on it, if you are not a Lesbianist, you are just throwing your money away.

No Fair Play In Nevada, And No Fair Play In The World

There is no fair play, here in Nevada, or any where else, in the world, and I would like you all to know that, and become aware of that, and then I hope you will tell your friends about it, and then I hope you will destroy every single last one of their casinos, and gaming machines. We are not going to allow them to continue their frolicking at your expense, and we are going to destroy every last one of the Lesbianists, as soon as we can. If they prefer to surrender themselves to my kids, than we can allow them to live. However, if they do not surrender themselves to my kids, then we will kill them all. And there are no 'maybe's' about that.

Sniper Shooting, And Miscellaneous Information

You have my permission to sniper shoot any police officer, park ranger, sherrif, or other person, plain clothesed police officer or detective, with or without a gun, on sight with your scoped rifles, and targeting assistant who will determine range, from your bunkered in the hillside, shooting site. Any hotel in the area, which might harbor shooters from local police, sherrif, or SWAT team operations groups, you have my permissions, and blessing, or go ahead, and my 'okay, and 'approved for action' sight of appeal. Sight of appeal means, my blessings, based on your determination as per your good judgement.

One hotel that is clearly the most convenient, and the closest with in shooting range, at close range, is the New Orleans Hotel. Hotels within shooting range, at a distance, are the Palm's Hotel, The Rio Hotel and Casino and its seperate tower wing, and a few others, off in the distance. You'll have to come and look at them from the approximate location of the site after you determine where every thing is, to locate and determine for your self which hotels and towers need to come down, and what you will need to bring them down. There is a tower off in the distance, a new hotel, that is going up, that I do not know the name of, but is clearly within shooting range, and needs to come down, and people are on it, daily, welding, and you can't miss it, if you look in the north easterly direction from the site. There is the Stratosphere Hotel and Casino, which also needs to come down, which is further over to the west from the new hotel wing that is going up. There are many scaffoldings in the area, that also need to come down with explosives, fracturables rocks, fuels, chlorine, and high temperature minerals particles ignition, and particles burnings bombs. There are probably a number of other landmarks, hotels, casinos, bars, restaraunts, trailor parks, trailors, houses, apartments, condominiums, near or off in the distance, that also need to come down, and need to be demolished with my light weight explosives fuels, gunpowders, metals particles, and chlorine plastique explosives bombs.

You will destroy them all, and you will come prepared, or be prepared to acquire all the demolitions needed to destroy them all, as well as to destroy all the local police and sheriff's many Metro offices, SWAT Teams offices and units, Fire and Rescue Ambulance units, Lesbianists' Hospitals, and other Lesbianists facilities, throughout the Las Vegas Valley, Henderson Nevada, North Las Vegas, Pahrump, Mesquite and the whole Southern Nevada, westward to San Diego, California, northward to Los Angeles, northward to San Francisco, California, northward to Berkely, California to Oregon, and Washington State, and back down to Reno Nevada, Arizona, New Mexico, Albequerque, Houston Texas, Dallas Fort Worth Texas, and all areas where there are tactical SWAT team units, military units, militia units, as all militias are organized and operated by Lesbianists, despite popular beliefs that they are independent of the government, and anti government, as we often see on the "TV for the Brainless", as they are often refered to, i.e., the general public.

You will destroy all law enforcement offices, and personel, and all military and militias. All governments, their offices, and employees, are to be destroyed, and all personel are to be executed, except for those who take it upon themselves to execute the Lesbianists among them. My kids have a full list of all the places and structures that need to be destroyed, and demolished, and so please see them for that information.

Your Orders Are To Kill The President Of The United States And His Wife

And to repeat, your orders are to kill the president of the United States, George Walker Bush, Jr., his wife, Mrs. Barbara Bush, Jr., and all of his and his wifes' Lesbianists' associates, pretend relatives, and friends.

We are not going to let this stand, another moment, and if they do not surrender to my kids, you are to execute them all. My kids have a list of names, of those, who have not surrendered, as yet. Please see them for and ask them for that list of names of persons who have not as yet, surrendered, and who need to be executed, post haste, immediately, or, ASAP.

United States President George Walker Bush, Jr., is no exception to this, as he has not surrendered, as of yet, and that is confirmed. Neither has any of his colleages, or congressional office holders and diet or congress members, except for Ted Kennedy, and one or so others, and maybe a cabinet member, one or there abouts, but I haven't confirmed that, yet. There are some members of the congress who are not Lesbianists, and you can get their names, on a list from my kids, as well.

Captain Off The Bridge.

Texas's Lesbianists' Latest 'Vaccine' And Texas's Attempts To Destroy Women's And Girls' Vaginal Lining And To Destroy Women's And Girls' Cervical Lining, Causeing Stillbirths To Increase, So As To Prevent The Successful Birthing Of Children - Latest Lesbianists' Vaccine Will Cause Numerous Problems - Execute United States Of America, State Of Texas, Governor Perry And Family - Underground Books Distributor's For Militia Types Folks - Information On Bombs Making And Detonators On The Web - Solar Flares And Flare Igniters - The Lesbianists' Balooney On Minus Charges As Opposed To Positive Charges - The Lesbianists' Maps Of The Brains - Execute The Current President Of The United States Of America, George Walker Bush, Jr. - Lesbianists Who Decide To Sexal In My Religion With Lesbianists And Non-Lesbianists' Persons - Citizens By Proxy - Temporary Full Time Citizens - What To Do About Untimely Pregnancies, Health Issues, Medicines, And Regroverative Formulas - Medical And Housing Benefits, And Other Health And Work Related Benefits - When Can People Begin To Come So As To Be Able To Participate? - Sniper Points, Places Where Snipers Shoot From - Pocket Knives, Construction Tools, And Miscellaneous Daily Life Management Tools And Equipment - Hookups For Travel Camping Vans And Similar Vehicles - Cleaning Up The Area And Throwing Away The Garbage - Schedule For Leveling Of The Ground And Hills In The Area, Removal Of Unsightly And Smelly Garbage - Setting Up New Facilities - Fountains And Showering Lamponeers - Restaraunts, Clubs, Lounges, Eateries, Cafeterias, Bars, Pubs, Bicyle Paths, And So Forth - Dealing With Criminally Minded Persons - Alterations, Modifications, Changes, Clearing Up And Removal Of Garbage In The Areas, And Additions Time Schedules Updated: 12-02-07 Rev.a.00.a 02:30 PST

Texas's Lesbianists' Latest 'Vaccine' And Texas's Attempts To Destroy Women's And Girls Vaginal Lining And To Destroy Cervical Lining, Causeing Stillbirths To Increase, And To Prevent The Successful Birthing Of Children

The latest attempt by the Lesbianists' governments of the world, near by my computer window, on the internet news services, to destroy and toy with the human population of this planet, has been launched in Texas, and is targeted at women and girls, and their ability to have children.

See the article at the end of this post.

The new vaccine, which is mandated by Governor Rick Perry, who signed it into law, and is now obligatory, unless you protest it, and go to

court, and spend years fighting it, as an individual or small group of claimants, will destroy the vaginal cervical collar and the lining that holds every thing in place, and supports the interior of the vagina, thus making it impossible to carry a fetus to term. The vaccine is also targeting the brains fibers throughout the human body, and the fibers of the brains in a woman's or girls' body will slowly rot, and decay as they are eaten up by tiny animals that eat these energies conducing fibers, synapses, relay switches, and other related energical brainal related things and dings thoughout the body.

Latest Lesbianists' Vaccine Will Cause Numerous Problems

It will also speed up the eating away of the enamel of the teeth, and of the bones in the woman's and girl's body, her fingernails, and her skin membranes NS membraneous tissues throughout the body, and on the exterior of a woman's and girls' body, making the women and girls grow older looking at ever more younger ages, and making women and girls susceptable to skin cancer, melanoma, herpes, genital warts, other infestations of animals in the skin, and other skin related membrane destructing colonies of animals, that they use from out of their Bio Chem War encyclopedia of how to destroy human beings, with poisonous and health problems causeing crystals cages animals of all kinds. Especially numerous are the Bio Chem Warfare crystals cages animals of the petroleum industry's based kind.

The vaccine is no different from any other of the Lesbianists vaccines aimed at destroying the health of the people who live on this planet. It is compared to the 'polio' vaccine, in the news article, and that was similarly an attempt at destroying the health of the human being, by making the human being incapable of haveing any sexual orgasming capabilities, by killing off all the sex related animals and bugies in the body, which make sexaling juices, that make eroteming and orgasming possible.

Thus, this latest attempt at destroying the health of the people who live on this planet, locally, in Texas, and that I know of, anyway, is nothing more than the Lesbianists toying with the people who they are here to amuse them selves with by destroying them, little by little, over a long period of time.

Execute United States Of America, State Of Texas, Governor Perry And Family

This will not stand, and you will all destroy the capital of Texas, and Governor Perry's mansion, and the Governor and his wife, and their family, pretend or otherwise with my fracturable rocks and fuels chlorine and explosives, etc., bombs, that you will make in your home's garage, or workshop, safely.

Underground Books Distributor's For Militia Types Folks

Use the delayed timer invention, that is a workable time delay detonator, that I've explained about, especially if you use black

powder gun powder, mixed with axel grease, turpentine, benzine, chlorine, using also some Elmer's glue, prior to mixing with chlorine, and then set it in a warm cupboard, to ferment for a few days, to then turn into a nice plastic explosives mixture for detonating with the string of flash bulbs wired to the alarm clock trick, as described by Ragnar or by one of the other bombs making specialists, in their sub culture literature for militia types folks, who wish to destroy the government.

They find the list of names of all the people who request the literature, by mail, and then they go and watch them, with their surveilance technologies they have, and then they either capture and torture them, and then kill them, or they just make sure they are die, in a fatal car accident, or whatever.

Paladium Press is one of the Lesbianists' book publishers, and there are others, and this one is affiliated with the National Rifle Association, a Lesbianists organization.

This publisher has titles sold to underground books distributors, and you can find a number of underground book distributors on the internet, which carry more titles than Palladium press.

Delta Press, who publishes their books and paraphenalia distribution listings magazine, 'Delta Force' is one of these distributors of interesting underground literature.

http://www.deltaforce.com/catalog/page30dp.html

'Home Made Fireworks', is one web page to look at, if you have the time.

http://www.deltaforce.com/catalog/page28dp.html

'Booby Traps, Explosives and Black Medicine', is another useful page to look at, as well.

http://www.deltaforce.com/catalog/page30dp.html

There are a number of other distributors of underground literature, and some have better selections than does Delta Press.

In any case, with a little research, there are plenty of 'timed detonation devices' drawings, and explanations, for you to view, and learn from, that will help you to construct a timed detonator, that will allow you to safely set off one of your plastiques bombs made with my explosives formulas.

Paladin Press, you can find their books at Amazon Books on the web, another Lesbianists owned corporation, is another publisher of interesting underground literature, that can be useful for you to study and learn from.

Paladin Press can be found at, http://www.paladin-press.com/

Books for supposed 'Professionals' who are anti terrorists professionals, that allow them to detect the different types of bombs people can make, and then use to destroy others, is sort of a tounge in cheek joke of the Lesbianists, for luring in people who wish to find information on bombs and explosives.

There are many useful books published to help beginners understand the basics of bomb making. The idea is to use the information for professionals who wish to understand the craft of making bombs, and detonating devices, and then use that information to build your bombs and your detonating devices.

The flash bulbs wired to an alarm clock with matches and ignitable phosphates glued to a string of flashbulbs, wired properly together, then crushed, so as to expose their flash and heat ignition coils filaments, for your detonating heat energies ignition needs, is one of the basics and you can find it in one or another of the underground books on bombs making and detonation devices making for 'professional' anti terrorist's private investigator or bombs detection professionals types.

This is one of the ways the Lesbianists lure in persons who know nothing about weapons, and then they find out who they are, and then they make friends with them, and toy with them, and introduce them to their Lesbianists' friends, and hang out with them, and pretend they are all friends, then one day, they all attack the person, and torture the individual, and get their kicks, amusing them selves, by ripping the person up, or by hanging, and nailing the person to a wall, with a nail gun using, approximately, three inch nails, and then hammering in longer, seven inch to twelve inch nails, or larger ones, or other similar nonsensical, childish, but fiendish behavior.

The "BRUTAL ART OF RIPPING, POKING & PRESSING VITAL TARGETS"
"by Loren W. Christensen"
http://www.paladin-press.com/detail.aspx?ID=1441

Is a beginners guide to ripping people apart, one arm, or leg, at a time, or with team work, one half of a person can be ripped from the other half, if you hold the right bones in place, and then, using teamwork, rip the person into two or more pieces. This book gives a person a preliminary sense of what he or she can muster, as an individual who attempts to rip at a person, and tear the person apart, one limb at a time, or with friends, how to rip a person up, one piece or more, at a time. Ripping people up is accomplished best, if they are unconcious. If they can not fight back, or resist, it is easy to rip a person apart, if you have the needed strength. Since many people have ancestors who were monkeys, chimps, orangutangs, guerillas, and so forth, with tremendous muscles strength, there are lots of very tiny persons, with phenomenal strength, and they can easily rip a person in two, by them self, if they try.

Books on booby traps for law enforcement personel, are simple descriptions of bombs that they may or may not encounter, and there

may be some useful information in some of them such as,

"BOOBY TRAP IDENTIFICATION AND RESPONSE GUIDE FOR LAW ENFORCEMENT PERSONNEL"
"by Tony L. Jones"
"This manual teaches cops and other law enforcement personnel all they need to know to recognize a booby trap and respond properly. Find out where booby traps are most commonly employed; the 11 physical signs that most often signal a trap; what to do (andnot do) if a trap is suspected or found; how to safely search a building, outdoor site or vehicle; and the one indicator that practically guarantees that a building has been booby-trapped. Shows more than 90 different booby traps in place. For academic study only. 5 1/2 x 8 1/2, softcover, photos, 80 pp."

There are others, which you can also find, that will provide schematics, and drawings of useable ambush related devices, and detonators for them.

"Contingency Cannibalism", sold through Paladin Press, and other 'underground' book distributors, is one of the Lesbianists' favorite books, that help them to track persons who they would like to later, cannibalize, themselves, as a joke on the person.

"CONTINGENCY CANNIBALISM"
"Superhardcore Survivalisms Dirty Little Secret"
"by Shiguro Takada"
"This twisted, tongue-in-cheek look at cannibalism as a last-resort survival option analyzes real-life case studies and historical episodes of cannibalism. Then it examines the hard-core decisions and gruesome details one must know in order to partake in this grisly practice. Recipes included. For entertainment purposes only. 5 1/2 x 8 1/2, softcover, 160 pp."

The Rusksack, "Survival Information Clearinghouse", is just one club of members of mainly Lesbianists, who have fun toying with the people who live on this planet.

http://therucksack.tripod.com/survival.htm

Information On Bombs Making And Detonators On The Web

For information on making detonators, and other bomb related stuff, please see this web page as it costs nothing.

http://www.bombshock.com/archive/Homemade_Bombs/

Solar Flares And Flare Igniters

A solar igniter as talked about in the article on page,

http://www.bombshock.com/file9/crtrmkr.txt-Crater_Makers-932.htm

'Crater Makers', is a solar flare igniter, a device that is used in solar flares, or night time distress signal flares, that ignite the flare, by sending an electric battery current into the flare phosphates holding tube, down a wire, on an ignition circuit, and then igniting the distress signal flare.

You can find solar igniters inside of distress signal flares that are used on boats, for shooting up into the air, with a flare gun for maritime use, that will send the distress signal flare up into the sky, if you have the flare gun pointing in that direction, and then at a certain altitude, a trip switch circuit is activated, due to air pressure, or due to timing from time of departure of the distress signal flare from the flare gun barrel.

You have to exhibit extreme caution, when taking a flare apart, as it can detonate, accidentally, and they are not made in a way so that people can safely take them apart, and people who try to take them apart, are accidentally injured, on a regular basis. Do not use this, if you do not know any thing about demining, as a professional mine deactivating specialist in the military, or with military training. This is best left up to the professionals, and is not meant as something the average house wife, business man or business woman, or chemistry or other studies, school student, should attempt.

You can use a flash bulb, and get the same results, if you glue some gun powder and phosphates to the flash bulb housing, and then crush the glass, and then wire it properly to a common house morning wake me up, alarm clock with a striker bell and a striker that moves back and forth. The circuit is simple, and you can figure it out with little difficulty.

The Lesbianists' Balooney On Minus Charges As Opposed To Positive Charges

Remember the minus sign on a battery is where all the activity of the little energies kids is going on, and the Lesbianists purposefully teach that the positive side is where the current is moving out of, and around towards the negative side of the battery. The Lesbianists teach that the active side of the battery is the plus or positive side, or the side with the plus sign on it, when you look at a common house hold nine volt battery, and that the non-active side is the negative side, or the side of the battery with a minus sign. This is false. The side with the minus sign on it, is the active side, and that is where you do not want to wire any thing to, unless you know what you are doing. The positive side has no activity going on, and is safe to touch, but the other side is not safe to touch, and the testing meters are wired to show you that the reverse is true. They have tampered with the design of testing meters, so as to support their allegation and falseity, that the minus side is where there is no activity, contrary to the truth.

That means, that, the flash bulb igniter system and the flash bulb itself should indicate that one side is the positive side, for the

positive wire to be attached to. You had better check carefully, and make sure there is no mischief here, as you do not want to detonate your igniter, accidentally. Ask a qualified electronics specialist to do all your wiring of your detonators, as he or she is the only person qualified to wire these types of detonators.

The Lesbianists' Maps Of The Brains

It's rather confusing, the way the Lesbianists have reversed things, and have messed around, so as to thwart your attempts to make nice detonators that work every time, unless you have a normal set of brains, which unfortunately, I have not got a pair of, or triple set, or more of. That's sort of a joke. On a magazine, yesterday, I saw how the Lesbianists teach that one part of the brain is for speech, and one area of the brain is for speaking, and one area of the brain is for sight, and one area of the brain is for logical thinking, and one area of the brain is for signing, or one area of the brain is for artistic inventioning, and so forth, but that's a lot of hog wash.

The brain is not partitioned in that way, and they know it, and they are misleading every one, and laughing at all of you while they are doing it, with their 15th to 17th century style drawings, that they have plastered on all the Time magazines, or what ever magazine cover it was on, that I saw in the check out lane, at the super market, yesterday. You have kazillions, and more of parts to your brains, and there are so many, it is unlimited, nearly, and your brains are so complex, and you have got brains in lots of other places in your bodies, other than in your head, and I'm not going to go into that one, now, but the Lesbianists are lying through their teeth, when it comes to this type of pseudo historically backwards, archaic, or cave dwelling human's notions on science, that should insult a first grader, or kindergarden school student, or preschool student.

In any case, ask your local electronics' specialist or house hold electricians' specialist, or handy man repair persons, who work for house hold water heating devices installation companies, or other electrical home appliances sales and installation companies, who also get confused, from time to time, as I've witnessed them, personally, blow up breaker circuits.

Get a qualified, and that's hard to find in so far as I've witnessed them at work, electronics' specialist to wire your detonators, or go take a course with my kids, as they have courses available on wireing such devices.

There is no minus charge, and there is no positive charge, and that is what you should understand. There is a side to the battery where there is lots of activities going on, and that is the minus sign side on the battery. The positive sign side on the battery is where there is little to very little or nearly no activity, but no activity is not the truth, either, as there is activity, you just can not measure it with todays' electronics measuring devices, as they are not

technologically sophisticated enough to be able to detect the activity, though I'm sure there have been intrepid scientists who discovered that both sides of the battery have activity, and then they were shot and killed, after that discovery, by a Lesbianist assasin, or by a hired assasin, assigned or paid to kill the scientist who discovered that there is activity at the 'minus' side of the battery as well as at the 'positive' side.

That means, that you need only concern your self with the 'minus' side, since you will not be able to detect any thing at the positive side, unless you use the reverse wired electronics and electrical energies detection devices that the Lesbianists market through Tandy, or Radio Shack, and at Sears, and so forth.

It gets confusing, a little bit, doesn't it. Anyway, go and take a course at one of my kids classes, after you sign in, and swear in as a jr. member to our new country, which I haven't sworn on to, as yet, or joined - but though I am the boss of, regardless - since my kids do not speak to me, on a daily, or weekly, or other basis, and I just happen to be able to know what they are doing as they tell me what they are doing, through some secret port hole in one of my brains some where, in my toes, or nose, or who knows where, as they telegraph or some how signal in, using semiphore signaling, or probably hand signaling, that my brain then catches, and then passes on to me, their messages that they signal in to me, and the news, as well, about what they are doing, and about what is going on with them, and about what is going on with some other things, as well.

Since I am GOD, I happen to have a right to know this stuff, what they and every body else is doing, on a daily basis, but they haven't told me how my brains catch their information, yet, or the other information that gets there, some where into my one or more of my brains, and I haven't figured it out, yet, myself, either, though I think I know something, a very little something, about how it works.

This does not mean, that my brains are unreliable - except for my memories areas of my brains, in particular - but that I am just waking up to what is going on, here, and I have a few kazillions of years to work out every thing, or some of the basics, any way.

In any case, you have all been snookered by them, with regards to their non sense sciences, and you are being laughed at, and toyed with, daily by them. That happens to be the truth, whether we find it pleasant or not.

Execute The Current President Of The United States Of America, George Walker Bush, Jr.

In any case, the Lesbianists are a twisted group of individuals, who toy with the people who live on this planet. Mrs. Hillary Clinton, Bill Clinton, George Walker Bush, Jr. President of the United States, his wife, Barbara Bush Jr., George Bush, Sr., former president, and

his wife, Barbara Bush, Sr, are all gagsters, or jokesters, who wish to only toy with you, and eat you, or deprive you of your life, and of your rights, in fiendish and horribalistic ways and manners.

They are all to be executed, especially George Walker Bush, Jr., President of the United States of America, currently residing at 1600 Pennsylvania Ave. Washington DC, in what they call the White House. You are to kill them all, and send every last one of them to my Epcot Center, as soon as is convenient for you.

Lesbianists Who Decide To Sexal In My Religion With Lesbianists And Non-Lesbianists' Persons

If any Lesbianists decide to sexal in my religion, with their friends, and their friends may include other Lesbianists who decide to sexal, as well, as well as, other people they know, then they may begin sexaling with their friends in my religion, however, they must have a pentative attitude, and they must say they are sorry, and they must now and then, when they feel they wish to, and feel emotionally and mentally capable of speaking about it, they can talk with their friends who they are sexaling with, and with others who wish to listen as well, and they can denounce the Lesbianists by telling people about the things the Lesbianists do, and did.

If they decide to do this, this is the same as surrendering, and my kids will protect them from other Lesbianists who might want to harm them. They have not sworn in, as a citizen of my and my kids' country, and as citizens of our country that every one is swearing in to as citizens, but it is sort of a promise to swear in, informal gesture that they are committed to, once they begin sexaling with their friends, and with other Lesbianists, who also wish to sexal and in time, denounce the Lesbianists with them.

Citizens By Proxy

By denouncing the Lesbianists organization, and by telling people about what the Lesbianists do and did, they are essentially stating they are sorry for what has happened, and that is a pentative attitude, and with that pentative attitude, they are accepted as citizens, by proxy.

Temporary Full Time Citizens

Citizens by proxy means they are accepted by my kids as pentative persons, who wish to join our country, and who there with, qualify as citizens of our country, in an informal manner. Citizen by proxy means, they give up their old citizen ship, to whatever government they used to belong to, and they are taken in, as temporary full time citizens.

Temporary full time citizen is a term that means they are full time citizens, but on a temporary committal agreement, and that will be made permanent when they have the chance to meet with my children, and

then can swear in, as a permanent full time citizen.

They can then participate at the collection site, in the activities that will be going on, with others, who wish to participate, as they spill their juices, and purify the area with their sexaling juices.

What To Do About Untimely Pregnancies, Health Issues, Medicines, And Regroverative Formulas

My kids will deliver to them, to the men and to the women who surrender and become citizens by proxy, and temporary full time citizens, the needed medications that will help to make their bodies, wholesome and well, and regroverated, as well as the medications that are needed to prevent untimely pregnancies.

Medical And Housing Benefits, And Other Health And Work Related Benefits

My kids will make certain that they will be given the right medications, and my kids will also provide all the same medications for each individual who participates in the collection site activities to purify the area where we will one day set up my ministry with my kids assistance. My kids will also set up other facilities, as well as the ministry facilities. The other facilities will be scattered through out the valley, and they will be the houseing units and other facilities for people to use to become physically fit, well, and well nourished, and healthy, such as gyms, aerobic studios for practicing aerobic dance, and aerobic excercises, as well as sauna and health spa, and swimming, tennis, badminton, cricket, and other sports facilities for baseball, rugby, foot ball, for those who wish to play a friendly game of foot ball, now and then, with the needed bleachers, lighting, and other supportive facilities for allowing persons to attend and watch the games that are going on, not only for foot ball, or for base ball, but also for tennis, soccer, rugby, and all out door sports facilities that will be needed.

When will my kids set up these facilities? They will set them up at the same time or shortly there after, as my kids begin to set up my ministry facilities, and the needed facilities for living and working in the valley area, sexaling for a living.

At that time, the citizens by proxy, and all other persons who have not yet sworn in, but wish to, will have the opportunity to swear in, and then they can enter and use the facilities full time, twenty four hours a day, without any further discussion about it.

All people who participate in the collection site activities, are also citizens by proxy, and as such, will automatically qualify for all medicines, all health supportive medical formulas, and all youthfulness prolonging, or regroverative formulas, that will feed all the amoebes, and other cells, or living beings in your bodies, and that will feed all the living beings in your bodies, that will then allow you to enjoy full regroveration of your body and rejuvenation of

your youthfulness, youthful energies, and of all the other health benefits that accompany a youthful body, such as more energy, a stronger libido, a more healthful body, and so on.

When do people begin this participation in the collection site activities? As soon as they come out here, to Las Vegas, and arrive in their camper trailers, or caravan buses, or other vehicles, or with their camping gear such as tents, and cooking grills, and so forth.

When Can People Begin To Come So As To Be Able To Participate?

How soon can people begin coming to participate at the collection site in the activities that will be on going at the collection site for some time to come?

They can begin coming to participate any time. My kids will watch out for the safety of all the people who come to participate in the collection site activities. My kids will prevent accidents such as current Lesbianists shooting at people at the collection site, from high rise towers, scaffolding, tall cranes, or from hotel and casino properties owned by the Lesbianists, and from other tall condominium and also from tall apartments buildings and also from normal sized, two or three storey, to eight or so stories, apartment buildings, in the area. Of course, my kids will prevent accidents from happening such as shootings, from all possible locations, and not just from those named structures and locations.

Sniper Points, Places Where Snipers Shoot From

There is no need to blow or destroy them with explosives, in Las Vegas, as there will be no way any one can use those hotels, and other structures, as shooting or sniper points, places where snipers shoot from, to harm any one who is participating at the collection site, in the collection site activities.

In time, every thing will be worked out, and all the people who must hand over their companies, or disolve their companies, and sell or get rid of the assets of their companies, all of that will be in compliance with my childrens' instructions with regards to it, as I've stated about it, already, in brief.

Once the facilities are set up by my kids, and people swear in formally, then my kids can begin to pay people their earned income, for the work they did as they sexal for a living, and for their work, as they spill their fluids, to purify the collection site, the collection site area, and the general vicinity.

Pocket Knives, Construction Tools, And Miscellaneous Daily Life Management Tools And Equipment

No one needs to bring weapons to the collection site area, or to Las Vegas, as they will not be needed, and pocket knifes are okay, and construction tools are okay, but they will be for daily use

activities, only. Daily life management tools are forks, knives, spoons, chopsticks, plates, dishes, glasses, coffee cups, can openers, bottle openers, cork pullers, and these types of things, as well as all the other types of kitchen use tools for cooking food, for eating food, for drinking beverages, and for the collection of garbage, and food wastes, and for cleaning up their eating and cooking utensils, such as portable wash basins, and portable gas stoves, or fixed stoves, fixed wash basins, fixed showers in camper trailors, and in caravan buses, and so forth.

Hookups For Travel Camping Vans And Similar Vehicles

We have no hookups at the site, for water supply, electricity, or sewage, as yet, but the instructions that my kids will make available to persons who come in to my kids' underground facilities - the protected and encapsulated living environment - those persons who go in to recieve the instructions, and other information they must recieve on companies and assets, and persons moving on, and on persons staying, and other information needed to successfully carry out the removal of hotels, and the demolition of buildings, etc. which my kids will handle with the technologies they have available to them for their use for these purposes, and for other purposes.

Cleaning Up The Area And Throwing Away The Garbage

My kids will also handle the required steps for clearing up of the litter and garbage in the area, all of Las Vegas, Pahrump, Henderson, Laughlin, Mesquite, North Las Vegas, Arizona, New Mexico, California, Utah, and beyond, above ground and below ground, and for cleaning up the areas, and for removing the underground and above ground garbage, or city buildings and Lesbianists' structures, and all structures that are no longer needed, train tracks, airports, roadways, bridges, parks, hospitals, medical clinics, and so on, all of which will no longer be needed.

Schedule For Leveling Of The Ground And Hills In The Area, Removal Of Unsightly And Smelly Garbage

Initial leveling of the grounds' areas, leveling of the uneven surface areas, and leveling of the sloping areas, and of the tiny hills, and other uneven and unuseful features to the area, such as hills, low cliffs, and removal of unsightly, smelly garbage, will be done by my kids, with the technologies they have available to them, according to the schedule for making these types of changes, and cleaning up of the area, so as to make the area, one hundred percent, useable for collection site activities, for people to then come in and use the area as a collection site.

Setting Up New Facilities

My kids will take care of all of that, and they will take care of all of the work and tasks for setting up a private collection site area - for spilling purifying sexaling juices, to purify the area - in

accordance with my kids' schedule for these works and tasks for setting up a private collection site area, with tall side walls, and barricade walls, to prevent people from rubber necking as they drive by, so as to prevent car, truck, automobile, motorbike, and bicyle accidents. My kids will also set up the latrines, and other needed hygenics facilities, sleeping accomodations, eating facilities, rehydration facilities, co-opted bathing facilities, sports and excercises facilities, and other facilities.

Co-opted facilities means facilities used co-optively by men, boys, women and girls. Co-optively means, in cooperating measures with each other. Cooperating measures means, each of the four groups of people, men, boys, women, and girls, will work together, to keep the facilities sanitary, clean and healthful, neat and tidy, and safe for use, keeping young children from playing on the stairs for the elevated latrines, and keeping young children from getting in the way of asscending and descending users of the co-optively, or cooptively managed facilities.

Fountains And Showering Lamponeers

My kids will also use their high tech teletransportation technologies for removing toddlers from the stairs, and for placing them in a much safer location, such as in a near by sand garden, or play area, with sandy areas, and with toys to play with, and with cold showers, or showering fountains, people can refresh themselves under, and with fresh water to drink.

Lamponeers are showers that shoot up from sprinkler systems embedded in the paved surfaces, or concrete like surfaces, that shower water up and over the area, up and above and over persons who are there, to cool every one off.

Restaraunts, Clubs, Lounges, Eateries, Cafeterias, Bars, Pubs, Bicyle Paths, And So Forth

Bicycle paths, mini bike paths, walking paths, with rest stations, for refreshments and food, will be set up, and restaraunts and other facilities will be set up, nearby and they will be accessable by following these foot paths, bicyle paths, waling paths, and so forth.

All needed facilities for all parties, such as accomodations, living quarters, health clinics, excerize facilties, swimming pools, saunas, spas, and clubs for eating and mingling with persons, either in light weight evening wear and garments, or partially naked, or in the buff, will also be set up by my children for the use by all legitimate collection site participants. Gurkian Laws apply, and no other laws, such as local area laws, will be enforcable. Police and others will be turned away, and the rights of participants at the collection site area, will be protected one hundred percent, as we begin to change over to the new Gurkian Laws we will all be living by, from now on.

Dealing With Criminally Minded Persons

Any violators of the Gurkian Laws, codes, statutes, and so forth, my kids will arrest, and detain, and then place into prison cells, and then sentence them, in accordance with the sentencing requirements under Gurkian Laws, etc., and they may end up doing humiliatory punishments, or community clean up activities. In any case, they will be arrested by my children, who will use their high tech, biometrics and teletransportation technologies, and their other integrated technologies that they have, to swiftly remove the violators of Gurkian Laws, from the collection site and from the collection site area, and vicinity, and that will effectively cancel out their participation, until sentencing has been given, and until penalties have been leaned.

Penalties have been leaned, means, they have undergone sentencing, and the penalties have been enforced upon the violators, i.e., the guilty parties.

Alterations, Modifications, Changes, Clearing Up And Removal Of Garbage In The Areas, And Additions Time Schedules

These modifications, alterations, changes, and additions, etc., will occur over a period of time, as my kids have a schedule for all of these changes, modifications, alterations, clean up, and additions, etc., and they must stick to the schedule, so after you arrive, if you do not see some thing you feel should be there, by then, it is not there because it is not on the priorities facilities and priorities changes, etc., schedules lists.

Texas requires cancer vaccine for girls

By LIZ AUSTIN PETERSON, Associated Press Writer

AUSTIN, Texas - Bypassing the Legislature, Republican Gov. Rick Perry signed an order Friday making Texas the first state to require that schoolgirls get vaccinated against the sexually transmitted virus that causes cervical cancer.
ADVERTISEMENT

By issuing an executive order, Perry apparently sidesteps opposition in the Legislature from conservatives and parents' rights groups who fear such a requirement would condone premarital sex and interfere with the way parents raise their children.

Beginning in September 2008, girls entering the sixth grade - meaning, generally, girls ages 11 and 12 - will have to get Gardasil, Merck & Co.'s new vaccine against strains of the human papillomavirus, or HPV.

Perry, a conservative Christian who opposes abortion and stem-cell research using embryonic cells, counts on the religious right for his political base. But he has said the cervical cancer vaccine is no different from the one that protects children against polio.

"The HPV vaccine provides us with an incredible opportunity to effectively target and prevent cervical cancer," Perry said in announcing the order.

"If there are diseases in our society that are going to cost us large amounts of money, it just makes good economic sense, not to mention the health and well-being of these individuals to have those vaccines available," he said.

Merck is bankrolling efforts to pass state laws across the country mandating Gardasil for girls as young as 11 or 12. It doubled its lobbying budget in Texas and has funneled money through Women in Government, an advocacy group made up of female state legislators around the country.

Perry has several ties to Merck and Women in Government. One of the drug company's three lobbyists in Texas is Mike Toomey, Perry's former chief of staff. His current chief of staff's mother-in-law, Texas Republican state Rep. Dianne White Delisi, is a state director for Women in Government.

Perry also received $6,000 from Merck's political action committee during his re-election campaign.

Texas allows parents to opt out of inoculations by filing an affidavit objecting to the vaccine on religious or philosophical reasons. Even with such provisions, however, conservative groups say such requirements interfere with parents' rights to make medical decisions for their children.

The federal government approved Gardasil in June, and a government advisory panel has recommended that all girls get the shots at 11 and 12, before they are likely to be sexually active.

The New Jersey-based drug company could generate billions in sales if Gardasil - at $360 for the three-shot regimen - were made mandatory across the country. Most insurance companies now cover the vaccine, which has been shown to have no serious side effects.

Merck spokeswoman Janet Skidmore would not say how much the company is spending on lobbyists or how much it has donated to Women in Government. Susan Crosby, the group's president, also declined to specify how much the drug company gave.

A top official from Merck's vaccine division sits on Women in Government's business council, and many of the bills around the

country have been introduced by members of Women in Government.

Morals For A Sane Society - It Is Now Time To Destroy The Lesbianists - Destroying The White House, Balitimore, Maryland, And Virginia, Killing The President Of The United States, Mr. George Walker Bush, Jr., And Sinking The Eastern Coastline Of The United States Into The Atlantic Ocean - Chaos Every Where In My Universe - Bringing An End To The Chaos In My Universe - Surrendering And Repentance - Lesbianists With Non Repenentant Attitudes Who Will Not Surrender - Orders To Kill All Presdential Candidates, Etc. - New Coins Ready And Are The Ever Useful To Us! - Public Nudity And Public Sexaling - What Does The New Moralicity Mean, In Plain Language? Sexaling Is An Absolute 'Good' And An Aboslute 'Right' - Free Action Sexaling Updated: 13-02-07 Rev.a. 00.a PST 23:25

Morals For A Sane Society

To not fuck a person when you can fuck a person is a wicked act.

Not to fuck a man or a woman in the mouthal hole, or in the buttal hole, or to not fuck a woman in the vaginal hole, when you can, and when you are healthy, and when you have the time for it, by refusing, for what ever reason, other than mental illness, or 'gayist' reasons, you are committing a cheap and wicked act, when you refuse to fuck the other person, and use your dick, or your tounge to felate or kiss and tickle, and lick at the ladies' groinal area, and her vaginal cleavage, and vaginal flaps, or labial flaps, or labial tissue, and also her labial throes.

To not suckal a dick or a scrotum or tickle the males' groinal area, with your tounge, or with your fingers, and so forth, when you are able, and ready, and capable, is a cheap and wicked act, whether you are a woman or a man, girl or a boy.

You are given demerit points for not sexaling when you can and are able to sexal, and your time permits it.

To not participate in sexaling when you can participate in sexaling, is a wicked act. To prevent others from sexaling with you, or prevent a person from sexaling with you and your friends, these are both wicked acts.

A kindly and goodly person is a person who sexals all he or she can and who participates in sexaling with people, all he or she can, when ever he or she can to help those people, and one self, to erase the negative karmic markups each person has, and to help to create the wonderful energies that you can create by sexaling, and to change our universe into the nice place we need to change it into for us to live in, prospering with each other, in kindly loving embraces with each other.

If you stand or sit, talking, drinking, eating, with your clothes on, arguing, and discussing football, or baseball, or the local news on TV, or whatever, and you if you are not sexaling, as a result of your actions, when in fact, you could be sexaling, and helping to purify all the people around you, and yourself, as well, you are commiting an evil act, and an immoral act. It is immoral to behave in an uninterested manner, towards sexaling, and towards helping others by sexaling to purify their karmic markups. You are engaging in wicked, unkindly, and evil behavior, by non chalantly staring out the window, at a restaraunt, or in your car, with others around you, thinking about your miscellaneous thoughts, and by your not attempting to purify others, with every ounce of energy you have got, by sexaling with them, in a safe manner.

We do not want you to drive down the road, sexaling, and not paying attention to the traffic, and thereby causing accidents, and there be causeing harm and injury to self and to others, thereby preventing one self and others from their being able to freely mobilate, or move around freely, or ambulate, as they say in modern English, and then freely participate in sexalating activities of fucking, sucking, tounging, massaging the bodies, and the titties, and buttholes of women and girls, and massaging their kissing lips, and their vaginal lips, their facial cheeks, and their butt cheeks, and so forth. You must drive safely, and make it home, to a safe place, where you and your friends can freely sexalate with each other, without others interefereing with you.

A wicked or evil person is one who prevents a person from sexaling, and who destroys or ruins another person, physically, mentally, morally, emotionally, psychologically, or psychically, so that the other person can not participate freely and fully in holy and pure, GODLY sexaling activities.

This type of person who prevents others is a ruinous person, who will invite ruin and disaster to his or her doorsteps, and into his or her life.

There are many ruinous people, who execute others, and who torture, and cause pain, and suffering to others, and who disfigures others. These people who execute others, and who terminate their ability to sexal, prospering with others, making our universe into the kind of nice place we all want to be living in, together with each other, are wicked and evil people.

It Is Now Time To Destroy The Lesbianists

However, when we have a problem of the size and the magnitude of the Lesbianists, that we have, today, in this period of chaos, across my universe, and the Lesbianists' who are toying with humanity, and with all human beings who are not Lesbianists, it is time for us to take action, to prevent them from toying with us, and put a stop to their amusing themselves with their toying with us, any further, and it is now time to destroy them.

"I am Arjuna, a wickedly angry man, and I come to protect those who can not protect themselves. I will kill and thrust my sword and lance through the hearts of men and women who evilly try to prevent people from being prosperously good and bekindly to others."

This is a stanza or sentence from one of my writings, of old. 'Wickedly angry' in this sentence means, outraged, and furious, so much so, every one is scared and afraid of me.

I am 'wickedly angry' and I am here 'to destroy' those who would fuck us up, and ruin our lives, and make our lives miserable, as they toy with us.

My name is GOd, but in my Buddhist scriptures, I am referred to by many names. One of my many names, as I appear to people, in many and various personas, is Arjuna.

I have many sides to my character, as I am GOD, and I am here to protect my children, no matter what the name is people use to refer to me by, and that I am known by, and no matter how it is and no matter who it is among my many children, who I will protect from wicked and ruinous people.

Destroying The White House, Balitimore, Maryland, And Virginia, Killing The President Of The United States, Mr. George Walker Bush, Jr., And Sinking The Eastern Coastline Of The United States Into The Atlantic Ocean

There will not be any further Lesbianists living in Washington DC, or in Baltimore Maryland, or in Northern Virginia, and that vicinity, above ground, and below ground, if some one will be so kind as to place a very large explosives, fuels, chlorine, high heat burning metals fragments, and fracturable rocks bomb, outside the gates to the Washington DC White House, where the number one enemy, Mr. George Walker Bush, Jr., President of the United States, lives, and works, and then detonates that bomb, out side the gates of the White House, where the president lives, currently, and then destroys him, and his

White House, a lair for Lesbianists, with multitudes of torture rooms, i.e, lots of them, below and inside of the White House.

You will destroy and kill the President of the United States, Mr. George Walker Bush, Jr., and Mrs. Barbara Bush, Jr. and every one else who lives at 1600 Pennsylvania Ave. Washington DC.

Why are we going to throw all these people into my Epcot Center. Once in my Epcot Center, they can freely sexal with each other and they can earn merit points.

That will help them straighten out their karma, and it will help them to have a nicer life, when they are born as tummy babies. There are many tummy mommies who will match up with these people, and when they come out as tummy babies, they can start their life, with us, out here in my universe with us, again.

Am I a wicked wrongful person for terminating so many people's lifes? No. Why not? Because that is the only way we can over throw the vastly wicked and evil Lesbianists who practically rule my universe, with their perverse friends, and there are many groups of perverse friends, who we are going to get rid of, and send into my Epcot Center, one after another, as we move ahead, in our efforts to clean up our universe, and in our efforts to stop this nonsense of senseless killings and torturings of people, for amusement, and for game playing.

The Washington White House is one of the homes for these perverse people who game play and toy with all human beings who are not Lesbianists, who live on this planet.

We have many Lesbianists to trash, and to say good bye to, before we can begin to get our world, straightened out, and started up again, with a new culture, with new morals.

We will throw out their old cultures, their Lesbianistic cultures, and we will replace them with our new culture, and our new civilization, that is based on my religion, and on the sanctity of sexaling as a common sense value.

Sexaling is a sacred and holy act. Even if you sexal with a kangaroo, or a chimp, it is still a sacred and holy act.

Why is that? It is because every body is made of something, and that something comes from me, GOD. That something from me, is pure and holy, as I am pure and holy. I designed every person, and every animal, and every living being, with sexaling capabilities that allow that pure and holy GODLYNESS to come out once they begin sexaling.

That GODLYNESS begins to radiate out, as each person begins sexaing, and as each animal begins sexaling, and as each living being begins sexaling, eroteming, orgasming, and phlumetting, and it purifies each and every living being, and washes away the karmic markups every

person, and every animal, and every living being, has in them, and has stored in the molecules that are stacked up in my universe, out side the boundarary walls that hold this universe up, and that keep us in side of the area we are in, and that keep the rest of my universe standing up, stable, making this a safe place to live, at least, safe in so far as nothing comes crashing down on us.

My kids are expert builders, and it is thanks to them, that we have such a nice and safe, and well built universe to live in. It is also thanks to them, that we have these bodies to live in, and to sexal with, since my kids put us together, one molecule at a time, as we need to have our parts put together, along with all the anmials, and living beings, who are inside of us, that my children also assemble for me, and for us.

What is this GODLYNESS? It is a purifying force, that is of me, and is me. It is inside of every one, and inside of every creature, animal, and living being, in my creation.

This is woven into the fabric of your being, and it is of me, and is always a part of me, and is always connected to me. Since I am always pure, and GODLY, you have a possibility of becomeing pure, and holy, like me.

Right now, we are filthy, and grimey, and all gunked up, with sludge, and residues of our karmic heritage. We have done many things that contribute to who we are, and to what we experience, day to day, and if we are not happy with our life, that is because we have the karmic records and markups that dictate that we must be in this miserable and suffering condition, that we are in, today.

There is always sufferring, and unwholesomeness, in our lives, and around us, every day. There are many wicked things that go on, every day. People perpetrate wicked acts, daily, and they go on, unpunished, for a long time, until their karmic markups begin to add up to sufferings coming out, in that person's life.

Sufferings are your payback for your wicked acts, and they help to keep our universe in balance, as I've spoken about, a little, before.

It may seem unwholesome that I ask you to kill my kids, and put them into my Epcot Center, where they can sexal, and where they can get retrained, and where they can be taught to be nice people, after they are retrained, but my asking you to kill my kids, this is merely an expedient, or a means to an end, and it is permissable, given the circumstances, and given the situation, and given that we are at the begining of our new Age of Gurkian Englightenment.

The result we wish to see by killing them, is an end to the activities of the Lesbianists, and and end to the activities of other people like them, in my universe. The Lesbianists are ruining my universe, and ruining the lives of every body in my universe, and though this was the way things were balanced out, prior to now, we are starting out,

with a new method of 'payback' and a new means to balance out the karmic balance book. This is all to be governed by my rules and regulations, that my kids will enforce, in our new, Gurkian Age of Enlightenment, begining about now.

Our killing the Lesbianists, will help to control their ruinous and heinous behavior and activities, and it will help us to get them out of the picture for a while, until we are able to set up our new government, globally, or universal wide, across our universe, in a one universe government, over seeing the activities of all of my kids. It is the only way we have to begin to get our selves straightened out, and onto our new path, that we will follow, for the rest of eternity.

This marks the begining of the Gurkian Age of Engligtenment, and it marks the end of the previous period, or random, or just about nearly random, chaos.

We went through a very long period of decline, untill we got to the period of chaos that we are in, now. This period of chaos, we call, the 'melt down' period.

The 'melt down' period, came after the 'run amuck' period, when my kids began their severely ruinous activities that led to the period of chaos that we are now in.

Chaos Every Where In My Universe

We are going to begin to pull ourselves out of this period of chaos, with the help of my religion, and with our religious activities, and it is going to take us a very long time to pull ourselves out of it, as this 'chaos' is going on every where in my universe.

It will take us a long time to begin to be able to erase our karma enough, based on my religious principals, and the ethics of the Gurkian Age of Englightenment, and our religious activities of sexaling, dancing and excercising, and sexaling in syncopation with the metronome, at one thirty seventh and one fifth, or so, to then some day be able to have erased enough karma, to be rid of, completely, all these horribalistic people, my horribalistic kids, in my universe. When I say, be rid of them, I'm not saying, to trash them, completely. I am saying, we will put a stop to their activities, by changing our karma, and by purifying ourselves with my religion and our religious activities of sexaling, keeping time, in synch with my children, as we sexal, and as we activiate, playing basketball, tennis, or as we swim, or as we pray Nam Myeo Ho Ren Ge Kyeo, and so forth.

Bringing An End To The Chaos In My Universe

We are going to bring an end to the chaos, and to the chaotic behavior, and abberant, ruinous behavior in our universe, as we bring this period of chaos to a close. We will, as we steadily move forward, open the way for the budding and flowering of the Gurkian Age of

Enlightenment, and to the budding and flowering of the new age of friendship and loving care, among all of my children, who participate in my religious, social, economic, and karmic revolution, as we sexal with each other, lovingly, and strive to clearify and erase our karmic markups, sexaling, and synching our activities to one thirty seventh and one fifth on the metronome. Later we will fix our metronomes to keep exact pace in synch with my children, and after we fix and reset the timing scale of the metronome, the timing will be one thirty seventh, exactly, on the metronome.

Our sexaling will produce all types of wonderful, purifying energies, that will revive our universe, and that will revive us, and that will help us to reclaim our universe, and that will help us to live, prosperously, and prosperingly in our universe, together, with each other, and with every one of my children, as we reform the bad and naughty ones, who are wicked and unkind to others, and who prevent people from sexaling, together, with each other.

That means, we are going to kill all the bible thumpers, Pat Robertson, Orwell Roberts, Billy Grahm, Tammy Faye, Jim Faye, and all the other Lesbianists of every religious faction, or group, whether they are Lesbianists who are christians, islamists, judaists, shiites, hindus, buddhists, black moslems i.e., afro american black muslims, or whatever.

We are going to destroy them all, all who would try to prevent us from what we are attempting to accomplish, a global, universal wide, government, run by me, GOD/GOd, as I am the Captain of this ship, and then we are going to begin our new age of Enlightenment, hand in hand with each other, and when they come out of my Epcot Center, again, next time, to be born as tummy babies, to tummy mommies, and to tummy daddies, we will teach them the new rules, ethics, and morals of our new universal wide society, and then we will begin again with them, and raise them in accordance with the new rules, laws, regulations, ethics, and morals of our Gurkian Age of Enlightenment, led by me, GOD/GOd.

Surrendering And Repentance

Those who will surrender, will be allowed to be repentantent, and they will be forgiven for their misgiven, misbegotten, and ill minded ways, once they begin sexaling with the rest of us, and participating in our religious, economic, and social revolution, and once they begin following Gurkian laws, rules, ethics, the codes and norms of behavior, and our righteous, and correct morals, acting and exerting one's efforts for the sake of others, never sparing a moment of energies, wastefully on trivial and trite activities of gossipping, mischiefing, or other harmful, and potentially ruinous, wicked, and evil behavior.

Lesbianists With Non Repenentant Attitudes Who Will Not Surrender

Those who will not surrender, we will send to my Epcot Center, as that is the only way we can get them out of the picture, temporairily, so that we can then get things in order, before they return, once again, as tummy babies, into the lives of tummy mommies, and tummy daddies.

Orders To Kill All Presdential Candidates, Etc.

You are hereby authorized by me, GOD, John Francis Ayres, to kill all United States Presdential candidates, including but not limited to, Barack Obama, Hillary Clinton, and Mitt Romney. They are to be executed on sight. Also, you are ordered to kill all non repentent Lesbianists, such as, Vice President Dick Cheney, Tony Blair, Butros Gauley, Oliver North, Colin Powell, Oliver Poindexter, Casper Willard Weinberger, United States Supreme Court Chief Justice John Roberts, Associate Justices, John Paul Stevens, Anthony Kennedy, David Souter, Clarence Thomas, Ruth Bader Ginsburg, Stephen Breyer, Samuel Alito, Antonin Gregory Scalia, Arnold Swarzneggar, Sylvestor Stallone, Robert Deniro, Gary Busey, Kevin Sorbo, Timothy Dalton, Michael Jackson, Matt Damon, Bruce Willis, Mila Jovovich, Peter Jennings, all members of the United States Congress who are Lesbianists, and all other Lesbianists, whether in politics or not, and in whatever government you find them, around the world. There are many Lesbianists in local and metropolitan police departments, and in SWAT Team units, and in fire departments, and in the National Guard units throughout the United States, and Lesbianists own every news media organization, television corporation, cable television corporation, satelite television corporation, major radio station, transportation corporation, chemicals corporation, petroleum corporation, coal mining corporation, as well as every other major corporation around the world. You are to kill every last one of them, and spare no one. We will then destroy every underground city they are hiding in, and force them to surrender. If not, we will kill them all, and I authorize you to do exactly that, kill every last one of them, all thirteen billion plus Lesbianists, hiding under the surface of our planet, or out walking about, pretending to be an ordinary citizen on this planet. Nothing is further from the truth, and you are authorized to kill each and every one of them, and send them all to my Epcot Center, using what ever means available, including my tactical, powerful, home made radiological explosives bombs, i.e., nuclear explosives. Please study my notes on my web site for further details regarding radiological fracturable rocks, and my notes on how to make an explosive weapon to detonate nuclear materials, you can find along beach shorelines, in sediments deposits, and on old mountains, every where on our planet, if you have a geiger counter.

New Coins Ready And Are The Ever Useful To Us!

http://money.aol.com/news/articles/_a/new-dollar-coins-enter-circulation-this/20070211095409990001?ncid=NWS00010000000001

"Updated:2007-02-11 15:20:31"
"New Dollar Coins Enter Circulation This Week"
"By WILL LESTER"

"AP"
"WASHINGTON (Feb. 11) - Maybe Susan B. Anthony and Sacagawea should not take public rejection personally. It's not easy overcoming people's indifference to dollar coins, even those honoring such historic figures."

See also,

http://news.yahoo.com/s/ap/20070211/ap_on_bi_ge/money_ap_poll

The new coins reportedly have many fracturable rocks in them, as the metals used, were mined from deposits of minerals that contain large amounts of fracturable rocks.

They also have high heats and high temperatures burning minerals in them, that will level up your thermal temperatures to near solar temperatures, if grinded up and mixed in, and allowed to ferment, in sour berry juices, slowly, with tiny amounts of salt, and large amounts of raw sugar.

The high heat temperatures, and the energies produced at these higher heat levels, will reach near solar heats energies temperatures, and that is very important for developing the energies needed to wake up every body, in the fracturable rocks - or 'fissile' materials, in Lesbianists' speak, or Lesbianists' mumbo jumbo language - to get them to begin making children and families.

Please see my notes on 'Radiological' crystals cages salts kiddies, and other related energical animals kiddies, of various, and hard to imagine, types, unless you're a kid and unless you have the mental flexibilities and typical mental gymnastics capabilities of a normal child, unhindered by brainwashed thinking and brainwashed patterns of thought the Lesbianists have caged, and closeted in the dark, our brains with.

Public Nudity And Public Sexaling

Public nudity and public sexaling is now a way of life for all, in our, now, Gurkian Age of Enlightenment. We will begin broadcasting live sexaling events, and other entertaining and informational, educational programming,, as soon as I get my new quarters, a unit to live in, where I can eat more properly, sleep more properly, recieve the medical health aides and regroverative formulas, that I need, and where I can practice my religious ceremonies, with others, daily.

The public broadcasting of various informational programing, educational programing, sexaling entertainment programing, sexical, hygenical i.e., sexaling hygene, and sexical educational programing as well as sexical training programing, as well as my religious ceremonial sexaling activities, and my general, more typical day to day, religious ceremonialing, for now, until I get my health up to a level of youthful vigor, and robust wellness, as I religiously interact with my students, and train them, the disciple priestesses,

and disciple priests, will all help to set the basis of normative, and expected, social behavior, for all people in our universe, to learn about, now in our Gurkian Age of Enlightenment, so that we can all get along, with one primary set of customs and standard of behavior, and with one primary language for communication, as we will all be sexaling with each other - all of my children who are now just begining to get with the program, at least, anyway, will be sexaling with each other - from now on, and for all eternity.

We need this exposure, as well as alternative programing, for laundering up to, and for begining to expose ourselves to, and learn about, the reality of the universe, my universe, that we live in.

Laundering up to, means, exposing ourselves to the mischievous antics of the Lesbianists, to launder their filthy, garbagical, and tormentuous ways, so that all may learn about them.

This will be coming up, in the near future, possibly, as far as I can determine, any way, after we have the spilling of the sexaling fluids campaign under way for purifying the area where I will be setting up my religious ministry, on the parcel of land, on the north west corner of the intersection at West Tropicana Ave. and South Decature Blud., Las Vegas, Nevada, and possibly on confiscated properties to the north, as well as to the west, for now. This is a public service, informational bulletin, on what you are to expect, in the near future. Prepare yourselves, accordingly.

What Does The New Moralicity Mean, In Plain Language?

Our new moralicity means we are going to learn we can and should sexal with every person, and even with animals, when we have a chance or opportunity to sexal with people and animals, and that we can and should sexal with every person we see, so long as we have a mutual reciprocical understanding of the truth to sexaling, that it is a pure, blessed, and holy act, GOD, me, made possible, to purify you of your blemishes. It is the most significant and powerful way to purify you of your blemishes and karma

You can also clearify your blemishes, your karmic markups, by praying Nam Myeo Ho Ren Ge Kyeo, and by your keeping syncopated and in rythm with my children, helping my children to work smoothly, syncopated and in rythm with each other, perfectly fluxed, meshed perfectly with all my other children, working at different life spins, as I've mentioned about, as my kids will reward you by sprinkling faerie dusts, purifying energies, and other types of related, purifying things and dings, all over you, as a reward for your cooperation in keeping my universe, humming, and running, smoothly.

With your syncopated rythms, your syncopated pace of movement, and actions, as you time your motions, and stay in synch with one thirty seventh on the metronome, plus one fith of a mark on the metronome we currently have available to us, here, on our planet, during your

activitiating, sexaling, playing sports, dancing, excercising, and so forth, you will purify your life, and you will purify the lives of those around you, with your actions, as you get rewarded by my children.

Our new moralicity means we can and should sexal with each and every person possible, in free association with each other, no matter what the age of the person, and no matter what the gender of the person, no matter what the tribal background is, no matter what the tribal heritage is, any place no matter where we are, any time no matter what the time of day or the time of night it is, in public spaces or in private living spaces any and all places, no matter who else is around us, as sexaling is a blessed act that my kids reward you for, any time, every time, no matter where you are sexaling, and no matter with who you are sexaling with, or even no matter what type of animal you are sexaling with.

It means there are no bullshit, propagandists' Lesbianists dreamed up taboos, any longer, regarding sexaling, and that sexaling is a blessed act, and not a 'forbidden' act, as the bullshit Lesbianistic Christians, Muslims, and other religious 'pious' bullshit assholes, who would want us to believe that sexaling is forbidden by 'God', which is complete and total bullshit, and a lie, as they base them selfs on their 'holier than thou' pious 'ignorance' of the truth.

So long as you and the person or persons you are with are equally, mutually, and reciprocally interested in purifying your lifes, and interested in clearifying your karmic markups, and interested in helping my children work in synch with each other, and interested in helping to push my children along, with your energies, and efforts, and so long as you can sexal together with one and each other, without damaging either or any of the participants, it is morally correct behavior, and any person or actions to prevent that morally correct behavior must be condemned, and punished.

Some people, especially young participants, do not have butt holes, mouthal holes, or vaginal holes that are large enough to swallow a dick, or mouthal holes that are large enough to swallow a tittie and suckle it fully, without straining.

You need to spend several hours phlooching out the butt hole, or phlooching out the mouthal hole and throat, and phlooching out the vaginal hole, with generous massage over several hours to the muscles and tendons in the neck, mouth, nose, eye ridges, ears, throat, face, chest, tummy, back, arms, hands, fingers, shoulders, titties, thighs, hips, waist, groinal area, labial folds, vaginal lips, facial lips, male genitals, and the entire torso, back and front, the legs and feet, ankles, and toes, as well, and all parts and areas from head to toes and in between, with continued efforts to massage all these places, until the body begins to respond, and until the body responds fully.

The butthole will loosen up, and the throat hole will loosen, and the mouthal hole will widen, and the vaginal cavity and vaginal mouth will widen and expand in size, and the groin in girls will spread apart, allowing for more room for access to the vagina, and for smoother access to the butthole, as the hips loosen up, and begin to spread apart in response to your efforts at massaging the body, to prepare it for sexaling.

No matter how old a girl is, and in the case of a boy, no matter how old the boy is, baby, child, adolescent, or adult, phlooching out the sexaling orifices, is easy, if you spend the needed time on preparatory and thorough massage, sufficiently enough.

That's how I designed your bodies to respond to massage efforts to loosen up the muscles, ligaments, sinews, cartiladges, so as to allow the bones of the body to move and spread apart, freely, and loosenly. Your body is like a rubber band, and if you massage it, well enough, it will begin to respond like a rubber band, and it will loosen up, and spread apart, where it needs to spread apart, so as to allow you to sexal, thoroughly, and continually, for as long as you continue your sexaling activities.

After you finish your sexaling activities, your body will begin to stiffen up, as all the ligaments, sinews, cartiladges, muscles, and fiberous threads throughout your body, begin to tighten up, for returning to daily life, working activities, where you need a hard, and tough body, to survive, as you work in the field, or work in the rice paddies, or work on the farms, to labor for producing crops for feeding you, your families, your children, relatives, tribal village friends and tribal villages neigbors, who are, or who used to be, traditionally, as life used to evolve for us, all related to all of those concerned in the area, or on the planet, for that matter, or in the entire galaxy, or spread out over many galaxies, and even spread out over even larger, and wider areas of my universe in the large, familiies that used to be the norm.

You may need to spend several hours, or even several days, or maybe even longer, a number of weeks, or even a number of months, before the body will begin to respond, and begin to flex, and bend, to help all the ligaments, sinews, cartiladges, tendons, muscles, and all the body parts, and supporting, interwoven parts of your bodies, as I've briefly talked about, before, as well as all the lubing stations, that will eject fluids to assist in the loosening up of your bodies' ligaments, sinews, cartiladges, tendons, muscles, and even the bones, to allow them to be more flexible, including the jaw bones, facial bones, neck bones, spinal bones, leg bones, thigh bones, hips bones, pelvic bones, buttal bones, groinal bones, back bones, and all the bones of the body. Every bone in your body will loosen up, and become more flexible, and pliant, durile, durable and tensilely strong, as you massage all the parts of your body, and the bodies of the people you are sexaling with, very young, young, adolescent, adult, middle aged, elderly, and even the ancient, or the extremely very old.

This is the truth to this matter, and you can find out for your selves, if you try and see how your bodies respond, to daily, rigorous, continued massage, over various lengths or periods of time.

This is part of the ancient and old art of sexaling, as I taught in my religious teachings, in every religion that I taught, and I have taught a lot of religions in my time, to lots of different peoples in my universe, from the begining of our time, here, together, in our universe, after we arrived, which I've talked a little about, before.

Sexaling Is An Absolute 'Good' And An Aboslute 'Right'

Even the veryest oldest and the veryest youngest have a right, duty, and obligation to sexal and produce holy, sacred, sanctifying, i.e., to make sacred, holy, and pure, harmonious, purifying energies.

It is an 'A B S O L U T E' RIGHT as in, a 'right' to free speech.

It is also an 'A B S O L U T E' RIGHT as in, 'this is right, correct, upstanding, laudable, commendable, proven to be always right, correct, true, holy, graceful or GODlYNESS and GOODLYNESS gracefilled, morally right, morally correct, morally absolutely right, and morally absolutely correct', as opposed to, right and wrong, i.e., as in the opposite of wrong, as in, that is wrong, that is incorrect, evil, hateful, sinful, morally inaccurate, morally wrong, morally defunct, undoable as it will not stand, and useless,'.

It is also an 'A B S O L U T E' GOOD and an 'A B S O L U T E' GOODNESS.

Free Action Sexaling

Anything that counters, or runs contrary to this, is an 'A B S O L U T E' WRONG, and an 'A B S O L U T E' EVIL. It is absolutely wrongful to deny or to prohibit or to interfere with, in any way, with any one who wishes to sexal, as THAT PERSON IS CLEANING UP MY UNIVERSE WITH HIS DICK, OR WITH HER VAGINA, BUTT, AND TITTIES, AND WITH HIS PURIFYING ENERGIES, OR WITH HER PURIFYING ENERGIES! DO YOU UNDERSTAND THAT?

Any body who even attempts to impede, to deny, to prevent, or to interfere with, in any way at all, with a person's absolute right to sexal runs counter to Gurkian laws, regulations, codes, ethics, morals, standards, and you will serve jail or prison time, for prohibiting, or interfering, or impeding, or violating in any way, a person's absolute right to free action sexaling, which is, the act of freely chooseing who one wishes to sexal with. DO YOU UNDERSTAND THAT, SOLDIER? GOOD! BECAUSE A "NO SIR!" WOULD BE INAPPROPRITATE AND UNACCEPTABLE!

To learn more on these subjects, swear in, and become a citizen of our country, and begin studying, and working in the many programs my children have for you to study and work in, to score earning points, and to earn a living in our new, Gurkian Age of Enligtenment, where

and now that we work, and we pay as we go.

Those who refuse to work, in time, will be required to work, to pay off their debts and to pay off the fees that are owed for the use of my resources, all the molecules in my universe, and all the resources, energical, or otherwise.

Even though I am GOD, in our new system of working in my Gurkian Age of Enlightenment, even I have to pay for the resources that I use, as I work as chief priest of my religion, spiritual director of my universe, and boss of my universe.

I'm the mother and father, the creator of all humans, animals, and living beings, as I've explained, every thing in my creation, and people will begin to understand that, that I am GOD, as they practice my religion, over the years, and over the aeons, and over the millenias.

The people who refuse to work, will be required to work in prisons, sexaling with animals, to produce sexaling energies that will restore the supplies of energies in our universe, as I've mentioned about, before, as they work and learn their new trade of animal husbandry, and animal wifery, in the animal habitry industry, as I've also mentioned about, in earlier notes.

No matter what the age of the person, every person can participate in our Gurkian Age Of Enlightenment, sexaling, dancing, excercising, and syncopating their movements, in rythm, to assist my kids as my kids, work to keep my universe, strong, durile, flexible, safe, and a nice place for every one to live in.

DO YOU UNDERSTAND THAT? YOU HAD BETTER, AS A "NO SIR!" WOULD BE UNACCEPTABLE, SOLDIER! DO YOU HEAR ME? I HOPE YOU DO! NOW, GET TO WORK AND SEXAL TILL YOU DROP, SOLDIER, AND I'M NOT JOKING!

We will build a nice and comfortable, safe place for every one to live, now, in my universe, and we will follow the Gurkian Age of Enlightenment Rules and Regulations, Codes, Morals, Ethics, and behavioral norms, that you are required to live by, now that we are going to become, one, very big, happy, harmonious, in synch, prospering family.

You will not forget to wash out your butty butt holes, and to flush out your vaginas, and your mouths, and to practice proper and health promoting sexaling and love making hygene, with the medical formulas that my children will be providing to you, and that you will pay for, out of your earnings, and they are very reasonably priced, now that I am making every thing available to every one, at a set, yet, flexible, and low cost for the use of my resources, once you citizenize your selfs, and swear in, as a citizen of our new, global, i.e., universal wide, one universe, family of GOD's, that's me, children.

The costs are flexible, in the sense that you do not have to pay, yet, as you will be learning about the ways to work, and you will be learing and preparing your selfs for a new working life, in my universe, for some time, and so we have no hurry to have you pay for the resources you use. We can collect the fees, and costs for resources, in the future, when you are a big money earner, once you learn your new work requirements, for sexaling for a living, as that is the only job opportunity open to every one, and the only job opportunity, that you have a choice about.

My working children, though they do have many different jobs, they have basically the same set up, or arrangements as you now will have, and so you will be joining my children, and you will be working, i.e., sexaling, excercising, aerobically dancing, and so forth, in synch, and in rythm, for me, just as all of my children are doing, at least, those of my children who are able to work, and who are bright and intelligent enough to work for me, to keep my universe, healthy, safe, solid, durile, strong, wholesome, and a nice place to live in.

That means, I have a lot of burnouts kids, and rampant, vagarous, dangerous children, who are not really very bright, and they do not work for me, yet, but they will, in time, regardless of the fact that they may at the present, be abominants kids, or not.

As I've mentioned, all my up until now, non working children, are abominants. What does that mean? It means, they do not give a darn about killing another person. They kill for selfish reasons, and for fun and games, and so forth, and you are all guilty of that, though you may not remember that you killed for fun and games, and for selfish reasons, in previous lifes, in my universe, but you all have, and you are all abominants, of varying degrees.

So, welcome to the Gurkian Age of Enlightenment, and welcome to my workforce.

Captain Off The Bridge.

Interestingly you are the one talking so much about it. Must be true
that you want some cock too Scheissman.

1177. you plea for attenion is granted

No you don't. If you had any cojones, you'd own up to your nyms. You are a rank coward, Wabbit. The entire Bush admin put together manages to have more courage than you, though not by much. Oil company executives who denounce "global warming" as phony science still have more courage than you (and they have all the personal integrity of a popped balloon).

I've got the conversion from vinyl to CD down to a science. I even run it through the rice crispy filter. Once the loud noise spikes are removed I can increase the volume to almost 0db. Of course, I've been throwing away lots of bits to make MP3's for my MP3 player. I always save the lossless files.

Same here, been doing a lot of conversions since I got a 200+ gig hard drive
that can handle all my 8 tracks......Just for you Jim..... LMAO!!!
Seriously, I have been converting a ton of albums into MP3's, tend not to
skip when out off roading.

I didn't start the subject or even mentioned sex, YOU did when you called me a pervert. Then when I pointed out the fact the your bi/gay lifestyle is devient, you didn't agree. I only commented on the other post that I thought the phonetics were comincal. You could of simple commented that you didn't like the humor, but you had to get nasty and resort to name calling. Maybe if you didn't act like an asshole all the time people would treat you with respect.

Keep on responding puppet. My friends are looking over my shoulder
laughing like a bunch of maniacs. They can't believe that you think I
am attacking you. Dave said your a mommies boy pussy.
Fucking pussy!

Time to go out. Puppet, I'll pull you strings later.

Such behaviour is not deviant to Mark. To him, what he does is "normal".
Just ask him. He has a room full of reasons to justify his proclivities.

The perversions are yours, Mark. You are the one who sees sexual innuendo in every post even where none exist.

You have an unnatural obsession with things sexual. Sensetive, are we?

Roger doesn't have any friends so we know that is a lie!

1240. Cobra 2010 loses Tx audio

Newsgroup: rec.radio.cb
Date: 2007-02-17 07:59:59 UTC
From: Pete KE9OA <p.gianako@comcast.net>
Message-ID: <24GdnZZDv9ZkKEvYnZ2dnUVZ_sSmnZ2d@comcast.com>
Source record: 229195

Another eBay special that "worked perfectly". It doesn't matter if I put in an external audio source from an audio oscillator or a microphone. I've tried three good microphones, and have the same problem. When I first key the mic, Tx audio is fine, but it quickly, almost abruptly fades after about 2 seconds. Has anybody seen this problem?

Pete

Assuming your ground plane is at least nine square feet.....

Someone screwed with the audio AGC. Whoever did it probably screwed up
other stuff, too. You should take it to a shop to have the whole radio
re-aligned.

You got that right. Mark thinks everytime he sees the work suck, its
sexual. I guess a baby sucking milk from a bottle arouses his sick
mind.

Billy Boy, I told you to stop trying to gain glory by riding on
Marqueer's coat tails. Now go play with your cartoon pedophilia. BTW,
stop thinking that every post is from Woger. You must have secret
obsession with Woger or Scheissman, because you think every post is
from one or the other.

Dloyd Lavies, Sweat Lord and Talk Show Buffoon

"In the Domestic Rear"

Sounds like a RESISTOR is changing value causing the bias to change on the input preamp.

S'funny. I still have a portable one, no radio, justt an old ass protable 8 track player that still works. It's the tapes that sound awful. I'm still trying to make a susccessful transition from vinyl to CD with mediocre success. Damn CD's just sound flat and ANY BMG CD is garbage. It's like BMG turned down the recording level. There are a number of cool bands doing the live recording thing, like the Allman Bros. You can buy the show you just attended on CD thirty minutes after the band walks off stage.

>I've got the conversion from vinyl to CD down

>to a science. I even run it through the rice

>crispy filter. Once the loud noise spikes are

>removed I can increase the volume to almost

>0db.

I seriously need to update my stereo equipment. In addition to the old float-style tuner knob stereo, I have the first receiver model Sony produced after going digital in the eighties. Speakers range from Pioneer cabinets on the floor (circa 1976) to the Jensens sitting atop of the Pioneers, two angled-Bose speakers mounted on the wall and two JBL bookshelf speakers.

> Of course, I've been throwing away lots of bits
>to make MP3's for my MP3 player. I always

>save the lossless files.

I haven't even started moving anything to pc yet.

Legal but obnoxious. Of course that is the reputation you want anyway.

Dave WD9BD

BTW: the beeps used in astronaut communications has a functional
application in that it is used to operate the various transmitters used
in space communications.

Thanks for the tip. The problem is definitely in the modulation stage. It appears that the operating point of one of the preamplifier transistors is changing into a nonlinear region. I didn't see any new soldering that had been done, and all of the coils still have the wax intact. The receiver sensitivity measures at , < 0.1uV across the whole band, so that section is working fine. This unit has one of the hottest receivers I have seen in a long time; this is the reason I want to restore it. I do have the service manual, but I have never seen this kind of problem.
For testing purposes, I am using a CT Systems Model 3000B Communications Test Set. For the brief time that Tx audio is present, the modulation envelope looks fine. This unit has a built in 100W dummy load.
RF output is flat across the band, at 4.5W, so it doesn't look like somebody tried to align the exciter/output stages.
It looks like I will have to do some signal tracing with an o'scope.
Hopefully, I will be able to find that 5-pin mic plug so I can make up a test cable. Thanks again for the advice! I think I remember you as also working in the RF industry.

YES - for a MSS and as a RF bench engineer years ago.

If u have the schematic it should be easy to trace the input and output stages of each section of the TX audio sections.. Just run a constant 1K tone to the mic input line - I would tend to think that its in the TX line only, as most of these radios used the same transistors for both RX/TX in the audio output stage and you are not reporting any distortion in the RX audio.
Best 73's

I wondered about that myself. Looking at the schematic, I do see a couple of electrolytic coupling caps that can be causing the problem. Since Tx audio is there for the first few seconds, this tells me that it is a Tx keyed stage that has the problem. I am going to have to trace the Tx enable line to see which stages are being keyed in Tx mode only.
I am looking at the block diagram, and it appears that either TR27, the PA switch or TR21, the AF switch might be causing the problem. There is also a feedback network that starts back from TR34, the ALC amp. This feeds a couple of other stages caled AMC amps, that appear to go through a summing network into TR23, the Mike amp.
Since the Tx audio problem affects both AM and SSB modes, it has to be in a keyed stage that is common to both modes.
The nice thing about this radio is that no mods appear tohave been done.....even the clarifier control has not been "married" to the Tx mode. This one is worth fixing.....the only problem is getting at all of the wiring. Much of it is hidden behind a shield plate at the front panel. It could be something as simple as a cold solder joint, but that might just be wishfull thinking!

Thanks, I appreciate the help. I am going to fire up the test bench and give it a go. I will let you and the folks know what I fine.
Ok on that RF engineering experience.....that is also what I am doing right now. I worked at Collins Radio in the 2nd half of the 90s, switching to Motorola when we moved back to chicago. For the last couple of years, I have been working as a contractor/consultant at Motorola. I think that's what happens when you get to be a semi-old guy like me. They make you a consultant!
Thanks again to you guys for the help!

Pete

Sounds like it might be a little too hot for the band.....

> I do have the service
>manual, but I have never seen this kind of problem.

Never assume the manual is correct. Establish a baseline by injecting
a single tone post-AGC, run it up to 100% and measure. Then re-align
the AGC to your mic according to that baseline.

>For testing purposes, I am using a CT Systems Model 3000B Communications

Sounds like it may have an RF limiter. If you have a pulse generator,
hit the audio with 0.1ms spikes. That will also tell you if the audio
limiter has been disabled.

>It looks like I will have to do some signal tracing with an o'scope.

No problem. If you ever get around to scanning the manual I wouldn't
mind having a copy.

> I think I remember you as also

I might inject the signal right at the audio amplifier and work backwards.

I will do that. I only can scan up to 11 X 14 size, so the schematics will
be broken pages,but that should be fine.

I had this problem on my 2510. Ended up finding out that my power supply wasn't
cutting it. I went to a larger power supply. Since yours in internal, I am not
sure that is the problem. But the damn symptom iwas the exact same.

Vinnie S.

I have found that it's sometimes better to DE-sensitize the receiver
front-end on a noisy band. Tends to improve S/N.

No hurry. I only get a couple CB radios a year, so it's hard to tell
if or when I'll run across this model. There really should be a public
CB manual repository like BAMA..... maybe some day.

That sounds good.....I will probably scan the service info in the next couple of weeks. now, about the receiver desensing.....I don't have any problems with IMD in the receiver, and a diode attenuator is used in the front end. I have found that IMD performance can be improved by changing that general purpose switching diode in the front to a 1N5767 PIN diode. I wanted to get started on this project this afternoon, but a friend stopped over. I'll give it a whirl tonight. It will be quite a nice radio, once I get through with it.

Thanks Vinny. I'll check the power supply and see if droop is occuring on Tx. I need to take a close look at the schematic and check the low current line. I think it is 8VDC. The seller was nice enough to tell me that he removed the battery from the microphone so that damage wouldn't occur. He probably figured that it would take me a few days before tested the radio. Whenever I get ahold of an eBay item, the first thing I do is open up the unit and make sure that somebody didn't try to align it. Next, I connect up an RF generator and measure the sensitivity, after which I check the RF output and modulation index of the transmitter on a service moniter. Looks like I picked up another "tech special".
This unit isn't as bad as the Drake TR7 I picked up from a fellow in Ohio last year. He conveniently didn't include a microphone or a power cord, but he was nice enough to include a Cinch Jones connector for the 12V input.
I had a PS7 power supply on hand, and I noticed that power output was low on 10M. I found a cold solder joint on one of the exciter boards. In an attempt to cover up the problem, he defeated the ALC circuit, so after I repaired the unit and checked the power output it was putting out over 275 watts. I readjusted the ALC and everything was fine.
When I contacted the seller and shared my findings with him, he said "Oh, I was wondering why I had to crank up the mic gain with this one".

Pete

IMD is minor compared to the negative effects of high input impedance
of the RF preamp, which is almost always too high. Reducing the 1st RF
gain (A = 5 to 10) will reduce the input impedance and make it less
vulnerable to noise -- especially the white background noise. You can
compensate by increasing gain in the IF stages. Then realign your
input matching network and =>blammo<=, weak signals are solid with
much less noise.

As long as the original isn't used for overload protection, I don't
see any problem with that. But then I don't see any advantage, either.
The band is just too noisy for it to make any significant improvement.
Still, I've got a crusty old Diamond 60 laying around somewhere, so
I'll give it a try anyway.

I understand what you are saying, but the RF amplifier should be conjugate matched to 50 ohms anyway, in order to have uncondisional stability. I am not sure what the noise figure of this system is, but it seems that the gain distribution is such that most of the gain is in the 2nd I.F. strip anyway. Even so, under 30MHz, in most areas the excess environmental noise is in the 15dB region so a receiver with a 12dB noise figure does just fine.
I remember the old Allied Model 2568 CB radio. This thing had quite a bit of RF gain and relatively low I.F. gain. As soon as you connected an antenna, it sounded like an FM unit. The problem with that design is that the AGC voltage was derived from the RF stage with its relatively low selectivity, in addition to the I.F. strip. Strong off channel signals would capture the AGC loop and desense the whole system. Remember the old term "bleed over"?
You do have a good point about keeping the RF gain ahead of the mixer as low as possible, since any gain ahead of the 1st mixer degrades the dynamic range by that same amount. In my last contract with Motorola, we were using mixers that had an IP3 of +40dBm so we were able to get away with having some gain ahead of that mixer.

Conjugate match is needed for maximum power transfer. Nuetralization
helps extend stability over various mismatch condistions.

In a receiver RF front end it is preferable to match for best noise
figure and accept the gain. The less gain before the mixer the better.
The RF front end sets the noise figure for the whole receiver. The
gain of the RF Front end need only be high enough to overcome the
noise figure of the next stage and any losses it may present if any.

More often than not,CB calibur radios places far to much gain in the
first stages so that more simple IF stages can be used. Thereby
lowering costs.

I don't have the schematic for your radio in front of me, but if that
1st RF stage is like most CB radios it's common emitter. So the input
impedance is a lot higher than 50 ohms, and is matched to the antenna
with a transformer or LC network. Not exactly ideal.

The objective is not low gain but low input impedance. Closer to the
impedance of the feed, to keep the first impedance transformation as
small as possible. With a common emitter, the only way to do that is
by reducing the gain. And just at the first RF stage, not necessarily
everything else in front of the first mixer.

> In my last contract with Motorola, we were using
>mixers that had an IP3 of +40dBm so we were able to get away with having

Most of the problems I've had with mixers came not from the mixers but
from unbuffered oscillators. Anywayz.....

I guess the question is if the radio works well enough as it sits. If
you can hear a signal buried in the band noise then that's about as

good as it gets. The only way I know to improve it is by matching the impedance of the first RF to the antenna. Beyond that you'll need to get a directional antenna.

IMPEDANCE match... for maximum power transfer. A 'conjugate' match is
when the impedances are complex, which isn't always the case.

> Nuetralization
>helps extend stability over various mismatch condistions.

Lots of things can improve stability, but unless the amp/mixer is
oscillating the point is moot.

>In a receiver RF front end it is preferable to match for best noise
>figure and accept the gain. The less gain before the mixer the better.
>The RF front end sets the noise figure for the whole receiver. The
>gain of the RF Front end need only be high enough to overcome the
>noise figure of the next stage and any losses it may present if any.

All true. But the point I was trying to make (which I incorrectly
assumed was already understood) is that any impedance matching device

or network between the antenna and the 1st RF can cause more noise from IMD than the noise from the 1st RF or mixer, -especially- if that matching device/circuit uses a ferrite core or solid dielectric, which includes almost all CB radios. That's why strong signals can sometimes be heard even when the source is several MHz away (often mistaken for receiver overload).

The concept here is to reduce (or, ideally, eliminate) that impedance transformation stage. A long time ago I built a common base (voltage follower) RF preamp using eight transistors in parallel followed by the impedance transformation stage (transformer). The input impedance directly to the transistors is about 100 ohms, but I feed it directly anyway. The difference is like night and day. I use it for lowfer work these days.

>More often than not,CB calibur radios places far to much gain in the
>first stages so that more simple IF stages can be used. Thereby

Like you said before, the first RF is all that matters.

I have found that it is rare in the real world that impeadances are
not complex. Outside transimission lines, there is little that is not
complex. Then again when you conjugate match, the imaginary part of
the complex impedances is nulified and you are then left with the real
part.

You just said that resistors have complex impedance and transmission
lines are flat.

>the complex impedances is nulified and you are then left with the real
>part.

Reactances don't just disappear. They create a current between the
source and load that must be assessed to see if it is going to cause
any problems. Sometimes it doesn't and sometimes it does.

No I did not. Besides Resistors can have complex impedances depending
upon constrtuctinand frequency in which they are used.

>+++

I did not say they disappeared. At resonance the conjugate match
causes the net reactance to be zero. Thus nulify. The reactance are
always there.

This must be some new definition of the word "won" with which I was
previously unfamiliar, Mr. Spamming, Binary-posting, Forging, Morphing,
Nym-shifting, Flaming, Personal-Attack-making Wabbit.

Or perhaps you just think Mark will never be able to post in a moderated
group? Maybe you think your own private treehouse group has been
created? That's most amusing.

Go back and read your own words again.

When a resistor is used at its intended frequency, any reactance is
insignificant. If it wasn't then it would be called an 'inductor' or
'capacitor'.

Notwithstanding the fact that the non-reactive component of impedance changes at or near resonance, maximum power transfer (due to matched impedances) occurs regardless of whether those impedances are reactive or not. Hence "impedance match" instead of the more limited "conjugate match". As for your assertion that non-reactive impedances are rare in the "real world", maybe you should describe -your- "real world" and how it differs from the rest of reality.

alt.usenet.kooks
Some information in this article or section has not been verified and may not be reliable.
Please check for any inaccuracies, and modify and cite sources as needed.This article or section does not cite its references or sources.
You can help Wikipedia by introducing appropriate citations. This article has been tagged since November 2006.
The correct title of this article is alt.usenet.kooks. The initial letter is capitalized due to technical restrictions.
alt.usenet.kooks is a newsgroup established on 1993-12-20 as part of the alt hierarchy, its main focus is on discussing Usenet contributors who fit the definition of a "net.kook" as mentioned in its FAQ:[1]

Anyone who posts uniquely strange, preferably incomprehensible articles, or who manifests a persistent, extreme, and somewhat bizarre obsession, might be a net.kook.
The subscribers to the group regularly hold votes to label people as "recipients" of various mock awards. Past "winners" include people of Usenet notoriety such as Archimedes Plutonium, Sollog, Kenneth Robert Pangborn and Jack Sarfatti, and also people (or organizations) of greater fame such as Bill Gates, Bill Clinton, Gary Glitter and the Kansas Board of Education.[2] Awards of special distinction have been given to Edmond Wollmann (Kook of the Millennium), Earl Curley (Kook of the Century), John Grubor (Kook of the Century and Decade), Brad Jesness (Kook of the Decade) and Richard Bullis (Clueless Eternal Newbie).[2] See the external links below for a full list of award winners.

As its name implies, the main focus is on Usenet posters seen as kooks, though alleged kooks on the World Wide Web and in real life are also discussed, as are more general topics of what motivates posters perceived as kooks by the other subscribers, and what an appropriate response to them might be. Also, persons suffering from actual mental illness rather than mere kookdom are sometimes spared from receiving the award.[citation needed] See Formosa's Law.

The group receives many crossposts in the form of follow-ups to alleged kookery in other groups, as well as many posts from people who believe they have been falsely accused of being kooks.

The FAQ attempts to distinguish between "kooks" and other types of irritating people:[1]

It is important to note the subtle distinction between a net.kook, a net.cretin, a clueless newbie, troll, or garden-variety asshole. The newbie, one hopes, can acquire a clue on the installment plan even if he can't afford to buy one for cash. The cretin is merely stupid and/or irritating. The troll is purposely pulling your leg like it got caught in some heavy machinery. The @$$hole is, well, simply that. But a TRUE net.kook has a special fascination derived from his/her/its utter ineffability. Their behavior is irrational, if not downright weird, but they are seldom merely boring.

Controversy
Because the subscribers are typically anonymous (or pseudonymous) and the group is not moderated, those labeled "kooks" have little chance of redress. Those labeled "kooks" are banned for life from voting in awards on alt.usenet.kooks.[3]

Especially in the late 1990s and early 2000s, alt.usenet.kooks has been criticized by some[Please name specific person or group] as a soapbox for personal or political grudges.[citation needed] Critics[Please name specific person or group] claimed that regular users of the newsgroup displayed a "pack mentality" and were engaging in cyberbullying.[citation needed]

Regulars in alt.usenet.kooks also followed those labeled "kooks" into other newsgroups and posted messages attacking them.[citation needed]

>+++match". As for your assertion that non-reactive impedances are rare in
>+++the "real world", maybe you should describe -your- "real world" and
>+++how it differs from the rest of reality.

****
I am not saying that the real portion of impendances are rare. I am
saying that pure resistance is but a subset of complex impedance. Pure
resistance is where the reactive part of the complex impedance is
zero. In the real world no component has a "zero" reactive component
as does it not have zero resistive part.

In conjugate matching, the nodal point where the output of the
transform network terminates with the load will have a net reactance
of zero. The real part is still there. It does not go away. The net
real part should be half that of the real part of the load.

All components have complex impedances. In cases where frequency of
operation is well below the self resonance frequency, discrete passive
components can be thought of as purely resistive or purely reactive
dending on construction of the passive part. That be whether it is a
resistor or a capacitor or inductor. Non passive components have
complex impedances.

All the above is valid only when you are dealing with time varying
signals. Complex impedance has no definition when dealing with a non
time varying signal(ie. DC).

On Tue, 20 Feb 2007 09:39:07 -0800, Socks_Fever did the cha-cha, and
screamed:
<snip Wikipedia article about AUK>

What gives you that impression, Wabbit? AUK isn't going anywhere, nor
are the unmodded rec.radio.* froups. Furthermore, apart from his
occasional tendency to be a bit spammy, Mark's not an abusive poster,
unlike yourself. I see no reason why unbiased mods would be unwilling to
allow the vast majority of his posts. Of course, if you forge him while
posting to the mod group, and post abuse in doing so, then I suppose you
could get your own way _that_ way. However, your net access wouldn't
last long...

The West Coast (read among those west of the rockies as "California") has
easily the worst cuisine of the continental US. If you want a decent plate
of anything or something resembling beer (instead of that rolling
rock/miller/pbr/urine swill that should be sued into the next century for
false advertising), you gotta think a little more north and visit the
Oregon Territory states.

I can't taste the difference between Rolling Rock and mopwater. Why would anybody pay for Rolling Rock when you can get it for free by cleaning the kitchen floor? If you want a good porter, gonna have to hit up a Rock Bottom.

The original "Henry Schmidt"
COOSN-029-06-71069

==========
Brad Jesness Memorial Kook Appraisal Test (KAT or KAT Index) v. 5.1 by
Cipher and the a.u.k crew

So, you think you've got a contender, eh? Hard to separate the Kooks
from the mere pains in the ass though. Hopefully this will help you.

Instructions :
In this section give your Prospective Kook ONE point for every YES
answer. Give your Prospective Kook additional points for multiple
occurrences.

Grading scale follows questions.

Have they ever :

1. Been the first to go ad-hominem in a newsgroup debate.

2. Accused someone of breaking a non-existent Federal Law.

3. Called a properly formatted cancel of a BI>20 article a *forged cancel*

4. Ranted about *Free Speech* when a moderator rejected their article. Two points if it's spelled "FREE SPEACH".

5. Tried to censor others, yet scream when others suggest that they killfile them or create a moderated newsgroup.

6. Complained to someone's ISP when they got spanked in a flame war.

7. Been complained about to their ISP deservedly.

8. Flamed someone from an anonymous account.

9. Made a spelling flame. (*)

10. Used RANT-CAPS & manic punctuation.

11. Claimed to be qualified to make a legal determination or medical diagnosis with no justification - bonus points if the kook is obviously projecting her/his *own*
condition/behavior. (**)

12. Claimed an academic or professional degree they obviously do not have.

13. Claimed that because of a degree or research topic, another poster cannot know anything about any other subject.

In this section give your Prospective Kook TWO points for every YES answer. Give your Prospective Kook additional points for multiple occurrences.

1. Called someone a pedophile or drug pusher without proof.

2. Bonus if they called anyone a "Republican Nazi Pedophile"

3. Ranted about *Free Speech* when an anti-spammer canceled their article.

4. Posted to a newsgroup via sock-puppet.

5. Thought about becoming a Freedom Knight.

6. Voted via sock-puppet in a Big Eight vote.

7. Defended a well known kook.

8. Been Nominated for a Kook award.

9. Invented Usenet 'rules' & 'laws', particularly coming up with creative definitions for what constitutes spam & spamming.

10. Implied that she/he has powerful allies who will deal with his/her enemies, due to having affiliations with Microsoft, the CIA or some other powerful organization - no matter how flimsy the association.

11. Claimed an academic or professional degree after having stated they are a high school dropout or otherwise indicated their actual level of achievement, or claim multiple PhD's, MD's, etc.

12. 'Removed' an academic or professional degree or title from another more clueful poster. (Includes scare quotes such as 'Esq.', or 'Dr.')

13. Claimed one of the well known regulars of AUK is using a remailer to impersonate them, when all kook sign points to them.

In this section give your Prospective Kook THREE points for every YES answer. Give your Prospective Kook additional points for multiple occurrences.

1. Threatened to kill or cause bodily harm to another via mail or post.

2. Told someone they have caused the kook to harm himself.

3. Stalked/harassed an opponent off-line.

4. Mail-bombed anyone.

5. Spammed a newsgroup.

6. Posted a forged or altered newsgroup article.

7. Lost an account due to abuse.

8. Won a kook award.

9. Threatened a groundless lawsuit via mail or post. LA Law bonus: Additional point if a TV lawyer is used.)

(Grubor bonus: If they claim John Grubor/Law Systems Institoot as counsel)

10. Threatened to have their "agents" come after someone.

11. Had a FAQ posted about their kookiness.

12. Pretended to be a sysadmin or ISP owner.

13. CC'ed emailed complaints to irrelevant or non-existent organizations email addresses, such as the DOJ, AG, CIA, FBI etc.

14. Been TOSsed and then claimed to have canceled it, her/it/himself?

(*) PalmJob Exception Rule. Cannot be applied to a mere troll's points.

(**) Brad Jesness Factor. Not applicable to BJ, it is expected.

Scale/Rank :
1 - 10 points : Kook Wannabe. Needs to read Grubor's posting history on dejanews. Your Prospective Kook has much to learn. They may have just

screwed up once or twice.

11 - 25 points : Journeyman Kook. Needs to Continue to mimic the real kooks. Your Prospective Kook could be a contender.

26 - 36 points : Kook First Class. Still a lesser light, but Your Prospective Kook HAS arrived! People killfile him/her.

36 - 50 points : Kook cum Laude. Someone is considering writing a FAQ about your Prospective Kook. Has been nominated for at least one a.u.k award.

51 + points : Kook Magna cum Laude. Your Prospective Kook has a FAQ. Your Prospective Kook will eventually win all the big awards. Your Prospective Kook can leap tall newbies with a single bound.

I'm not convinced either vehicle mentioned (mine or my former roommate's)
ever had a good ground to start with.

I question that assertion. I had been running a detachable-face Midland job
that had sideband and that thing was noisy as all get-go on that.

Well, in my "real world" there are many components with reactances so
small as to be insignificant and are therefore ignored.

>In conjugate matching, the nodal point where the output of the
>transform network terminates with the load will have a net reactance
>of zero. The real part is still there. It does not go away.

Okay....

> The net
>real part should be half that of the real part of the load.

Huh?

>All components have complex impedances. In cases where frequency of
>operation is well below the self resonance frequency, discrete passive
>components can be thought of as purely resistive or purely reactive
>dending on construction of the passive part. That be whether it is a
>resistor or a capacitor or inductor.

Thank you. And I should add that it is more often the case where an
intended reactive component is measured for resistive impedance than
an intended resistive component is measured for reactive impedance.

> Non passive components have
>complex impedances.

Not necessarily, for the very same reasons mentioned above.

>All the above is valid only when you are dealing with time varying
>signals. Complex impedance has no definition when dealing with a non
>time varying signal(ie. DC).

For all practical purposes, true.

But you are still ignoring the fact that a conjugate match is nothing more than an impedance match using a conjugate impedance, which is often not necessary. Just because some comp resistors -- or even the wires or PCB traces -- in an audio amp or power supply may have a very slight inductive reactance doesn't mean you waste your time trying to load them all with sub-pF caps. That's why, here in the real world, the term "impedance match" is used to include any necessary conjugate match that may (or may not) be necessary, and why you don't hear the term "resistance match" used very often (i.e, never).

"Immorality: The morality of those who are having a better time." -- H. L. Mencken

"Consider that language a moment. 'Purposefully and materially supported hostilities against the United States' is in the eye of the beholder, and this administration has proven itself to be astonishingly impatient with criticism of any kind. The broad powers given to Bush by this legislation allow him to capture, indefinitely detain, and refuse a hearing to any American citizen who speaks out against Iraq or any other part of the so-called 'War on Terror.'

"If you write a letter to the editor attacking Bush, you could be deemed as purposefully and materially supporting hostilities against the United States. If you organize or join a public demonstration against Iraq, or against the administration, the same designation could befall you. One dark-comedy aspect of the legislation is that senators or House members who publicly disagree with Bush, criticize him, or organize investigations into his dealings could be placed under the same designation. In effect, Congress just gave Bush the power to lock them up." -- William Rivers Pitt

"It has become clear in recent months that a critical mass of the American people have seen through the lies of the Bush administration; with the president's polls at an historic low, growing resistance to the war Iraq, and the Democrats likely to take back the Congress in mid-term elections, the Bush administration is on the ropes. And so it is particularly worrying that President Bush has seen fit, at this juncture to, in effect, declare himself dictator." -- Frank Morales

I use conjugate matches with active devices and crystal filters. In
that aspect they are easier and cheaper.

james

Unfortunately, the cap will do little without something to work
against. A choke would be a nice addition to this filter.

The code hating losers were too stupid and lazy to learn and use CW,
they're also probably going to be too stupid and lazy to solve TVI
and interference problems with their neigbhors. There will be more
amateur to amateur and amateur to non-amateur conflicts. Hams will look
bad and the FCC will regulate the service more because of all the retards
we let have HF privledges. CQ Breaker, CQ Breaker.

Welcome to CB everybody.

Let me relate this story, again, but I like it!

One time I pulled up to a red light while talking on my CB with a 667.
When I unkeyed, I noticed the guy next to me starting his car. When he
got it going, I keyed up and his engine died. I waited for the green
light and keyed up and nailed it! The guy was stuck at the light, restarting!

I used to be able to watch people's TV's flicker as I drove past, before cable.
Now I can turn on all the motion sensor lights on the street as I drive by
with a 2 pill.

One hour until there are no CW requirements anymore! Ye-ha! Got my Wilson 1000
mag mount, 2950, an external speaker and a cigarette lighter power cord ready.
I've got a few hour drive around town every day in a company car. I'll use my
KW-7 and 2 pill when I get back from my drive. I did a receive test Tuesday
night. The KW-7 has much better ears then a Wilson 1000 mag mount on 11 meters.
Of course, the antennas are tuned for 27 MHz. I'll have to cut a KW-7 down a
bit on the top to tune one for 10. Then I'll need to carry 2 of them, one for
10 and one for 11...tune for midway and be half-assed on both? Hmmmm.

good lick selling it.
I am sure there are more than a few hams working for Ebay, Inc and they
often do paruse the groups looking for things like this.

btw, Ebay DOES allow "buy it now" at amounts greater than $300.00, BUT, you
have to be a power seller and have a near perfect record.
as for the radio itself, you are asking too much for it.
try again.

Please get off your knees. I know my parents, unlike you. But then not all
experiments in genetics fail so badly as the one producing things like you.
Please direct your complaints to the lab you came from.

Nope, but did you see how he held the lead for the first 18, dropped
back to 41 and a lap down, then worked all the way back to threaten
the lead? He's one to keep an eye on for next year's Demolition Derby.

BTW, no relation to Richard Gilliland (the actor), either.

He's an old-time hamie pissed off at what the service became and feels
more of a kindred with cb'ers than what's happening on the ham bands and
wants ever so bad to say so but his pride is weak.

I didn't notice what he drove. I don't hate Fords.... they made the
Fairmont and the Taurus, two of the most dependable cars ever built
(don't know why they dropped the Taurus, that was pretty stupid). Ford
steering systems are excellent. And the 300 I-6 was probably one of
the best engines ever made by -any- auto manufacturer. I even own an
LTD for those long road-trips.

But then again, they did make the Edsel and Pinto....

LOL!!! Which one?

Just kidding. My branch on the tree grew from a long line of thieves
and drunks that staggered out of the Ozarks. You won't see many of
them getting much public attention outside of a court or lynch mob.

The Taurus won Ford a nascar championship a few years ago, but that's
probably the only Taurus ever running a carburator. <g>

Now it's the Fusion or some shit, right? The COT (car of tomorrow) will be
running at Bristol in about a month.

>outside of a court or lynch mob.

That's funny. It's amazing what we find in our ancestry. I imagine back in the day folks in the hills weren't much different than the rural folks in the south. Whiskey, agriculture, cattle and whatever made the dime.

Hello Scott:

Yeah that element will be there, as it has always been there. Probably why the FCC said it had enough, in so many words deleting the CW testing requirement.

I was at the local testing place last Jan, there where very friendly and busy with guys and gals taking General and Extra without the code. But had to wait for the new rules to kick in for it to be legal.

I look forward shooting skip with ya all.

I tuned around the HF bands today around 21:00 zulu, and everything is
normal. Haven't heard herds of "uncoded masses" flooding the air... :-)

I think we got off the original subject of this post, but that's ok. There are NO problems with the Rx section. No IMD problems, no desense of the Rx section. Although it is a cheap design, it isn't too bad. At least a monolithic crystal filter is used as a roofing filter at the 1st I.F. to protect the 2nd mixer from off-frequency signals. Most of the CB units use a 10.7MHz ceramic filter with a bandwidth of anywhere from 150 to 230kHz, which is only going to reduce 2nd image response.
Below 30MHz, you don't really need to worry so much about NF.....a 12dB NF is fine. As long as you are conjucate matched, stability would be good. The main thing that can cause problems is if you S11 parameters (input return loss) aren't high enough. If you have at least a 10dB return loss for both your S11 and S22 parameters, you shouldn't have any problems. Most RF amplifiers are going to be unilateral, so our S12 (input / output isolation) is going to be at least 25dB. It if isn't, the designer of the equipment didn't know what he was doing, and doesn't have any business doing that job in the first place.

Resistors can have complex impedances, especially film resistors. Carbon
film resistors can get by up to 30MHz or so, and metal film resistors
shouln't be used above 10MHz. The problem with these devices is that they
consist of a sprial etched resistance material that has a fair amount of
reactance as you go up in frequency.
Carbon composition resistors are preferable in RF applications, but even
their lead length becomes too reactive at higher frequencies.
Nowadays, we use 0603 or smaller size components at higher frequencies. 0402
geometry is presently being used at higher frequencies, with 0201 size soon
to become the norm. This is what I have been working with for the last
couple of years.

How about the real world above 1GHz? It is very easy to model these "insignificant" reactances in a program such as ADS and see the effects on a real world circuit design.

As long as we are on that subject, an RF stage isn't even needed at
frequencies below 30MHz. As an example, you can use a Mini-Circuits SRA-3
doubly balanced diode ring mixer, that has only 4.77dB conversion loss at
11M. You also have approximately 35dB of port to port isolation. The only
advantage that an RF amplifier would provide in this situation is minimizing
1st LO radiation through the antenna port of the radio.

Thanks..........that sounds super. I have the radio apart on my bench downstairs. Gosh........what a brick! Isn't is great, when you have to undo everything that the "technician" did to upgrade the radio?
There were several other problems that I have found. Why the manufacturer chose to use hot glue on all of the solder lugs of the switches escapes me. This caused several solder connections to fatigue and break off.
It looks like this repair will be an hour here and there. I might get it fixed in a few months. The one redeeming quality is the great Rx section.

Not sure if this made it the first time since I never got it back...

Radio Enthusiasts,

This posting is to invite radio entusiasts to investigate Internet Relay Chat (IRC), a free realtime multi-user chat medium that allows users to connect to a network of servers and chat in realtime with other users connected to any of the servers on the same network.

IRC uses "channels" similar to the chat rooms on AOL for those familiar with those. Anyone who connects to any server in an IRC network can join any channel on that network and chat with any and all other users in that channel regardless of what server in the network they have connected to.

Using IRC, it is possible (for example) for radio clubs, ARES/RACES or other EmComm groups, etc. to have a realtime online chat forum where members can connect and have sort of an online clubhouse or meeting. This is great for groups with members in widely separated geographical areas who can't otherwise have a "meeting" in the usual sense.

The IRC network IRC-GLOBAL is one example of an IRC network, and it happens to be operated by radio hobbyists. Feel free to check out the network's website at http://proxemic.net - this network is now inviting radio enthusiasts of all stripes to use the IRC-GLOBAL network as a forum for realtime multiuser chat with other like-minded individuals. Hams, CB operators, scanner and shortwave listeners, whether individuals or clubs, are welcome to use this network.

IRC-GLOBAL offers five open public IRC servers using active connection ports 6661-6669 (and also, 6697 for SSL connections). running full modern services (ChanServ/NickServ/MemoServ/BotServ/HostServ). Secure client connections are available using SSL. Channel owners have full founder control of services tools and security options. All of this is free, there is no charge of any kind for the use of any IRC-GLOBAL servers or services.

There are already some radio-related channels formed (#monitor, cross-linked to the #monitor channels on four other IRC networks as well, is the busiest right now), or you may of course form your own channels - about radio, or anything else as long as it's not illegal or just for the purpose of harassing others.

I hope nobody will consider this "spam" or be offended by it, if so, I apologize - I'm posting this as a network administrator on the

IRC-GLOBAL network, I have no financial axe to grind since the use of the network is totally free to any and all who wish to use it. I'm one of the radio hobbyists who has helped put this network together and just want to invite other radio people like myself to make use of it.

Hope to see you on IRC-GLOBAL soon!

73 de John Kasupski, KC2HMZ
IRC-GLOBAL Network Administrator

Well, that's good advice that should be followed before you even
connect to the Internet, even to download your e-mail. I do know,
however, that I've used IRC regularly since 1996 and have never, ever
gotten any kind of virus or other infection as a result of my IRC
activities. Thoigh I suppose other people's mileage may vary.

Several.

Long story short, the power-to-voltage ratio of a signal is always
higher than the power-to-voltage ratio of noise. Most RF front ends
are voltage amps. But a -power- amp on the left can dig the signal out
of the noise on the order of 2-4dB, sometimes more. I like using a
common-base for the 1st RF, but you can re-bias a common emitter and
make pretty good improvements. And, as I stated before, a low input
impedance will reduce or eliminate the impedance transformation prior
to amplification.

>doubly balanced diode ring mixer, that has only 4.77dB conversion loss at
>11M. You also have approximately 35dB of port to port isolation.

You can do better with discretes from Radio Shaft, which is really sad
when you realize that those are their lab numbers. The only advantage
I've seen to Mini-Circuits is the size. For performance, their stuff
sucks.

> The only
>advantage that an RF amplifier would provide in this situation is minimizing
>1st LO radiation through the antenna port of the radio.

It also serves as a buffer to the mixer, which is essential for
reducing mixer IMD. The RF amp is generally a good idea.

TEH WAY OF THE K00K
Never learn from your mistakes.
Always practice your mistakes; you may get them right.
Always pick on those smarter and tougher than you.
Always believe that only you know the TRVTH.
Never allow logic or reason get in the way of a good k00k.
When being overwhelmed by logic and reason: k00ksuit!
If you are going to be wrong, do it at the top of your lungs.
When caught in a lie: LIE!
When in doubt: Order the Crab Won Ton
Plagiarism is your friend. Use it.
Whenever contradicted; morph, start calling people names, and make false
accusations. Include the children of your target in your allegations,
even if they don't have any.
(06-Jun-05) When nobody else will listen, post to your own fan group.
(06-Jun-05) Obviously, since you have your own fan group, this must mean
that you have fans. Post prolifically to your fan group - you wouldn't
want to disappoint them!
(10-May-2005)Everyone reads usenet. Approval here means approval
everywhere.
Post numerous blank posts, or posts containing only a message id.
Post numerous copy&paste web articles from crackerpot websites.
Never forget to call kookologists "k00ks."
If there are several, call them "sockpuppets" too
When all else fails, accuse various and sundry kookologists of e-mailing

viruses to you. This is a sure-fire method of garnering sympathy and ensuring that the General Public will always see things your way. An especially effective sub-strategy here is to accuse them of infecting you with the 'Sasser' worm via e-mail.
Quote notorious scientists or writers - it makes it look as if they approve the drivel you are writing!
(9-Jul-05) Anytime your computer is infected with a virus, bogged down by spyware, attacked over your internet connection, or otherwise suffers from preventable problems, government agencies are responsible and are trying to silence you and are monitoring your computer files.
Ignore all traffic signs and feel free to trespass, you don't have to obey any rules.
Scare your enemies with lawsuits, police escorts and whines.
Always back up your empty (albeit noisy) threats with phony LARTs, false police reports, and harassing letters to the FBI and other gubbermint agencies.
Be vigilant in your redundancy. The more you repeat yourself, the more likely others will believe you!
If you can't find anyone as crazy as yourself to support you in the flamewars you start with the normal population, create sock puppets and use anonymous remailers that shamelessly hang on every word you write.
(17-Mar-05) When dealing with law enforcement, remember that it is they who have the problem, not you. Be sure to inform them of this at every available opportunity, as they will surely appreciate your constructive criticism. Be sure to make them aware that YOU KNOW YOUR RIGHTS! ("The cops like that, when people know their rights. That way they don't have to read them to you on the way to the station." - George Carlin)
The more your fake personalities adulate you, the more respect you'll get!
When confronted with a reality that you don't like: Announce loudly that you are departing, never to return as long as there's an Internet. Come back in three or four days and claim you were drunk, hacked, abducted by alience, or forged. Alternately you can just not even mention your prior departure, and if anyone asks you about it, either ignore them or respond with something along the lines of "YOUR NOT THE BOSS OF ME! *PLONK*!" People really know you mean business then.
Always remain clueproof.
(20-Mar-05) Anyone who does not believe that you are the reincarnation of [$DEITY_OR_PROPHET] is obviously an infidel lacking in faith whose soul in in peril of everlasting damnation.
When responding to one line challenges, post paragraphs of rants and screed in response.
Incoherency is not a roadblock to poasting.
Neither is illiteracy.
Delusions poasted often enough become fact.
Claim you will destroy <insert newsfroup> for attacking you.
When spnaked, send cmsg for Fanboi newsfroup(s).
Find your Lame, Use your Lame, Be your Lame!
Post Edit when the TRVTH hurts.
Always sneck the offending newsfroups.

Always poast pictures of yourself so you can be admired in all your k00ky glory.
Always accuse others of the very acts you are guilty of.
Post lots of boasts about your high IQ and incredible talents.
(20-Mar-05) If you repeat a lie often enough, it becomes the truth. Anybody who fails to understand this is engaged in a deliberate campaign of misinformation and character assassination.
Always <plonk> somebody just before replying the plonkee!
The k00k considers itself the most intelligent person in any conversation, possibly on the planet. Other people are benighted and ignorant, and have been waiting their whole lives for the k00k to rescue them from intellectual darkness.
Write a self-published book and claim it a success. Bonus points for comparing it to "Mein Kampf" and/or the Bible.
Declare yourself equal to a deity of your choice.
Claim that you've come from other planets.
Claim thousands of past lives.
Frothing complaints carry far more weight when you send them from "legal@" some domain.
Nothing strikes terror into the hearts of your detractors more than telling them that you're archiving their messages for possible use in the future.
Never forget that everyone else posting to Usenet is a paid disinformation agent looking to discredit you.
Usenet is governed by US law. If a poster in Romania killfiles you, he's obviously violating your 1st Amendment rights and can be sued.
Every news admin in the world hangs out in NANAU, and they're just dying to nuke the account of that meanyhead who just called you "fucknozzle". Drop 'em a line - that's what they're there for, after all.
AUK will be closed down. Just you wait and see.
They've nuked hundreds of accounts in the name of free speech and *yours* will be next.
The k00k will, without any trace of irony, lie, manipulate, impersonate, censor, and declare themselves powerful in ways ranging from the ability to have an account shut down to being God Herself, in order to convince people that they are not liars, manipulators, censors, or insane.
Abuse women while telling how many hundreds you've loved. Nevermind that you're one ugly motherfucker and that there were 30,000 femininas that thought you were a scumbag with bad teeth.
Remember that your ko0ky klaims are 'facts', and that 'facts' do not require proof.
Do not neglect to poast your responses to forums that the originator doesn't read. This will make the people in that forum very impressed with how you tear him to shreds without him being able to respond. They like it even better if you are off-topic for that forum.
Keep in mind that lack of evidence supporting your konspiracy theory actually _is_ evidence, of how effective the konspiracy is in hiding.
(06-Oct-05) When spanked, always retreat to the safety of the Ad Hominem.
(04-Aug-2005) When spanked mercilessly for days on end, proving with

each poast just what an illiterate and ignorant fool you are, ALWAYS claim ownership of [person(s),froup(s)]. This works on so many levels. It inspires dread in your opponents that they will no longer be able to poast in their home froup and that they will eventually have to pay rent, to name just two.
Any problems with your poasts are the fault of the konspirators, who are trying to stop you from preventing the extinction of humanity.
Konspiracies that are able to subvert whole governments are always unable to silence konspiracy ko0ks.
The entire United States government is willing to spend millions of dollars for the sole purpose of harassing you.
Hollywood is making movies based on your personal life.
Do not consult psychiatrists or other mental health professionals. They are part of the konspiracy, and will sedate you and lock you away and keep you drugged if you tell them the truth.
Numerology and Astrology are respectable sciences and are useful for proving your case.
Everyone is Tim Hill, or David Green, or...
There is a fine line between trolling and kookery. Find that line and cross it repeatedly. When you are killfiled and/or LARTed for net.abuse as a result, claim victory. If you lose multiple accounts, this merely proves that you are indeed a world-class troll, with a black-belt in manipulation.
If you respond to every post someone else makes, they're obsessed. If they respond to less than 1% of your posts, they're even more obsessed.
Publishing people's real names, addresses, and phone numbers when there's no other way for you to come out of a flamewar with any dignity is cool, and proves that you are a master of secret internet information stores, and absolutely not to be fucked with.
Everyone is out to get you. You can put a stop to this by telling everyone that they're out to get you at every available opportunity.
You are the only sane one.
Those that give you a hard time about morally bankrupt things you yourself admit to are just persecutioners of the new inquisition.
Yelling in all caps and cursing at your detractors is debate. Your detractors laughing at you with sarcastic remarks is obvious anger and jealousy.
If doing something results in the loss of your account, legal hassles, or blunt trauma injury, do it again. It always works better the second time.
Asterisks, lots and lots of Asterisks.
Poking holes in kookscreed is stalking, and is a felony.
K00ks LOVE to "connect the dots". They are, of course, dots that only the k00k can see.
"They laughed at Einstein, too!"

...with thanks to Aratzio, Dr. Flonkenstein, Dan Baldwin, Cujo, CJ Osterwald, Jade, Bookman, and John Henry, of AUK. Meow. Original thread at http://tinyurl.com/3fsho - some posts may not appear due to x-no-archive headers. The spelling mistakes are intentional, dolt.

Source record: 229310

This is FEDERAL not just some state or city. It applies to all personnel on all federal installations (military posts, VA hospitals, national parks, national forests, any other federal property with its own roads). It also applies to all military personnel on and off post, on and off duty.

A revision to the Code of Federal Regulations mandates that all federal installations prohibit the use of cellular phones, PDAs, and similar communication devices by persons operating motor vehicles, unless used with a hands-free device. Effective 1 March 2007, the use of such devices without hands-free devices will be prohibited on [this installation]. This regulation applies to all devices using cellular technology. Cellular systems built into the vehicle and activated by voice or push-button (On-Star) are considered hands-free. An earpieces used in one ear or headphones are the only other approved hands-free devices for motor vehicle operators.

Radio communication devices (hand sets or "mikes") may only be used by operators if the radio device is mounted (wired) to the vehicle. Use of walkie-talkies or phones in the direct connect mode is not authorized. This includes the use of Motorola or other "Brick" type radios in GOVs and POVs. The use of tactical radios in tactical vehicles is not subject to this regulation.

The use of video technology in any playback mode, by the driver, is prohibited. The only exception is the use of vehicular-mounted navigation systems.

Any vehicle operator desiring to use cellular phones, PDAs, and similar communication devices without a hands-free device may do so only after safely exiting the roadway and placing the vehicle in park. The wearing of portable headphones, earphones or other listening devices while operating a motor vehicle is prohibited.

Operators found in violation of this policy during the grace period of March 1, 2007 through April 1, 2007 will receive a warning ticket. Beginning 2 April 2007, violators will be ticketed. Violation of the above stated policy may result in suspension or revocation of post driving privileges, the assessment of points, and/or a fine.

These restrictions apply to all personnel on post and to military personnel both on and off post regardless of their duty status.

Classification: UNCLASSIFIED
Caveats: NONE

1415. For New Hams

Newsgroup: rec.radio.cb
Date: 2007-02-25 20:13:12 UTC
From: Jeff <hammer707@yahoo.com>
Message-ID: <45e1edd8$0$5812$4c368faf@roadrunner.com>
Source record: 229320

The 30 Steps below will help all New Hams.

Step One: Use as many "Q" signals as possible. Yes, I know they were invented solely for CW and are totally inappropriate for two meter FM, but they are fun and entertaining. They keep people guessing as to what you really meant. I.E. "I'm going to QSY to the phone." Can you really change frequencies to the phone? QSL used to mean, "I am acknowledging receipt", but now it appears to mean, "yes" or "OK". I guess I missed it when the ARRL changed the meaning. It is also best to use "OK" and "QSL" together. Redundancy is the better part of Lid-dom.

Step Two: Never laugh when you can say "HI HI". No one will ever know you aren't a long time CW rag-chewer if you don't tell them. They'll think you've been on since the days of Marconi.

Step Three: Utilize an alternative vocabulary. Use words like "destinated" and "negatory". It's OK to make up your own words here. I.E. "Yeah Tom, I "pheelbart zaphonix" occasionally myself."

Step Four: Always say "XX4XXX" (Insert your own call) "for I.D." As mentioned in Step One, anything that creates redundancy is always encouraged. That's why we have the Department of Redundancy Department. (Please note that you can follow your call with "for identification purposes" instead of "for I.D." While taking longer to say, it is worth more "LID points".

Step Five: The better the copy on two meter FM, the more you should use phonetics. Names should be especially used if they are short or common ones. I.E. "My name is Al... Alpha Lima" or "Jack.. Juliet Alpha Charlie Kilo." If at all possible use the less common HF phonetics "A4SM... America, Number Four, Sugar Mexico." And for maximum "LID points", make up unintelligible phonetics. "My name is Bob... Billibong Oregano Bumperpool."

Step Six: Always give the calls of yourself and everyone who is (or has been) in the group, whether they are still there or not. While this has been unnecessary for years, it is still a great memory test. You may also use "and the group" if you are an "old timer" or just have a bad memory. Extra points for saying everyone's call and then clearing in a silly way "K2PKK, Chow, Chow."

Step Seven: Whenever possible, use the wrong terminology. It keeps people guessing. Use "modulation" when you mean "deviation", and vice-versa.

Step Eight: If someone asks for a break, always finish your turn, taking as long as possible before turning it over. Whenever possible, pass it around a few times first. This will discourage the breaker, and if it is

an emergency, encourage him to switch to another repeater and not bother you.

Step Nine: Always ask involved questions of the person who is trying to sign out. Never let him get by with just a "yes" or "no" answer. Make it a question that will take him a long time to answer.

Step Ten: The less you know on a subject, the more you should speculate about it in the roundtable. Also the amount of time you spend on the subject should be inversely proportionate to your knowledge of the subject even though you have no damn clue.

Step Eleven: Always make sure you try to communicate with only a handheld and a rubber duck antenna. Also, make sure you work through a repeater that you can hear very well, but it cannot hear you. This will put out a kind of "LID mating call": "Well, Joe, I can hear the repeater just fine here. I wonder why it can't hear me?" You will score maximum LID points if you are mobile, and with the radio lying in the passenger seat.

Step Twelve: If you hear two amateurs start a conversation, wait until they are twenty seconds into their contact, and then break in to make a call, or better yet to use the auto-patch. Make sure you keep the repeater tied up for at least three minutes. This way, once the two have re-established contact, they won't even remember what they were talking about.

Step Thirteen: You hear someone on the repeater giving directions to a visiting amateur. Even if the directions are good, make sure you break in with your own "alternate route but better way to get there" version. This is most effective with several other "would-be LIDs", each giving a different route. By the time the visiting amateur unscrambles all the street names whizzing by in his mind, he should have moved out of the range of the repeater. This keeps you from having to stick around to help the guy get back out of town, later.

Step Fourteen: If an annoying station is bothering you, make sure your other "LID" buddies have a "coded" frequency list. Even though "CODES" are strictly forbidden on Amateur Radio, it's really neat to practice "James Bond" tactics.

Step Fifteen: Always use the National Calling Frequency for general conversations. The more uninteresting, the longer you should use it. Extra points are awarded if you have recently move from an adjacent frequency for no reason. Make sure when DX is "rolling" in on 52.525 that you hang out there and talk to your friends five miles down the road about the good old CB days!

Step Sixteen: Make sure that if you have a personal problem with someone, you should voice your opinion in a public forum, especially a net. Make sure you give their name, call, and any other identifying remarks. For maximum points, make sure the person in question is not on the repeater, or not available.

Step Seventeen: Make sure you say the first few words of each transmission twice, especially if it is the same thing each time. Like "roger, roger" or "fine business, fine business". I cannot stress enough about encouraging redundancy.

Step Eighteen: If you hear a conversation on a local repeater, break in and ask how each station is receiving you. Of course they will only see the signal of the repeater you are using, but it's that magic moment when you can find a fellow "LID", and get the report. Extra points are awarded if you are using a base station, and the repeater is less than twenty-five air miles from you.

Step Nineteen: Use the repeater for an hour or two at a time, preventing others from using it. Better yet, do it on a daily basis. Your quest is to make people so sick of hearing your voice every time they turn on their radio, they'll move to another frequency. This way you'll lighten the load on the repeater, leaving even more time for you to talk on it.

Step Twenty: See just how much flutter you can generate by operating at handheld power levels too far away from the repeater. Engage people in conversations when you know they wont be able to copy half of what your saying. Even when they say your uncopyable, continue to string them along by making further transmissions. See just how frustrated you can make the other amateur before he finally signs off in disgust.

Step Twenty One: Use lots of radio jargon. After all, it makes you feel important using words ordinary people don't say. Who cares if it makes you sound like you just fell off Channel 19 on the citizen's Band? Use phrases such as "Roger on that", "10-4", "I'm on the side", "Your making the trip" and "Negatory on that".

Step Twenty Two: Use excessive microphone gain. See just how loud you can make your audio. Make sure the audio gain is so high that other amateurs can hear any bugs crawling on your floor. If mobile, make sure the wind noise is loud enough that others have to strain to pick your words out from all the racket.

Step Twenty Three: Start every transmission with the word "Roger" or "QSL". Sure, you don't need to acknowledge that you received the other transmission in full. After all, you would simply ask for a repeat if you missed something. But consider it your gift to the other amateur to give him solace every few seconds that his transmissions are being received.

Step Twenty Four: When looking for a contact on a repeater, always say your "listening" or "monitoring" multiple times. I've always found that at least a half dozen times or so is good. Repeating your multiple "listening" ID's every 10 to 15 seconds is even better. Those people who didn't want to talk to you will eventually call you, hoping you'll go away after you have finally made a contact.

Step Twenty Five: Always use a repeater, even if you can work the other station easily on simplex ... especially if you can make the contact on simplex. The coverage of the repeater you use should be inversely proportional to your distance from the other station.

Step Twenty Six: When on repeaters using courtesy tones, you should always say "over". Courtesy tones are designed to let everyone know when you have unkeyed but don't let that stop you. Say "over", "back to you" or "go ahead". It serves no useful purpose but don't worry, it's still fun!

Step Twenty Seven: Use the repeater's autopatch for frivolous routine calls... especially during morning or evening commute times. While pulling into the neighborhood, call home to let them know you'll be there in two minutes.... or, call your spouse to complain about the bad day you had at work. After all, the club has "measured rate" service on their phone line so they get charged for each autopatch call. Your endeavor is to make so many patches in a year that you cost the club at least $20 in phone bills. That way you'll feel you got your money's worth for your dues!

Step Twenty Eight: Never say "My name is ....." It makes you sound human. If at all possible, use one of the following phrases: a) "The personal here is ..." b) "The handle here is..."

Step Twenty Nine: Use "73" and "88" incorrectly. Both are already considered plural, but add a "s" to the end anyway. Say "73's" or "88's". Who cares if it means "best regards" and "love and kisses." Better yet, say "seventy thirds"! (By the way, seventy thirds equals about 23.3).

Step Thirty: If the repeater is off the air for service, complain about the fact that it was off the air as soon as it's turned back on. Act as though your entire day has been ruined because the repeater wasn't available when you wanted to use it. Even thought you have never paid a penny to help out with the upkeep of it.

There is no such thing as an intended frequency. Now, if you said that if a resistor is used, taking into account its limitations. Must we continue this silly bantering?

> I've seen to Mini-Circuits is the size. For performance, their stuff
> sucks.

From the above statement, I can tell that you have very little experience
with doubly balanced mixers, especially the ones from Mini-Circuits. The
LAVI-XXX series of mixers have IP3s in the +33 to +40dBm range. The only
type of discrete mixer that can even come near this type of performance is
something that uses either a quad JFET ring, a quad CATV bipolar ring, or a
dual power FET type that uses something like the Siliconix VN66. Your
typical balanced dual JFET mixer, as used in some of the Yaesu and Icom
transceivers will achieve IP3s in the +10 to +15dBm range, which isn't bad.
This is without having the preamp switched in.
Now, to even be able to measure that type of performance, you need to have
```

all of your RF sources very clean. This means at least -65dBc for all RF signals. Special attention must be paid to the 6th and 9th harmonics of the LO, as these artifacts can cause poor return loss of the I.F. port and also, 2nd order IMD measurements can be degraded.
The test setup must have an intermodulation free dynamic range of at least 10dB better than the device you will be testing. This includes connectors, attenuators used for isolation, etc. Attenuators with transverse heat sink fins have the best IMD characteristics.

>> The only
>>advantage that an RF amplifier would provide in this situation is
>>minimizing
>>1st LO radiation through the antenna port of the radio.
>
>
> It also serves as a buffer to the mixer, which is essential for
> reducing mixer IMD. The RF amp is generally a good idea.

The RF amp will not reduce IMD.....it will actually degrade the IMD performance of the mixer by the amount of gain that the RF amp provides. It is very easy to see this if you are making IP3 measurements on a mixer. Add 10dB of gain ahead of that mixer, and IP3 degrades by 10dB.

And carbon composition should be avoided. They absorb moisture and
change resistance with time. I have seen to many 100K carbon comps
measue around 60K with time. I would aviod them like the plague.

I have worked with chip components for over 20yrs. I stay away from
the samllest one unless the board density constraints or the design
dictates it.

That is true in most cases. Most of my RF work in the front end dealt
around using small loop antenna(less than 1/8 wave) for paging
recievers and those puppies have very low radiation resistance. You
need some impedance transformation even if you do use common base.

When you select a CB radio, is there any thing you should be looking out for? I know that some people just chat with CBs that are not businesses. Can any CB radio really do, or do you need something special? I am just getting into CB radio, I am not an expert, so I do not want to pay $500 for a radio, that I may not use much, because there is barely to no CB activity where I live, I would have to travel. Do they make portable CB radios?

You're right. I ran some of their stuff through the bench many years
ago and was disappointed, so I never used it. As for size, Analog
Devices has been making some remarkable stuff in the last few years.

> The

>all of your RF sources very clean.

Exactly! That's why I pointed out those numbers are "lab numbers". If
you want to get some realistic numbers you have to test it under
realistic conditions, which isn't that hard. The only drawback is that
the numbers will be relative; i.e, it's a comparison test against
other circuits. But if you do you will find that what I'm saying is
true -- discretes perform much better. And yes, you have to carefully
match the curves. This added labor, along with higher assembly costs
and parts counts, are the primary reasons why discretes are rejected
over mini-bricks; it rarely has anything to do with performance.

I can see that you are locked into a voltage-only mode. Feed your mixer under test with signals of varying impedance. I think you will be suprised, if not shocked.

Well, yeah, with a 1/8 wave loop? LOL!

Anyway, a common base with a single transistor can get you in the
neighborhood of 100 to 500 ohms, depending on the transistor. With a
50 ohm input that leaves you with a transformation ratio from 2:1 to
10:1, which is -way- better than the typical 1000:1 to 10000:1 range
needed for a bipolar voltage amp (I won't even mention FET's). The
lower the ratio the better. Put two or three transistors in parallel
and you can divide that ratio down even further.

Take a half-hour or so and sift through your pile of schematics. I'm
sure you'll find a few radios that do this. Even some HF tube radios
used a grounded-grid triode on the front end -- not for stability as
might be assumed, but for performance.

My apologies. I'll rephrase:

When a resistor is used within it's intended operating frequency
range.....

When a resistor is used below the frequency where it no longer behaves
like a resistor.....

When a resistor is used in the frequency range for which it was
designed.....

Better?

And if you don't like "silly bantering", why are you in this group?

Well, I am a little new to CB, but I live in Johnstown, PA, and I noticed that when my scanner scans the CB range, it never picks anything up. Although when I was in Ebensburg, PA, a more rural area, I was picking up a lot of truckers. I don't really hear much private use of CBs anymore. I haven't tried New York, NY or Atlantic City, NJ but as far as I can tell, it's dying a tad. I think it's due to Family Radio Service, Cell Phones, Walkie-Talkies, Handie-Talkies, General Mobile Radio Service, and more.

I have a cheap CB radio from radio shack, but whenever I use it to talk, my computer loses connection with one of its USB devices. I can even see the pattern of what I am saying in the light flashing underneath my mouse. All I have to do is unplug the USB device and plug it back in, but it gets a little annoying crawling around underneath my computer. Is there any way to make it -stop- doing this (besides the obvious solution of not having the computer on at all).
Thanks.

I'm new, too. I just got mine set up. So far, I detect only one side of a business communication and some losers making goofball comments and the occasional put down of prominent political figures. It's odd that I don't pick up more because around the corner is a speed trap for the tourists in the area and I'm surprised that people don't communicate warnings back and forth.

A CB radio should come with its own (primitive) built-in speaker. Using a
better speaker which plugs into it improves audio performance, but is not
necessary to hear the output.
My CB radio required a 12 Volt adapter for the wall (Radio shack told me the
13.8 V adapter was the same thing, and it worked. So, shows you how much I
know.) You can use a cigarette lighter adapter for your car, too.
Yes, you will need an antenna. I thought Radio Shack was trying to scam
me -- but he really wasn't. This thing has a hard enough time receiving
audio even with an antenna. However, I am in the mountains, and am inside
of a building, which probably doesn't help. You can buy the antenna you
want at Radio Shack. (And possibly on Ebay, but be careful about what you
buy.)
You do not need a license or certification to operate a CB radio if you live
in the United States. You do not need to be a certain age to operate a CB
radio.
I don't know about police scanners. I just bought a primitive radio from
radio shack, which was -exclusively- a radio with mic.

First find out why you need a CB, is it for the road so you can here the reports, or just rig chewing. CB is OK but why waste time in it, go for the real radio world, Ham radio with much better audio quality and allot more choices in bands.

Well first let me suggest that you find a local Ham Radio club and learn
some read radio electronics. Any ham will be more than glad to help you.
You can find your local club at: http://www.arrl.org .

Now as to your situation. You were not scammed or lead astray by your
Radio Shack sales person. The 13.8 volt power pack you got is exactly

correct. An automobile when running produces 13.8 volts of power to charge the car's battery therefore all electronics produced to operate in a car uses 13.8 volts. In fact 12 volts will under power most devices. Most higher frequency receivers require an outdoor antenna placed as high as you can safely hang it. There are many good sources of equipment that you shouldn't have any problem getting equip. Check advertising in the various magazines. One good source is "Amateur Electronic Supply": http://www.aesham.com . They have CB equipment in addition to ham and the salesmen are excellent sources of accurate information.
As to licensing. In the US and it's territories and possessions no license is requires for CB radio. For Amateur Radio you do need one. Of course no morse code is required anymore. Just some multiple choice questions.
Finally, in the mountains at CB frequencies you need a clear and high antenna to get any signal.

Good luck and ignore the idiots on the band.

That's what I thought but I figured I would ask anyway. Ham has to be
licensed no? Is it the same cost anywhere in the US?

You don't mention what kind of CB you are using. Is it a handheld walkie-talkie type with a rubber duck type of antenna or is it a mobile with an external antenna? If it is a walkie-talkie type with a rubber duck antenna, you're probably out of luck and will need to just deal with the interference to your USB plug or back further away from your computer when you use it. If you have a mobile with an external antenna, you may have a mistmatch (high SWR condition) or possibly some feedline radiation going on. Try moving your coax further away from the computer and see what happens.

Actually not that difficult. Definitely the frontend transistor were
bipolar. Often configured in cascode and operating at 0.95VDC and
narrow band operation (>5 MHz wide) anywhere between 30 and 1000 MHz.

true.

I still like depletion mode MOSFETs as they operate more like vaccum
tubes than bipolar transistor do. Ever tried a common gate depletion
mode MOSFET amp in any RF AMP?

Outside of shielding and/or bypassing on the inside of your USB mouse,
move your transmitter farther away. Even better don't talk on the
radio at the same time you use the computer. The USB cable itself is
fairly immune to EMI pickup but not 100% prevention. The circuit board
inside the mouse is often left unprotected. Then again most
manufacturers of USB mice do not intend the product to be used in
strong RF fields.

It's a mobile with an external antenna. It's right on top of my desk, where
my computer is, which is probably part of the problem. I'll try moving it
farther away and see what that does.
Thanks.

> So does CB really still exist around the country?

There are hot spots of activity. On my side of town there is nothing. On the other side of town there is AM activity. Tuesdays have a net on single sideband. Other folks report CB is alive and well. The last skip cycle was so noisy, not because it was a strong cycle, but because there are too many dirty amps on the air and a lot of people went ham. Then last Friday, the CW requirement for ham radio went the way of the dodo bird. Lots of techs are making waves from 28.3 to 28.5. If you have a scanner, try listening from 144-148 and 438-450 for local activity.

Ham radio is probably NOT a good choice for you until you learn a bit
more about radio and electronics. Ham radio requires studying and
tests to gain a license.
CB does not require a license, and you can use it immediately, it is
not at all a waste of time.

I would suggest a CB that also has SSB, and also a good antenna.

Ham radio is fine, but its a whole different animal and can't be
compared to CB.

CB is a good stepping stone. Not all folks that buy a CB even stay in radio.
If you like it then ham is the next step.

> I would suggest a CB that also has SSB, and also a good antenna.

Sideband radios are generally better radios overall. It would help if pointers to
"a good antenna" were posted. How about:

o The bigger the better
o Holes instead of magnets
o Center is better then edges

> Ham radio is fine, but its a whole different animal and can't be
> compared to CB.

But people are still people and you'll get bad apples in every group.

Yes, but is slowly losing popularity. Ham radio is also losing
popularity, which is mostly why the code requirement was dropped.

Cellphones and the internet seem to be the main choices of
communication these days.

With a JFET, not a MOSFET. I'll bet it's as sensitive as a gay
attorney watching a Snicker's commercial. It sounds a bit scary
though..... maybe if it's DC coupled to a bipolar 2nd stage? However
it's used it would definately need some sort of protection that
doesn't contribute to noise. And imagine the possibilities using a
dual-gate MOSFET (too bad they don't make them anymore).

10 meters still dead in my neck of the woods for local chatter and
DX, but CB is still hopping on AM and lots of DX on 38 lsb...

Funny, but the whole reason I became a Ham was so I could use 2 meter
and 440 where all the local chit chat and fun was, not 10 meters....

Yep, tons of activity and fun on the bands when No-code first
started, now its dead out here... Wonder if it is because No-codes
were not treated with enough respect??

sheesh

It sounds to me like the ham radio operators are the retards

1
A BUNCH of Ham radio operators were complaining that there's already
a
bunch of people operating illegally on family radio service channels
one through seven with illegal excessively high power of five watts
instread of the maximum two and a half watts allowed and with five
khz
deviation instead of two khz deviation and illegally pretending to be
ham radio operators by illegally using fraudelent ham callsigns like
WXY2457, WBT5632, WZ2345 instead of real ham callsigns like KG5RTU,
WG4RTU, WE3GTE (how they knew they weren't really real ham operators
like they were trying to pose as). and that these people should be
reported, fined, and put in jail for doing these illegal activities.

Listen up you hambos. I got news for you. Those AREN'T illegal radio
operators andd they AREN'T doing anything illegal. Those ARE GMRS
radio operators who ARE ALLOWED to operate on family raadio service
channels one through seven which ARE also GMRS channels.

And they're NOT pretending to be ham raddio operators. Those
callsigns
that they're using ARE legal GMRS callsigns.

You would THINK that ham radio operators would knoow this stuff.

I don't even have a ham liscence and here I am having to explain to
ham radio operators that GMRS radio operators ARE allowed to operate
on GMRS radio frequencies WITH GMRS power levels, WITH GRS deviation,
and ARE also allowed to use GMRS callsigns on those GMRS frequencies.

Sheesh!!!

They are pissed because the FCC changed the rules for their own reasons.
The FCC was the ones who changed the rules and made the changes, not the
no-coders. But the people on the bands who dont like it will have to

deal with it because the no-coders are here to stay there isn't a damn thing the old fogies can say about it.

Frankly, I've had quite a few good comments from Extras with 20WPM and all that too so some of the hams are pretty cool about things. You have to realize that you have a lot of attiude problems in ham radio because they did it and things changed. Like I told one critic, I guess they will have to deal with it. If they respect me, then I will respect them and I will respect them as well. But when they start their little fights over the code, then I say they need to grow up.

I dealt with one anti social jerk the other day that wasn't even using a frequency for 5 minutes and all of a sudden they got their underwear in a wad about it when someone asks twice if anyone is using the frequency. No mention of that so call CQ and they throw a fit. Claimed to be operating a mobile net on 40 but even a dipole and loop couldn't hear them.

> Welcome to CB everybody.

No, not too stupid. It's just that the hams find ways ro screw over anyone they want to, just because they want only them and their friends on the frequencies and no one else.

I stuudies for my ham test and I KNEW rhe correct answers and gave the correct answers.(for the most part). But the hams also gave me phony questions, which I also answered correctly. And still refused to give me my ham liscence, saying that I flunked the ham test. Then the hams told me what they said the "correct answers" were. However, all of their so-called "correct answers" were wrong answers.

And they never did give me a refund of my fifty dollars that I had to pay them in order to take their phony ham test, so they're thieves also.

In addition to the multiple choice questions cheets, they also gave me sheets with just questions on it that they said I had to answer correctly to pass the ham test.

Some of these questions were "What does ATV stand for as related to ham radio?". I answered "amateur tv, also known as ham tv".

After the test was over, the hams marked it wrong and told me that the correcr answer is "ATV stands for an all-terrain vehivcle equipped with an ham radio" and that "there isn't any such thing as amateur tv or ham tv"

.They also told me that to get upgrades to my ham liscence if I got it, that I have to communicate with non-ham radio services by operating at the very edge of the ham band so that my transmissions can be heard by the non-ham service so that I can communicate with the non-ham service with my ham radio. And tat to get a ham liscence upgrade, that I also have to perform community service at the parade/ festival and have to say the name of te fffffestival over the ham radio several times.

By the way, the name of that parade/festival is The "Mayday"

Other questions on the test were to name all of the (then-current) ham bands.

That question was also mnarked wrong since the hams said that I forgot the 11 meter ham band known as cb radio.

By the way, this was all in the early to mid 1980's.

My answer on a similar question that was also on the test was also marked wrong as the hams tol.d me that 11 meters is too a ham band and that the cb'ers stole it away from them.

After that, By all rights, I should have had my ham liscence back then, but the hams were very very very very very deyermined to prevent that from happening.

They just want certain people in there. They let in people who don't know anything about radio and they prevent people from getting in who do know about radio. The hams just want it to be their own little, private exclusive club.

They sure turned me oiff of ham radio (which was their intention to do).

Before that, I was looking forward to it.

But not anymore.

I don't want to get involved with a bunch of people, thieves, and criminals like that.

Give me good old cb anyday.

I haven't heard them on 10 meters yet, but if they're there, then I
wonder if they're really truck drivers.

There was a buch of interference to GMRS repeaters in northern
California.

Both the GMRS operators and the ham radio operators complained about
the family radio service users interfering eith the GMRS repeaters.
Although the hams went on to say how it's proof that family radio
service is turning into the exact same thing cb has and should be
given to the hams instead.

The GMRS operators by theirselves went direction finding to track down
the sources of interference to their GMRS repeaters.

And guess what they found?

They found out that ALL of the interference to their GMRS trpeaters
were ALL ham radio operators purposely interfereing with their GMRS
repeaters.

A BUNCH of hams.doing so.

And I wouldn't doubt it if thoise ham radio operators who were
purposely interfering were the same ones complaining about that very
same interference and about family radio service operators and about
cb operators.

I was into cb decades ago. But the hams around here messed that up for
me also with their criminal activitities, which I won't get into here.

It will suffice just to say that I'm glad the morse code requirement
was dropped and now maybe we'll get a bunch of decent people around
here as hams, who will outnumber the ham bozos who have been clogging
up and polluting the ham airwaves around here for so long.

They even went so far as to say (on the air) that they wanted to
pollute the whole planet since it gives them better dx!!!

While it's true that gives them better dx, I wouldn't want to pollute
the planet, and I don't want the planet polluted.

It just goes to show what kind of people they are and what idiots and
bozos they arel. At least around here.

Anyways, after a hiatus of several decades, I just hooked up a cb
again, and will soon be returning to the airwaves.

That's probably the best thing said in here.

Although it still amazes me how many hams who claim you should use only the power levels necessarry for communications are the same ones promoting using more unnecessary power for communications by saying if you want to talk on the radio to your neighbor down the street, don't use a half watt frs radio that covers only your neighborhood and lets people in other cities and neighborhoods in the same city talk also. Instead, use a cb that covers a twelve cities and prevent people in ywelve cities from talking just to talk to your neighbor down the street on the radio. "After all, that's how us hams do it."

Yes, I know that's how you hams do it. I have a radio scanner. I hear you hams running more power than necessarry for communiccation. I know you do because I hear you talk on the air about it.

I sure hope the elimination of the morse code requirement helps to get some actual sensible people into ham radio.

Sure, I'll use a cb to talk to the neighbor down the street if he has only a cb radio.

But if we both have frs, why should I talk to my neighbor down the street or next door with four watts of power that covers twelve cities when only a half of a watt that covers only one mile will do?

I know the bozo hams around here will just be angry that they can't hear what I'm saying . Well, tough luck. hahhaha.

no, the original poster is correct, sort of, although very mixed up.

I believe he heard about the rf debvices that the police use to stop
cars, but either he or his friend(s) got it mixed up somehow.

You are right with many points...

I am a Ham myself, I got into Ham radio after many years of fun on
CB.

Don't be fooled into believing that Ham radio is a perfect world, its
not. You have many pirate stations, over powered rigs, and obnoxious
people. You may not notice this as much because it is spread out over
many bands.

FRS is great, but Cb is probably still more popular for the masses
and rag chewing...Nothing wrong with FRS for local stuff.... GMRS is
neat because they do have repeaters, but you must buy a license...

Thank you all for your posts. I learned a lot more about Ham and radios now I believe. You guys/gals are right, I think I should try out with CB or something first, because I don't really want to buy a license and all that kinda stuff right now. To the guy/gal that said he/she had a radio scanner, I swear radio scanning probably will never die, it's just too amazing what you can hear on them. People swearing on CB and people at fast food restaurant clerk frequencies insulting customers and other stuff. I know some people here might saw scanners are more important for police, fire, and EMS but believe me, since I live in a city and surrounding cities that have almost no good emergency traffic other then maybe some kids breaking windows with rocks, no bank robberies or stuff like that, it's kinda fun to hear stuff like fast-food and CB.

Geez what a bunch of tossers you all are - you don't like someones postings so
you try and get him evicted from the net, why not just use a kill file - you
DONT have to read his posts/threads now do you ?

Why is it the net is getting populated by the biggest bunch of self absorbed
little Hitlers ? You don't like someones posts so you bloody complain or mail
bomb them - grow up you bunch of fucking sad gits !

Richard.

All I can say is what I hear around here. I've been listening to channel 19, the trucker's channel, and was surprised that I don't hear anyone using handles anymore like they did back in the 70's and 80's.

I don't hear names either. Just talking and conversation.

Not that it matters. It was all civilized.

Not the cesspool hams claim it is.

Finally, a ham with some sense. If only the ones around here were like that.

I know some would say "just use the telephone or just walk over to your neighbor's house".

Well, I'm not about to trudge four acres in nine feet deep of snow in the middle of winter just to get to the house next door to tell my neighbor something.

And my neighbor doesn't have a phone. It was disconnected because she couldn't afford it. (That was a regular landline phone, so she can't afford a cell phon either with the prices they charge).

And she doesn't have a cb. But she does or did have a frs radio.
At least she did a few years ago.

She doesn't know I've heard her on it since I never used it to contact her, yet.

And besides, I remember in the 70's and 80's, a lot of people thinking the cb was preferrable since it didn't tie up the phone lines.

There was even an episode of The Donna Reed Show in the 50's where the dad comes home and really angrily chews out Mary for tieing up the phone line.

The CB at that time, (late 1970's and early to mid 1980's) was more like an old-fashioned party line without the lines.

I'm not sure how it is around here today, but I'm about to find out.

Yes, I think cb is probably the way you should go when firt starting
out.

I don't think you'll hear cb on most scanners, though. Mot seem to
start at 30 mhz and go up. CB is around 27 mhz.

Since you seem to be interested in hearing anything you can on a
scanner, I think you'll find some stuff to listen to around where
you're at on one.

One word of advice, though: Unlike in the past, don't ask for a
"scanner" at the store. Make sure you say "radio scanner" or maybe
"police scanner", or else they'll probably think you mean a computer
scanner to send pictures.

Yes, I have heard her fast food restaurants on mine although my local
one switched over to something I can't hear after they found out that
other people could hear them.

I didn't tell them. I had a handheld scanner in my car. While going
through the drive-thru, it fell under the seat where I couldn't get it
right away, so they heard it. At first, they couldn't figure out why
it sounded like their drive through speajker sounded like it was
coming from outside by my car. I guess they finally figured it out.

But even before that happened, on a different day, they said something
on their channel that I inadvertantly replied to when I got to the
window. They thought that something was wrong with their drive-through
speaker and sent someone out to check it because "the customers aren't
supposed to hear that".

I've also heard aircraft, taxis, police, ems/fire department,
businnesses, ham radio, and broadcast studio transmitter links.

I've had a scanner before the ECPA went into effect. I read the ECPA and it looks to me like it says that listening to broadcast studio transmitter links is legal, although some people will say it's not legal, but I think they're misreading it.

Besides, the ECPA seems to contradict itself. It says listening to ham radio is perfectly legal. But when I listtened, most ham radio transmissions consist of phone patches, which according to the ECPA is against the law to listen to..

If I find he text about studio transmitter links, I'll try and post it.

hey, don't you know that all those "inbred cb operators" live in very
rural mountainous aras where they need the few hundred watts on 11
meters just for their signal to make it to their closest neighbor?

The legal 4 wats won't reach any of their neighbors in those areas.

So it's understandable why they run a few hundred watts.

:;)

Step 31. If you hear someone playing music on cb channel 14, don't check it out first to see if it's a kid next door or down the street playing music legally on an old 100 milliwatt cb channel 14 kids walkie-talkie handed down to him by his grandfather or bought at a pawn shop or flea market.

Instead, just automatically assume that it's an illegal transmission and immediately report it toi the FCC as an illegal transmission and turn the kid in.

After all, why go to all the trouble, bother, and hassle of first checking out whether it's a legal transmission or not. It saves you much more time to just immediately assume, immediately report, and imediately turn the kid into the authorities without bothering to first check the facts of the situation.

I think it is a good idea. Distracted drivers can be as equally
dangerous as drunk drivers. It does not matter whether the distraction
comes from a cellular telephone of a CB or even a 2 meter ham rig.

That's what the hams get for trying to keep everyone else out of it
for so long, even when they knew radio theory, and for trying to keep
it their own little exclusive club wher only a very few people are
members, even though they don't know a thing about radio theory.

Keep people out for decades. Now there's a huge gap between the "old"
hams" and the "new" hams.

which means the die-off is coming, as you say.

I also disagree that local police should be given authority to arrest violations of cb radio.(Although it's sort of already done).

A few years ago, I bought a cb. I hadn't been on the air in decades. I put the antenna on my car first. But then I had to go somewhere before I could hook up the cb.

So even though I didn't have a cb in my car, a cop followed me for several miles, following every turn I made, until he got a call on his radio to go somewhere else.

He was obviously following me just because I had a cb antenna on my car. Not because of any cb transmissions I made while driving. How could I without a cb in my car at the time?

I wonder what he would have done if he found out that there wasn't any cb in my car.

Some people just don't know. The local pawn shop here is selling one.
The average person who shops at pawn shops isn't going to have any
idea that it's illegal.

They'll mistakenly think it's a legal cb. After all, the store was
selling it.

Also, hams have claimed that they're legal for hams to use and
possess, but illegal for anyone else to even possess.

What if a ham buys one, and then loses his liscence, but can't sell it
because no one else will buy it?

He'll be immediately in violation of the law if we go by what the hams
said in the past about when it is and isn't legal to have one.

To abolish the FCC, Congress would have to recende the Communications
```

Act of 1934 as amended. Then they would have to create a replacement. Do you really want a bunch of political hacks doing that? Do you?

If you check the statistics you will find that the leading cause of
automobile accidents is drivers looking at another automobile accident
as they drive past it.

Cell phones are way down the list of causes.

I spoke too soon when I said cb channel 19 was civilized. After
further listening, just tonight I heard a couple of cb'ers aarguing
with each other with the one really swearing at the other one.

Just because the one guy didn't like the subject matter that the other
guy was talking to someone else about.

>From your posts, I think you'll enjoy listening to cb channel 19.

And the fast food restaurants channels on your scanner and the other
channels omn your scanner when you get your cb and your scanner.

I think you'll have fun with them.

wrong. I studied for the code and written test. They kept me and
others out by giving required to get your ham liscence phony ham tests
in addition to the real test, claiming it was also part of the real
test, marking correct answers wrong, and then claiming that wrong
answers were the correct answers.

question "What does ATV stand for as relating to amateur radio?"

My answer: "ATV stands for amateur tv, also known as ham tv"

They marked it wrong and then told me that "the correct answer is an All-Terrain Vehhicle that is equipped with an amateur radio set. There is't any such thing as amateur tv or ham tv.

THAT IS purposely keeping people out.

If that was the case (though I doubt it), all you had to do was test elsewhere.

Personally, I think you're just a crybaby.

Nope. If you tried to take the test in the neighboring counties where
you didn't live, they would refer you back to your local county.
>
> Personally, I think you're just a crybaby.

Nope. I'm not crying about it and never have. Just getting the truth
out.

I've been quiet about it for over twenty years. It's about time that
the truth about them finally comes out to the public.

However, with the CW requirement now eliminated, I'm sure enough good
people will finally get into ham radio and be able to keep an eye on
those old bozo hams (who did pass the cw test since it was required
back then).

That is a distracted driver. Also I am irritaded by these idiots also.
While cell phones, CB radios, ham radios and such are not major
factors for acidents, they do increase the amount of distractions that
now plague drivers today. Couple that with the increased number of
vehicles on the roads today, the need for the driver to pay attention
to the road and conditions is far more critical than was 30 yrs ago.

Rubbernecking is a distraction that is almost hard to control. But
other distractions/impairments need to be controlled.

james

Oh... THERE we go... the truckers were all upset on channel 19 about some
backed up traffic. Heh I went to take a look, being a local. Yeah, that
would have peed off the truckers allright, the interstate was diverted to a
local road.

1514. amp question

Does anybody know where I can get a radio signal amp that operates in the 24-35 Mhz range?

How did you know "He was obviously following [you] just because [you] had a
cb antenna on [your] car," and
How did you know that "he got a call on his radio" if you did not have a
functioning radio of your own?

ph:

Since 1995 the hand writing on the wall spelled out the doom of CW.

However, the sheer momentum which was built up by the dyed-in-wool
hardcore CW'ers carried it on. Time and time again resurrected it from
its' tomb and breathed life anew in CWs' brittle bones.

The arrl, being the professional politicians (or, as I like to refer to
ALL politicians--public butt lickers) they are, make the proper noises
and finally let lose the grip they had on the dead and bony fingers of
CW. However, don't be fooled. They only do so because even they have
woken to the fact there will be no resurrecting CW another time and do
not wish their true motives to be seen in the light of day. Now they
seek to shore up the old and ancient myths and class systems which has
made amateur radio a good ole boys club and placed it under their control.

Beware, the future will only bring more stealth, deception and
disinformation from the arrl as they seek to maintain the status quo on
what is left of their control freak, class system and good ole boys club
which they have established for amateur radio. They need to have their
dead old fingers pried from its' death grip they maintain on amateur radio.

If that's the case, you only had to file a complaint. You clearly
didn't take your test with an FCC examiner. More likely a VE, or at an
ARRL event, or hamfest.

FCC takes testing irregularities seriously. What your suggesting,
here, is a crime. If taken with an FCC examiner, your experience would
have been highly public, at a testing event, and there would be many
witnesses. Witnesses to not only support your claim but to file
complaints of their own. FCC examiners at the event would have been
summarily terminated. And you'd be permitted to retest again. At no cost
to you.

If you took your test with a VE, at a hamfest, a single complaint
can get a VE summarily decertified while the merit of your complaint is
evaluated. Again, there would be witnesses, and supporting complaints.
And you would have been redirected to another VE for retesting.

That said, your complaint, here, is quite difficult to swallow.
First of all, all government issued tests, and that includes FCC and

even FAA tests, which should give us all pause, are required to publish and maike available both the pool of questions AND their answers to anyone interested in testing. Non published questions are NOT permitted on the tests. This has the force of law. That means your phoney ham tests is an allegation of a criminal act. Believe me when I tell you, anyone observing this would raise holy hell if anyone were turned away based on a 'phoney' test. In this litigious society, the lawsuits would far outlive your interest in amateur radio.

And finally, there has been amateur TV since before there was TV. If you have really studied your theory and legal elements, you would know that a portion of many of the bands are set aside for slow-scan TV on HF and fast scan TV VHF and above. There IS amateur TV. And any study materials you'd have access to would include it.

So your story is false on its face. And you've neither studied code in earnest (outside of the Cub Scout and Boy Scout merit badges) nor any of the elements.

And one other thing...if you really expect us to believe your complaint, it may be useful to not go to such lengths to remain anonymous. Many, here, use handles and nicknames, we've come to correspond with them privately, many have done business with some of them, bought and sold radios, shared schematics...You're clearly not willing to participate in any of that. And as such seem to be only about the bitch, and not about the hobby, as your absurd anecdote attests.

If you'd like to try again, and if you're genuinely interested in pursuing amateur radio, try being more of a participant. And a little more genuine. You'll find that amateurs, as a whole, are a pretty inclusive bunch. And any obstacles you face will be non-issues in the wake of the juggernaut of knowledge and experience that will come your way.

Yes there is not much original thinking on the groups these days, as seen above, the hanger-on types are even trying to forge a spoof.

Because only a few states even consider cell phones as a possible cause on
accident report checksheets.

The VoiceMax project is progressing on schedule and a product release
date has been set. This date has been set on the conservative side and
the product could conceivably be released sooner. I invite all of you
to keep abreast of the continuing progress with this product at
http://www.telstar-electronics.com/default_files/NewProductDevelopment.htm

The preceeding was a paid commercial message, and does not necessarily
reflect the views of this station.

The cops use them all day everyday.. on duty or not.

Al Gore is telling us to cut back on our natural resource consumption too.

Have you seen how many KW hours he uses in his mansion, or his natural gas
bill? -Bogart-

JS, that evolved in ALL radio services from a much earlier
period. In general the experiences of and with radio
communications during World War 2 was the "Great Awakener."

>However, the sheer momentum which was built up by the dyed-in-wool
>hardcore CW'ers carried it on. Time and time again resurrected it from
>its' tomb and breathed life anew in CWs' brittle bones.

In amateur radio that may be exaggerated but true.

The built-in fact of amateur radio being basically a hobby
makes it ultra-conservative insofar as actual innovation
and experimentation is concerned. Hobbies are a pasttime
for most and thus there is less time available for
participants to either learn more, keep up with, or
actually do operating. As a result, many prefer the
"tried-and-true" methods and modes they are used to, or
feel comfortable with.

Underneath all of that amateur radio activity is the
long-term but subtle emotional influence of amateur-
radio-oriented media, namely the enormous quantity of
publications of the ARRL. The ARRL has kept the Mythos
of Morse alive for decades, decades longer than it
deserves as a communications means. The enormity of
their publications base has been in existance for so
many decades that few members are aware of their
(insidious) influence on their thinking.

>The arrl, being the professional politicians (or, as I like to refer to
>ALL politicians--public butt lickers) they are, make the proper noises
>and finally let lose the grip they had on the dead and bony fingers of
>CW. However, don't be fooled. They only do so because even they have
>woken to the fact there will be no resurrecting CW another time and do
>not wish their true motives to be seen in the light of day. Now they
>seek to shore up the old and ancient myths and class systems which has
>made amateur radio a good ole boys club and placed it under their control.

In all fairness and logic, SURVIVAL of anything is the
most important human motivator. Politicians,
organizations, and corporations all have a basic need
to SURVIVE. They must cater to their constituency or
target market to do this.

The ARRL can be summed up as having two basic components:
A publishing house (prime) and a membership organization
(secondary). ARRL's annual reportable income exceeds the
million-dollar value by at least an order of magnitude;
they reported higher-than-ten-million dollars income to
the IRS four years ago. They could NOT have achieved that
just from annual member dues.

An oft-used argument is that the ARRL offers "so many 'free'
services." The ARRL VEC exam fees are the top of the limit
yet some of the other seven (?) VECs charge less. The ARRL
offers "help" on license renewals and paperwork to the FCC.
That is just lip-gloss since: (1) There is NO charge to any
licensed amateur at the FCC except for Vanity call
applications; (2) Paperwork handling AT the FCC for license
adminstrative matters is no more difficult to do on the
Internet OR by mail than through the ARRL (as an intermediary).

Back before the Internet went public in 1991, it was very
convenient to have the ARRL "represent all radio amateurs"
in lobbying and legal-speaking to the FCC. Most citizens
tend to shirk direct talking/communicating with their
government (although some have done so and effectively so).
Having a legal firm on retainer IN Washington, DC, is more
effective than individual citizens writing letters from
Montana, Arizona, Hawaii, or Oregon, all several time zones
away from DC and days of postal delivery away. [CT is in
the same time zone as DC and physically much closer than,
say, most-populous California] Radio amateurs tended to
prefer someone "speaking for them" so that they would have
more time to play with their radios.

Another argument of those championing the ARRL is that
they "have a democratic-principled representation" through
their own established Districts and "elections." Actually,
there are NO similarities to our federal government's
democratic principles and practices; the only similarity
is to several national fraternal orders, all private

organizations. Supposedly there is a "third-party observer" to ARRL elections, but that is NOT anything similar to the built-in Checks and Balances of the real federal government. Those federal (and local) Checks and Balances DO NOT APPLY to private membership organizations. Yet the IMPLICATION of similarity is so often done that it has become just-another-urban-myth, emotional sustenance for its membership.

The ARRL remains a MINORITY special-interest-group in US amateur radio...yet they imply (often) that they "represent all [US] amateurs." The ARRL only publishes a CLUE as to their membership totals twice a year; In the "publishers sworn statement" about QST, the member-ship magazine of the ARRL. ARRL membership is still only a quarter of all US amateur radio licensees. QST survives as a periodical on its advertisers ad purchases. QST is the major periodical target for manufacturers and service-providers of the amateur radio market. QST has a virtual (if not de facto) monopoly as an amateur radio advertising medium in the USA. Note: Three other INDEPENDENT amateur radio interest periodicals have survived for over a double decade of existance of each yet two have had to close or sell. Their incomes depended on advertising space sales. When the ad monies diminished those independents did not have the demographics to attract enough advertisers as compared to the ARRL. The number of members keeps QST demographics high, thus it serves to keep its survival intact...and serve as a free advertising medium for its OWN products and services.

>Beware, the future will only bring more stealth, deception and
>disinformation from the arrl as they seek to maintain the status quo on
>what is left of their control freak, class system and good ole boys club
>which they have established for amateur radio. They need to have their
>dead old fingers pried from its' death grip they maintain on amateur radio.

Human life expectancy will take care of that. Eventually the core membership of the ARRL and its chieftans will understand that this new millennium is NOT the same as it was in the 1930 to 1960 period when They were young (and supposedly vibrant). Times and tecnology have changed enormously yet the Mythos persist on the "necessity" to hold to the old, old standards. However, to retain their CONTROL ("they know what is good for ham radio") while they still live (and rule) they must insure that the Big Publishing House survives. That income is what gives them the perquisites and power of quasi-rule over others. They MUST acquiesce their quaint old ideas and mythos however much that hurts their psyches. WE still have time to see

the Change happening...but I am not optimistic about it.

73s,
LenAnderson@ieee.org

Len:

Just for starters, it pieces me off that the FCC doesn't even host the download of the amateur pool questions "right-out-and-openly" on their web page. This alone gives the VEC and arrl MUCH more credibility then the toothless old grumps deserve. And, I have complained about this ... I will continue to do so, use the public funds and keep this outta private hands and influence!

The arrl need to go, and Carl is NOT looking like a good replacement with NCI when he boot licks ... amateur radio needs a new start and some new blood ... someone needs to kick some real booty here.

Regards,
JS

JS, amateur radio is not even close to their main task of
regulating ALL civil radio in the USA. However, they could
make a small link to www.ncvec.org if they bothered.

For real complaints, you might address the FCC on why
they do NOT bother with many updates of the amateur
radio page under the Wireless Bureau. They haven't kept
that updated but sporadically since the NPRM on
Restructuring (FCC 98-143) came out in 1998.

> This alone gives the VEC and arrl MUCH more credibility then
> the toothless old grumps deserve.

I'd say the NCVEC is reasonably up-to-date given
their voluntary task of coming up with new QPs every
three years or so. The ARRL is only part of the VEC.

> And, I have complained about this ...
> I will continue to do so, use the public funds and keep this outta

Sorry, but the privatization of radio operator testing put
that in very private hands of the COLEM and the VEC.
I haven't looked for a COLEM QPC but have no doubt it
exists somewhere. My First 'Phone that morphed into
a GROL went lifetime, no renewal and I have no need to
go look for that commercial pool.

>> The arrl need to go, and Carl is NOT looking like a good replacement

>> new blood ... someone needs to kick some real booty here.

That's a subjective opinion, JS, and I won't fault Carl S. on
what he has done and stated in various places. I disagreed
with what NCI did NOT do immediately on FCC 06-178 when

it first broke news last December...but then NCI is really
an international movement, not strictly one for the USA.

While the USA is a LATE-comer on tossing the morse code
exam internationally, there still exist other countries who have
kept it, one way or another.

In my opinion, NCI could either dissolve or change away from
being USA-oriented with a different direction. NCI's basic
goals have largely been realized and, in that, was a success
to my mind.

As long as there is money to be made from publishing to a
niche hobby activity, the ARRL will be firmly entrenched.
Human attrition will eventually cause their metamorphosis.

I'm sorry but I don't understand what you mean here. The Amateur Radio
question pool was developed by a committee composed of representatives
from the various Volunteer Examination Coordinator organizations noot
the FCC. The questions are posted on the Internet and are available for
anyone to view. If you go to www.qrz.com you will find a routine that
will allow you to take a sample quiz. If you do this enough times you
will be able to pass the various level tests.
The ARRL does not have anything near exclusivity in this process. They
only have one vote in the process. I don't know exactly how many other
organizations there are but I know of at least three.
As for replacing the ARRL as an orginization feel free to do so. So far
they are the only group to stay in business.

Subjective? Well ya, all you see in my posts are one mans humble opinoions. But then, the president pulls his pants on one leg at a time (well, I believe he does!) and no mans opinion counts more than mine--not even his!

NCI has REAL relevance, in my humble opinion ... your mileage may vary.

>

Hmmm. Yep, we may be dumb, but we can always point out someone dumber! <sticks-out-tongue>

Yep, time for NCI to step into phase two, hope Carl is "psychic" enough to realize that!

Time for the "common ham" to fire up. Setup some web pages with training, "elmering", etc. Heck, where is the group rec.radio.amateur.new-licensees ??? Instead, we have self-protecionist hams creating groups like "rec.radio.amateur.good-ole-boys-club"

Krist, Dee has better ideas than most, that alone should shame us into better behavior and efforts ... are we men or are we mice?

The world is owned by the common man (in this case, common ham)--strange how so few "common men" realize that we put amateur radio forward "one ham at a time ..."

The little amateur who got me started, ran his rig with dignity, gained my REAL respect and was one "HELL OF A GOOD JOE" (might I add, was LOVED by his town and community?) and will always be remembered in my book. I cannot find his equal easily these days ...

The arrl can go to ... well, you know where ...

Warmest regards,
JS

Well, exactly!

Get rid of these fools and let the FCC set the exams ... gawd, that
doesn't take an einstein does it?

I am all for private enterprise, however, when we talk about laws,
guidelines are rules governing pubic properties--we as "the people" only
have that right ...

Actually, I should have been more clear on this.

Our representatives, and though the gov't agencies they design, should set these "rules and regulations." "We the people", should vote in and support only those representatives which serve us and our public interests. Yanno, like they are supposed to work in our best interests?

Yanno, like the public airwaves are a natural resource given man by his creator. And, since we realize that some of us "common citizens" might work in our own best interests if not watched closely, may indulge in stuffing our own pockets if not watched closely, may use "public resources" for our own personal use and that of our friends if NOT watched closely, so that we may pay attention and CLOSELY to giving all citizens use of their creator given resources.

In my humble opinon this has not been done for decades past, indeed, the same old protectionist policies and guidelines are being hoisted upon us again.

We need the FCC to accept total control of these things, away from public enterprise and interests. We need the public servants to control these things so we can kick their butt when they start working in their own interests.

The arrl has been working in its' own best interests for decades. They have been able to do so because the avg citizen is ignorant. The avg citizen doesn't even know how to wire an electrical outlet in their own home--let alone build an xmitter or power amp.

Get real, time for private interests to be kicked out of control of public airwaves!

Regards,
JS

The pro-code hams have been arguing that Galaxy radios are perfectly legal for hams to use on 10 meters, even though they're illegal for cb'ers to use on 10 meters.

Well, IF that's the case, then a lot of Galaxy radios suddenly became legal on 10 meters from a bunch of people passing their ham tests without having to take a code test.

And we all now how those hams LOVE those Galaxy radios.

I don't think they're legal even for hams since they can transmit in the 11 meter cb band with more powwer than allowed.

But since the old pro-code hams have been arguing that they are perfectly legal for hams to use.....

There are at least 12 VECs. These VECs create a Question Pool Committee and create the pool and maintain it. Since the question pool is available in its entirety for free from a number of websites and since the FCC does not create nor maintain the pool, there is little reason for it to be on the FCC web site.

No, you did not vote for the VECs. However, anyone could have sent an objection to the FCC if they thought a given organization was unsuitable for this program.

Yes they are responsible to you under the law since they are accountable to the FCC. If any VEC (these are organizations by the way), is found to be remiss in its duties, they can loose their standing as a VEC. At the time the system was being developed, any organization could have applied and if they met the FCC's standards could have been certified as a VEC.

Yes the VECs are responsible to you under the law since you have both the right and responsibility to file a complaint with the FCC if you find that they are not acting according to the requirements of the FCC.

The VECs do not use any public resource monies. The expenses of testing are covered by the testing fees, which are set by the FCC.

The VECs were selected and appointed by the FCC from various organizations applying for this task.

You may not like the VE system, but amateur radio experienced a surge of growth once exams became available at times and locations that candidates could get with ease and without having to take time off work.

I want them gone, gov't bureaucrats are enough to put up with, private
sector idiots sneaking into gov't regs, rules, exams and policy is much
more than any citizen should endure. I already pay taxes to have these
things taken care of, they don't need to hire maids and butlers to do
their work ...

JS

You can become a VEC if you so desire. All you have to do is find enough hams to support your efforts and create an organization to conduct examination sessions.
There is nothing magic about the VEC. It just takes a lot of unpaid work on the part of a lot of people. Yes some get paid to process the paperwork and file the actual application for your license. No one is getting rich on this program.

Well, most of us don't. Fact is, there are very very few FCC field offices left. People from Oregon would have to go to Seattle or San Francisco to take their tests (as would hams from Idaho, Montana, Wyoming, Utah, etc..) I was fortunate when I originally got my ham ticket that the Portland field office was still in existance. It's no longer there. Most can't take the time off work in the middle of the week to drive 200 miles (more or less, from Portland to Seattle) just to take a test. With the Volunteer Examiner program, it allows hams to take tests usually at a place within a few miles of their own home town, with flexible times, usually on a weekend when they don't have to give up valuable work time.

Don't be sorry -- he may very well be in the tree.

==========
RICHARD PETER GILLILAND
Richard Peter Gilliland is accused of sexually molesting a 17-year-old
male in West Allis, Wisconsin, on March 14, 1997. Gilliland, while
working as a minister of a church, allegedly invited the teenager to
look at computer-generated pornographic pictures on the Internet.
During this visit, Gilliland allegedly molested the boy.
Gilliland is a registered sex offender in the states of Arizona,
California, and Washington. Presently, he is wanted by authorities in
Washington State for communicating with a minor for immoral purposes.

IF YOU HAVE SEEN THIS INDIVIDUAL CONTACT YOUR LOCAL FBI
==========

Even better, if you see him contact ME and I'll make sure he doesn't
get the chance to skip bail. If he's like most of this branch of the
Gillilands he's either back in Arizona or hiding with relatives, very
possibly in Oregon.

All of that depends on the mindset of the "men" you are
in the company of...(he said, jangling English syntax)

> NCI has REAL relevance, in my humble opinion ... your mileage may vary.

I agree but conditionally. I think it has POTENTIAL relevance.

The IARU started the code revolution in prompting for the
re-write of most of S25 at WRC-03...the WRC that made
it possible for individual adminstrations to toss the code
test at THEIR option.

Be sure to include the proposed tax increase for funding when you get the
FCC to resume doing the testing. Their budget no longer includes money for
such as they are getting the testing done for FREE by volunteers like
myself.

I love it when they make a CB amp and try and sell it as a 10M amp
when that also is illegal.

Now if they sold it as a amature amp capable of tuning from 160M to
15M bands then they would be totally legal.

I am waiting with such great anticipation that I can't hardly control
myself.

I hope it is soon so that the suspense will be over.

By the letter of the Law, they are not type accepted radios. Or better
yet thay have not been certified for the band in which Hams wish to
use them. Therefore are illegal to sell for use in that spectrum.

Still any Ham with half decent skills can build a unit that would tune
the 10M band and out perform any commercial radio built for the CB
market.

Galaxies are horrible on sideband. If I were them, I would stick to AM, and get
something else for sideband.

Ham radios DON'T have to be certified by the FCC...
a person can even build their own gear if they want. Many folks modify
11-meter radios to get on 10-meters and it's perfectly legal. What the FCC
has a problem with is the so-called 'Dual Use' radios which the Galaxies,
Presidents, Connex's, et.al. become once they have been modified for
11-meters. 'Type Acceptance', now called' FCC Certification' however IS
required for 11-meter radios which makes the above mentioned radios illegal.

"I heard that no code hams are allowed to use the 28 mhz frequencies
now"

Since there is no longer a code test for ANY Amateur Radio license, 'No-code
hams' can use all of the frequencies their ticket allows them to. A basic
Technician class license will now allow operations between 28.300-28.500 USB
with up to 200 watts output.

If you are making a transmitter or power amplifier for personal use
then, no, the FCC does not have to approve it. It however must meet
certain FCC mandated specifications. If it doesn't then it is "ILLEGAL"
and it's use can subject the operator to sanctions.
If you making a transmitter or amplifier for sale then it "MUST" be
approved by the FCC as meeting the afore said specifications.
The various so called 10 meter ham transceivers under discussion here do
not meet these specifications and are "TOTALLY" illegal for use by
anyone in the jurisdiction of the FCC. 11 meter transceivers may be
converted to 10 meter use due to the fact that the 11 meter transceiver
has been approved (?) for use by the FCC. Also hams may now purchase
power amplifiers that have 10 meter capability manufactured into it by
the manufacturer. This has been the case for a couple of years now.

Not true. The 11-meter transceiver has been approved for 11-meter use ONLY,
and the approval has NOTHING to do with folks being able to convert it to
10-meters. Hams don't need approval to use it on 10-meters. Also,
manufactured ham gear needs to meet certain specs, but it does NOT require
FCC Type Acceptance/Approval. Nowhere on my Icom does it say 'Type
Accepted."

Well, they still have to stay off the CW frequencies if they're not actually
running CW. The frequency plan is in effect still.

Nope. I'm not crying about it and never have. I don't need any stinking ham bands. I have fifty-nine channels (actually more) that I can legally use without any liscence whatsoever.

With a GMRS liscence, I can use sixteen more channels for a total of seventy-five channels (actually more) that I can legally use without a ham liscence at all.

And recently, someoe at my house just purchased a new "two way radio" that gives me an extra FRS channel that doesn't use any of the standard 14 FRS channels and doesn't use any of te GMRS channel;s, and is perfectly legal for use in the U.S.

It was even advertised as "use it at sporting events and shopping malls to stay in contact with your family and friends".and as "two-watt radio".

I'm not sure what the range is of it yet. I'll test it out when the weather gets warmer. This radio also doesn't have any way of monitoring for other people's transmissions before you tansmit.

But you don't need to since it automatically sends a code that ollows only the people in your group to heaar it, You can't set it to hear other people's transmissions even if you try to., even if they're on the same channel.

And it can't be picked up by radio scanners the genreal public uses, it can't be picked up by frs radios that use the standard 14 frs channels. It can't be picked up by GMRS radios or ham radios either. Although I'm sure the hams will try to.

It seems to truly be a radio with your own private lFRS channel.

And yes, it's FCC-approved. So don't give me any of this "you're using an illegal radio transmitter on frequencies you're not authorized to transmit on" garbage.

LOL, haven't seen that particular clip in years.

across what pond ya nonce? i might live on an island but not one that eats haggis, mushy peas and faggot. btw, for those who dont know, google or wiki 'faggot' and you'll see it most certainly is a type of food.

I disagree. Not know more. Just know different. Other people have said
there hasn't been any new improvements in ham radio technology in
decades.

The morse code requirement was probably holding them back.

Look at other industries. The latest improvements made were made by
people not familiar with the old technology, but familiar with the
newer technology.

In the computer industry, most of the recent improvements have been
made by people not familiar with the punch card sysyem.

If they were still required to learn and use the punch-card system,
they wouldn't have as much time to study all the newer technologies
and the improvements either wouldn't have gotten made at all, or at
least not as fast.

They would still bee stuck uing the old very slow computers that use
punch cards.

The same goes for a lot of other industries, also.

Although with other things instead of computers and punch cards.

So you want to give this much power to the government?? Not me. This was an extremely progressive idea and actually gives a great deal of control to the people. It maximizes the personal freedom and choices of the participants. Would you really like to go back to the repressive "old" day??

The Volunteer Examiner program puts control where it belongs, directly in the hands of the citizens rather than the government. The government then takes its rightful place in promulgating, administering and enforcing the rules rather than dealing with all the minutia on a day to day basis required to run the program itself.

Michigan has done the same thing with its driver's licensing. Both the written and driving tests have been contracted out to private companies. The state monitors the program and handles the broader functions such as maintaining the database and enforcement.

I don't regard privatization as "progressive," only economical
for the government...and, perhaps, less economical for the
individual depending on where they live relative to any testing
location.

COLEMs have it a bit easier since they can both teach a
commercial licensee and test them in a continuous course.
That is more convenient for the newbie commercial license
applicant. That is similar to school courses with the FCC
exam as the "final."

VECs - usually - do not sequentially teach and then test.
They can if they so desire, but few VEs are qualified or
have experience as teachers. VEs can proctor a test
with little experience other than handling paper and seeing

that all the blanks are properly filled-in and check answer sheets against a template. That is not a Masters or Doctorate level work. :-)

FCC Certification is required for all commercial manufactured
transmitters in the US. The exception is for amatures who make five or
less in a calendar year.

Any radio that is commercially manufactured for the CB band is not
certified for the amamture bands. And vice versa. The FCC will not
certify it for both. Also any transmitter in which more than five are
manufactured within a calendar year must have FCC certification in
order for it to be legally sold in the US. RAdios like the Galaxies
and other so called "export" radios are not certified in the US and
are not legal to sell. Therefore they are not FCC Certified radios
even for amature use.

Correct an 11 M transciever is Certified for 11 M use. Under the
provisions of Part 95, an amature can modify one for his own use and
not have to certify the radio. Still he must ensure that the
transmitter meets the emmisions requirements for amature transmitters
for the band that the unit is beign converted to.

I once thought of converting a HR2600 to 6 M when I found out that
with a cut here and pullup there and the display read 50.0000. A tween
on the VCO and it tuned and locked from 50 to 54 MHz. I abandoned it
when I discovered that on FM the transmit offset was still 100KHz.
That would have been legal for me to persue with an amature license.

It may say "complies with part 15 limits"!

If a 2950 is illegal for use on 10 meters, that all the converted Motracs
are illegal for use on 10, 6, 2 and 70 centimeters? All the repeaters
made with Motorola or other brand business band/public service type radios
are illegal then! Where do you draw the line? An amateur is responsible
for their transmissions. If an amateur does not do anything wrong with
the radio, it is perfectly legal to use, no matter what the radio is.

New? What did that run you? I have a Icom 746 that I purchased used that was mint. I am pretty busy this month, so I will try and talk next month.

BTW, I am attempting QRP DX with a 1/2.5 watt walkie talkie on 11 meters. Does that sound right? No success yest.

On the Citizen's Band that is true. Outside the 40 channels, that is not
true: Frequencies and modes are restricted depending on your license.

Hello Scott:

Yeah what do you think of the new Yaesu FT897 Radio?

Yesterday I was crusin around and hears a bunch of stations all with newbie type call signs on 28.390 and 28.410 USB. It sounded almost like CB for a minute, but stations where making contact and moving off these frequencies. There where all having a good time. And me without a microphone on my mobile radio.

Jay in the Mojave

Looking 4 mobile microphone.

Lets all take a BIG breath and relax/chill.
If you want to take a Motorola/GE or whatever radio from it's current lo-band use and convert it to 6-meters, you are GOOD TO GO. You do NOT need FCC Certification to modify it and put it on the air in the 6-meter ham band. After modification, it will no longer be Type Accepted/FCC Approved for the service that it was originally designed for and therefore CANNOT legally be placed back into original service. Am I getting through to anyone? Frank, help me out here. Amateur Radio operators have for many years been able to build/modify/transmit from gear that they have either bought, built, or modified to work on the ham bands with no FCC 'sticker' required. The 11-meter "Type Accepted" is just that... the radio is "Type Accepted" for use on 11-meters ONLY and any change/modification to the radio will null and void it's 'Type Acceptance' for that particular band. Hams, can however, modify that same 11-meter radio to become a beacon or 10-meter radio if they so desire WITHOUT any type of FCC Type Acceptance and/or Certification for its new use.

I have a working Comstat 35. Only problem here is sense the invention of the cell phone, no one here uses CB anymore except truckers. But if your not driving a truck, then you are just as popular as a 11 meter user, freebanding on ham freq with all the noise toys and high power. I would like to see 11 meter take off again. I got into CB radio in the late 80s to the late 90s. Then I put all my equipment in storage for a few years because I always was working when locals were out talking. I recently got the stuff out to think about getting back into it. But now all I hear is truckers on 19 and static on the other channels and a loud mouth on channel 6 a few days ago in the NY area bleeding over 3 channels bragging something about being world wide. And I am located in the Midwestern part of va. Sound like the same guy I remember hearing before I put away my equipment in the late 90s. So I guess CB must still be booming up north, and the FCC still does not care about CB users using excessive power like 8000 watts.

Guess I just have to give in and let the spiders and mice have their home back and get me a cell phone. :)

You, Mark, are a liar. You almost always hijack topics for your jumbled, mind-twisted comments.
If necessary, I can post thread after thread to prove the point. Google has hundreds of them archived.

The more I read, the more convinced I am that you have a deep-rooted mental disability. There is something severely wrong with your mental processes Mark, and I don't mean just your dyslexia.
You have a glaring problem that the rest of us can see, but you are incapable of admitting same...deep denial, Mark. Very deep.
I posit that any person, you included, and especially you, who posts forty, fifty, sixty or more posts per diem to these newsgroups and, who makes the effort to use nyms, has a problem. Apparently your personal life is shallow indeed. Life must be a bore up there in Chassell. Your forays into the theatre are obviously a dismal failure.
Is Gav indeed your wife? Wait. I don't care. Since she has not taken your last name one must assume that the two of you are cohabiting and she has no desire to be known as Mrs. Morgan. Who can blame her?
Any woman who would live with you, Mr. Bisexual Morgan, has a screw loose herself. One can only draw the conclusion that Gav, like you, has more than a few loose ends or she'd not have taken up with you.
Is Gav one of those "artsy" types who wears floor length 70's style hippie dresses with beads on each ankle? You know...the old Hippy Gal whose hips have gone wide? Hints of a mustache on her upper lip? Unshaved legs? Granny glasses? Old open-toed leather sandals? Career Student? White wine? Did she have nowhere else to go?

Does Gav have her own bedroom? Bet she does. Do you make her split the rent? I have ten dollars and a Long John Silver's meal that says she doesn't

climb into bed with you. Ever. Not once.

LOL!!!! When you said to go east for good brew, I was sure you meant the
Isle's, British Isle. You can't go wrong with their Ale's, Porters & Stouts.
Now, if you want to go a little further east, you can't go wrong with the
Lagers & Pilsners .
UUuggghhhh, Haggis that is fowl smelling tasting sh&t!!!!

How old is the amp and what's he driving it with?

>His quality amps simply kick ass over the junk

>Palomars, etc.

"etc" may be right, but there is nothing wrong with the old Palomars.
Besides, for the money you're talking for a Griffey-made you can get a
Texas Star which needs no testimony and you don't have to "hope" you're
getting a good product.

> that are all over the net. I have seen one in

>action, so don't reply unless you have too.

You're the only person in the world to report on this amplifier besides
the manufacturer. Of course you're going to get questions about it.

I didn't offer paypal, and never had a problem. It's all about feedback and description. I never overrated any items I sold. If anything, I underrated them. This way, they could only get better than expected. I only recently started to use paypal. But it's a scam. It's ebay's way of double dipping. The fees are excessive if you do a lot of business.

Besides, Paypal doesn't guarantee shit. It also has had it's problems. People using paypal have been able to rip off other jast as well.

If you are speaking about putting control in all 350 million citizens hands (well, those over 18 and citizens of the united states) in some form of vote--ABSOLUTELY!

If you are speaking about putting control in only those hands which possess amateur tickets--ABSOLUTELY NOT!

A gov't agency, responsible to ALL citizens of the US is then the correct means to implement a democratic republic. But then, you already knew that from your HS and college civic classes ...

Letting the fox run the hen house is NOT American!

Yep, FCC should design/implement the exam forms and get the money it
costs to print/disperse and implement said exams--the citizens pay for
this, naturally, there is no "money tree" which provides money, we the
citizens foot EVERY cost of ours, whether someone hides these costs from
us or not.

That is American, we pay our own way here.

Take a civic/"American Government" class. All power comes from the
people and "flows" to our representatives, our representatives hire
other servants to assist them in carrying out the peoples will, and only
by our pleasure and for our well being, safety and needs.

All in government are a bunch of servants who work for us, kinda like
maids, butlers, handy men, maintenance people, logistic workers,
security, bean counters, etc.

If a few Americans are confused and attempt to worship them as royalty--well, I just don't know how to save the ignorant from themselves ... perhaps a better education will enlighten them?

Remember, our forefathers insisted we bear arms just to bring these guys back into line--least they forget ...

Too many diverse cultures and peoples flowing into this country and having lived under despots, disgusting dictators, communism, common criminals, etc. has diluted our sense of who we are and what heritage we have. This does need to be addressed ...

Roger chases DX. YOU chase dicks.
It won't be long, Mark, before your sphincter is so stretched out of shape
that you'll be able to store your never-used head in there.
Look on the bright side. At least you will be able to keep your ears warm
during these cold Michigan nights.

This could well be true. You just suck on them when the opportunity
"arises".

> >It won't be long, Mark, before your sphincter is so stretched out of
shape

If you want to start out with a good CB radio but not spend a fortune I
would recommend that you start with a cobra 148 GTL which has SSB and AM.
If you use it in the house you will, of course, need a 13.8 VDC power supply
and an Antron 99 base antenna. In the mobile it works good with a Wilson
1000 magnet mount antenna if you can't stand the idea of drilling any holes
in your vehicle roof. You would be well advised also to get a good mic for
it, such as a handheld D-104.
On the subject of scanners there are some that cover from 25 MHZ to 1.2
GHZ and on up. I have a Bearcat scanner which I have programmed it for over
200 frequencies in and around CB plus various other VHF, etc.

Good Luck
Scorpio

Hello Scott;

I have been looking at the Icom 7000 Mobile Radio, for the big truck,
and I can run a large HF Low Band Antenna.

Why amplified? A 636L is nice and clean, and never needs batteries.

My original question was to see if anybody had any experience with the "no Tx audio" problem. As it turned out, there was a bad 330uF 10V electrolytic cap that was causing the problem. As it turned out, this unit turned out to be another unit that was
"peaked and clipped" by somebody who didn't know what they were doing. In other words, another piece of eBay junk.

I like to use 0805 series, at higher frequencies, I see 0603 and smaller sizes being used. As far as carbon comp resistors, they are the best through-hole components for RF, at least up to a certain point. True, they can and do change value over the years, and they can absorb moisture.

I have worked with some of their newer stuff, and it has been very good. AD
got their act together pretty well, in the RF arena.
The Analog Devices AD831 isn't a bad design; it does have a good IP3, but in
order to reach the NF of a Mini-Circuits SRA-3 however, you need to have a
preamplifier ahead of it. With its 12dB NF, it isn't a bad mixer for HF use
up to 30MHz. I had started a receiver design using the 831, but things got
so busy at work that I shelved that project for awhile.

I agree on those points. Unless the LO in the actually is actually filtered
to the point where all higher terms are at least -65dBc, that performance
won't be realized. The manufacturers I worked for over the years were quite
happy with -25dBc for the 2nd harmonic of the LO.

You do make a good point; an unconditionally stable low gain RF amplifier
will satisfy this requirement. I have done the measurements that you
mention, and I have noted some level of disparity between real world
conditions and manufacturers' specs. I know.....too many
manufacturers play the "numbers game". As long as they stick to the same
standards, one can use these numbers to initially select a product but the
devices still need to be characterized before those numbers are actually
believed.

Yep, Seen many an electrolytic go bad. Especially in power supplies.
Heat is the enemy of electrolytics.

As for EBAY CB radios, mostly useless other than parts.

Port to port isolation or carrier rejection, whatever you want to call
it..... you can easily get 60 dB or better using discretes. Heck, some
of the old DSB-SC tube rigs were even designed to mix in a -power-
stage!

Anyway, you used dBm in one post and dB in another; not the same
thing.

>believed.

I won't even use a 2-cent resistor until I destroy it on the bench
first. A lot of the manufacturer specs look really good on paper but
don't mean squat beyond the ideal conditions of a lab test. Even a
supposedly identical component made by different manufacturers will
behave differently in the actual circuit, especially under failure
analysis (which can be a very expensive lesson if not learned before
designing or repairing power equipment..... don't ask!).

Perhaps of YOU didn't make shitting on everybody's posts the "order of the
day",
the character "asiisnation " would halt.

"I supect it is becuase you do know I was discharged for being
overweight "

Well there's nothing wrong with the IMAX either but I've always used a D-104 which is loud and clear and has long battery life.(7.5 V battery in a handheld mic)

Unless you have ESP it's not obvious why he followed you or stopped
following you. The cops don't usually have any authority to enforce FCC
rules and regulations unless maybe the FCC is riding "SHOTGUN" with them or
something like that.

Liar, you hijack threads and use your delusions to justify your
perverted lifestyle.

No, Roger doesn't lisp.
And you cannot prove he does, since you've never talked to him, or
hear him on the air.

> and I don't think

That is obvious that you don't think.

>you suck cock

No, but you sure have for real, haven't you?

> you justwantto

Why do you think that everybody wants to suck cock just because you
do? You are mentally ill and are probably on SSI for it.

Yes, you obtuse retard, you have publicly stated that you have sucked
a man's penis. That makes you a homosexual.

>
> > Even your shemale wife doesn't want to take
> > your last name.
>
> my "shemale wife" onnly exists in your and steve's delsuions

No, you cannot prove you married a female. Why doesn't Gavi (What a
name for a woman!) sleep in the same bed with you or take your last
name?

>
> >She should really shave under her arms.-
>
> only if that please both of US it is known of your affair since the

So you admit your shemale wife has hairy underarm pits? BWHAHAHAHAHA!

> onl;y way you will ever be near her is likely to result in your death

Not likely, since a retard like you wouldn't know how to use a weapon
even if you could get one.

Hell, Marqueer, we already know that by what you post.

>...YOU want to suck cock becuase yo u rave about all the
> time

Yet it is *you* that have actually sucked a cock. You drool at the prospect of anybody discussing that perverted practice by two men, and you are a militant homosexual, trying to recurit others into your deviant lifestyle. You always defend your homosexual lifestyle, but on some level you must be ashamed of what you are since you try to say you are "bi".

Interesting. Wonder what the motive is behind the page, though?
Disgruntled customer? Maybe even a competing amp manufacturer?
If we start slamming products because of who makes them instead of
focusing on the actual product we might as well begin not listening to
music put out by people who have engaged in similar or other undesirable
acts. The Web site is interesting though and makes some mighty weighty
accusations.

But hell, why not start closer to home in the same vein?

www.qsl.net/k4kwh/

A cb truck-driving hippy stole his lady back in the sixties and this guy
has had a perpetual hardon for cb ever since, causing trouble and
screwing with truckers and cb'ers all over the 'net. No biggie because
it's old news and everyone in the radio world who knows Oxendine or
talked with him on his net
knows he is a little over-the-top, a bit bizarre and prone to rambling
but he still posts (spams?) to other cb web sites this incredibly
overpriced antenna (28 bucks in parts) trying in vain to sell this
voodoo to cb'ers. For $350 it doesn't even include wire or the shaft
and tells the customer to purchase his own whip.

Those schooled in antenna design can imagine the condensation this thing
holds after continuous exposure to tropical conditions such as
incredibly high humidity and temps. The antenna errantly uses
transparent Lexan which
has a water absorption and saturation rate. I'm not certain what the
rates are right off the bat, but it's not good for this purpose.

Maybe he can link to....nah, forget about it!

>Can a linear ham amp be converted to an audio (guitar) amp?

Easy. Assuming the amp has a 50 ohm, unbalanced output:

Amplitude-modulate your audio, feed the amp's output through a balun
to make it balanced, followed by a full-wave bridge rectifier, then a
single-ended audio transformer (which also serves as an RF choke).

Impedance matching, however, is a big ball of very sticky wax.

As have many of us over the years. Remember the tape where Leila Heil knocked on his front door, making him run and hide in a closet like a coward? The bottom line is that Roger lisps when he tries to cover his timidity up when he is on the air. That's how he got the name "Woger" from the other hams who used to hear him jamming on 20M while lisping furiously about an Ohio ham named Steve Tunder.

Something just ain't right about that Woger.

Yeah doing fine up here while it's colder than a well diggers ass and
mounds of snow. I wouldn't have it any other way until my hair turns
blue..after that I -may- be convinced that a hurricane, flood, or drought
might be a better place to live out my years.

We're getting ready for $pring now, everyday.

Thanks for asking UKW.

Everything good with you I hope?

Realy bad marketing strategy.
Very poor product survey.

I hope that you are not contemplating filling any patents on this
product? With this announcement anything filed after March 9th are no
longer valid. I also hope that any copyrights and products names have
properly been filed. Ot herwise you are out.

james

Google "Telstar Electronics" and you will see that he already has that
problem. He seems to apply his 'head-in-the-sand' business methods to
all aspects of his business. He thinks that living in his parents'
basement will protect him from legal responsibilities, but here again
he's ignoring the fact that running his scams out of their house makes
them partially responsible, both legally and financially. His blatant
disregard of civil responsibility is enough to bring up the question
of what else he's doing in that basement for a quick buck..... making
bomb timers for terrorists?

As others have pointed out he should name him business and products
more appropriately.

Telstar should be......Tespam or Telstar rejectronics for obvious
reasons.

Skywave should be...... LieWave for its exaggerated specs.

VoiceMax should be......VoiceHack for his implementation of someone
else's design or VoiceLax for what will ultimately spew from the use
of his product.

Why would you want to? The computer has a stereo mini-jack. CB mike has
DIN or other style connector. Sounds fairly pointless, as the cost of
making an adaptor between the two jack styles far exceeds what the price a
standard computer mic. would run at the store.

I challenge you to find a computer mic that picks up well, doesn't sound
like shit *and* costs less than what it would in theory to convert a radio
mike.

I cut my party teeth with a Boston eight track tape playing in the
background. I caught them live in 1977 in downtown Cleveland. Great show.

Sorry to hear about Brad Delp hitching a ride.

1744. RIP: Brad Delp

I picked up a cheap iconcepts mike at one of the depot office stores.
It sounds better then the built in mike on my camcorder. I works great
on echolink and skype. It even sounded good when I made a PS trailer.

It's the small teardrop shaped one. They changed the color to silver
and doubled the price since I bought mine.

Challenge all you like. I'm not interested in such nonsense; the idea was
foolish to begin with. I can guarantee that a CB mike won't sound any
better (if not worse) on a computer than a standard microphone, even the
crap from Radio Shack.

Take your pick, you'd be hard pressed to create a CB mike to computer
adapter for much less than these:

Got to meet Delp and Scholz backstage on tour right after the band came
out with their second album. Delp was super cool, Scholz acted a bit
arrogant after being told his second album was nothing more than a
rehash and remix of the first album's (sorry, but it's true) arrangement
but Delp chimed in with, "That's because Tom's not really a musician but
an engineer. How many times do you need to hear that, Tom?"
Delp gave a great story published in the Atlanta-Journal Constitution
after the show.
Might still be in their archives...story was titled, "Boston takes
Atlanta home tonight."

Delp had a great voice and he will always be remembered as THE sound
behind the Smokin' Boston.

It was actually a 10V unit. I don't know why they would use something like
that either. All I've got to do is isolate the problem with whatever sets
the parameters for AM mode. It receives fine in AM mode, transceives fine in
SSB mode. Looking at the schematic, I saw a 220 Ohm resistor that is
switched in for biasing the output stage for SSB. In the AM mode, the mode
switches bypasses this resistor. Could be a bad mode switch. I have been
working 60+ hours every week, so I get about an hour each weekend to work on
this thing. Unless they send me out to Singapore for
awhile.....................

I do understand your thinking.....Maxim used to love us to do their
"beta testing" on their new devices. I don't remember using dB and dBm in
the same context. It must have been late.....probably a typo on my part.
Just 100 more hours, and I can undo everthing that the other guy did to my
fine radio!!!!!!!!!!!

Pete

In a nut shell - NO.

If you want to try your hand at building a custom guitar amp have a look at
the following sites.

http://www.normankoren.com/Audio/index.html

Oh, poor Morkie. Ever the "victum". Yet again, the derogatory comments made toward him are the fault of someone else and have nothing to do with his unabated habit of butting in on conversations and making himself a general thorn in the sides of others.
Many of us noted that, during a recent absence of Mark, this newsgroup actually reverted to a fairly pleasant group to visit. But, alas, this respite was all too brief and Morkie returned, only to trash it again.
Mark's absence was indeed a breath of fresh air.

Hello All: "War story alert"

That sounds great! Hope you got a few photos. I got a kick out of their Album Covers, saying that they had a broke and distorted piece of audio equipment that was left in the original cuts, as it sounded great!

While over seas working for my company (working heavy machinery) we where all waiting for a airplane to get us all out of a less than desirable vacation location. A dirt run way with on again and off again rain, figuring we would have to spend another night sleeping in the jungle, everything was wet and miserable.

The old transport airplane looked like a million bucks, even if it was a few days late. The crew was playing Boston over the public address system, I think it was "More than a feeling" I still remember the goose bumps on the back of my head, and renewed feeling we where all gonna get out of their safely, as the plane rolled up to us.

I was in charge of the guys, and asked the one of the crew if he could turn up the volume. He says: "Sure Dude" the lack of fidelity was obvious, but the sound and the feeling it gave everybody will never be forgotten.

Jay in the Mojave

1783. I crimnal

Newsgroup: rec.radio.cb
Date: 2007-03-11 10:57:08 UTC
From: Morkie <anon@anon>
Message-ID: <otcrm.kdr.17.1@news.alt.net>
Source record: 229690
Cross-posted to: alt.fan.ab8mq,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.cb

So, Mark. Which crime are you going to accuse me of today? Or Dee? Or Steve? Or Roger? Or Mike? Or Dorothy and Toto?
Lets get this straight. If and when I respond to you, I am "stlaking" you. When Mike responds, he is "harassing" you. When Dee sets the record concerning VE's straight, she is "calling you names". When you flood the group with your idiocy, you are merely defending yourself, right?

Clearly, Morkie, your idiocy has no boundaries. Oops! That is harrassment, right? Oh, wait. I called you Morkie, so I am also guilty of name-calling. Note that I refrained from calling you a dumbass or a dip shit. I wouldn't do that lest you turn me over to your local prosecuting attorney. Since you have inside information on the latest laws of the land, and so often quote them, I will shy away from referring to you as a dumbass as has been done by others. However, Morkie, I will NOT cease referring to you as Morkie. If this displeases you and offends your dyslexic sensitivities, call your attorney. Have him subpoena Altopia so you can find out who I reallly am. Maybe Gav will front you the money from her waitress tips earned at the Green Light Lounge.

You, Morkie, are quite the socially dysfunctional idiot. I thought Roger had no redeeming qualities, but that was before I came into contact with you. Roger is lacking a few dominos here and there, but you, Morkie, have many mental issues that will forever be unresolveable.
Roger, despite his foul mouth, is rather fun to spar with. You, on the other hand, are an insufferable, fat, pissy little Bitch.

Now go forth and call your attorney. Or act as your own. Either way, the both of you will be pissing up a tree.

Happy Trails, Morkie. May your AZT help you and Gav prosper and live long....

OH? And from which law did you draw this odd Mark Morgan conclusion?
I was merely wishing you and Gav a happy and long life. Nothing, repeat,
nothing was said about AIDS until YOU mentioned it.

Now, of course if you have a guilty conscience, well, I can't help that.

Rubbers, Mark. Rubbers. Live long and prosper.

That last bit was aimed at you, but to the person that got all weird over a comment. The idea is pretty foolish and probably would sound like crap, BUT, I don't see anything wrong with trying it if you were really interested in it. That's one of the founding stones of radio...experimentation. :)

I heard a bit of spanish on 38. 10 meters on the other hand was jumping! I made contact with ARGENTINA and was almost heard in Sao Pauli. He got half my callsign. I heard stations from Mexico and Jamaica. I was using my 2950 and a White Tornado 225. I knew we were due for some skip. It's been too quiet lately. I'll have to try again tomorrow after work!

gvien you are taking Cb what about usinga jack for the PA setting most
CB's seem to have (as does my 10 meter rig) you turn it to pa with the
a cable to your PC

Problem is... any 11M amp you come across will most likely not have
very good gain at 50MHz.
Even after retuning... you might need a hefty drive source.

1805. Another Recall

Newsgroup: rec.radio.cb
Date: 2007-03-12 23:05:38 UTC
From: John Doe <hgorden@adelphia.net>
Message-ID: <2Yydne55UIf1QWjYnZ2dnUVZ_s-rnZ2d@adelphia.com>
Source record: 229712

Recall -- Firm Press Release

FDA posts press releases and other notices of recalls and market withdrawals from the firms involved as a service to consumers, the media, and other interested parties. FDA does not endorse either the product or the company. This listserv covers mainly Class I (life-threatening) recalls. A complete listing of recalls can be found in the FDA Enforcement Report at: http://www.fda.gov/opacom/Enforce.html

Safeway Recalls Bread in Parts of California and Nevada
Contact:
Teena Massingill, 925-467-3810
Espe Greenwood, 925-467-2212

FOR IMMEDIATE RELEASE -- Pleasanton, Calif., - March 9, 2007 - Safeway Inc. today announced it is voluntarily recalling several of its private label bread products sold at Safeway and Pak 'n Save stores in Northern California and Northwest Nevada. The products may contain wire fragments from production machinery. The recall does not affect products sold at the Company's Vons or Pavilions stores.

The recall affects the following products with "Best Before" dates up to and including March 17, 2007. (Example: Mar 17)

Product
UPC Code #

Pak 'n Save Wheat Bread
113827210002

Safeway Butter Top Wheat Bread
21130-18089

Safeway Butter Top White Bread
21130-18088

Safeway Crushed Wheat Bread
21130-18133

Safeway Super Kids Bread
21130-18336

Safeway Whole Grain Bread
21130-18147

Safeway Premium White Bread
21130-18325

Safeway Premium Wheat Bread
21130-18225

Safeway Oven Joy White Bread
007989305190

Safeway Oven Joy Wheat Bread
007989305191

Safeway Texas Toast Bread
21130-18198

The recall also affects the following products with "Best Before" dates up to and including March 15, 2007. (Example: Mar 15)

Product
UPC Code#

Pak 'n Save White Bread
003827210001

Safeway Premium White Sandwich Bread
21130-18330

Safeway Pan Blanco Bread
007989305010

Safeway French Toasting Bread
21130-18199

Safeway 100% Wheat Bread
21130-18207

The "Best Before" date can be found on the plastic closure. The UPC number can be found on the bottom panel of bread bag. Customers who purchased these products in Northern California or Northwest Nevada can return the bread to their local store for a full refund.

While Safeway has received customer complaints, no injuries have been reported. The production machinery in question has been repaired and the production line cleaned. Safeway values its customers and apologizes for any inconvenience this may have caused.

hey Scottykins, was Bugsy related to you? Was he a ham too?

Get on 40 meters and shout out sometime...KB3JQQ is distinctive
enough, should be able to hear you through the noise.

PS: aren't you limited to 200 watts on 28.3 to 28.5, like everyone
else? That white tornado might get ya in trouble.

Recall -- Firm Press Release

FDA posts press releases and other notices of recalls and market withdrawals from the firms involved as a service to consumers, the media, and other interested parties. FDA does not endorse either the product or the company. This listserv covers mainly Class I (life-threatening) recalls. A complete listing of recalls can be found in the FDA Enforcement Report at: http://www.fda.gov/opacom/Enforce.html

WinCo Foods Recalls Bread in California and Nevada
Contact:
Michael Read
208-762-2011

FOR IMMEDIATE RELEASE -- Boise, Idaho, -- March 9, 2007 -- WinCo Foods announced today that it is voluntarily recalling several bread products packaged under the Cascade Pride label and sold at its WinCo Foods stores in California and Nevada. The Cascade Pride products, manufactured for WinCo Foods by Safeway Inc., may contain wire fragments from production machinery. The recall does not affect WinCo Foods stores in Washington, Oregon, or Idaho.

The recall affects the following products with a "Best Before" date of March 15, 2007.

Product
UPC Code #
Best Before Mar 15

Cascade Pride Crushed Wheat Bread
17072-00003
X

Cascade Pride 100% Wheat Bread
17072-00007
X

Cascade Pride Butter Top White Bread
17072-00008
X

Cascade Pride White 24 oz. Bread
17072-00017
X

Cascade Pride Wheat 24 oz. Bread
17072-00018

X

Cascade Pride Butter Top Wheat Bread
17072-00021
X

Cascade Pride White Sandwich Bread
17072-00022
X

Cascade Pride Wheat Sandwich Bread
17072-00023
X

Cascade Pride Texas Toast
17072-00068
X

Cascade Pride Maple Toast
17072-00069
X

Cascade Pride White 16 oz.
17072-00101
X

Cascade Pride Wheat 16 oz.
17072-00102
X

The "Best Before" date can be found on the bread bag's plastic closure. The UPC number can be found on the bottom panel of the bread bag. Customers who purchased these products may return the products to their local store for a full refund.

While Safeway has received a few complaints about the products, WinCo Foods has not received any complaints to date. No injuries have been reported. Safeway has assured WinCo that the production machinery in question has been repaired and the production line cleaned. WinCo Foods values its customers and regrets the inconvenience or concern that this voluntary recall may cause

ive just got back from a 500 mile drive so if this has been asked
already, im sorry :-)

i have 3 CB antennas, one 3-4 foot whip, a 6 inch rubber duck and a 6
inch coiled metal antenna.
im curious if i can hook up all 3 at different spots on my montero for
better reception.

if so.... what would i need to buy? adapter wise.

thanks for your time.

My opinion is that any CB antenna shorter that 4feet is not worth
spening any installation time on.

No, you are not. You are showing your true colors and Dave is nowhere to be
found at the below link.
You and Roger are, though.
If folks thought you were only a borderline psychotic, this will convince
them that you are a full-blown Kook.

Editor's note: Willie Lynch, a slave-owner living in the West Indies, produced a handbook (similar to an "owner's manual" for products and goods we purchase and own) for use by slave-owners living in the United States. Willie Lynch's plan directly explains the process used to break the minds, bodies, and spirits of Black people during slavery. The long term, lasting effects of this "process" can be observed, even today, in the average African American and West Indian family structure. Lynch's systematic "seasoning" methods, explained in the text of "Let's Make A Slave," copiously details the seasoning process for enslaved Africans and their future generations. The language in this handbook directly reflects the tone of the author. The audience of the handbook viewed Black people not as human beings, but as property (goods) and a primary element in their successful long range economic plan.

'Let's Make A Slave'

The Origin and Development of a Social Being Called "The Negro"
By Willie Lynch

"The Black slave after receiving this indoctrination shall carry on and will become self re-fueling and self-generating for hundreds of years, maybe thousands."
Let us make a slave. What do we need? First of all we need a black nigger man, a pregnant nigger woman and her baby nigger boy. Second, we will use the same basic principle that we use in breaking a horse, combined with some more sustaining factors. We reduce them from their natural state in nature; whereas nature provides them with the natural capacity to take care of their needs and the needs of their offspring, we break that natural string of independence from them and thereby create a dependency state so that we may be able to get from them useful production for our business and pleasure.

CARDINAL PRINCIPLES FOR MAKING A NEGRO

For fear that our future generations may not understand the principles of breaking both horses and men, we lay down the art. For , if we are to sustain our basic economy we must break both of the beasts together, the nigger and the horse. We understand that short range planning in economics results in periodic economic chaos, so that, to avoid turmoil in the economy, it requires us to have breadth and depth in long range comprehensive planning, articulating both skill and sharp perception. We lay down the following principles for the long range comprehensive economic planning:

1) Both horse and niggers are no good to the economy in the wild of natural state.

2) Both must be broken and tied together for orderly production.
3) For orderly futures, special and particular attention must be paid to the female and the youngest offspring.
4) Both must be crossbred to produce a variety and division of labor.
5) Both must be taught to respond to a peculiar new language.
6) Psychological and physical instruction of containment must be created for both.
We hold the above six cardinals as truths to be self-evident, based upon the following discourse concerning the economics of breaking and tying the horse and the nigger together... all-inclusive of the six principles laid down above. NOTE: Neither principles alone will suffice for good economics. All principles must be employed for the orderly good of the nation. Accordingly, both a wild horse and a wild or natural nigger is dangerous even if captured, for they will have the tendency to seek their customary freedom, and in doing so, might kill you in your sleep. You cannot rest.

They sleep while you are awake and are awake while you are asleep. They are dangerous near the family house and it requires too much labor to watch them away from the house. Above all you cannot get them to work in this natural state. Hence, both the horse and the nigger must be broken, that is break them from one form of mental life to another, keep the body and take the mind. In other words, break the will to resist.

Now the breaking process is the same for the horse and the nigger, only slightly varying in degrees. But as we said before, you must keep your eye focused on the offspring of the horse and the nigger. A brief discourse in offspring development will shed light on the key to sound economic principles. Pay little attention to the generation of original breaking but concentrate on future generations.

Therefore, if you break the female, she will deliver it up to you. For her normal female protective tendencies will have been lost in the original breaking process. For example, take the case of the wild stud horse, a female horse and an already infant horse and compare the breaking process with tow nigger males in their natural state, a pregnant nigger woman with her infant offspring.

Take the stud horse, break him for limited containment. Completely break the female horse until she becomes very gentle whereas you or anybody can ride her in comfort. Breed the mare and the stud until you have the desired offspring. Then you can turn the stud to freedom until you need him again. Train the female horse whereby she will eat out of your hand, and she will train the infant horse to eat out of your hand also.

When it comes to breaking the uncivilized nigger, use the same process, but vary the degree and step up the pressure so as to do a complete reversal of the mind. Take the meanest and most restless nigger, strip him of his clothes in front of the remaining male niggers, the female, and the nigger infant, tar and feather him, tie each leg to a different horse faced in opposite directions, set him afire and beat both horses to pull him apart in front of the remaining niggers. The next step is to take a bullwhip and beat both the remaining nigger male to the point of death in front of the female

and the infant. Don't kill him. But put the fear of God in him, for he can be useful for future breeding.

THE BREAKING PROCESS OF THE AFRICAN WOMAN

Take the female and run a series of test on her to see if she will submit to your desires willingly. Test her in every way, because she is the most important factor for good economics. If she shows any sign of resistance in submitting completely to your will, do not hesitate to use the bull whip on her to extract that last bit of bitch out of her. Take care not to kill her, for in doing so, you spoil good economics. When in complete submission, she will train her offspring in the early years to submit to labor when they become of age. Understanding is the best thing.

Therefore , we shall go deeper into this area of the subject matter concerning what we have produced here in this breaking of the female nigger. We have reversed the relationships. In her natural uncivilized state she would have a strong dependency on the uncivilized nigger male, and she would have a limited protective dependency toward her independent male offspring and would raise offspring to be dependent like her. Nature had provided for this type of balance. We reverse nature by burning and pulling one civilized nigger apart and bull whipping the other to the point of death--all in her presence.

By her being left alone, unprotected, with the male image destroyed, the ordeal caused her to move from her psychological dependent state to a frozen independent state. In this frozen psychological state of independence she will raise her male and female offspring in reversed roles. For fear of the young male's life she will psychologically train him to be mentally weak and dependent but physically strong. Because she has become psychologically independent she will train her female offspring to be psychologically independent as well.

What have you got? You've got the nigger woman out front and the nigger man behind and scared. This is a perfect situation for sound sleep and soundly, for out of frozen fear, his woman stands guard for us. He cannot get past her early infant slave molding process. He is a good tool, now ready to be tied to the horse at a tender age. By the time a nigger boy reaches the age sixteen, he is soundly broken in and ready for a long life of sound and efficient work and the reproduction of a unit of good labor force.

Continually, through the breaking of uncivilized savage niggers, by throwing the nigger female savage into a frozen psychological state of independency, by killing the protective image, and by creating a submissive dependent mind of the nigger male slave, we Have created an orbiting cycle that turns on its own axis forever, unless a phenomenon occurs and reshifts the positions of the male and female savages. We show what we mean by example. We breed two nigger males with two nigger females. Then we take the nigger males away from them and keep them moving and working. Say the nigger female bears a nigger female and the other bears a nigger male.

Both nigger females, being without influence of the nigger male image, frozen with an independent psychology, will raise their offspring into reverse positions. The one with the female offspring will teach her to be like herself, independent and negotiable (we negotiate with her, through her, by her, and negotiate her at will). The one with the nigger male offspring, she being frozen with conscious fear for his life, will raise him to be mentally dependent and weak, but physically strong...in other words, body over mind. Now, in a few years when these two offspring become fertile for early reproduction, we will mate and breed them and continue the cycle. that is good, sound, and long range comprehensive planning.

WARNING: POSSIBLE INTERLOPING NEGATIVES

Earlier, we talked about the non-economic good of the horse and the nigger in their wild or natural state; we talked out the principle of breaking and tying them together for orderly production, furthermore, we talked about paying particular attention to the female savage and her offspring for orderly future planning; then more recently we stated that, by reversing the positions of the male and the female savages we had created an orbiting cycle that turns on its axis forever, unless phenomenon occurred, and reshifted the positions of the male and female savages.

Our experts warned us about the possibility of this phenomenon occurring, for they say that the mind has a strong drive to correct and recorrect itself over a period of time if it can touch some substantial original historical base; and they advise us that the best way to deal with this phenomenon is to shave off the brute's mental history and create a multiplicity of phenomenon or illusions so that each illusion will twirl in its own orbit, something akin to floating ball in a vacuum.

This creation of multiplicity of phenomenon or illusions entails the principles of cross-breeding the nigger and the horse as we stated above, the purpose of which is to create diversified divisions of labor. The result of which is the severance of the points of original beginning's for each spherical illusion. Since we feel that the subject matter may get more complicated as we proceed in laying down our economic plan concerning the purpose, reason, and effect of cross-breeding horses and niggers, we shall lay down the following definitional terms for future generations.

1. Orbiting cycle means a thing turning in a given pattern.
2. Axis means upon which or around which a body turns.
3. Phenomenon means something beyond ordinary conception and inspires awe and wonder
4. Multiplicity means a great number.
5. Sphere means a globe.
6. Cross-breeding a horse means taking a horse and breeding it with an ass and your get a dumb backward ass, long-headed mule that is not reproductive nor productive by itself.
7. Cross-breeding niggers means taking so many drops of good white blood and putting them into as many nigger women as possible, varying the drops by the various tones that you want, and then letting them breed with each other until the circle of colors appear as you desire.

What means is this: Put the niggers and the horse in the breeding pot, mix

some asses and some good white blood and what do you get? You got multiplicity of colors of ass backwards, unusual niggers, running, tied to backward ass long-hand mules, the one productive of itself, the other sterile. (The one constant, the other dying. We keep the nigger constant for we may replace the mule for another tool) both mule and nigger tied to each other, neither knowing where the other came from and neither productive for itself, nor without each other.

CONTROLLED LANGUAGE

Cross-breeding completed, for further severance from their original beginning, we must completely annihilate the mother tongue of both the nigger and the new mule and institute a new language that involves the new life's work of both. You know, language is a peculiar institution. It leads to the heart of a people.

The more a foreigner knows about the language of another country, to the extent that he knows the body of the language, to that extent is the country vulnerable to attack or invasion of a foreign culture. For example, you take a slave, if you teach him all about your language, he will know all your secrets, and he is then no more a slave, for you can't fool him any longer and having a fool is one of the basic ingredients of and incidents to the making of the slavery system.

For example if you told a slave that he must perform in getting out 'our crops' and he knows the language well, he would know that 'our crops' didn't mean 'our' crops, and the slavery system would break down, for he would relate on the basis of what 'our crops' really meant. So you have to be careful in setting up the new language for the slave would soon be in your house, talking to you as 'man to man' and that is death to our economic system. In addition, the definition of words or terms are only a minute part of the process. Values are created and transported by communication through the body of the language. A total society has many interconnected value system. All these values in the society have bridges of language to connect them for orderly working in the society. But for these bridges, these many value systems would sharply clash and cause internal strife or civil war, the degree of the conflict being determined by the magnitude of the issues or relative opposing strength in whatever form. For example, if you put a slave in a hog pen and train him to live there and incorporate in him to value it as a way of life completely, the biggest problem you would have out of him is that he would worry you about provisions to keep the hog pen clean, or partially clean, or he might not worry you at all. On the other hand, if you put this same slave in the same hog pen and make a slip and incorporate something in his language whereby he comes to value a house more than he does his hog pen you got a problem. He will soon be in your house.

More From Willie Lynch
Editors note: This speech was delivered by a white slave owner, William Lynch, on the bank of the James River in 1712. The concept in delievering

this speech is very much like modern day "business workshops and seminars."

Gentlemen, I greet you here on the bank of the James River in the year of Lord one Thousand seven hundred and twelve. First. I shall thank you, the gentlemen of the Colony of Virginia, for bringing me here. I am here to help you solve some of your problems with slaves. Your invitation reached me on my modest plantation in the West Indies where I have experimented with some of the newest and still the oldest methods for control of slaves. Ancient Rome would envy us if my program is implemented. As our boat sailed south on the James River, named for our illustrious King, whose version of the Bible we cherish, I saw enough to know that your problem is not unique. While Rome used cords of wood as crosses for standing human bodies along its old highways in great numbers you are here using the tree and the rope on occasion.

I caught the whiff of a dead slave hanging from a tree a couple of miles back. You are not only losing valuable stock by hangings, you are having uprisings, slave are running away, your crops are sometimes left in the fields too long for maximum profit, you suffer occasional fires, your animals are killed. Gentlemen, you know what your problem[s] are; I do not need to elaborate, I am not here to enumerate your problems, I am here to introduce you to a method of solving them.

In my bag here, I have a fool proof method for controlling your Black slaves, I guarantee everyone of you that if installed correctly it will control the slaves for at least 300 hundred years. My method is simple. Any member of your family or your overseer can use it.

I have outlined a number of differences among the slaves: and I make these differences and make them bigger. I use fear, and envy for control purposes. These methods have worked on my modest plantation in the West Indies and it will work throughout the South. Take this simple little list of differences, and think about them. On top of my list is "Age" but it is there only because it starts with an "A"; the second is "Color" or shade, there is intelligence, size, sex, size of plantations, status on plantation, attitude of owners, whether the slaves live in the valley, on the hill, East, West, North, South, have fine hair, coarse hair, or is tall or short. Now that you have a list of differences, I shall give you an outline of action - but before that I shall assure you that distrust is stronger than trust, and envy is stronger than adulation, respect or admiration.

The Black slave after receiving this indoctrination shall carry on and will become self re-fueling and self-generating for hundreds of years, maybe thousands. Don't forget you must pitch the old Black male vs. the young Black male, and the young Black male against the old Black male. You must use the dark skin slave vs. the light skin slaves and the light skin slaves vs. the dark skin slaves. You must use thefemale vs. the male, and the male vs. the female. You must also have your white servants and overseers distrust all Black, but it is necessary that your slaves trust and depend on us, They must love, respect and trust only us.

Gentlemen, these kits are your keys to control. Use them. Have your wives and children use them, never miss an opportunity. If used intensely for one year, the slaves themselves will remain perpetually distrustful. Thank you, gentlemen.

Hello Jay

I thought I may have heard a tiny bit of Aurora or whatever one calls it, night before last. It sounded as though it was trying to break on thru to the other side, but it never quite made it to the Buckeye. That can be some really fun DX when it rolls, especially at night. I'll get 'em next time.

The band sounds quiet here at the moment.

Happy St Patty's to all the rrcb'ers. chin chin

Theres a guy known as 'bowlarse' on the classic car group with a lesbian
sister who keeps biggin' it up!
Needs teaching a lesson!

Short arsed fucker! strange thing is that he's a school teacher? I thought
that was illegal to have such abnormalties close in the family and be so
close to children, did they not check him out?

hi
can anyone help me. I am using a crystal control PLL. The PLL chip
contains Phase detector, charg pump loop filter, and VCO and divider
feedback to phase detector. Now I would like to use another signal
(audio) and modulate the two and transmite. my only problem is cannot
figure out what to use to modulate the two signals. Please if you have
any suggestion help.

ifmike keeps being a shithead and insuting and I find something proper
to say perhaps I will but I have no Knowledge he has a daughter

they pulled a scurous trick

No I was banned because I would allow to go unchcallgened a lie

there you are lying I am blacklisted there becuase I accepted to the
invatation fo the mods to se wht they would reject

no it is you and woger and Steve that isnit on as does Tom form RRCB
you comand of facts is fucked

IF your posts tady had been sent to the proposed new ng your addy would
ow be baaned indeed in your whole postig history I doubt there are mre
nthan a day in which you ever posted where your posting would make it
past moderation in the ng and 3 failed posts and you are banned

everyone should be advised that The following person
has been advocating the abuse of elders making false charges of child rape,
rape in general forges post and name

he may also be making flase reports of abusing other in order to attak and
cow his foes
he also shows signs of being dangerously unstable

STEVEN J ROBESON
<address snipped>

WINCHESTER TN 37398

BTW with the exalant response steve you can look forward to seeing this
email addy on RRAP a while

Mark caught forging using Steve's name.
"Steve's" post has headers:

> X-Complaints-To: abuse@aioe.org

Your reply contains headers:

> NNTP-Posting-Host: 66.82.9.42
> Injection-Info: 38g2000cwa.googlegroups.com; posting-host=66.82.9.42

'Nuff said.

in an radio News it is bashing eps when you go on to intoragte me
about my sexuality

And the most cruel of all...

what attack ? after all he claims he is not attacking me or my family when
he posts lies about me where is the attack in posting the truth that he
sired a defective daughter and failed to prevent her worthless existance in
the womb at least these things are true if Stve is telling the truth about
her on his websie

There is something very seriously wrong with you, Mark.

Well, it might say that in the bible alright, however, I can guarantee
the "feeling" won't be good for a real man ... and, their may indeed be
consequences to be paid elsewhere ... "youse' pays your money, youse'
take your chances"--has been told me by wise men ...

Go forth and sin no more.

Whilst I cloak my identity as I did 2,000 years ago, would you deny my
Father his due?

Thou knowest how to reach me. Look skyward, my Son.

Verily I say unto you. My Kingdom is not of this Earth.

Heavenly Father, please forgive Mark Morgan for his sins against You.
Truly, he knows not what he does as he walks in the shadow of Satan and sins against You.
Welcome this lost soul, Oh Father, into your fold as You did with the Lost Souls
of Jerusalem.

Have pity, Of Father, upon his lifestyle as you bid him to enter your fold and welcome Jesus into his lonely soul.

Grant, oh Father, that Mark go forth and sin no more in the eyes of The Lord.

Verily I say unto you. My Father has provided fishes and loaves left over
for a late night snack from our Galilee gathering. I say unto you, go forth
and partake of my Father's gifts.
Mary Magdaline suffers unto the the poor, the retarded, to enter thus into
her temple and pay that which is due unto Peter.

"Suffer the children to come unto me".

Mark Morgan. 3-11-07

1916. Jesus Predicts

Newsgroup: rec.radio.cb

Jesus predicts that by noon, this day, Mark will have posted no less than two dozen comments. Probably more.

Smile, Mark. Jesus loves you.

Now go forth and sin no more....

And Mark thinks that "going out for a Dairy Queen" is cruising for a gay
farmer.

If a man also lie with mankind, as he lieth with a woman, both of them have
committed an abomination: they shall surely be put to death; their blood
shall be upon them.

Go forth and sin no more.

The Philips datasheet for the 4046 includes a really good primer on
PLL circuits. I suggest you start there.

GARBAGE GARBAGE GARBAGE, just like his amps. Without the Motorola RF
Data Manual Griffgarbage would be even worse.
Maybe you should meet mopedopuke at the next pride march and get busy
doing your natural function, instead of selling garbage.

Has the simple thought that if, IF, you didn't post your name and callsign, that most of the alleged off-line "harrassment" would never have happened in the first place?
Yet you, who should by now know better, have this odd buggaboo up your ass that you are being brave by posting your name, callsign, and, yes, even your twisted blog.
Do any of us feel sorry for you? No.
Did you bring much of this upon yourself by YOUR actions? Yes.
Perhaps if you were to cease flooding Usenet with your inane and oft unasked-for comments, your problems would cease. But that is too much to ask, and certainly well beyond your ability to comprehend.

Your case is further weakened when one looks at your ongoing exchanges with Woger at http://nimbusters.com/forum/forum.php?board=1

You, Mark, are merely reaping that which you have sown. You have earned it.

obviously that is not the case as when I returned to the NG I did not
post my name or callsign

theefore you statement is proven inccorect but you most likely do not
post OURS becuase you misdeeds are likely a legand on the net

1995. VOTE! alt.fan.art-bell awards, Fall 2006/Winter 2007

Newsgroup: rec.radio.cb
Date: 2007-03-19 19:32:40 UTC
From: Teh Secretary to Teh Imperial Court of MEOW <BiGWhiteGuy5@yahoo.com>
Message-ID: <pan.2007.03.19.19.32.31.688321@meow.fuckhead>
Source record: 229898
Cross-posted to: alt.fan.art-bell,alt.usenet.kooks,alt.fucknozzles,rec.radio.amateur.policy,rec.radio.cb,rec.radio.shortwave,rec.radio.scanner,alt.alien.vampire.flonk.flonk.flonk,alt.discordia

At last, the alt.fan.art-bell awards for Fall 2006 and Winter 2007 have arrived! On the ballot this time are such usenet notables as: Andrew B. "You would no longer be here if I were to stop praying for you," Chung, Alexa "Screed Queen" Cameron, Gerald "real-lifing lover of usenet's freedom"/"I'll get you, Sean Monaghan" Newton, Ken "diploma-mill lawyer"/"ChasNemo has never been to Cuba, _I_ have!" Pangborn, Alan "Use my innovative 'challenge and response' email system" Connor, Azure the Pixie, Bloxy the forger/bot-runner, Ray "the Living Christ" Karczewski, my very own pet PorchMonkey, Jacky the post-editing nightbat, Commander of the saucerheads, the scaaaaaaared widdle Wabbit (who may or not be Woger Wiseman) of rec.radio.amateur.policy, Vito "Why can't you jerks be more polite?" Kuhn, Painius the saucerhead, Michael J. "Dogfucker" Cranston attorney kook, Robert "Mop Jockey"/"net.KKKopping stalker" Wolfe, Joey "Colonel Jake" Jimenez, Jayne "Chump of the Summer" Kulikauskas, Skeptic/Septic/Your Logic Tutor/"Deities don't *exist*, that's axiomatic!", Joseph "Three years and counting since Cujo accepted his challenge" Bartlo, and Richard "Nuked" Scoville.

For the rec.radio.* groupies, take note that the Wabbit is up for the Sir Robin Award for Bravery, and the Office of the Viagra Junkie. You still have a few days left to vote...

All Hail Fluffy! On Fri, 16 Mar 2007 04:53:32 +0000, Friendly Neighborhood Vote Wrangler whined:

"No man in History, including JESUS CHRIST, has directly revealed to
the World the SATANIC WEAPON used to enslave mankind -- INTELLECTUAL
THOUGHT!!" -- Ray Karczewski

"The MORE you think, the MORE you remain UNAWARE, CONFUSED." -- Ray
"Kazoo" Karczewski, in MID: <4504807e.80276754@news.west.earthlink.net>

"i have no need for sex; i'd rather tease you, honeybuns." -- Teh Mop
Jockey doesn't know the meaning of "TMI". MID:
<1253073.6W9sK7zyKL@unixd0rk.com>

"I hate explain $hit to tards. Especially illiterate tards." -- The
Monkey is very hard on irony meters, as in MID:
<Tc4xh.657$hH2.432@trnddc02>, and is also trained by moi, for the
Barbara Woodhouse Memorial Dog Whistle
http://www.screedbomb.info/porchie/

"Gabrielle?! Monkey-man, you bring her back! You know, you two are
beginning to irritate me with these obsessions of yours!
Fish don't just catch themselves!" -- Xena, "Fins, Femmes, &
Gems" (64/318)

Quoth Max Grrl to the Monkey:
> Free cl00: Why do you think you've been nominated for so many awards,

> Dribbles???

"Because y'all have so many nyms. Like I stated yesterday. Your b1tch as$ opinion doesn't mean $hit to me. You are totally irrelevant to me. I continue flame you because I like kicking retards around." -- The Monkey-man is unaware that Max Grrl only _has_ one nym. MID: <jq9xh.875$hH2.700@trnddc02>

>> Are you the Peter J Ross that I've heard so much about?
>
> Probably. I'm the one who doesn't resort to forgery after losing an
> argument.

"You're the one with the extensive brain damage... okay I see. You're gonna be easily to own them." -- PorchMonkey4Life: Not aware of too many things. MID: <bf7xh.834$hH2.64@trnddc02>

"Open wide and wait for a $hit explosion, turdboy" -- Joxer isn't very well-acquainted with the concept of not aiming the flamethrower at his own position. MID: <r7Wxh.2191$384.676@trnddc05>

I mourned:
> The Mop Jockey did most oddly state:
>> DUDE, YOU WIN TEH INTERNETS!!!
>>
>> the oversized check is in the mail.
>
> Alas, all I get for my trouble is a Monkey that's trained to hurl shit
> under several of my nyms.

"DevMcKinHole, you also get the pleasure of sucking off my doggy and cleaning out his butthole with your tongue." -- He's not so much a *Porch*Monkey as a _Fire_Monkey, as in one who's on fire due to his own tendency to mess with lighter fluid while standing beside a hot stove. Message-ID: <77Uxh.1996$384.1135@trnddc05>

Said I:
> You, Monkey-man, are quite possibly the only usenetter in existence
> who does not and cannot own Hatter.

"[...] What's the matter fagboi, am I beating your as$ so badly that you're no seeking an alliance with the diaperboi?...YOu really don't know how dumb you are, do ya?" -- I guess I don't, Monkey. Message-ID: <gHVIh.1760$Bi2.1639@trnddc01>

"yes you are definitely retarded. See a neurologist immediate. And if you don't have monet, blow a neurologist immediately." -- Farky the Monkey-man to peachy ashie passion. No, no trace of irony in his post. MID: <4h6xh.802$hH2.233@trnddc02>

"Etymology:
Argumentum ad Septicus : argument to putrefaction. Derived from Septicum Argumentum : putrefaction of argument.

"Septic \Sep"tic\, Septical \Sep"tic*al\
a. [L. septicus to make putrid: cf. F. septique.]
Having power to promote putrefaction. Of or relating to or
caused by putrefaction." -- Kadaitcha Man, indirectly to
Donald "Skeptic"/"Septic" Alford, in MID: <a3svh.djj.19.1@news.alt.net>

"Chips on you dud, you got bugged for being near me, Viruses transmit
that way you know." -- Blooey: Master of the Autoflame. Message-ID:
<4556A926.6F259DC9@pharae.org>

"No effort at all c*cksucking you, b1tch." -- At last, the Monkey-man
comes out of the closet, in MID: <aXkth.3535$QE6.1902@trnddc02>

"Fredbot == SameAsB4 == TGOOS

"You are stalking me, even after I thrashed ya." -- PorchMonkey4Life,
a veritable combination of Sherlock Holmes and Doc Savage for the 21st
Century. No, really. Would I lie? MID: <zaUqh.2972$E35.415@trnddc02>

"He unleashes a fecal explosion he time he posts. He uses so many nyms
because he gets beaten so easily and so convincingly in flame wars and
tries to hide behind nyms in the hopes of getting a fresh start. To bad
for him that his lameness keep shining through like a beacon for all
tards (e.g., SameAs$B4, Demon Spawn, Barbara's Pus$y, FredBot,
TGOOS, ..., etc)" -- Monkey-man identifies <jitter> as me, among
others, in broken English, in MID: <Z_Xqh.3167$E35.215@trnddc02>

"You would no longer be here if I were to stop praying for you." Andrew
B. Chung's delusions of grandeur are getting out of hand, in MID:
<1160653810.937331.31980@e3g2000cwe.googlegroups.com>

> A Christian is a citizen of Christ Jesus' kingdom just as an American is
> a citizen of the United States.

Whatever you've been smoking, it's making you spew great lines for a
"Cheech and Chung" movie.
-- Chadwick Stone to Andrew B., in MID:
<f98Hg.249738$bN2.41516@fe09.news.easynews.com>

"I am a loyal friend to those who report science and truth not
try to hidden agenda hide it. Astronomy is so important little do the
clueless know where they came from or where they are going. The Officer
Warhol reporting of Little Goldilocks and the Tree Bears was so relaxing
but heed its moral warning blondes do have more fun. The Seans Sil a
beauty like no other waits for this Earthman to hopefully safely real
Starship bring all those worthy to space the final frontier. Choose life
not war, oh the humanity, when will man lay down his arms? Thank you
Green Knight for your dedication to duty and God speed on your journey
to the sacred mountain. Figs and olives the preservers of life and
promoters of good digestion. You darn tooten we like fig Newton.

Att: All Earth Science Team Officers

Officer Warhol has issued a world wide bulletin for all coastal residing
residents to go to higher ground due to planet warming. The increasing

planetary green house effect is scientifically now observed. The Green Knight predicted dooms day long cycle comet may also be approaching, take heed! Also Florida residents listen for daily reports from Officer Bert and please be aware of hurricane Debbie now gaining power off the coast of Africa, oh the humanity!"
-- nightbat on the importance of a good diet, and always taking one's meds, in MID: <5936a$44ec171f$46e3a618$28623@COMTECK.COM>

"Real meaning: 'Repeatedly another raw-boned lout twitters, but some mankhead recurrently thereafter erodes the hymen. If another habitual criminal beyond a fat cell advises some fermentation bucket, then the show-off respecting another swamp-donkey glides. Now and then, some jawless fusspot periphrastically disturbs a mechanic with an inchworm. When you see another impacted tooth, it means that a bitch round a fried egg wobbles.

The walrus squeals, and another flathead amid a ham sandwich burns; however, a flasher charms a scabby codpiece. Another sheep with another taco tickler wakes, and the hedgehog sees another zigzagger. When some tatterdemalion afore the fungus is frightfully swaggering, some ruffian reportingly starts a bank manager.

Another vegetative door-to-door salesman splashes, and a dung ball respecting the motherfucker smiles; however, a hamster drinks a hifalutin fowl. Another alienated zoo exhibit comes, while some depressing hose bag finds some futtock. When you see another tonsil, it means that a cholera germ amongst another trollop sweats. Some dizzily stony-broke wretch is nosy. Some melancholic homo endlessly dangles some thereupon pus-filled fumbler.'" -- Kadaitcha interprets batty's advice in a most wise and insightful manner, in MID: <5m0ln4znko@emaciated-marshmallows.net.au>

There used to be some good tech discussions, or should I say battles.
Whatever it was... I had learned a lot about radio from this group. I
live a a subdivision now that does not allow antennas. I might make a
stealth antenna and get back on the air. My neighbors would just love
it if I hook up the big one that I still have with the 4 - cx250B's.

2016. OT Marine Freq's

The simple method is to use a high-level modulation scheme... probably
with a transformer. This is commonly done in CB radios. Try Googling
"high level modulation". This should put you on the right track.

I always liked the idea of the flag pole antenna for a stealth model.
Especially a tall lighted one with a big flag poppin' in the wind. I've
never had the need for one yet. Maybe later..

Yup the patriot freebander. Or maybe a pirate flag. Actually, I might
make a dipole. That should be easy to hide.

Hello All:

While listening to the noise on the bands 10 and 11 meters the other day, I heard stations come in and go very quickly.

After a while I heard a few guys talking to some boats and a base station. These stations where in Hawaii, on the big Island.

So if you hear stations trying to skip in, it may take a few times for the condations to work right. Keep your ears on.

Jay in the Mojave

My trunktracker has a marine scan mode that will display the channel and
the frequency when a signal is received. Of course, you need to be near water.

Chukkee, guess I will have to send off a message to abuse at puke brained phoney christians dot com about that deal you posted about sending a bomb.

I told you and mopey before, I am not interested at all. I am heterosexual, and your efforts are thus totally wasted.

Chukkee, maybe the keyclowns will let you belong to them if you keep
doing that. You struck out as a christian and as a ham. Keep trying
though.

I liked them. I remeber cutting the limiter diode out of the audio mike section and turning the RF up a bit. I f I remebered corectly a few of them were JC Penny radios also. Same guts just different covers. I miss the CB craze in the late 70's. I worked at a CB shop while I was in school.
I allways liked the Unidens. President Grants particularly. You could really trick them out.

RJ

ENFORCEMENT: YET ANOTHER HEFTY ILLEGAL CB GEAR SALES FINE

The Federal Communications Commission has ordered Charles E. Vance III doing business as CB Candy Electronics to pay a $14,000 monetary forfeiture. This, for offering for sale non-certified Citizens Band transceivers and external RF power amplifiers at his place of business in Ontario, California. Amateur Radio Newsline's Bruce Tennant has more:

--

This is a story that will sound similar to one we reported last week regarding the advertising and sale of non FCC certified transmitters for 11 meters. This time around it is illegal C-B gear on a website that is bringing a hefty monetary forfeiture.

The FCC says that Charles E. Vance III is being fined for willful and repeated violation of Section 302(b) of the Commissions Act and Sections 2.803(a)(1) and 2.815© of the Commission's Rules. This, based on several pieces of non certificated radio transmitting equipment listed for sale on his CB Candy Electronics website.

Thee FCC says that on June 28, 2005, an agent from the Enforcement Bureau's Los Angeles Office visited the CB Candy Electronics website. There he downloaded a sales catalog that displayed and offered for sale multiple makes and models of non-certificated CB transceivers. The catalog also included numerous makes and models of external radio frequency power amplifiers. A review of the Commission's records revealed that these devices had not received an equipment authorization from the Commission.

On June 28, 2005, the Los Angeles Office issued a Citation to Vance for the alleged violations. In a response dated July 21, 2005, a lawyer for Vance disputed "all legal and factual contentions set forth in the citation." Vance's council stated that the transceivers listed in the Citation were legal to sell.

The FCC says that the response did not address the marketing of external power amplifiers at all. Instead it stated the expectation that the Citation would be withdrawn within 14 days. The Los Angeles Office did not withdraw or otherwise cancel the Citation within the period set forth by counsel for Vance.

Instead, on September 6, 2005, and again on February 3, 2006, an agent from the Los Angeles Office again visited the CB Candy Electronics website. The agent downloaded the identical catalog as found on the website on June 28, 2005. All of the non-certified CB transceivers

and external RF power amplifiers were still being offered for sale.

On March 22, 2006, the Los Angeles Office issued a Notice of Apparent Liability in the amount of $14,000 to Vance. Vance's legal counsel filed a response on May 4, 2006, stating he was unable to obtain a copy of the catalog referenced in the N-A-L from Commission staff and argued that the refusal to provide him a copy of the catalog was a denial of due process.

But the FCC disagreed. In affirming the fine, the regulatory agency said that Sections 0.453 and 0.455 of the Rules detail the records that are routinely available for public inspection at the Commission. Unless a type of record is so listed, a request to inspect the record must be made pursuant to the Commission's Freedom of Information Act procedures. The FCC says that the type of investigatory records compiled for this enforcement action are not so listed. Therefore, Vance's counsel was required to file such a request to obtain them. But Vance's lawyer filed no such request and, consequently, failed to invoke the procedure mandated by the Commission to obtain such records. Therefore the FCC find no merit to his allegation that he was denied due process.

As to the actual violations, the FCC says that it has received no other response from Vance to the Notice of Apparent Liability. Consequently, based on the information before it, and having examined it according to the statutory factors and in conjunction with the Forfeiture Policy Statement, it finds that neither reduction nor cancellation of the proposed $14,000 forfeiture is warranted.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The $14,000 fine was affirmed on Match 14th . Vance was given the customary 30 days to pay or to file a further appeal. (FCC)

There's a retarded line of reasoning. Usenet's serious business, I
suppose. All of his usenet posting warranted some kind of drastic

response, I take it? Was he pissing in your playpen? Ruining "your"
group? Speaking as an official Usenet Ruiner, bully for him.

>> Hang on! Mark's former "residense" (now *that* has to have some
>> Freudian significance) was burred, er...umm...burned? There was serious
>> injury to either Mark and his father or Mark as his own father? His
>> pets were killed? He can prove that Steve Robeson or his "conries" were

Indeed. Fuck of a lot more serious than some newsgroup.

>> > Yet you, who should by now know better, have this odd buggaboo up your
>> > ass that you are being brave by posting your name, callsign, and, yes,
>> > even your twisted blog.

Is Dave Heil being "brave" by posting his name and callsign? Considering
what some deeply retarded and obsessed people will do about usenet posts
-- words on a fucking screen -- it seems to me that it could very well
be quite brave of him.

>> Mark is utterly incapable of recognizing how the blog appears to others.
>> No one would deliberately make himself look that foolish.

Um, I think you're being a tad extreme. It's only a blog, after all. I
think everyone has one, by now. I have two...Gotta be more than one
dyslexic with a blog on this planet. But I guess some people think
appearances mean an awful lot.

>> > Do any of us feel sorry for you? No.
>> > Did you bring much of this upon yourself by YOUR actions? Yes. Perhaps
>> > if you were to cease flooding Usenet with your inane and oft
>> > unasked-for comments, your problems would cease.

The gay lames from Wabbit could also do with being cut back. He's
raising his BI quite a lot...Then again, that helps with his long-term
campaign for a Busted Urinal.

>> They might and they might not. Mark hasn't just presented himself as a
>> perpetual victim, he has flooded this and other newsgroups with mindless
>> drivel for quite some time now. The ill will that he has generated will
>> not be quickly forgotten.

However, he brought Wabbit to the attention of alt.usenet.kooks, once
and for all. With any luck, the screams about criminal charges,
harassment, lawsuits for defamation and libel, and so on will begin
within a year or two (from Wabbit's direction), as soon as he becomes
sufficiently interesting to the bulk of my colleagues. Then the real fun
can begin...Mind you, RRAP will likely become a smoking crater, once and
for all, after that, if it isn't one already, but that's your business.
Making smoking craters is mine.

>> > But that is too much to ask, and certainly well beyond your ability
>> > to comprehend.

The flooding and the inanity are what earned him a Golden Killfile.
OTOH, the whining from the rest of you nearly earned RRAP as a whole a
GK. That could still be arranged.

>> The last clause in your statement sums it up. Mark cannot understand
>> how he appears to others. It is totally beyond him.

I dunno, he appears to me as a bunch of usenet posts with variable
spelling. Do usenet posts make you see things that you shouldn't really
be able to see?

>> > Your case is further weakened when one looks at your ongoing
>> > exchanges with Woger athttp://nimbusters.com/forum/forum.php?board=1

Isn't that a public service? You know, keeping the Wabbit occupied with
a webforum instead of bothering anyone who might know how to post.

>> > You, Mark, are merely reaping that which you have sown. You have
>> > earned it.

Ah, yes, arson, aggravated assault, and the slaughter of pets are all
reasonable in the face of obnoxious posting. I must remember that. There
is nothing graver than enduring posters who make you scream and rant and
rave. Come, tell Snarky all about your trauma from having to read Mark's
posts. I promise I won't laugh...hard.

>> Now you've done it! You've accused him of reap.

<poke>

>> Mark has a long history in usenet as a congenital liar. We all know
>> the entire drill by heart--the military lies, the year ago pagan now
>> converted to Judaism lies, the marriage lies, the
>> why-I-won't-use-a-spellchecker lies, the beat-me-hurt-me-pee-on-me
>> lies. The guy has serious issues. They aren't as serious as Wiseman's
>> personal demons, but he has issues.

"Marriage lies"? Do you have any particular reason for believing he has
ever lied about being married, or is that an assumption? Are the rumours
true about radio hams being k00ky stalkers?

>> I've had him killfiled for quite some time, but Thunderbird still shows
>> his myriad squirrelly, grayed-out message headers.

I'm not willing to go to the trouble of trying to kf Wabbit, and Mark's
no more prolific than him, taking all of the scared little coward's
posts as coming from one person.

>> Dave K8MN
>
> STOP IT,MARQUEER!

You first, Wabbit, you screaming queen.

Magnanimously,

Your Supreme High Overlord

"Immorality: The morality of those who are having a better time." -- H. L. Mencken

"Consider that language a moment. 'Purposefully and materially supported hostilities against the United States' is in the eye of the beholder, and this administration has proven itself to be astonishingly impatient with criticism of any kind. The broad powers given to Bush by this legislation allow him to capture, indefinitely detain, and refuse a hearing to any American citizen who speaks out against Iraq or any other part of the so-called 'War on Terror.'

"If you write a letter to the editor attacking Bush, you could be deemed as purposefully and materially supporting hostilities against the United States. If you organize or join a public demonstration against Iraq, or against the administration, the same designation could befall you. One dark-comedy aspect of the legislation is that senators or House members who publicly disagree with Bush, criticize him, or organize investigations into his dealings could be placed under the same designation. In effect, Congress just gave Bush the power to lock them up." -- William Rivers Pitt

"It has become clear in recent months that a critical mass of the American people have seen through the lies of the Bush administration; with the president's polls at an historic low, growing resistance to the war Iraq, and the Democrats likely to take back the Congress in mid-term elections, the Bush administration is on the ropes. And so it is particularly worrying that President Bush has seen fit, at this juncture to, in effect, declare himself dictator." -- Frank Morales
http://www.uruknet.biz/?p=m27769&hd=0&size=1&l=e&fark

"Right you are correct. Someone hooked me. I do believe in building relationships. That is what Christians are required to do. I am amoral. I am sure you know what that means. So are Scorpios. I am being 'protected' by the Formosa Rule because of my 'mental illness'. I am not targeting 'teh Mop Jockey'. You are and you are using me as a bait. Please stop. I have my own fish to reel in. Leave me alone. It is my hope that I will be able to catch a fish and reel it in for you. Once my retired bishop thought I was fishing for him and he took the bait, alas it wasn't me and that spelled the demise of our relationship. Have a little bit more faith in me. An Eastern Orthodox bishop thought I was fishing for him and willingly, proudly and defiantly took the bait on public record, and it wasn't even me. Give me a break." -- Atlanta Olympiada "Erica" Kane yammered in
Message-ID: <ochc3.ag0.17.1@news.alt.net>

"It does to a certain extant physically and theoretically
it holds even into the quantum but there observational confirmation is limited or non existent. That's the problem and the major stumbling block to field unification. For Dr. Einstein held out that a physical based field theory should be sought out and not left to quantum uncertainty of how the universe primly base works. Man made coordinate systems are fine without knowing from where or what is the base essence of what the space as deduced field is composed of, but not totally satisfactory. Anomalies keep space cropping up and scientists have to keep adjusting for these unexpected events. It's like a blind man that

has memorized his physical surroundings to a point he feels very comfortable until that one new or unexpected event pops up and he's lost and fumbling." -- nightbat, in one of his more lucid moments.

I take issue there I call them all woger becuase some are woger, the
rest are deeply offended by being called woger I also sometime call
unrelated people woger so as t bury their crap in general feild of
debries around the real woger making some good use of his presense
>

I have said you were wise to conceal yourself, In that you have proven me correct as you comit another outrage an Out rage showing you are No man but a beast, and a pretyy low one at that.

You should also count yourself as furunate that we no longer live under the code deulleo, although if we did I fancy you would never dare such outrages or that you would have fallen on the filed of honnor long before we ever met.

You dare to speak to me of being imoral when you steal from MY wife as you have done.

you like the rest of the anti Mark RRAPer are not man enough to keep your disputes with Online and between US you go after my wives property and privacy as well.

I name you what you are a trator for your vert acts agains the blessing and liberty Our founding fathers sought to insure us as american, against the scrafices and serivce rendered by our veterans past and present

In your blog you call yourself slime lord, in that it seems you typed the truth you are a slime lord

2096. VoiceMax Speech Processor Moving Forward...

Newsgroup: rec.radio.cb
Date: 2007-03-26 11:52:55 UTC
From: Telstar Electronics <briangriffey@sbcglobal.net>
Message-ID: <1174909975.113268.23590@o5g2000hsb.googlegroups.com>

The first pre-production pcb has been built and put into service.
Pictures of this board are now available at
http://www.telstar-electronics.com/default_files/NewProductDevelopment.htm
Several other additional boards will be built and put in service
within the next two weeks. After this pre-production pilot... final
adjustments will be made to the pcb to allow for easier/better
manufacturing before the final pcb is released.

P.S. I may be looking for several radio techs in the next few months
that would agree to do some beta testing. Email me with your
qualifications to be considered. The beta units will be free of
charge... and I would only expect a detailed performance report in
return.

Given that we know this much about the original poster:

1. He's on half a computer.
2. Posting from a site exclusively reserved for people who make poor
decisions.
3. Nobody but you read it because most sites drop WebTV for reason 2.

My guess in his case is that he's got one of the awful models. (OTOH, one
of the truly awful Realistics, model number escapes me at the moment, had
the best sounding WX receiver I've come across... too bad it sucked at it's
primary, 11m duties...)

Why do you sell a rf amplifier that covers "26-30MHz Coverage"
It sounds like you are selling a CB amp which I thought was illegal.
Just curious, Thanks

Turns out it's a fine fescue that's quickly overtaking my bluegrass,
both front and back. It looks great now that it's spring, but by July
I'm going to lose half my lawn (right now I have a two-tone yard!).
Any idea how to get rid of it without replanting? Like, maybe a
bluegrass or tall fescue strain that will choke it out?

No skip contacts on 11 meters this weekend, although during the contest, some guy in deep south america heard me. I wasn't contesting but I threw my CS out there just to see...

Anybody got a stock mike for a RCI2950? Some of the locals still believe its illegal for a ham to use an unmodified 2950 on 10 meters!!! Hell, I use mine on 10 meters and let them all know it on 2 meters. If I want to talk on CB, I hook up the CB. Three connectors. BFD! :)

Hello Steve:

I think this intermittent skip stuff slowly coming in and then disappearing is a indication that a single hop is only possible, Then again who knows anything about propagation?!?!??

The wind is gusting to 75 MPH here today, and has moved the beam, facing to the north. Thought I tighten the boom to mast bolts, ah,,, maybe not!

Anyway I will now be listening north for stations.

Jay in the Mojave

The reporter asked Colin Powell (or George Bush), "What proof do you have that Iraq has weapons of mass destruction?"
He replied, "We kept the receipts." -- Bill Hicks

Looney Maroon nominee for August 2006 Johnny D Wentzky foamed:
"You never asked someone who goes into areas of the internet that are only for adults who has an underage id somehow or another if they are a cop posing as an underage person online?
I guess lots of people just don't watch dateline or read stories much. Why don;t you go to pervertedjustice,com and see what they do. They are

awash in their self-proclaimed glory after they lied to membners of the public.
They are awash in their self-proclaimed glory after they posed as an underage person and agreed to do all sorts of sex acts wioth adult males, and they are adults posing as teenager themselves. They make themsleves into liars by falsely impersonating underage persons and by not fuilfilling the words they tell the victims online in their chats. Why don't you read it where they tell these victims of their deceit about how they have been with grown men and such? Why don't you read it where they say, "That would be cool." after someone makes an advance towards an adult who is posing as a teenager? And, where they agree to meet the person, etc.
Lost control, didn't you?
Is that why you feel as if you need to lie so much now? I see where lots of these false impersonation games are not sticking. They feel as if they can lie and then order the victims to get counseling in the gayblade, governmental, pro-choice tax leech counseling centers. They are doing nothing more than usury and fraud in many cases." -- Wentzky almost comes out of the closet as a pedo/ephebophile in MID: <H%%Eg.28916$Uq1.22411@bignews6.bellsouth.net>

Hello Scott:

I have now keeping an ear on 6 meters also, but I haven't been able to draw a pattern with 10/11 meters skip and 6 meter skip.

I modified a Interceptor 10K for 6, and it works great. I have a stronger signal than my neighbor with the same radio a few miles away. He is using a 4 element beam with a gamma match, must have things not to well tuned up?!?!??!??1

Anyway the Hawiian skip was a real fluke I think.

I bought a few Icom HM-36 Mics, they seem to sound great on a lot of radios. And I have a few of the older Mototrola Mic's that I have modified left over they sound great!.

Not really, in fact fine fescue is more of a creeper than either blue or
tall fescue. Fine fescue does well in shade but doesn't handle full sun as
well, and it tends to develop excessive thatch. It almost feels like you're
walking on a sponge when that happens. How many sq ft are you talking
about?

>about?

Enough. Funny thing though, I don't know where it came from. It's in
the front yard right beside the sidewalk, and smack dab middle of the
back yard. And none of my neighbors have the same stuff. Oh well, I
guess I'll be planting a sod garden this year. Thanks tho.

Try to recreate contracting Bubonic plague (the black death). Gavi
sure has enough fleas to start you off with infection.

Marqueer and his shemale wife are in this picture:
http://www.hu.mtu.edu/~jegirard/school/hu2650/shire/graphics/group.jpg

2155. Only in your sad reality, Marqueer

Nope it isn't. And is Avagaye a telling nickname since Gavi(n) is as
gay as you are, or is it pig latin since neither you nor your "wife"
are very creative.

Who knows how some of that stuff gets started? It may have been 7% of the
seed blend when that lawn was initially sown, as I said it creeps. It's a
weed to you but I know people with big trees that would love to have it.
>

Oh well, I

I might have an old marine radio laying around if you really need it.
You'll need some sort of an antenna to go with it tho.

Listening to the marine radio will not do you any good. The contractors
will not be using those frequencies. If they use any two way radios they
will be on the business band frequencies. What you need to do is have
the line of the fiver optic cable marked with flags so that the
contractors will know where your company has them buried. Usually there
is a agency that marks all underground utilities at no cost to the
contractor to prevent damage to the utilities. I recommend you contact
the Corps and request that they have the survey done prior to any work
being done. If they don't have the survey they become responsible for
any damage and subsequent repairs.

The -10 is too cold for tall fescue? We get that temp here in the Buckeye
too but not very often. Tall fescue is the next bluegrass, considering the
water budget for most.

The dreaded traffic problem. New sod isn't in love with it either, but I
know what you're saying.

At any rate good luck with it.

They can come get it anytime they want. I'm in zone 3: semi-arid,
temps between -10 to 110 degrees, and unusually windy the past few
years (apparently due to global warming). So my choices for grass are
limited to bluegrass, some types of tall fescue, and tumbleweed. There
are a few varieties of fine fescue that will work here if you're
willing to shell out major bucks for water, and some crazy folks
around here do just that, but the stuff I have doesn't seem to handle
heat at all..... kinda like it came from the wet side of the state. I

Yeah, it's just a slight slope, but it's right next to the sidewalk.
So either I lay down sod or I shoot all the stray dogs and neighbor
kids that would otherwise trample my seedlings. As much as I would
like to do the latter, I think I'll just go with the sod plan.

Looks like Mark held true to his threat to get even with Dloyd. He has begun by stealing Dloyd's blog.

http://www.markmorgansucks.blogspot.com/

I guess it is wrong, wrong, wrong, to use easily found information about HIM in these groups, and accusing others of theft comes easily to the hypocrite. But when it comes to stealing from another...well, Mark clearly has a double standard.

You are a Cretin, Mark.

Mark didn't steal that blog address, I gave it up because it was
getting stale and he would not stop posting his filth on there after I
repeatedly asked him to refrain from posting on my blog. But it is
funny that he correlated the "suck" part of the address as an attack
on his sexuality. Nevertheless, somebody can always create another
blog just like that one.

I classify his taking of the address more like some bum picking
through your garbage and taking a peice of trash.

However, all of that text from my Blog that Mark stole and has been
happily posting on his blog is theft and a direct violation of
blogger's TOS.

>From blogger's terms of service.

Sorry Dave but in this instance you are wrong. I have the MOP and it includes the provision for listening to marine ops on the channels mentioned. The cable in question is submerged off the south shore of Long Island so any markouts via flags is moot. On the terrestrial side we dont use flags rather orange paint on pavement and if in the dirt, flags, though there is nothing in the dirt. Been doing this many years mate so your advice whilst respectfully taken is not accurate in this scenario. Thanks, Jim.

Jim;

It was an easy one to make as you didn't mention the fact the cable was
all wet.

As to marking the cable location can't you just paint the marks on the
bottom of the boat/barge? ;^).

Thanks for the correction though. Good luck.

Dave

2198. radio channel memory on 1982 goldwing aspencade

Newsgroup: rec.radio.cb
Date: 2007-03-30 05:31:35 UTC
From: gdenniss@shaw.ca
Message-ID: <1175232695.710762.278300@l77g2000hsb.googlegroups.com>

I'm wondering if anyone has answer as to why when I program my clarion radio in my 1982 goldwing aspencade that it looses the memory of the channels and time when I turn the bike off?
Is there a wire that should be connected to the battery or is there a rechargeable battery that no longer holds a charge in order for it to retain the channel and time memory? I know this a a cb discussion site but I thought maybe someone has a knowledgable answer.

Thanks
Gordo

Most car stereos have one lead that stays hot (for clock and memory) and
one that's switched. I'd look for an unconnected wire.

2200. FS: VSWR Stub Matching System - Best Offer or Free

Newsgroup: rec.radio.cb
Date: 2007-03-30 06:06:17 UTC
From: mg <mgkelson@yahoo.com>
Message-ID: <1175234777.363724.56600@b75g2000hsg.googlegroups.com>
Source record: 230107
Cross-posted to: alt.ham-radio.vhf-uhf,sci.electronics.design,rec.radio.cb

About 3 or 4 lifetimes ago, during the big CB fad, I built a stub matching SWR system. After playing with it for awhile, I put it in a box and I've been storing it now in my shed for about about 30 years. Everytime I look at it, I get tempted to throw it in the garbage, but somehow, I can't bring myself to just throwing it away. So, I am willing to give it away or sell it for the best offer (USA addresses only).

If memory serves the system consisted of a whole bunch of RG-8 coax pieces with connectors on both ends that range from probably 1/4 wave length to just a few inches. It also includes some tees and maybe some adapters and it includes a home-made box that I used to use that can be connected to the tee for dialing in a variable capacitance or inductance. I would guess the box probably can't take a lot of power. I might also have a CB SWR meter in there also.

The way that I used to use it was to attach an extender cable to the transmission end of the coax then I would insert a "T" and connect the box and dial it back and forth until I got a match. Then I would record the L or C value and look at a chart I used to have and construct a coax stub that would provide the same reactance.

I would guess the best use for this would be for someone who is building a switchable antenna array, for example.

What he said. That wire is usually blue on Clarions.

Thanks guys. That gives me something to look for. My buddy has the
same year and model and his does the same thing. He has his wiring
apart at the moment so I'll let him know and see what we can come up
with.

No worries Dave. Its wet for about 6100 km's but it has to terminate at
a dry point which is a few km's land side of the beach. Cheers, Jim.

2204. Silent Night

My. What a peaceful group this has turned out to be with the absence of Mark.
This quietude is so nice that I hesitate to post more than once an hour for trepidation that Mark will, like a Ghost Who Won't Go Away, return to haunt us yet again.

I, for one, enjoy his absence. If he stays away, and I doubt he will, we can discuss radio issues uninterrupted...at least for the time being.

This is like a radio honeymoon! Mark is gone. Let's celebrate!!!

2205. anyone remember?

well well well.
anyone remember Eric Oyen (Blindboy asshole of CB)?

well, lets see, he's been heard on 38 lsb over the last 2 weeks!

>From what I have heard, it sounds like he's up to his old tricks
again....

gee Eric, you ever going to learn?

What did you fix? Possibly the door on a toilet stall at Petro. Lubed
it with some KY so it won't squeak when you sneak in with a trucker.

2226. CB REPAIR & MODIFICATION BOOKS AT 40% OFF

Newsgroup: rec.radio.cb
Date: 2007-04-02 02:58:39 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <uas013dva7silffhjmbiglp9uhadk4shnu@4ax.com>
Source record: 230133

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

2229. 38 LSB in Phoenix

Newsgroup: rec.radio.cb
Date: 2007-04-02 08:35:07 UTC
From: informer <informer@any1can.net>
Message-ID: <1175502907.422533.215960@y66g2000hsf.googlegroups.com>
Source record: 230136

I find it rather amazing...
listening to these people here in Phoenix, I wonder what it is they do.

sure, Eric Oyen (The Blindboy) figures into most of it but I haven't heard him on there in the last couple of days. yet, he figures in the conversation.

Tonight was a case in point: someone was playing what sounded like a scanner over the air. it took a while to track down that it was from the ham bands (146.540). as soon as the transmissions stopped, there was Bobby and Richard all blaming Eric. Personally, I think it was Eric retransmitting that conversation, but without any confirmation, whoes to tell. He just makes a nice convenient target.

He Eric, why don't you get in there and defend yourself? are you afraid? are you a chickenshit? a wannabe ham op with delusions of godhood??? They are mocking you and they are blaming you for everything under the sun! whats the matter, you blind freak? afraid someone might be hitting close to home????

and then, there is that job at fry's (yeah, that was mentioned on the air). they gave you a token position as a greeter?!? HAHAHAHAHAHA... wow.

btw, broadcasting (or retransmitting) with the intent to amuse or entertain is a violation of the FCC rules. too bad your radio is weak as hell over here on the east side. then you might give someone a run for their money.

well,
thats just great. I am now the proud owner of a new FAN. Like I need any other problems. don't you have something better to do?

1 post is probably coincidence, 2 or more is deliberate intent to get under my skin (and you got there, so what are you going to do now, dipshit?).

who put you up to this? Howard, Richard, or one of the other low wattage types on CB? I am sure there are others that would like to knwo.

as for any further responses, I won't be giving any! you are a troll and not worthy of any more attention than that.

2231. Cobra 19DX4 pops when going under squelch...

Newsgroup: rec.radio.cb
Date: 2007-04-02 11:27:49 UTC
From: Telstar Electronics <briangriffey@sbcglobal.net>
Message-ID: <1175513269.105179.66030@e65g2000hsc.googlegroups.com>
Source record: 230138

Yesterday, someone brought me a radio to install one of my VoiceMax beta-test units. I fired up the radio before the installation... and noticed that the speaker made an annoying loud pop sound when the signal fell under the squelch. This is the second unit I have noticed this on. Anyone know what is causing this? Sounds like a big DC pulse when the squelch kicks in. I haven't had time to look at this issue with a scope. Anybody else experience this? Any fixes?

2234. FS: Enhanced HTX-100 10 Meter Transceiver

Newsgroup: rec.radio.cb
Date: 2007-04-02 16:59:25 UTC
From: BW <winstead@airmail.net>
Message-ID: <1175533165.406497.96990@p15g2000hsd.googlegroups.com>
Source record: 230139
Cross-posted to: rec.radio.swap,rec.radio.cb

This professionally improved Realistic HTX-100 Amateur Radio
Transceiver is a close cousin to the Uniden HR-2510 and HR-2600
amateur
radios. Frequency range has been extended to cover 26.000 Mhz
through
30.000 Mhz. The CW function eliminated in order to add Lower
Sideband
capability to the existing Upper Sideband function. Microphone gain
slightly opened and output power increased to +/- 35 watts. Fun
radio
to listen to international DX pirate stations near 27.555 USB and the
old standbys on CB channels 36 to 40 (27.365 to 27.405). This radio
is
in beautiful condition and includes original microphone, power cord
and
a copy of the owner's manual. $125 shipped in the USA. Will ship
worldwide with buyer paying shipping costs. PayPal only.

Combine this radio with any ol' 10/11 Meter antenna and listen to the
world come alive! This popular Model 3837 Sears Roadtalker
Transceiver
has the built-in AC power supply for plug'n'play base operation as
well
as the 13.8VDC option. Extremely nice condition rig that ranges from
28.300 to 28.745 MHz with clarifier that works in both transmit and
receive modes. 25 watt PEP input power and digital display.
Includes original microphone, owner's manual, AC and DC power cords,
mounting bracket and conversion data. $90 shipped in the USA. Will
ship
worldwide with buyer paying shipping costs. PayPal only.

actually,
if a ham op modified it for use ONLY on 10 meters, its not illegal (for the ham anyway). modification of other gear to work only in ham bads is still provided for in part 97 rules.

now, if that radio still works in CB, then there is going to be a problem (because it won't be legal for part 95).

now, the OP stipulated:
"Extremely nice condition rig that ranges from
28.300 to 28.745 MHz with clarifier that works in both transmit and
receive modes."

I did not see in there any mention of use on CB. now, I don't know any other particulars on this radio, but from what I see, it looks like it would be a legal rig on 10 meters. so.... whats your problem with it (or is it just that you have a problem with the OP posting here as an item for sale)?

ok, now there is a problem with this radio...

had you left it alone (original factor settings for 10 meters only) then there wouldn't be a problem..

However, you have opened it up for use on 11 meters 9and it doesn't even have the tuning range to get to 12 meters!). the roadtalker was basically marketed correctly. this on isn't (and your advertising that it has been ILLEGALLY modified for USE ON 11 METERS doesn't help you).

I've identified the problem. It seems that the squelch transistion on
this model is on the order of 500uS. That is unecessarily fast and
causes a fast spike to the speaker when the receiver dips under the
squelch. I need to slow the squelch response time to eliminate this
problem. This shouldn't be a big deal... but I ran out of time last
night. I will be posting a fix for this issue in a day or so. Shame on
Cobra for allowing this annoying problem to get into production.

It is not illegal, in your arm chair lawyer beliefs maybe, but still not illegal.

Now take a close look Eric:

>> Sideband capability to the existing Upper Sideband function.

Nothing wrong there, it now has way more capabilities for 10 meters than before.

>> Microphone gain slightly opened and output power increased to +/- 35 watts.
>> Fun radio to listen to international DX pirate stations near 27.555 USB and the
>> old standbys on CB channels 36 to 40 (27.365 to 27.405).

Oh, so where he says you can "LISTEN" makes it illegal, interesting. If you are a
ham, you can own this rig and use it to you're hears delight, including "listening"
to
what ever freq you want.

>>This radio
>> is
>> in beautiful condition and includes original microphone, power cord

You decided to stir up the cb local, someone comes out here saying that,
So you get pissy and start spouting legalities that you know nothing about.

Your a piece of work.....

Landshark

well just got back was hoping to be able to report that I was kb9rqz/ae but alas I fell one question

STUPID!

short on that score oh weel I will have to try a different since i am wander lost in vaqely familiar math in an amateur context that makes little sense form the Physics point of

IDIOT!

OTOH I can report that my wife is now KD8CTL/ag a feat I thought

CB'ER WITH A TICKET..

possible but not quite probable. I am gald she made it she had woking for sometime on this question pool without feeling she was geting anywhere

on other scores My father in law came to hamfest spent some time whele we were testing on air and made a few contacts as a thrid party op, and left with a Tech class manual we will see what developes from that.

I had a chat with Mr Jim Hyaine

BET HE HAD A GOOD LAUGH AT YOUR EXPENSE

of of the ARRL at behest of someone else (not sure how it worked out) we had a frank discussion of thigng in My area the hobby/service in general, and my feelings and ipression of the ARRL. Deny the man what I must I must also grant him that unlike many folks on say RRAP he adknowledge that MY opions and impression are valid without my having to explain them to others, and he was quite attnetive to my responses to his question

Shame on YOU for not seeing the obvious problem. That gating time
isn't abnormal in the least. Instead of chasing insignificant time
constants you should be checking each audio stage (tracing back from
the speaker) for DC offset with squelch on and off, the likely culprit
being a shorted cap between the audio line and the gating signal. You
should have learned THAT much already..... but then again, what should
someone expect from a self-proclaimed "professor" who bought his first
proto-board less than six month ago?

Oh yeah..... where's that schematic, Brian? LOL!!!

The I suggest you read part 95 (specifically: part 95, subpart D et al:

RULE 7 (47 CFS 95.407) - Operating Channels/Frequencies Your CB station may transmit only on the following channels / frequencies:

Channel Frequency Channel Frequency
1 26.965 21 27.215
2 26.975 22 27.225
3 26.985 23 27.255
4 27.005 24 27.235
5 27.015 25 27.245
6 27.025 26 27.265
7 27.035 27 27.275
8 27.055 28 27.285
9* 27.065 29 27.295
10 27.075 30 27.305
11 27.085 31 27.315
12 27.105 32 27.325
13 27.115 33 27.335
14 27.125 34 27.345

20 27.205 40 27.405
****
RULE 9 (47 CFR 95.409) - Equipment
{A} You must use an FCC type accepted CB transmitter at your CB station. You
can identify an FCC type accepted transmitter by the 'type acceptance'label
placed on it by the manufacturer. You may examine a list of type-accepted
equipment at any FCC Field Office or at FCC Headquarters. Use of a
transmitter which is not FCC type-accepted voids your authority to operate
the station.
{B} You must not make, or have made, any internal modifications to a
type-accepted CB transmitter. (*read Rule 25) Any internal modification to
a type-accepted CB transmitter cancels the type-acceptance, and use of such
a transmitter voids your authority to operate the station.
****

These are the rules as applies to 11 meter operation. a modified HTX-100
would violate 47 CFR 95.409 and also specific sections of 47 U.S.C. ï¿½ 151
et. seq.

there is no "arm chair lawyering" about this. its pretty much spelled out in
black and white

I see you clipped out the section where he stipulated that its range was opened up to include 26.00-32.00 Mhz (this particular modification is KNOWN to open the transmit as well as the receive). you quoted out of context in order to make it appear that you were right while at the same to making me appear to be wrong. this, my friend, is called spin and i am very good at spotting it.

it is a well known fact that any modifications made to this radio will affect both transmit and receive as they are both integrated in the primary processor chip on board the device. I have confirmed this with techs at UNIDEN <uniden Corp. of America> (the original designer of the HTX-100 series radios as marketed under the Tandy Corp. of America brand logo).

no. I stated an opinion. here you are stirring things up by trying to prove that I am wrong (and failing).

I know more than enough about the legalities behind this kind of mess considering that I was one of the litigants in a case 10 years ago that involved aspects of 47 CFR 151 et seq., 47 CFR 97 et al., and 47 CFR 95 et al. and where the primary defendant attempted to hijack my identity, use aspects of said identity in stalking, issuance of threats via controlled airspace, interference with emergency radio traffic and filing false emergency reports via controlled airspace or devices (autopatches) as well as unlawful use of a valid callsign to commit such acts. Said defendant was fined in excess of $12,000 (an amount that was not reduced on appeal) and if forever barred from obtaining either a commercial license or similar amateur license. said defendant was also barred from ever using any transmitter (save those only covered under part 15 such as cell phones or cordless phones).

so I am. but I have documentation. do you?

perhaps you should familiarize yourself with the mods made to this radio, the meaning behind the words chosen for the posting, etc. it might also help you to get a schematic diagram of the radio, a list of mods and a few

other application documents AND READ THEM.

no go poke some other bear. this one just ripped off your arm and whacked you over the head with it.

The fix for this problem is to add a 100UF/6.3V capacitor from the
base of QR1 to ground.

www.telstar-electronics.com

Gee Brian, it might help to tell what model you are talking about. But
it really doesn't matter since if this QR1 is in the audio line your
added cap will work like a low-pass filter and make the audio "boomy"
(actually, it will be -really- boomy with that big of a cap on the
base of a transistor). If it's part of the squelch gating circuit then
you are going to have 1) a really long time constant on squelch which
may interfere with audio, and 2) the same DC offset problem as before
which may very well cause another fault down the road.

So where's that schematic, Brian?

What is the exact statement below? TRANSMIT, TRANSMIT, TRANSMIT!!!

Nothing about LISTENING, LISTENING.

> RULE 7 (47 CFS 95.407) - Operating Channels/Frequencies Your CB station may
> transmit only on the following channels / frequencies:

Again, it says transmit, nothing about listening to which is the exact statement he
said.

Useless dribble deleted

I didn't say that it couldn't transmit on those freqs, so why all this BS?
Neither did he say he was going to or transmit on those freqs, AGAIN he
said LISTEN.

YAWN, sure, right, whatever. YOU KNOW NOTHING! you can't even comprehend
what he & I said, so please don't throw crap out that you couldn't even fathom what
was
said.

>> Your a piece of work.....
>>
>> Landshark
>
> so I am. but I have documentation. do you?

Of what, being a legal alien? Being an idiot? Weren't you the one that said in a
thread a few years back that a cop could arrest you for interfering with an officer
by giving a "Smokey" report on the CB? Now that was great legal advise LMFAO!!!

>
> perhaps you should familiarize yourself with the mods made to this radio,
> the meaning behind the words chosen for the posting, etc. it might also
> help you to get a schematic diagram of the radio, a list of mods and a few

Oh, I am very familiar with the MODS ERIC, LOL!!! I can read and understand
when he said, and I quote :

"Fun radio to listen to international DX pirate stations near 27.555 USB and the
old standbys on CB channels 36 to 40 (27.365 to 27.405)."

Again, he never once implied or said transmit, so keep going on with this thread and all you'll do is keep embarrassing yourself.

>
> no go poke some other bear. this one just ripped off your arm and whacked
> you over the head with it.

ROTFLMFAO!!!!!!!!!!!! Yeah, right more like poking a Guinea pig and hear it squeal for ten minutes.....Too F'ng funny.

Landshark

For your reading skills Eric, I'll cut and paste his entire post for you to again try to see
where he said that you could transmit, imply that you could transmit, said he transmitted
or anything at all about using it to transmit on part 95 freqs:

This professionally improved Realistic HTX-100 Amateur Radio
Transceiver is a close cousin to the Uniden HR-2510 and HR-2600
amateur radios.
Frequency range has been extended to cover 26.000 Mhz
through 30.000 Mhz. The CW function eliminated in order to add Lower
Sideband capability to the existing Upper Sideband function. Microphone gain
slightly opened and output power increased to +/- 35 watts.
Fun radio to listen to international DX pirate stations near 27.555 USB and the
old standbys on CB channels 36 to 40 (27.365 to 27.405).
This radio is in beautiful condition and includes original microphone, power cord
and a copy of the owner's manual. $125 shipped in the USA. Will ship
worldwide with buyer paying shipping costs. PayPal only.

Eric Oyen got booted off of 11 meters for being a blowhard, by the CBers in his neighborhood. Consequently he hates anything to do with CB now. You can't make this stuff up! <g>

It has been opened up so that it will also transmit on the 11 meter
band at illegal power levels, that makes it an illegal radio.
Landshark, being the typical cber is clueless.

A real CB rulebook!

Terms of Use
1, DO NOT USE "VAD" (voice activated) ONLY USE PTT in Voiperized Settings Preferences

2, DO NOT Connect "Go private" to ANYONE

3,DO NOT MUTE the livecbradio audio or mute your mic audio to livecbradio

4,DO NOT disconnect from livecbradio and talk to others still connected to livecbradio

5, If you choose to designate a " hot key " ONLY USE the "Ctrl" or "Alt" keys or it will key the radio when you type instant messages. DO NOT USE SPACE BAR AS PTT!

6, Please STOP the livecbradio.com home page audio player when you are using the talk program.

7, Do NOT mess with emergency/help of any kind. DO NOT press PTT without talking. DO NOT press PTT for a split second to test if you are keying up the transmitter. NO dead keying or music/noise playing.

8, THIS IS NOT A CHAT ROOM: You are broadcasting LIVE ON THE AIR over a CB Radio Station when you press PTT on voiperized connected to the screenname livecbradio. Talk Program Users should conduct themselves like they are each on their own seperate cb radios (NOT COMPUTERS).

9, NO SPAM No MASS Redirection Mass Solicitation to DX Groups/Clubs/Forums/Webpages Text trolling

10, All users must have their bitrate set to 10kbps in Voiperized Settings/Preferences! Even high speed connections can sound distorted when your kbps is above 10kbps when many people are connected at once.

That is another point.
Perhaps the same reason or different reason why nobody is talking about
white slaves that were sold and bought in the slave markets.
Those white slaves have been forgotten.
```

oh. the old "loud is wrong" approach?

>
> Nothing about LISTENING, LISTENING.
irrelevant..... I reiterate, the modification in question would affect both
transmit and receive. ant further argument to the contrary would be
pointless on your part.

>
>> RULE 7 (47 CFS 95.407) - Operating Channels/Frequencies Your CB station
>> may transmit only on the following channels / frequencies:
>
>
> Again, it says transmit, nothing about listening to which is the exact
> statement he said.
unfortunately, the FCC doesn't see things your way. any modification to the
radio that results in the ability to transmit 9and this mod would do just
that) voids the authorization to operate it in class D 11 meter service,
period.
the radio is illegal on the face and the whole of its operation, period!
>> there is no "arm chair lawyering" about this. its pretty much spelled out
>> in black and white
>>
>
> Sure is, you can't seem to comprehend what he said.
I comprehend exactly what he said, but it seems that you've missed the
point. the radio was modified to operate in other than its intended band of
operation. since that modification results in both the receiver and
transmitter being affected, the radio is not longer type accepted for any
band it works on (mostly because it fails type acceptance guidelines for 11
meter operation, which was not the intended band of operation).

in any case, it should interest you to know that I do, in fact, own an
HTX-100 radio, I have its schematics here and a list of the possible mods.

only one mod would allow the receiver to span from 26.000 to 30.000. Unfortunately, it also opens the TRANSMIT to the same range. Now. the radio I have is *unmodified*. it operates from 28.000 to 29.750 Mhz in all supported modes.

This is why I say you are wrong. there in *nothing* you can say to prove otherwise. you don't own one, you haven't done the applicable research and you are blowing your stack and trying all available avenues of attack on my character, technical background and comprehension. Honestly, you don't know jack shit about me (and there isn't anyone on here that does). I have teh facts regarding this radio, and the documentation to back it up. what have you got? just a few misplaced or mistranslated bits of English designed to mask the true meaning of what was said?

now, perhaps you should do some *actual research* and then get back to the group. otherwise, I suggest you shut up. either way, I don't give a damned what you think (if such is possible).

<the rest of your mindless chatter, inane drivel and farcical technical mumbo jumbo have been snipped to save bandwidth>

> that) voids the authorization to operate it in class D 11 meter service,
> period.
> the radio is illegal on the face and the whole of its operation, period!
>>> there is no "arm chair lawyering" about this. its pretty much spelled out
>>> in black and white
>>>

WTF are you saying????? My FT101 with an 11 meter mod is illegal????
That's what you are saying, right??? You're an idiot Eric!!! I can mod any
radio I own to do almost anything, but as a ham I have the duty not to transmit
on any freq that I or my rig is not authorized. The FCC can not and will not
harass me, threaten me nor will they ever fine me for "Listening" to freqs that
my rig is not authorized to "TRANSMIT" on.

>>
>> Sure is, you can't seem to comprehend what he said.
> I comprehend exactly what he said, but it seems that you've missed the
> point. the radio was modified to operate in other than its intended band of
> operation. since that modification results in both the receiver and
> transmitter being affected, the radio is not longer type accepted for any
> band it works on (mostly because it fails type acceptance guidelines for 11
> meter operation, which was not the intended band of operation).

See above, your logic goes for my FT101, with the legal modify option
for 11 meters, but of course all you keep spouting is that it is illegal to have.

>
> in any case, it should interest you to know that I do, in fact, own an
> HTX-100 radio,

I too, but so what?

> I have its schematics here and a list of the possible mods.
> only one mod would allow the receiver to span from 26.000 to 30.000.
> Unfortunately, it also opens the TRANSMIT to the same range. Now. the radio
> I have is *unmodified*. it operates from 28.000 to 29.750 Mhz in all
> supported modes.

But you are not able to operate that, your license does not allow you to operate
it, so since you have it in your possession, you are illegal then, right???? By your
logic that would be the case because mere possession makes it illegal for you to
have.

>
> This is why I say you are wrong. there in *nothing* you can say to prove
> otherwise. you don't own one,

Sure I do and when I had my license, it was legal for me to use, unlike you who's
license does not allow it.

> you haven't done the applicable research and

Sure I have Eric, but you on the other hand will keep this going until your face
turns blue, if you say it enough, it will be true, keep dreaming......

> you are blowing your stack and trying all available avenues of attack on my
> character, technical background

Not really Eric, calling you an Idiot when you are acting like one is not an attack,
it's the truth. I never said anything about your Tech abilities, so keep being
paranoid.

> and comprehension.

Again, you don't seem to be able to, so that too is true.

> Honestly, you don't know
> jack shit about me (and there isn't anyone on here that does). I have teh
> facts regarding this radio, and the documentation to back it up. what have
> you got?

The truth and facts that it is not illegal to have or use and only "listen" to freqs
that are not authorized.

> just a few misplaced or mistranslated bits of English designed to
> mask the true meaning of what was said?
>

I have a motorcycle capable of going 140mphs, does that mean I do that?
I own vehicles that can drive over virtually any type of terrain, does that
mean I'll drive over people cars, lawns, yards, fences? Does that make
them illegal? or for that fact illegal period?
Remember to answer no, then you can see the light. If you answer yes, well
then this thread will be done to you're inability to comprehend English.

> now, perhaps you should do some *actual research* and then get back to the
> group. otherwise, I suggest you shut up. either way, I don't give a damned
> what you think (if such is possible).

I have done "real world" research. What was my class of license that I had in the
late 70's?
WAY higher than your present. But I gave it up because of Hams with attitudes
like yours.

>
> <the rest of your mindless chatter, inane drivel and farcical technical
> mumbo jumbo have been snipped to save bandwidth>

>Hey Twist, I hear they are forecasting a mild

>season for hurricanes. Wanna bet that it will

>be a busy season? Hope not...................

>   Landshark

Dr. Gray, the world's foremost leading authority and forecaster of hurricanes quit his post at the beginning of the year in disgust and commented that Floridians just won't heed his warnings about building on the vulnerable coastline.
I agree with him. So much coastline has been dotted with construction over the last 5 years that I have no doubt -when- the next storm comes to the area, we're going to see some serious devastation. Gray said that when a super storm does slam the coast, Katrina will pale by comparison.

Anyhow, it's the same old story down here, northerners coming here, building on the water, artificially driving up home prices then bitching about bugs, alligators, storms and how they "did it up north."
Methinks some of the storms are nature's weeding process/natural selection. Who besides idiots are going to sit tight in there home on the water when officials are telling you the eye is heading right for you and death and destruction is not only a possibility, but probability? The state already banned the sale of alcohol during evacuations, hurricane watches and warnings because of the yahoos and the national guard now closes the beaches to protect some of these geniuses from themselves.

We're good for at least 10 days with no contact from the outside world (food, water, generator, grill, lanterns, candles, first-aid kit, two-way radios, linear and other goodies) because when this little peninsula (you have to cross water to get here) suffers the wrath of the storm and an official evacuation is underway, all roads in and out of the county are closed.....no one in, no one out and those that choose to stay are on their own for at least 2-5 days according to local officials.

From: n7zzt@127.0.0.1 (N7ZZT - Eric Oyen)

>I know more than enough (snip)

You know the entire family, Oyen. You know Ida, Awe, and O. You're not familiar with Noe, but you are intimately familiar with both brothers, Deep and Dip. People often confuse you with the sister, Fulla, but you remain loyal to Bull even though you remind us of Dog. So while you sure don't know Jack Shit, the rest of the family gene pool makes up your DNA.

>is this an attempt at humor?

Good moaning, Oyen. Nah, just simple observations from those of us in the know.

> try harder....

Trying is for folks who have yet to succeed or accomplish. I can talk to your CB neighbors (who, btw, are pretty cool and not at all what you have misrepresented on these pages) from my mobile. In fact, the pile has been all up in the business of Phoenix lately but of course you already know these things. You've heard the radio power from the bikini state, when do we get to hear you back?

Wow! is all I can say about the Connex 4600 Turbo with the Super WackPack! I have 8 gauge copper strand power supply cables, grounded cab and antenna on my International Eagle tractor. My Monkeymade 9 coil antenna has a SWR of 1.3 (still trying to lower readings)... WOW!!! Guys are scared of this radio!!! I have never before had the pleasure of operating a better mobile radio!!! Many Thanks Guys.

Sincerely,
Ronnie H
Kingsport TN

In this world as it is today it it rare and very hard to find a company who;

1.. Stands behind their workmanship and products.
2.. Gives a true lasting guarantee.
3.. Remains professional in business ethic and assistance to customers.
My hat is off to you, please know that the radio and the work performed is excellent. I will be reccomending you to everyone.

Thanks,

Gunner
Virginia Beach, VA

You guys are great!! I took your advice and purchased a Gen Lee super wackpacked w/super rec. All I can say is Wow! I am very impressed. This radio is ass kickin! I hooked it up in my big KW the Sunday after Thanksgiving and headed out from TX to MO, all along the way I was getting big time respect from all those big radios in those big chicken trucks. Those same guys wouldn't even give me a come back before. Now they want to know what I've got and where I got it. I told them all Radio Active Radios! You guy's really deliver on what you promise. I have never had a radio this cool. I didn't want to be the loudest or biggest radio around but I was tired of getting walked on and ignored. That doesn't happen any more thanks to you! I swear I had to be careful not to talk to much 'cause I was making some other drivers mad. But, I have to admit though there is something so cool about some crybaby saying he can't hear anything but that "BIG RADIO" he was talkin' about me! I love it! I promise I won't abuse the airways. But I am having fun and hell it's not that big of a radio anyway but it's big enough for me. (For now) ;~) maybe I'll put a "Dave Made" with the Gen Lee. Hmm. Should I lock down the air for miles of interstate around me? Nah. Not yet.

Customer for life,
"Buckshot" AKA Rob
Mansfield, TX

Purchased a General Washington (aka General Lee) superwackpacked. WOW!!!!
My first buddy that I talked to remark was - quote: " I haven't had my
cherry popped like that in a long time " Now thats what I call a radio.
Thank you! Nothing but loud and proud!!
Thanks!
Ron aka "Reaper"

Recently purchased a connex 4600 turbo superwackpack this radio receives
better than any radio I have ever owned, and talk this is unreal. got it
wired the way you told me to and now it really does the job, couldn't be
happier. Will never buy a radio from anyone else. When people ask me who to
get a radio from it will always be radioactive radios. THANKS a lot
Tom-MOUNTAIN MAN DENVER, CO.

My new Galaxy 99V arrived last night by USPS, and after reading all the
literature, I couldn't wait to install in my big truck.Well, I hooked it up
this morning, did the usual connectivity, grounding, and SWR checks (1.1:1),
and fired that bad boy up. In just talking to another trucker beside me, a
reply came on the air from about 10 miles away, asking "where's that Big
Radio ?". And I've been hearing it all day long, all day strong. Excellent
Transmit, and Receive! The "Super Whack Pack" was worth every penny. My only
dealer for Radio Equipment is going to be RADIOACTIVE RADIOS, from now on!
Thanks guys...you really 'are' Super Techs!!!
JohnnyZee

Michael,

What can I say? WOW! This Galaxy 99V rocks! I asked for audio checks,
not radio checks and everyone who came back replied loud and crisp and
clean. I love this thing. I can tell others get really jealous when they
hear it. AWESOME!!! Thanks

Wesley(sorrydogg)

RadioActiveRadios,

I've been on the air for over 24 years. I had called around for about 4
months to everyone I could think of about buying this RCI 2995DX base
station. I nearly did not buy it from you. One of my friends bought a 2995DX
from (*sensored*) on the internet. The places price was maybe $200 less. I
did not buy mine from them only cause cash was a issue at the time, and I
could not afford it. Let me tell you I'm glad I could not of afford it. He's
2995dx sounds weak, and he's ticked off. The place wont help him now. every
time he keys up with the thing, I now know why it was cheaper. I'm on a
fixed income, and appreciate not getting ripped off. Yup it cost me a arm
and a leg, but its well worth it. My 2995 is great, I've made contact to
over 7 states the first day skip rolled in. Alls I get it "loud/proud"
"sounding good" "top shelf", and it means a ton. Every guy I know you have
treated right, that's hard to find nowadays.

Customer for life,

Alan

Well finally have my new radio hooked up and properly tuned with a great antenna. Of course its the Wilson 1000, and you guys have done a wonderful job on this radio, it outperforms most of my friends radios. I just want to thank you for such honest information and such wonderful equipment. your right though, other techs don't know what they are talking about and by the way, can't get over how good my receive is and how quiet it is also. i will be shopping again for more equipment.

Thanks, Don

Mike,
I bought a SWP General Lee from you and man it is BAD! Very impressed with the work and more importantly, your customer service, all TOP SHELF! After showing off the radio to my father who's been into radio's for better than 30 years, he bought one too!(the next week) He said he'd heard a radio talk that good! You've got to customers for LIFE Short Fuse, round the Chesapeake Bay!!

Mike,
What can I say. The only word that comes to mind is amazing. You hooked me up with a Connex 4600 Turbo setup for 205watts and a 636L mic and I tell you this thing TALKS! Ive never gotten feedback on ANY radio I have owned like this one. I mean I could be parked beside the guy giving a radio check with those other radios and dont think I would get the same feedback. Spent the better part of a day installing this thing the correct way. Heavy gauge wires the entire nine yards to make sure it was done correct the first time. Keyed the mic for the first time for a radio check and got "Loud and proud driver, It took me a minute to come back to ya because you knocked me to my passenger side".!!!!!!!!!!Sence the I dont even know where to start with the comments.. ie. "Walking the dog and kicking the cat, what is that thing" "That thing is a keeper" "You have me needle so far in the red I think its gona snap" "I didnt know my base was getting out that far".. well I hear ya hows this mobile sound? "holy **** you in a mobile?" -that guy was on a base about 40 miles away, the way the bird flys. I could go on but I think you get the point. I cant wait to order my RCI 2980WX and I-10K for my base from you. I know that thing will blow some serious smoke.

Thanks
NC

Man, you've hooked me up real good. The Superstar 36 dual final radio is the best cot'n pickin' radio that I've ever owned. Reason being is that, I've been jacked so many time with fakeass doctors from the mini-grass (which I'm originally from) and they say that this radio will do this and that and upon arrival?, my radio sound likes a piece of junk. Now, that is after they received the radio and they do their doctorine 'wannabee' on my radio. -
Mike, from the deepest from my heart you've hooked me up with a barefooted radio with your "superwhacked" packed and super modulation on this radio; it makes "ModSquad" look silly. This radio just stomps on the air. Mudducks

here in Idaho thinks that I'm running more than just this radio but, when I key down. I only use the barefooted mode when just modulating. BUT, when it comes down to laying it down?, damn, you should see how many ducks I put to "quack"!! Thank you so much, Mike... I will definately buy from "Radioactive" again and again.

Thank you so much & God Bless!
309 in the cle'ah!

Michael......

I read the testimonials page on your site. Honestly I was still a little skeptical of buying my RCI 2995 from you guys. However after talking to you guys, answering all the questions I had over the course of many days.......I bought what was either going to be the biggest rip off RCI 2995 base or the baddest base station this side of the nation. This I can say this RCI 2995DX base station was worth every stinking penny I spent. Ill be paying my credit card company for a long time, but let me tell you one thing, I'd buy another in a second, and recommend any of my friends to do the same. All my buddies base stations around here don't even come close. I can say is your a man that delievered his word, and thats rare these days. I called one of your competitors that slammed you, called you a hack, and were alot cheaper. Now I know why-- if they could tune a radio like this bad boy, their phones would be ringing off the hook too!! Good tech skill is worth good money, and being a mechanic for 25 years, I can tell you alot of guys want cheap, and get what they pay for. Thanks man, Ill be calling for my dads radio really soon.

Lil Reb- Joey Silva

Thank You Mike, I got my galaxy 2547 this afternoon. I was working on a deck and did not get to fire it up until later this evening, WOW....SWP and all. With a astro plane up in the air 30' and bare footing, I talked to several units in N. Cal from my place in S/W Colorado, so the rocky mountain oyster is on the air and the needle was swinging like you said it would. Get some mad money together and I'll be back for a mobile to go with with the new base. Mr. radioactive, you and your crew are great.

One question, can I use a D-104, with a t-ug8 stand with the radio and if so what would be the wiring sequence? I'll just get in line and tell all that ask, "it's a RadioActive Radio".

Thanks again, Lynn F

Just wanted so say "THANKYOU'. The Connex 4600, superwack pak is awesome, have since sold my Ranger 6900 F150, not a bad radio but not even close to this one. I will never do buisness with anyone else.

Thanks again--W>B in Denver, CO

RadioActive, Man I purchsed that Astatic mic you told me about to go along with the General Lee Radio. Man am I pleased, It's AWESOME, everyone at work is telling me how I'm talking all over them. They are all impressed as well

:).. This Radio with the superwack pack Just Ownz!!!!
Thanx, Lee A.

Hi my name is bill (AKA DOC HOLIDAY) Austin Tx.
This radio just about leaves me in awe. Man this thing has unbeliveable audio. I run this radio in my '03 Silverado p/u, using a dbl coil 10k predator. Man it's overwhelming. Just awesome. When I back the unit down to 3-5 watts & CLICK. On comes my amp damn it's hell on wheel's. Local and in skipland. Everyone asks what kind of radio I'm using. Nothing but the best comments on the way it performs.(with the amp &with out the amp. I've never been so satisfied with any radio until I dealt with you guys. I'll alway's recommend you, Radio active. Your tects are the best I have ever encountered since 1973. (when I got into CB.) Just keep on doing what YOU DO BEST.
Doc Holiday, Austin,TX

Hi, my name is Charles.
I just bought your Connex 4600 Turbo,with the Super Wackpack with the Super Receive and the Predator 10K Antenna, about a mouth ago,what a package!!!! I have never had so much FUN in my life with other radios,as I am now, Thank you very much in setting me in the right path in chooseing my equipment.

Also a good friend of my sold me a brand new Galaxy DX-959 40 channel AM/SSB mobile CB radio never out of the box for half the price,and I was wondering how much would it cost to soup this radio up or can you.
Thank You.

I bought a 66 with a wackpack and a 99 without a wackpack, well I only use the Galaxy 66 with the SUPERWACKPACK now. I didn't think I wanted to Wack the 99. Anyway I was WRONG! The 99 just sits on the shelf until I want to talk ssb. I want to get the SUPERWACKPACK done to the Galaxy 99 now as I should have when I bought it.

Can I send back the radio to have this done? I will supply you with my card number for the charges and return shipping. I understand you are a very busy shop, but you guys are the best and wouldn't send my "BIG BOY" anywhere else!
Thanks, Moogie

WOW!! Unbelievable!! ..... I had a General Lee 3 years ago, and it performed great, but it got stolen by some low life that can't afford his own radio. ..... I bought another one from you guys, had it SuperWhackPacked, and WOW!! it out performs EVERY radio on the highway. Drivers call me a "Liar" they say I must have a "Kicker" I tell them "No" but just wait till I DO get one lol ....

Thanx a Million guys, you've got one happy customer.

High Voltage

Mr.RadioActive,
I got my RCI 2980WX base station in on 6-1-06 from you guys. Before that I had a 2980WX I bought from another dealer, I had sent it back to that dealer

3 times, all times they told me the radio worked perfect. I was shocked when you didn't suck A#% and tell me what I wanted to hear.

You told me sometimes radios work on the bench. Damn man your honest, defending another shop! Anyway the base I had sucked and I got burned I sold the crappy thing losing $200 no matter what they screwed me. Their tech service bites. You guys told me you wouldn't say anything bad about them because it's against your rules to speak badly of someone else. That's freaking INTEGRITY.

Anyway again I called you and didn't want to pay $690 for your radio. I thought it was nuts. But something told me to do it. You answered my questions, and put up with me for 2 hours on the phone. Anyway to make a long story short, this base KICKS A$#. It's nuts how far I'm hearing, and talking the money was SO WORTH IT. This radio has the biggest ears I've ever had. I'm hearing maybe 2x greater then I did before with the same Imax 2000 antenna. I've been hearing people telling me I used to hit them with a 3 or 4 now its 6 or 7 on their radio you can't lie about that! That's with the SAME TYPE OF RADIO! No radio I ever had talked so far, and heard so well. Guys your top of the line, when you get screwed as much as I have you get a little bitter, but I may not be a technical expert but you guys are now my techs.

Thx again,
Bob M.

I just wanted to say thanks Mike , for fixing my Galaxy 99V.I have gotten alot of compliments on the radio , Sounds Great.

Thanks again,
Mike.Noel from San Antonio,Tx.

P.S. I'll never use a CB shop again.

Pred 10K mobile antenna, and my dx99 Galaxy radioactive style, Radio Active 450 doing the job for sure, with 636L kicking.

Thanks, Tommy-
($ 105 shipped to the door!)

Got three radios from you guys (1)Stryker 440 just got, (1) General Lee, with DAVEMADE 2x4 best setup I own (1) 2950dx my ssb radio. Alls I can say is I'll be back for more soon. The super wacked packed whatchamacallit radios scream. Mudduck sqwishing for sure!
SuperMan 244- round I-5 reading the mail

Thank you very much for going out of your way to get my radios fixed right. You don't know how happy I am. As you know I had a General Lee "superwackpacked" by on 5/26/06. I had bought the radio from you, installed it and got nothing but compliments. However after passing a "cb shop" the owner told me to take the radio inside, he could "improve" it. He put you guys down and called your work a "hack" and told me he knew all about you. I was a fool and fell for it, paid $50 so he could remove the work, and do his

wonders on it. The moment his "tech" put the radio back in the truck, I noticed people told me my audio as low, and muffled. The shop told me to drive down the road and test it with them on the air. They said I sounded great, which I found out was a total lie. The shop ruined my radio. Everyone told me I sounded horrible. The other drivers for my company said, I sounded like a was talking on junk. This is when I called your company. I could not believe that you were willing to fix it....the total bill came out to nothing! You guys charged me nothing to rework the entire radio, and you got it back out to me in 3 days, and even paid for shipping. The radios talking GREAT now, and Im very, very impressed. In todays day and age many people will try to ruin a good reputation, slam the other guy, and boost up themself, but what really matters is how the radio talks when you key up the mic, and your radios are the best. Please feel free to share this on your site. If people need to contact me please allow them to.

Ricky Montseniour
Coast to Coast

Guys, Rec'd the 2980dx "super wackpacked, with super receive, and power supply upgrades". I was kinda skeptical of the price you had on the radio. It was higher then the other guys. However your sales staff really answered all my questions the many times I called. The mods done to this radio are sincerely the best that I've ever seen. Being in electronics myself for over 45 years (out of it now due to poor eye sight), I can say you guys are on top of the technical bench work. The audio is very clean, and loud. I've talked to locals over 90 miles (if you can call that local), and DX all over including AU, NZ, and others on a omni.

I've owned many radios over the years, and have built a few and blown up a few as well trying, I really wanted to say thank-you. The other base stations in town have no where near the same results, plan on hearing from a few of them.

Thank you very much,
Chuck, NH

The radio works great and I have had some awesome responses for my trucker buddies.
Thanks,
Geoff
PS Thanks for the tip of turning off my talk back.

Mike-dropping the freaking hammer on the 95T2 dude! Killer audio, I can't believe how much better this radio is then my hacked-up cb shop one was. You got a customer forever! Keep up the killer work..... I'll be getting that 1600 next.
HardHat-227 c-u 10-7 AKA Bill

Guys, First off I wanted to say you ROCK!
My new 95T2 is the best sounding radio on the big road. Alls I get is "what the heck you running?" I used to use one of the other places I found surfing. Cant believe I paid money for their so called tune. Radio squealed

nonstop, and alls I got was audio sounds muffled. Dumb me fell for it 2 times. When I called and told them, idiot me bought another radio from them, and got ripped twice.

Dudes thanks for being honest and answering my questions.
See you guys in NC next year.
Jimmy, Big Horn

I bought a connex 4600 turbo from you guys and get the best compliments on the radio! You guys did a really good job on it.

Hey Mike, I just recently purchased a s/w/p General Lee from you and that thing blows some serious smoke, I've got nothing but compliments on the radio, it's the loudest, cleanest radio I've ever heard, I was running it barefoot for a couple of days, but I just got my old tx800 hooked up today and that thing is kickin some serious butt. I'll probabally be looking to get one of those Davemades pretty soon though, that old tx has just about had it, anyway just wanted to say thanks for the great service and a great radio, you've got a new customer for life.

Thanks again
Kyle "rooster" Baton Rouge,La.

Just wanted to let you know I'm elated with the radio.
Thanks again
Mike

I recently received my superwhackpack, super receive Connex 3300 H/P and this radio rocks. It sounds great with my Texas Star 500 matched to it. No more CB shops for me. My radio pals don't even know me now!!! Thanks for a killer radio.
Gerald in Arkansas.

What happens when two big RadioActive Radios meet?
We've all heard the "little" radios, and the loud radios that sound bad, and a few of us have heard the big, loud, radios that also sound good. Two customers of RadioActive Electronics who both recently purchased SuperWackPacked General Lee Radios, recently met. Of course they tried the radios out.

The meeting went like this:
BigGuns: Today I met the "Working Cowboy" in person, and during this meeting I experienced the real power of a SuperWackPacked General Lee radio from RadioActive Radios. The "Working Cowboy's" barefoot SuperWackPacked General Lee was so loud, I had to turn the volume on my radio down because he was hurting my ears. I also got to really hear what my SuperWackPacked General Lee sounded like, and all I've got to say is Mr. RadioActive YOU ARE THE MAN! My past experiences with bad CB shops had me skeptical, but now, I AM A VERY HAPPY CAMPER, THANKS FOR EVERYTHING!

And now that the DaveMade 2 by 4 has arrived I believe I am about to be the happiest guy in Virginia!

Thad (SmallTruckBigRadio)

MICHAEL, I recived my connex 4600 turbo in the mail on 4-20-06, hooked it up & could not belive how great it sounded. IT KICKS ASS!!!!!! LOUD AND PROUD. I have no idea who worked on my radio BUT he or she knows there s%$#!!!

THANKS GEORGE R. P.C.B. FL 32408

All I can say is AWESOME!!!! Thank you for your EXCELLENT customer service. The radio sounds better than expected! I also wanted to thank you again for getting it back to me so soon. Wow less than a week, can't ask for anything better! You will definitely get many recommendations from me. RADIOACTIVERADIOS ROCKS!!!!

Mark
St. Louis Mo. 63116

Hi! I just recently purchased a General Lee with Superwhackpack and Super Receive, and you guys rock! From all account of the people I have talked to, this radio is "bangin'".

Would I buy from you again? Yes! Your knowledge and customer service are great, and you helped me select the right radio for me. I have already recommended you to a few friends, and one of the has already bought another radio from you. Keep up the good work!

Sincerely,
Ret in Reno, NV.

A good friend of mine bought a General Lee from you not long ago I love it
got to get one...
it is super..
the loudest most bad to the bone radio I ever heard,,
he completly shut me down,,
I believe what you said about cb shops,,
we have a few in tulsa but I dont trust them,,
keep up the great work,,
from Rooster,,
Tulsa, Okla

Mr. RadioActive
I JUST GOT A S/W/P Galaxy 99 DONE UP FROM MIKE! THAT THING ROCK'S! I LOVE WHAT THIS THING CAN DO. IT IS A GOOD CLEAN SOUNDING RADIO. THE MUDDUCKS RUN AT THE SOUND OF THAT S/W/P Galaxy 99 JUST BEING TURNED ON.

Thanks,
THUMPER
CHICO,CA

Mr. RadioActive
One word, Awesome!. Thats the best way to describe my SuperWackPacked Galaxy DX66V from RadioActive Radios. Before I had the SuperWackPack done to my radio, it worked OK but was ordinary at best. I'm always getting compliments on how loud my 66V is now. This never happened before with the peak and tune(hack job) performed by the local Golden Screwdriver. Now my radio

rocks! The audio is louder and my average talking watts have almost doubled. One word.....Awesome!

Mississippifrog (sent us his used 66V and Boomer Amp)

Thank you for ending my expensive search "for a little bit more, and a little bit better" in a radio. Usually, a new toy loses its "newness" after a few weeks.
With this SuperWackPacked General Lee, I get very regular reminders that my search for a top shelf radio is over. Never in my wildest dreams, was I expecting consistent compliments from base stations, while using a mobile. And, when I'm not getting compliments, I can hear the sound of respect, and sometimes jealously of finally being the "BIG RADIO" on the air.

GatorBait,
Louisville, KY

"Got the radio installed yesterday. Found a channel with folks talking on it. At a break, I keyed up for a radio check. Loud and clear came back from N. Carolina!"

Thanks much!! (superwackpacked connex 4600 turbo)

"Before the SuperWackPacked General Lee, I would ask for radio checks with doubt, Now I ask for radio checks to show off! Strangers speak to me differently on the General Lee. I have been called a CB shop 3 times now. Sounds like a base! Comments like "That radio sounds top shelf" "Walking the dog" "Sounds smooth as silk" etc. are all indicators that your radio is SuperWackPacked! "

AWWWWWWWW......poor marqueer!
guess that multiple choice give away extra is just another example of
marqueer being a victim of the mean old amateur radio community.

maybe the test should be further dumbed down so that even the most simple
minded (such as marqueer) can play radio with the big boys! or does marqueer
really want to play with the big boys on the radio?

Hi ,
i have a problem with a president jackson cb ,
in tx there is about 100hz noise (i tx with car battery no PSU),
the noise there is even if carrier is unmodulted (fm and am mode)....
Can someone halp me ?
Schemtics are aviable and i can use an oscilloscope.........

Wow. That kind of obsession is definitely not healthy. You need a hobby that
occupies more of your time.

Sounds like audio oscillation. What mic are you using? What happens if
you key the transmitter with no mic? Problem still there?

I can't figure out what's wrong with my Cobra 29 WX/NW/ST. I moved it from one of our trucks to another....installed the same way as before, and get no sound from the speaker on CB channels. The weather band sounds just fine though. Went to RadioSmack and bought a new antenna and cable.....still no dice. Took mic apart, no wires broken, and clean inside. What the heck could be wrong??

LOL! We have told you a thouseand times, AKC'ers are heterosexual. You
are too dumb to get it.
As for coming to Toledo, or anywhere for that matter...you can flip
your wrist about it all you want...it is a free country. Just bear in

mind that no matter where you go AKC'ers are heterosexual and your fantasies of gayness will never be actualized.
By the way, congratulations on being able to read the QRZ database. That way you will always know where the men of your queerboy fantasies are at.
Better hurry up to the Petro before your boyfriend chukkeesukkee gets dibs on your stall.

Again now...repeat after me...AKC'ers are heterosexual.

i put an612 pin to ground ......so mic is cutted out .....or carrier
oscillator or power control loop from tx power transistors.......

I can program my Icom to listen to the Yankees on the AM broadcast band. Is that illegal? No.

Hey Shark, howz it been going? Anyway, the consensus is that Eric is indeed
an idiot and has proven himself so time and time again. You are correct.
buzz corey is also an idiot. Neither is worth getting worked up over.

Take care and have a great Easter weekend out West!

Ignore Brian (Telspam) -- he'll tell you that your ground plane needs
to be nine square feet.

Refer to your schematic and use your scope to trace the oscillation
backwards through the audio chain starting at the audio power amp.
You'll find the problem stage eventually. Don't forget to carefully
inspect the board for bad solder joints and loose pads.

The mic would be my first suspect, too..... did you check the switch?
It may just have a bad contact. Also check the squelch. If the mic is
good (and all your front panel switches are correct) then there's
something wrong inside. As far as repairing it yourself, that depends
on your electronics skills.

I would check the weather/cb switch...
P.S. Make sure you haven't inadvertantly moved a front panel switch
into the public address (PA) function.

listening is irrelevant when the radio as a whole is no longer in type
acceptance. that was the point. you missed it and instead attempted this
stupid little strawman... next.....

>
>>>
>>>> RULE 7 (47 CFS 95.407) - Operating Channels/Frequencies Your CB station

>
> WTF are you saying????? My FT101 with an 11 meter mod is illegal????
very much so. under the rules currently in place, its very illegal. AND,
they do not make any allowance anymore for a "grandfather clause". as far
as the FCC is concerned, if you are operating that radio and they catch
you, its a fine + confiscation. also, the ft-101 series came out AFTER the
11 meter service was established, thus, that radio has no
legal "grandfather status". sorry OM, you are S.O.L. next.....

>>> Sure is, you can't seem to comprehend what he said.
>> I comprehend exactly what he said, but it seems that you've missed the

>
> See above, your logic goes for my FT101, with the legal modify option
> for 11 meters, but of course all you keep spouting is that it is illegal
> to have.
really? and when was this radio available? and when was that modification
EVER legal in the united states? it wasn't. ask your local FCC office man.
one last point... the ft-101 had an 11 meter mod, and that was marketed in
places where 11 meters was still considered a HAM BAND (like canada). it
was never officially marketed or intended for use within the United
States..
here is an excerpt from a "brief history of the yeasu 101 series radios":
"The FT-101 radios covered 160 (at first 80) through 10 meters, including
WWV at 10Mhz and had the 11 meter (27.0-27.5Mhz) band shipped enabled for
transmit (CBer's loved this!!) at first as the band still had Amateur Radio
use by a number of countries overseas. Later during the FT-101B and earl
FT-101E series the 11 meter selection was configured for receive only. In
later FT-101E series versions the 11m crystal was removed altogether and
the markings on the band switch was changed to AUX."

note the words "still had amateur radio use by a number of countries
overseas".

its pretty clear to me that the "11 meter" option was never intended for use
in the USA. in fact, later versions of that radio removed that option

entirely.

> makes it illegal for you to have.
actually, you are wrong. my license does allow me to operate that radio (in
accordance with part 97 as amended on 22 February 2007) on the technician
portion of the 10 meter band (28.3 -28.5 Mhz), therefore, your logic is a
fallicy.

fyi, in a written statement some 8 years ago, the fcc deemed "possession of
proscribe equipment is sufficient to prove guilt".
>
>>
>> This is why I say you are wrong. there in *nothing* you can say to prove
>> otherwise. you don't own one,
>

wrong. my license does not preclude the use of the HTX-100 on 28.3 - 28.5
Mhz. again, you have opened your mouth and inserted foot.
>
>> you haven't done the applicable research and
>
> Sure I have Eric, but you on the other hand will keep this going until

you still haven't answered to the charge. I guess your only tactic here is
misdirection. what research have you done man? have you acquired technical
advice from licensed technicians (general class radio telephone commercial
operators licensees)? any engineers in radio? anything qualifying as
bonified research?

>
>> you are blowing your stack and trying all available avenues of attack on

ah yeah. name calling. thats usually the first step toward the last refuge
of the incompetent (violence).
>
>> and comprehension.
>
> Again, you don't seem to be able to, so that too is true.
your failure to understand does not cannot a failure of comprehension on my
part. it simply means that you have lost sight of the point.

a little history here.... you have been blowing your ill wind of heat and
discontent through this (and others) newgroup for a better part of the last
decade. you have, on numerous occasions, denigrated, insulted or character
assassinated your opposition. your weapons of choice are generally
the "straw man argument" and hyperbole. you have on numerous occasions
failed to demonstrate more than a basic understanding of the politics
involved or the actual issues involved in the subject you spout off on.
list latest little "spat" is a singular case in point. you accuse but have
no basis in fact to back up your accusations. when faced with that fact,
you spin, misconstrue or simply ignore that "inconvenient truth".

I see no further point in this discussion. you are wrong. you have been
wrong and you will continue to be wrong. attacking my character, quoting
out of context or even fabricating quotes attributed to me will only serve
one purpose; to inflate your self importance among your so-called friends
on here.

you shout ever louder when you are wrong (thats a failing in the species I
hope you know).

as far as I am concerned, this discussion is closed. the htx-100 radio as
initially described in this thread was modified for operation on bands
other than 'type accepted'. regardless of whether or not it was
for "monitoring purposes" or not is immaterial. the modified radio is, by
definition of the FCC rules, unauthorized for use, period. the regulations
are painfully clear.

is the radio (as modified) authorized for use on 11 meters: NO
is the radio (as modified) type accepted for its original band or 11 meters:
NO
therefor, that radio is not legal for use on 11 meters. aso for its
operation on 10 meters, that is still up to the FCC regulations as per its
use on the 10 meter band.

OK... you have pin2 grounded for no input signal. Now use your scope
and trace backward from the RF output collector... moving back through
the audio chain... noting the origin of the 100Hz oscillation.
Normally those radios have only a single transistor buffer for the
mic... followed by a high power op amp (usually mounted to chassis
wrapper) for the audio. Your signal tracing should take long at all.
Hope that helps.

©anadian Ponder thought he got an extra special wife or a bonus when he got his new wife into the sack and got her bloomers down and happened to find a dick.....He imediatley called his best buddy Derek Broughton and told him his wife has a dick.....to which Derek Broughton replied. Really so does mine. So tell us there ©anadian Ponder, are you a cock sucker like Derek or just a cock licker?

2343. Eric says it is ilegal to own 10 meter radio was FS: Enhanced HTX-100 10 Meter Transceiver

Newsgroup: rec.radio.cb
Date: 2007-04-06 14:10:16 UTC
From: Landshark <S3Buell@SBCGlobal.net>

"N7ZZT - Eric Oyen" <n7zzt@127.0.0.1> wrote in message
news:1216227.VN9imGS08s@www.usenetzone.com...

All of Eric's nonsense deleted:

Well, he's had a 10 meter radio for years, knows ALL about it,
but only as of 1.5 months ago was he legally able to "Transmit"
on it. Someone else post about a radio that is legal for a Ham to own,
use in his license ability and otherwise listen to any freqs that are
"legal to listen" too, he spouts about legalities..... End of story
Eric.
You say I was calling you names, LMAO!! If just calling you an idiot
when you are acting like one, well truth must hurt. You then talked about
"History" of this group (claiming I do this on multiple other groups too),
about character attacks, harassment, the next step for me would be
violence etc etc etc and the best for last misdirection.....OMG,
talk about misdirection.
He spouts that just mere possession makes it illegal, again read it carefully
Eric, possession along with other evidence. You do the research Eric, it
has been mentioned a ton of times what class my license was, not only
by me but Geo, Doug, Mark Fuller etc etc They did the research then,
YOU do the leg work now.
You can try to make yourself look good all day, but the fact remains (by
the other responses) you are the one on Rec.Radio.CB that gets laughed at.

Remember Eric, you can't give a "Smokey" report on the cb, that would be
deemed as interference in a law enforcement officer duties, you would get
arrested (more great words of legalities by Eric).

ROTFLMFAO!!!!

All of my front panel switches are set correctly. I even readjusted my SWR/CAL. When I switch to CB, the speaker makes a small pop noise, and when I key on the mic, my needle swings all the way to right, but cant get a sound from speaker. If I switch to WEATHER, it takes about 2-3 seconds longer than usual, but the weather slowly comes on. I've replaced everything except for the radio so far..... still confused.

Can you verify that your transmitter is operating (RF output)... and
that you have modulation on that output signal when talking into the
mic?

Sorry, I do not know enough about electronics to answer those
questions....however, I CAN tell you that when I key in on CH 19, and
ask for a radio check, someone must hear me, because my needle swings
over pretty far after a few seconds. I get sound from an external
speaker plugged into PA spker, and EXT spker for weather band, just
not CB.

well the cowardly nature of the attack bloger has truely gone the deep
end

http://markcmorganusenetmoron.blogspot.com/

is his sight it seems dlooyd and his cyber buddies are so afraid of me
they are not even allowing coments on their latest attack blog full of
nothing but lies and libel it does seem that they can do nothing
without comiting libel

I love the line about my being a drug and achol abuser it is a real belly laugh there

his rediculous accusation I am Neo Nazi and a child molestor as more distrubing we will see if Blooger is a spineless as they normaly seem to be well we will see

Posted by mark at 11:12 PM 0 comments

more efforts to tie me to spamblogs

http://usenetkook.blogspot.com/
currently get you back here (what it will within a few minutes who knows)

it is reported an number of other such siies are being created

fre free to report them to google and if you are feeling kind leave a coment to me here at this blog and I will do what I can

http://markcmorganusenetmoron.blogspot.com/ another run of the mill attack blog

Posted by mark at 1:46 PM 0 comments

Monday, April 02, 2007
the Ham fest

well just got back was hoping to be able to report that I was kb9rqz/ae but alas I fell one question short on that score oh weel I will have to try a different since i am wander lost in vaqely familiar math in an amateur context that makes little sense form the Physics point of

OTOH I can report that my wife is now KD8CTL/ag a feat I thought possible but not quite probable. I am gald she made it she had woking for sometime on this question pool without feeling she was geting anywhere

on other scores My father in law came to hamfest spent some time whele we were testing on air and made a few contacts as a thrid party op, and left with a Tech class manual we will see what developes from that.

I had a chat with Mr Jim Hyaine of of the ARRL at behest of someone else (not sure how it worked out) we had a frank discussion of thigng in My area the hobby/service in general, and my feelings and ipression of the ARRL. Deny the man what I must I must also grant him that unlike many folks on say RRAP he adknowledge that MY opions and impression are valid without my having to explain them to others, and he was quite attnetive to my responses to his question

Posted by mark at 5:34 PM 0 comments

My My how the attention swirls just becuase I go to a hamfest

I'll more about the AES Superfest later I hope but for now I am alive well and STILL with hughesnet

the lastest in out right cyber attack by Dloyd

http://www.markmorgansucks.blogspot.com/ if you clicked on that blog you were here By an anonmous entiyt calling himself "Dloyd Lavies" if you click on that link now you will unless he changes thing yet agina find yourself back here in short order

I assume based on his passion for cyber games and his allowed insitance in forcing to never ever coment on USENET post with his premission again he may be creatigng a number of these blogs in future, if indeed he has not done so already, I presume in an effort to have My blog removed by google as a possible spam blog or something along those lines

update Dloyd changes the nature of his attack mosr foten then most change their sock stay tune to this for further repoting on Dloyd the cyber madman and terrorist, terroist being the prefect word since his avwed aim (at least avowed aim at time he changes his stated postisnion so so often) is to cause teror and to imtiadate tme into meeting his ever changing set of demands

Posted by mark at 10:44 PM 0 comments

I wish Dloyd would make upo his mind

I wish Dloyd would make up his mind. one day he is demanidng I cease and deist all posting the next he is inviteing me to continue inflicting inflicting on him an experence he considers as bad as being falsely accused of analy raping my old man and my old having to endure question on such a topic

Posted by mark at 6:51 PM 2 comments

is Dloyd a chil or just acting like one

he insist or demands or whatver word you like I prefrom actions heagree are impossible
he claims the right to harm in the offline world if I do not managethese things he conceeds are aimpossible
he post statement atht can be read as claiming when OTHER takes offline such he he apears to have it is likely criminal
he claims to be expempt for any harm himself if performs acts againstme he agress are imposible and likely ilegal
he claim that he may in effect yell "fire" in a crowded room when nofire is present
he claims he has no responibility for the result of HIS action andthat I am repsoinble for mine
God I must say the man does lok more and more like robeson by the post meanwhile I have evidence of his possible involvment in a

securitybreahs against ME, at a sitie where the stolen data resided
the listhe published the unlisted unpublished phone that was
compromised, andthe credit cards that were compromised all at about
the same time
he claims protection in making flase claim about the authorship of
ofEmail he received (alleges to have receieve in all afirness)
butbecause he "not a forensic IT" guy he is free of respobility, bu
thatI must have these skills before I assume that what apears to be
truemight be true
meanwhile I am left with cleaning up the mess and paying the
expensesinvoled in dealing with these matters

is Dloyd pissed I have not changed my sig line on my terranews posting

http://kb9rqz.blogspot.com
stealing data from my wifes accounts is unaccaptable
Dloyd Lavies renagade cyber theif and terroist
it goes out everytime I post on terranews at this it will continue
until I chose to stop or the cyber terroist calling himself "Dloyd
Lavies" is caught, or I choose to rewrite it bassed on further thought

Dloyd likes to claim that seeking the id of my attacker is somehow
stalking hm

he is of course free to pursue that legal theory with LE if he likes
but I dount he has the guts to talk to LE anywhere

Posted by mark at 9:02 PM 0 comments

Labels: dloyd lavies

Dloyd latest two faced shit

Mark is once again continuing with his tirade of stalking and
actuallybelieves that I would waste my time suing him. I've said
multipletimes that he is not worth suing because he doesn't have
anything ofvalue. He is a pauper at best. I would be better off
litigatingagainst a homeless person, at least they can pan handle and
obtainsome kind of income. Nevertheless, we see how Mark is a man of
hiswords, he tells me to take down my blog (which I did, but not
becausehe said) and to not post about him, which I didn't, yet here he
is, asusual he proves.....well you know.
And since he started this for today, I had to laugh when I saw one
ofhis posts begging everyone to come over on his boring blog and
postsome comments, he sounds like Lloyd. He is so needy isn't he. He
wasso needy for attention he even sent me an email to my gmail
account.What a joke.
Dloyd.

in light of this statement on you blog

(you blog goes up and down like a Yo Yo Dloyd)

In consideration of the recent situation on RRAM and RRAP, and threats of death and blackmail received by me. I was advised to archive my two blogs pending possible further litigation and approval of protectionary "John Doe" status before proceeding in this matter. So at this time I have suspended my blogs until further notice

I have stated I will remainVilgilant anagist Dloyd unwisely deciding to continue his campiagn of teror against me and mine

I am I aawiait the unlike event that Dloyd is truly seeking somekind of John doe stautas

he is presently John Doe and thus can't be the the recepinat of an actionable threat

Indeed I can no more in legal terms threaten him to kill him at this point than I can threaten to kill Capt Kirk of the Enterprise

Posted by mark at 8:41 PM 0 comments

well the "sweat lord is making a feeble repost

http://www.dloydlaviessweatlord.blogspot.com/

of course I never sent any such email to Dloyd indeed I have never sent any email

I guess he is infact too stupid to stop his stlaking just give thes cops more data to work with

Posted by mark at 7:43 PM 0 comments

dloyd backs down? or is taken down?

hard to say but his attack blog are 404s right
http://worldofdloyd.blogspot.com
http://www.dloydlaviessweatlord.blogspot.com/
http://markmorgansucks.blogspot.com/

all show down as of right now if reader should discover a change in the status of these blogs I would welcome conact at this blog or by what ever means you felt most comforatble with

Like the GW Bush and WH et al on the Iraqi troop surge I am hesant to claim sucess, but I do report that all the signs are looking postive.

as always I stand vigilant and prepared to respond massively against any cyber attacker. I belive in the policy of Massive Response

Posted by mark at 11:39 AM 0 comments

a blog entry that Dloyd seems to have forgetten he made

http://dloydlaviessweatlord.blogspot.com/2007/02/new-name-for-blog.html
"I decided to rename the blog. I read some posts concerning the past
actions of some in regard to Mark Morgan. Personally, my opinion is to
keep it on the net, period. Unless someone is breaking the law, there
really is no need to interfere with anyone beyond the net. Once you
cross that line and start interferring with people's personal lives,
it just takes the fun out of the whole thing. Furthermore, that type
of behavior is probably illegal, uncalled for, and IMO malicious. I
believe some have crossed the line. So I decided to refrain from
directly commenting about Mark Morgan, he gets enough grief already.
However, I will still monitor everybody's favorite wacky racist and
religious host, Lloyd Davies."

highlights added by me Dloyd clearly see the sort of behavoir he
enaged as criminal at least when other people enage in it

Posted by mark at 12:53 AM 2 comments

Dloyd allows his blog to used to attack me and claims he is not doing
so

http://markmorgansucks.blogspot.com/2007/03/welcome-to-new-blog-dedicated-to.html

Not Cocksucker Lloyd said...
Markie's confessional:

Mark gives his preference for tube steak in
http://nimbusters.com/forum/read.php?board=8&id=220259
"I am bi and I prefer a cock"

He admits to following another man, stalking him in
http://nimbusters.com/forum/read.php?board=8&id=222044
"sure I followed him"

Mark is as spineless as a clam in
http://nimbusters.com/forum/read.php?board=8&id=223484
"I am prefectly clam"

More family secrets:
http://nimbusters.com/forum/read.php?board=8&id=223519
"My brther is a homosexaul"

Mark admits getting raped by another man in the Army
http://nimbusters.com/forum/read.php?board=8&id=226032
"yes i did"

as can be seen Dloyd allows his blog to used to harras meon the web

Posted by mark at 12:40 AM 0 comments

Labels: Lavies Dloyd woger

Dloyd you have no cause to talk about harasment

http://markmorgansucks.blogspot.com/2007/03/mark-refueses-to-stop-his-harrassment.html
I'll be qoting from this blog post shortly but first just looks it

"markmorgan sucks" and he dares to speak of me harrasing him for objecting to his blog

his claims he did not invite or induce me to hsi blog he named after me

https://www2.blogger.com/comment.g?blogID=9419816293627392 01&postID=5605423273403347725
"and you are even welcome to post coment on my blog"

certainly looks an invation to me
he claims that he harrased when I sek to learn the real name behind the false front that has stolen data and spread it acorss the net about my wife

he think he steal and harrass people and recieve nothing in turn

his obejection to my RRAP posting is that I refuse to to not opose his effort to harrass me there

I post to USENET I have that right so does he, what does does not have the right to too is escalate the situtaion and demand I do nothing in response

Dloyd has decided he wants a war well so be it " it takes but one side to breed a war" JJR Tolkien "the return of the king vol 3 Lord of the Rings

another famous quote aas I can't recall whom "if this be treason make the most of it"

"who therefore thinks that you can kill (commit murder), without provication"

most people would think that stealing from someone and attack their wives would provacation also Dloyd has serious langauge issues he can't seem to grasp the difference betwen murder and self defense perhaps his aleged lawyer can explain this to him but I doubt it. I have and continue to wonder if this ain't Robeson he at least has most of the same ideas

"Once again I am demanding that you cease all harrassment of me and threats of death."

agin this shows the delusional nation of the Subject Dloyd he can't accept the notion I have the ame rights as himself since he chooses to attack me I will contiu e to seek out his real name and loctation only that way acan I access what legal options I have. He is obessed and confused over the meaning a statement It may be possible to kill withi n the law depending on the exact circumtstances. he also over looks that his renlentless attacks against that have taken a general escalating pattern might well allow to threaten deadly force even if I could not empoly it, additional he odismisses the fact to be ilgeal the threat has be something I can do. the FBI states that Robeson can make his death threats because it is not crediable that he would

travel from tn to here to effect the deed how much less credible is
the "threat" I will kill dloyd without knowing anything about his name
location or even with any certainy his gender I would be reduced to
traveling from to house asking are you Dloyd and being prepared to
shoot anybody that said yes (gee that sounds like something out Good
Morning Veitnam almost a Robbin Willaims line)

the root deiference betwen me and Dloyd

https://www2.blogger.com/comment.g?blogID=941981629362739201&postID=1...
>"I don't want to take any action against you. I've repeatedly told you what the problem
is, yet >you won't admit your problem of hijacking my threads and altering my topics. I
tried to leave you >alone, but you insisted on harrassing me and stalking me on the groups.
Now I just gave you a >very small, and I stress very small taste of what I have the ability
to accomplish. I advise you to >leave me alone and stop commenting on my posts. You want to
continue to act like an a-hole? >That is your option" I have never demanded that Dloyd
cease posting although I have sugested that deep sixing the dloyd moniker would be an
option
I have never dispurted the right of the person behind the dloyd nick
to post. I never will
what I dispute and what he threatens further action based on is his
demand I stop comenting on his posts or else.
that is the problem dloyd demands I submit to blackmail. he insists my
right to post is lessoer in some fashion to his own and he threatens
further criminal action against me and my wife if I don't submit to
such

Posted by mark at 8:15 PM 0 comments

posibly a dup but an example of dloyds work

http://markmorgansucks.blogspot.com/2007/03/mark-stop-threats.html
Monday, March 26, 2007

Mark stop the threats.
Mark Morgan, Amateur Radio Call Sign KB9RQZ, of Chassell, Michigan,
stop threatening me. I don't want you posting on my blog and implying
on the news groups that you are going to murder me. I demand that you
stop any and all harrassment in accordance with the cyber stalking
laws of Michigan, which prohibit such practice.The follow excerpts
from your posts clearly show that you want to kill me and is implying
the use of deadly force."stalk you I love have the chance""I will make
you pay for if I ever get the chance""I will seek to make [you]
suffer""feel I might even have the right to use deadly force""I will
take the braodest and most violent to your person""threat of death
promises of death""I want you dead without even knowing your name""I
can kill you out of hand">You were the one who brought up killing
someone.< "Indeed I did"Mark has clearly and repeatedly threatend my

life. I have demanded that he cease (Stop) his harrassment and death threats upon me in accordance with the anti-stalking laws of the state of Michigan.

more of the stalking of the morgans by Dloyd

http://markmorgansucks.blogspot.com/2007/03/morning-after.html

The Morning After.....
After Markie went nuts last night, and changed all the posting headers, I hope he is feeling better this morning. I also see that Markie promptly deleted his wedding registry, but it was too late for that, the truth came out anyway.However, I believe that it wasn't the posting of the wedding registry that set him off. I believe that it is because I may have discovered another one of Markie's family secrets, which I won't say here, but based upon a book that his wife earmarked, it certainlly explains why Mark would get upset if the truth came out. Not only did Markie delete the wedding registry, he also strangely deleted any reference to this book, which suggest that he was trying to conceal this information.The book is named, Rhapsody : To Touch the Face of the Goddess (Spiral-bound) by F.R.R Mallory aka Mistress Steel (Author). One book reviewer commented that, "I find Rhapsody an altogether different take on the usual Fem-Fem erotica being published today."Now why would Markie want to conceal that his wife had an interest in this book with a story line based upon female to female erotica, unless.....BTW Markie I know you are bound to read this. I didn't "hack" into anything, your wife put this information out there in the public domain. I think you need to go over to RRAM and RRAP, post an apology, and say that you were wrong and lied when you called me a thief. Furthermore, Gav, if your are reading this, maybe you can talk some sense into you wacky husband, tell him to leave other people alone, because if he had, none of this would have came to fruition.Dloyd

another open letter to the enity calling himself "Dloyd Lavies"

You have the abilty to effectively stop me from taking anyaction aganist as in effective as any such action are presently, you operate from behind you wall of proxy and falsenames etc. I do not I live in open and I stand therfore behind my words and actions.

It is not a crime to want to kill you and your cadre of stalkers, this a fortunenate for the liberals that so desperately seem to want the president dead. One can even express such desires openly.

If one asumes you are truely just a fool that has blunged into the 10 years effort of Robeson, Wismen et all to stalk and harrass then prehaps you should take a lession that you need to know you enemy before you enage him this advice "know your eneimy know yourself and Victory shal be thine" is from SinTzu the art of war (don't have date this was written handy)

Under the Recently enacted "Castle Doctrine Laws of the state of Michigan I or anyone may use deadly force in defense of oneself in excerising one right to be where one lawfully has right to be. As I understand the matter that would certainly include the USENET. I further opine that I may most any method short of deadly force to

defend that right. This I have done. this I will continue I am prepared to submit to due process of law.

I further opine that under the legal theory I must retreat where possible to avoid a confrontation poir to using deadly that prevailed in Mich till the new laws were enacted, well given that I can't move out of his way even by retreating completely off line, this does not stop his contiued ferreting out of info about me anf my wife and myfamily and spreading his effort to alrger and larger realms, thus I conclude if it were found that I was subject to some other juristction where retreat if possible was the rule since I can not reat or avoid Dloyd Effort against my wifes account my phone number and internet access that retreat is not an issue and if threatened I may peotencaily use deadly force against "dloyd"

"dloyd" OTOH can reatreat and avoid me entirely since he has sheileded his existance to point I can't find who he is, he can simply shut down and leave and thus he can disengag e where the Honest man can't

Dloyd whining while contiuing hsi stalking ways

http://markmorgansucks.blogspot.com/2007/03/mark-stop-threats.html
Mark stop the threats.
Mark Morgan, Amateur Radio Call Sign KB9RQZ, of Chassell, Michigan, stop threatening me. I don't want you posting on my blog and implying on the news groups that you are going to murder me. I demand that you stop any and all harrassment in accordance with the cyber stalking laws of Michigan, which prohibit such practice.The follow excerpts from your posts clearly show that you want to kill me and is implying the use of deadly force."I will make you pay for if I ever get the chance""I will seek to make [you] suffer""feel I might even have the right to use deadly force" "I will take the braodest and most violent to your person""threat of death promises of death""I want you dead without even knowing your name""I can kill you out of hand">You were the one who brought up killing someone.< "Indeed I did"Mark has clearly and repeatedly threatend my life. I have demanded that he cease (Stop) his harrassment and death threats upon me in accordance with the anti-stalking laws of the state of Michigan. Posted by Dloyd Lavies Sweat Lord at 4:19 AM

kb9rqz-1 said...
you can want you like Dloydbut as long as you keep stlaking and harrassing with these blogs and you attacks on amazon and god knows where else by now you are stuck with the war you created You can delete this remark of course, I will echo this all on my blogbut you

expressly invited me here to coments on your effort to harrass me on USENET and the rest of the interent after all what is next Dloyd an attack at our ecomerce site where my wife makes her living?I have stoped the phone calls by changing the number a pain and money out of MY pocket becuase of YOUR stalking, but is the next step using her freinds list to attack her network of suppilers, freinds and customers? I'd like to know just so I can plan my week

Dloys added the out context quotes as I was posting to his blog and I added these

Dloyd would like the phomes to complain about my actions? I will happily provide you with themyou have in this edit job which ocoursed as I was writing my comentadded a series of out of context quotes but let me help youI will use any force at my legal disposal to stop your harrassmentI am of the opinion that such legal do include deadly force oud]nder certain condictions

an open letter to Dloyd Lavies Coward and stalker and thief

I have said you were wise to conceal yourself, In that you have proven me correct as you comit another outrage an Out rage showing you are No man but a beast, and a pretyy low one at that.

You should also count yourself as furunate that we no longer live under the code deulleo, although if we did I fancy you would never dare such outrages or that you would have fallen on the filed of honnor long before we ever met.

You dare to speak to me of being imoral when you steal from MY wife as you have done.

you like the rest of the anti Mark RRAPer are not man enough to keep your disputes with Online and between US you go after my wives property and privacy as well.

I name you what you are a trator for your vert acts agains the blessing and liberty Our founding fathers sought to insure us as american, against the scrafices and serivce rendered by our veterans past and present

In your blog you call yourself slime lord, in that it seems you typed
the truth you are a slime lord

well the lastest from the world of stupid people

over at Nimbusters (www.nimbusters.com) the latest things is to post
fake death threats under other peoples name at various sites across
the net

I support free speech but this osrt of thing is what will kill it in
this nation, if anything does

Who is defaming you? I started this thread about the moderated
group,you hijacked MY thread, and you took it off topic. Everything
that Ihave posted is based upon my view and observation of the posts
on hereand responses to specific posts. If you don't like it, you can
take aquarter and call someone who cares.
If a law has been broken, call the law. You know what law has
beenbroken, none.
And who has forged a name. Dloyd Lavies is my pen name, many
authorshave pen names, it is legal. Don't try to play lawyer, it is
apparentthat you have no legal training whatsoever because you throw
acusitorylegal terms around without knowing the implications of such
terms.
> you do not enage in on topic post that is a violation of neNG policy
You are blabbering something about a violation of NG policy, but
yourfumble fingers has made it unreadable, but I will address one
policyviolation issue, which is your excessive posting. Your
excessiveposting is a violation of Google Groups Policy, because if
you posteddirectly into the group instead of a news server and using
all of yourdifferent names, you access to post would be limited. It is
apparentthat you post using one name until you are suspended, then you
startusing another, just to flood the group with your posts.

Google Groups Help Center
Is there a limit on how often I can post?
Yes, there are a few ways in which posting frequency is limited.
Onelimits the number of messages posted to a single group within a
shortperiod of time. If that limit is reached, posting to that group
willbe frozen temporarily and you'll be instructed to post again
later.
Another limits the number of messages a single user can post via
emailin a short period of time. If that limit is reached, your
postingaccount will be disabled. If your account has been disabled,
you canclick the "contact us" link below and request that your account
bereactivated. We'll review your request, and let you know what
wedecide.
We may also limit the number of messages a single user or computer
canpost via our website in a short period of time. If that limit
isreached, posting will be frozen temporarily and you'll be
instructedto post again later.
Please note, we are unable to provide the exact numbers that
triggerthese posting limits as the limits are subject to change.
These limits are to protect the users of our service and their
emailaccounts, our groups, and the Usenet community from poorly
configuredauto-responders, spammers, robots, trolls, and thread
hijacking.
Google Groups.
> id tell you in heartbeat and you'd do nothing> Don't bet your life on that.
you can find anytime you like Id rather you did not esp now it wouldbe
rough getting the blood up off the snow
What blood, you would be on your knees in about a 10 seconds
withontany blood at all. I saw your photo, no problem. The goal is to
applya lot of pain without any residual evidence of such force. Many
lawenforcement agencies and federal employers, such as my former,
provideexcellent training in the application of these techniques. But
ofcourse, this requires me to actually touch you, but you appear to
beway too filthy and dirty that I would ever want to touch your.
Doever take a bath? I bet LLoyd is cleaner than you.
> > if you did you'd be dead or in jail shortly thereafter> Well if you killed me because I
was kicking your ass, that means you> would be guilty of murder, so you would end up in
jail for life.
nope. indeed I don't have to wait for the first blow to land,althought
that would be safer legaly
Sure Markie, that defense would not stand a chance in any district
orjudical circuit in the US, even in the 8th circuit.Like I said, it
is apparent that you have no legal trainingwhatsoever.
>not the case in Michigan
Actually, Michigan is one of the more liberal circuits, you betterhave
significant evidence to warrant justifiable homicide. The courtswould
put you away forever if you try to say "oh he was giving me ahard time
on the internet after I shit on everyone's postings, and Iwas scared,
so I killed him even though he had no weapons. You aresuch an idiot.
>>stop whining like a little bitch just because you can't poison the moderated group.

>I don't want to poison any NG please stop lying about me
No lie, you flooding policy and misc. is evidence enough of your
handywork.

more current ops

mostly waiting for better weather to put up anttenas still looking for
my first non local VOICE qso on HF

Posted by mark at 11:53 AM 0 comments

Sunday, February 25, 2007
an account of hf weekend part 1 delayed report

well things stared out pretty dead at midmight as expected at 12:10 a
gruop of my then gathered to tlak to each other on 10M I arranged that
my wife should have the honor of the first qso

firday morning set for Eat Troy where my father in law lives trying
out my new 10 m adio as I went made a few conacts as I went south ,
biggest observation was the noise level arround around even smal
cities like Like Green Bay WI Milwakee the noise was just horrible and
I truned the radio off as I had managed to arive at rush hour turned
it on a bit as I pulled out of town

sat morning scruiied into AES for the exam place was a Zoo a very good
sight for the ARS

must have 40-50 people starting out taking exams which did not count
the paperwork upgrades being handled in another room and people keep
coming in Indeed after I took my geneal (passed) and extra exam (which
I fialed one too many this time not suprised) there was someone
waiting for my chair

dropped in AES itself to pick up some stuff and headed home made a few
more contactrs on the way all preetlocal although I did hear from the
LP of Michigan possible on VHF but not common

it is now sunday about noon time to turn on the radio here and see
what is up

I'd sting the new G5RV-M up but it is very windy today and the thing is 200 feet long should have check that and maybe picked a smaller anttenna like a 20 m Dipole

another of the passion haters of me

http://markmorgansucks.blogspot.com/

or is it just another of the same jerk hard to tell his blog is
amusing like the others that have been created to attack me over the
last few years

the picture he is using is stolen from another Ham Lloyd Davies who he
hates but wishes to be seen as

these guys are nuts so be warned

one last thing half the posts they claim are from ain't the guy is
cobbing together stuff trying to emulate me

11 days to go

nothing but the normal sniping on RRAP and QRZ truly youd think it
iwas the end of the world

wife and I have worked out I will venture off to a VE session that
weekend alone since the weather is so frightfull now

it will eb the first trip I have made over night since we finshed
moving up here although she has been severl time to see her mother
father a trip to NM

we will be seeing just how well 10m work as I pull away intot he
distance

one last studied insult by the ARRL

the ARRL ever eagar to insult the tech class and the NoCoders in
general has scheluded one last insult code tests on the Eve the
begining of the new Era

by there deeds we know and will long remember this last (I hope last
prehaps the ARRL divise some further insult)

from The ARRL Letter, Vol 26, No 06
Website: http://www.arrl.org/ on February 9, 2007
View comments about this article!

W1AW Special Event, Midnight Exam Sessions to Mark New Amateur Rules: As new Amateur Radio Service rules phase in Friday, February 23, eliminating the Morse code requirement, Hiram Percy Maxim Memorial Station W1AW will mark the milestone with a weekend-long special event. In addition, a number of Central Connecticut volunteer examiners will be on hand at ARRL Headquarters -- both before and after the new rules become effective at 12:01 AM EST -- to offer Amateur Radio examinations under the current and new rules. ARRL Regulatory Information Specialist Dan Henderson, N1ND, is helping to coordinate the celebration. He says Headquarters staff and other volunteers will keep W1AW active for the "Welcome Weekend" event.

"W1AW will be on the air all weekend for this special event to celebrate the fact that so many amateurs have gained or will earn new privileges as a result of the rule changes," he said. "The station will operate starting at 12:01 AM Eastern Time on Friday, February 23, continuing into the wee hours and resuming operation during the day. Then W1AW will be on the air on both days of the weekend, from 10 AM until 5 PM -- perhaps longer as conditions and enthusiasm dictate."

Operation will be on both SSB and CW. W1AW operators will concentrate their activities on the Technician and General class HF subbands. On SSB, the station will use its normal phone frequencies -- 1.811, 3.990, 7.290, 14.290, 18.160 and 21.390 MHz. On 10 meters, W1AW will operate SSB on or about 28.480 MHz.

Henderson says operating will be casual unless pileups develop. "The purpose is to welcome newcomers to new privileges," he said.

"First Contact" certificates will be available as part of this event. ARRL invites anyone making a first contact or first HF contact to enter the contact information on the ARRL "Welcome Weekend" Web site http://www.arrl.org/HFWelcome/ and receive a certificate in return. "If the first contact is with W1AW we will also be including a W1AW QSL card for the contact," Henderson added.

The ARRL anticipates a huge influx of upgrade applications once the Morse code requirement disappears. In addition, all Technician licensees will have limited HF privileges starting February 23, whether or not they've passed a Morse code test.

Amateur Radio exam sessions both before and after the zero hour will offer an opportunity for applicants either to upgrade under the outgoing licensing rules at the last possible opportunity or under the new licensing rules at the first possible opportunity.

"Dual exam sessions are scheduled at ARRL Headquarters around the effective time of the new licensing rules," says Brennan Price, N4QX, a former ARRL staff member and an ARRL VEC volunteer examiner. "At 11 PM on February 22, a session will be held for candidates wishing to upgrade under the existing rules. A few folks have expressed interest in such a session." Price says all Amateur Radio written and telegraphy elements will be offered until midnight.

"At 12:01 AM February 23, a second session will begin under the new licensing rules," he said. "Examiners will not only be evaluating previously earned Certificates of Successful Completion of Exam (CSCEs) for upgrades, but will be offering all written elements." Two teams of volunteer examiners will be on site until all applicants have been served.

On or after February 23, applicants upgrading on the basis of a valid CSCE must present the certificate for element credit, fill out an application and pay any applicable exam session fee, which most VECs charge. Only after the VE team has issued a CSCE for upgrade credit may applicants actually use their new operating privileges on the air.

Additional details and more information will be available on the ARRL Web site in the days leading up to February 23.

dday minus 15

well another day passes and another day closer to the the day
everything is ready to go

Posted by mark at 11:42 PM 2 comments

what is the problem re editorial policy

I dind it amusing that insisting that the coments on my Blog be on topic is such a hardship to people that they coment on RRAP about it

one is since the topic is radio the coment needs to be radio related IOW calling my wife a shemale in response to a post about my new radio or the end of code testing just doesn't make it.

two, posting a dozen coment s becuase you have not noticed that coments are moderated to prevent the above abuse will get most of your coments dumped in the bit bucket I will choose which of your coments

gets through in that case

three I will not post your coment if I consider it libelous against a third party, My wife My father my father inlaw and the esp the makers of the gear I buy and use' so saying "ranger sucks...." don't make it either

four spam don't make it either although I supose if you are selling something I migh t seel you a posting or accept some other arrangement

in general nothing about sexuality is going to make it to this blog although I am condsidering authoring such a blog in the future, a na excepttion might be coments about some repost of a post I might here but that is case by case

16 day till d-day and news from the club meeting

was an interesting clube meeting tonight here in the Copper Country

6 new memeber long term techs that have never realy jioned the club.

5 New ham (having taken their tests since the NPRM) showed up

2 folks showed that are students at the local college took thier exams over the previous weekend so they don't know their calls yet

1 new unlicnsed propective ham

tsk tsk children

trying to post a a dozen or so insulting coments to this blog just doesn't work since i moderate them

it is a also a rude thing to do to your host

I will add it seems interesting that there are those that want to want i have an oblibigation to assit them in comiting a crime where I myself would be the victum of that crime

the fat lady apeareance has been anounced

the R&O has apeared on the public inspection roster of the federal register so the fat lady is tuning up to sing

Posted by mark at 7:30 PM 0 comments

Monday, January 22, 2007
ah well not today

I was hoping that the R&O would come out today giving us no code for my birthday

Posted by mark at 9:07 PM 0 comments

Friday, January 19, 2007
the date is Set?

the ARRL claim to have knowledge that the R&O will published on jan 24 2007 making for an effective date of 23 feb 2007

from www.arrl.org

Posted by mark at 10:16 PM 0 comments

Wednesday, January 17, 2007
some nice word from the Pres (or his staff)

found on QRZ.com I assume it is from the ARRL letter or something like that

NEWINGTON, CT, Jan 16, 2007 -- President George W. Bush has written the ARRL to recognize the just-ended Hello Amateur Radio public relations campaign and to extend "greetings to all those celebrating 100 years of voices over the airwaves." The president said the centennial of Reginald Fessenden's landmark Christmas Eve 1906 voice broadcast "opened the door for technological advances" that improved the lives of people around the world.

"I appreciate all who work in radio, and I am grateful to the Amateur Radio operators who provide emergency communications that help make our country safer and more secure," President Bush wrote. "Your good work strengthens our society and represents the American spirit."

on my capture of the spamblog

http://marksspamblog.blogspot.com/
was a creation of someone person or persons unknown to me but they made the mistake of using one of my real email addies to on the blog and in seting it so the posting of coments to the blog would result in them being emailed it and it become clear Google would not honor the ToS I simply used the tool the blogger was using to harass me and gain control of . then I deleted the ofensinve cotent and left the blog that sit there now

if you want to report me the feds go for it that you were using the blog to harrass and libel me I can't see where a crime was coimited but you know I have the guts to say go for it

Posted by mark at 12:52 AM 2 comments

latest of the mocking bird

http://ipunce.blogspot.com/
the product of some jealous freak desperate to mock but clearly afraid of me

they are so desperate to mock and think their crap will enagrge into saying thing they find amusing but they don't have a clue

the "blog" is worth reading for laughsi will be keeping an eye on it

Posted by mark at 12:39 AM 0 comments

Sunday, January 14, 2007
new hate blog

http://www.ipunce.blogspot.com/

agin another effrt to harrass me but it shows more of the mental illness of th emakers of these frauds

Your submission has been rejected because it is off-topic in the newsgroup news.groups.proposals. This newsgroup is for the announcement, discussion, and development of active proposals for changes to the Big 8 hierarchies, as documented at
. Discussion begins in news.groups.proposals
when the Request for Discussion (RFD) is posted in
news.announce.newgroups and continues until a decision is announced.

Common topics that do not belong in news.groups.proposals include:

- Discussion of world events or "the news" - see talk.current-events
- Proposals for alt.* or other non-Big-8 hierarchies - see alt.config or the appropriate regional config newsgroup
- "How do I do X with my newsreader?" - see news.software.readers and/or news.newusers.questions

The charter of news.groups.proposals is at .

Please direct your queries to ngp-mods@ngp.big-8.org.

Thank you,

- Moderator.

global warming?

finaly seeing what looks like the first real snow of hthe season today
on jan9 till now we have had a light snow cover aways threatening to
let us see our yard one last time this seas

we ave 2 inches of new snow I wnonder how much will indeed fall

Posted by mark at 3:53 PM 0 comments

Wednesday, January 03, 2007
an interesting sight for a kosher Ham

I have been watching with interest the recent cyber terror attacks directed aginst the neoNAZI's like http://www.vonbluvensshow.blogspot.com/ and http://halturnershow.blogspot.com/ and other NeoNAI ayran nation type groups. It satrted with massive efforts to overload Hal turners server(s) and has spread to others amusing that Nazi.org seems unaffected

the prerps in this intereternet seem to be http://turnerchan.blogspot.com/ although some darkly suggest that various WN or NeoNazis are responible I doubt the latter as it would seem beyond their ken although each Figure is trying to exploit the matter for any benfit they can direve from it

so i watch and wait to see what developes

as I belive the rest of us should

Posted by mark at 9:37 PM 0 comments

well it is new year

although it hardly seems to be the new year still waiting for the FCC to finsh acting

still watching the insane raving of the ProCoders

still receieving death threats over email

ah well things will look up soon enough

still on coments

coment are accepted but if you want to abuse ME on my blog forget it it ain't seeing the light of day

otherwise the comment needs to relate to the post

if you want someplace to post about the Code well try QRZ.com

Posted by mark at 11:18 PM 0 comments

amazing the the efforts that Wismen goes to to publicize something that is not secert

I am bisexaul if that offends you sadly that I feel is your problem not mine I have enough to do just living my life without obessing over who may be sleeping with whome or even what. yes I don't care if someone is indeed sheep shagging so to say as long as they own the sheep in question

a rejoiner to "now you are HF active"

first I thank the author for his thought wether or I not I agree with you I do respect.
OTOH I simply feel you and others have failed to understand what you were up against in the Code test fight which I don't consider quite over yet, anymore than "mission acomlished" was the end of the Iraq war. I exepct indeed my inbox have receieved a number of threast if I dare use my new found prevledges, some of these are threats to murder me, my family, my dog my inlaws, (and I truly wish I were kidding I have gotten all of those threats and more since THE DAY) Till I am able to operate on the Air the battle is not over. I did not take part in this fight only to lose the resulting "peace" I know full well I will encounter jamming of my signals. I do now from time to time on VHF and up, I know this will presist

The question you pose begs the question: why do I want to use this mode? I spent year in my youth trying and failing to obtain a Novice License, the experence of 5 year trying and failing is certainly incentive to try again 20 some almost 30 year older than when I started. And suppose you had a wand that over come that and sudden allow my brain to process these signals: what then do I gain? one more mode amoug many others? one I must lisstrain to hear through static? if I am straining to hear throught the static I I am seeking the reward of seeking Human Contact. Morse Coded CW offers me only the interent chatroom plus the noise of HF. it hardly seems worth it.

If I were to take this step (which in may case I think beyond any ability I have anything close close to the time to expend on) who do I get to "talk" to the same people I least want to contact are amoug them.

People call me lazy because I don't want to spend even more effort than I have. to a point I supose that is fair, but I would contend this is the crux of the Code debate. I don't value effort for efforts sake. I value efofrts vs results I.E. Profit, yes the Kosher Ham is capitalist Pig and proud of it. I want the most return from my effort in the case of Our Hobby (which has it service overtones etc) I want to to maximize the return. and no matter how I try to look at it. I see MorseCoded CW as a poor risk and bad investment.

I am banned from QRZ for saying basicaly 'never stop.. never stop fighting till the fight is done" the code war is not yet over, indeed sadly I fear i may never live to see the end of that war even though I

am 42 and pretty good health. The fight will be over when the ARS is aplce i can operate on the air with it being resasonable bet that I may entouer some the proCoder retain their chip the size of RMS Titanic on their shoulders. then war is over, how long is up the side the did not prevail in working of this republic

ps I have been reading most of the stuff on qrz on this matter the original piece is about the only I realy felt was worth comenting on

Posted by mark at 3:24 PM 0 comments

an interesting piece of writing from QRZ.com

TITLE: "SO NOW YOU'RE HF-ACTIVE"

© Heath Roberts, KE5FRF
With permission granted by the author to distribute with appropriate intellectual credit.

"Wow, I never thought this day would come. The FCC finally flexed its regulatory muscle and notified the world that US Amateur Radio operators will no longer be required to pass a Morse code proficiency test to indulge in the world below 50 Mhz. What does this mean for ME?"

This is a fair an honest question that many Technician class amateurs will be faced with in the coming weeks and months as American hams learn to accept the end of a long standing tradition and the beginning of a new era. It is natural to be excited about the new privileges that you will be granted. You are eager to plan your new HF station, purchase some new gear, and maybe even erect a tower and directional antenna for that DX band you've been hearing such great things about. There is so much out there to do and be a part of, you don't know where to begin.

I can assure you, this is a road that everyone has traveled in their quest as an amateur operator, code or not. You'll be certain to receive the wise counsel of some older fellow who has more than a few tips to share. A friend who upgraded his license to General last year will offer his insight into propagation and techniques for busting a pile-up. The local club will be offering a class on operating procedures. No worries, for there is a lot of resources at your disposal. All you must do is display a willingness to learn.

As exciting as the news is for you and as eager as you are, you can't help but wonder what mode you will like the best. Everyone says that PSK-31 offers the most efficient use of the spectrum and can cut through a host of propagation conditions that other modes can't. You saw an Extra class ham on Field Day working a digital station and this was the mode he used. It was interesting and he sure looked like he was having fun, but it kind of reminded you of an internet chat room like QRZ.COM.

Your buddy, the guy who upgraded his license before the new rules, swears that SSB is the most fun mode. He barely squeaked by on his code test and never looked back. He regularly checks into the WAS nets and is close to his goal on 80 meters and already confirmed 40 meters. There certainly won't be a lack of new friends to make on phone. Hmm...Maybe this will become your favorite mode too.

But there's one other fellow who keeps showing up and offering you suggestions that make a lot of sense but you're just not sure if you have it in you. He's the local CW guru and he spent the last two years coaxing you to master the code before the requirement was dropped, but you failed to heed his advice. You know it is probably too late to learn it now, the new rules go into effect next week, but you must admit that with the "pressure" off the idea of casually studying the code is intriguing. You've read some stuff on the internet about colorful figures in the history of amateur radio and telegraphy like Hiram Percy Maxim and T.R. McElroy. You've watched your CW friend use his Blue Racer during a contest and were fascinated by his skills. You feel a certain connection to this storied tradition even when you tap out "SOS" on your desk with your index finger. What is stopping you from turning your years of procrastination into something you think might benefit you in the long run?

My friend the answer is simple. Nothing is stopping you, nothing at all except the same thing that hindered every CW op who ever "dit his first dah." Learning Morse code is a work in progress. It is an endeavor of achievement that has a certain beginning but no real end. No matter what skill level your CW associates may brag to possess, they all make mistakes and have plenty of room for improvement. Just knowing this should set your mind at ease and give you inspiration!

Yep, you finally got that new HF rig via UPS delivery. The tower isn't up yet, but you managed to hoist a coax fed dipole into the old oak tree in the back yard. You cut it for 40 meters in hopes that it will offer the most playing time at this point in the sunspot cycle. Everything is hooked up and ready to go.

Power "ON"....Shschshhhschhtishahshhi....Static. "Hmmm what frequency is that? Oh, out of band."....Zzschshizzz...dadidadit dadadidah...dadidadit dadadidah. Oh boy, you recognize that familiar sound. Someone is calling CQ in code. Well, at least you know your antenna and feed line are working ok. Tune up...tune down...tune up. Nothing but static crashes and faint voices. You can't make anything out. Everything seems to be in order, filters configured for SSB. This is 40 meters, and you are on the lower sideband. "Oh well, I guess the band is dead".

So you tune back down to the CW sub band. Amazingly, as you move back to that CQ frequency, you must hear at least three ongoing QSOs along the way. Two of them are way to fast to make heads or tails, but one guy is sending slow enough that even YOU can copy a few of his characters. "Wow", you think. "I could do THAT!" You put the headphones on and lean back in your chair, close your eyes, and listen

to the rhythm. You only know a handful of letters...S,O,C,Q....uh..uh...well SOS and CQ...but you are amazed that every time you hear these characters you immediately recognize them. "Hey, 26 letters in the alphabet, and I already know four!" You think to yourself, "Not bad."

My friend, you've just been bitten by the bug. There is a mystery behind all of those funny tones in the ether, and we've all found a childlike fascination with them at some point. You stand on the threshold of letting it be more than a fleeting interest. You have an opportunity before you to affiliate yourself with a tradition that has stood the test of time, and will stand strong many, many more years despite the actions of the Commission. Will you be just another op who jumps on board the sideband rollercoaster of QRM and static, or will you take the time to learn and develop a skill that will stay with you a lifetime?

This message is brought to you in hopes that you will consider the opportunities that CW brings. There is a large group of hams young and old whose only desire is to see the art and skill of telegraphy passed on for as long as it is feasible. Back before the FCC R&O, many of these folks seemed abrasive, but you must realize that they knew this day was coming but wanted nothing more than to delay it for as long as they could. Their desire is not to hold back deserving and ambitious hams that have much to offer. It never was. They simply seek to maintain the traditions which are the history of this hobby. They want to preserve and foster a mode of communication that they love and are proud to be a part of. Were their concerns and their motivations so unworthy?

Next time you fire up that brand new rig and hear the tell-tale music of Samuel Morse's creation, think about these things, and consider getting in touch with that fellow with the Vibroplex. I'm sure he'll be glad to invite you to his shack to show off his bug collection, and no doubt he'd be the first to take the time out to teach you those other 22 letters and some numbers to boot. Just think about it.

100Hz?????

That is a subaudible frequency.
How could anyone detect it without a scope?

james

So what you're implying is that the CB receiver is functioning... when you say you see received signals on the meter. I guess your problem is that the RF coming in either is not being detected (to recover audio)... or the detected audio is never making it to the audio amplifier chain.

The range of "normal" human hearing is 20-20,000 Hz. How is 100 Hz
"subaudible"?

If you can't hear 100Hz... you need to get your ears checked Jim.

But NO! One out away from a complete five innings and they called it.
(white out snow) To be resumed tomorrow - 34 degrees and more snow in the
forecast, with the real Saturday game to be played at 7 pm. burrrrr!

Hey Frank, the Mariners are in frozen Cleve btw.

Yanks have had 2 sub-30 games. It's pretty bad to watch baseball in those conditions.

It's dangerous for the players. Victor Martinez pulled up lame running to
first base because of it. ugh The only reason they are playing is $$$

I've had pretty good luck with my Connex 3300 HP that I've been using for about the past 7 years. I use a Road King 56 noise canceling mike along with it. I've actually had to replace my RK56 a few times. They say they are repairable, but to me it's just worth it to buy a new mike. I think Astatic mikes are crap ... stay away from them. What I like about my 3300 is that just the radio without an amp gives you enough power to get out over the noise surrounding a truck stop for example. When I used to run a Cobra I could never get out over the noise. I'm not one of those " Big Radio " guys either. I could really care less about that rat race. Those drivers who spend a huge amount of money, pumping out huge amounts of watts just so they can talk to the truck in front of them mystifies me.

I had the Cobra Dale Earnhardt Jr. CB but I don't know if it was defective or what, but it sucked ass. I couldn't get more than 100 yards of reception. I replaced it with a cheap Midland CB from the TA and it works just dandy. I get about 5 miles of reception with just 1 antenna. I think it cost me about $40.

Check the major truckstops. They've been putting the Cobra 29 Classic
on sale alot lately. I picked one up last year for $85 at s Pilot.
And it had a $25 mail in rebate so it only cost me $60 brand new

I agree with you on that. I just need a radio that will recive/
transmit 4-5 miles or so. Not one that will be heard 3 states away.

LOL... looks like the Connex does not fit into the compact category. That
radio certainly has a great reputation. But thanks anyway. I do slip
seating so I need something that fits easily into my soft sided briefcase
and fits that tiny cubby hole in the Columbia.

Mariners sucked big time last year, maybe the cold will improve their
game. After all, for the money they get paid they -should- have to
play in foul weather once in a while!

BTW, the temp here is supposed to climb over 70 today..... hahaha!!!

Someone asked a question over the CB radio and I answered it. The driver didn't hear my Radio and I don't know why.

Then someone between us repeated my answer for him. Next thing I know, that driver starts bragging about his "Big Radio" when he was just closer to the other person than I was. Big deal.

If it isn't politics, sex or religion on the CB radio, it is talk about "Big Radios."

Not exactly "compact and reliable", but I've got one that's been
sitting on the shelf collecting dust for quite a few years.

Its really hard to go wrong with a Cobra 29. Add a RK56 Roadking mic, external speaker and a Mirror Mount Wilson 1000 and you hae a setup that will work decently without spending a fortune.

The most important thing to getting out that is frequently over looked is tuning the antenna. On a Wilson 1000 iits fairly normal for the static rod to be 3 to 3.5 inches too long. You want to tune the antenna to as low of SWR as you can get. If you have a CB shop tune it watch them they get lazy and stop tuning at about 1.7 to 1.5, You want at least 1.1. Have the antenna tuned corrrectly is the single most important part of the install. If you have question regarding the antenna tuning email me andd I will answer them that way..

I have a Cobra w/ a Wilson 1000 in my pickup, but I use a Galaxy 95T w/ a roadking mic and a Wilson 5000 antenna in my Columbia.

Hello Jay

That sounds like more material for your resume, especially with those blues brothers shades! One thing about N Ohio weather, if you don't like it wait 24 hours and it will change. It was 80 degrees here monday.

Be careful around the power lines with that big honkin' antenna on the back of the tractor. Keep your knees in the breeze and the rubber side down.

Very easy to watch when we start out 4-0 and outscore opponents 31-3 :)
Go Mets.

Hello Steveo:

U people in the back mid east, and eastern states need to get a grip!

Yesterday it hit 84 degree's, I was ah wearing my "Shit Happens" Tee Shirt, LA Dodgers Ball Cap, Blues Brothers Ray-Ban Sun Glass's, cut off old jeans, and old tennis shoes. Had to run the tractor around the south acreage. Umm I mean the antenna range. No skip heard on the old radio, don't know why the weather hasn't ruined that radio on the tractor yet?

Classic Rock and Roll, and ocaiosanl tuned in 2 the old classic County Western Station, I was rocking out, as they say.

When it snows here it only lasts long enough to take photos. Not long enough to figure out where I put the tractor battery, to start it!

Jay in the Great Mojave Desert, ...just down the road ah ways from the fillin station.

Is that antenna resonant at 1.7:1 or at 1:1? A dummy load has a perfect
SWR but doesn't radiate very well. My CB antenna is at 1.6:1 and is
resonant. It works great. Resonance and 1:1 don't always coincide.

I prefer resonance. A 4% loss is more than made up for by a resonant antenna.

Obvisously you lack the knowledge of what is the subtle difference
between audible and audio frequency. Also I did forget that CB radios
are not necessarily well designed radios. In a well designed radio,
any audio frequency below 300Hz is considered subaudible.

Why? Because the power density in the human voice below 300Hz is
negligible. Most well designed receivers for communications purposes
do not have audio response below 300 Hz. Also human hearing threshold
increases as the frequency decreases below 300Hz. That is the source
of the audio freq uency needs to have a larger PSL in order for it to
be heard. Sensitivity to audio frequency in Humans is not flat like
that of speakers and some sound systems. Instead SPL, Sound Pressure
Level, needs to increase as frequency decreases below 300Hz to gain
the recognition. For most Humans the power of a 20Hz signal needs to
be about 30dB higher than that of 100Hz.

That maybe true but the Human ear does not perceive sounds with a flat
response for that frequency range. Instead as frequency goes very low
and also very high the power density for a given frequency may have to
increase or decrease. The human ear does not have a flat range of
sensitivity.

Also in communications the Human voice has very little power below
300Hz. Therefore most communications equiptment considered below 300
Hz as subaudible. A well designed receiver for voice communications
should reject frequencies below 300Hz. In fact they should also reject
frequencies above about 3KHz also.

The range of 300 to 3000 Hz is where the ear is most sensitive to
frequencies. Also the Human voice contains most of its power between

this range.

I have a situation that does not make any sense to me. I have a galaxy 73V and when I get the SWR on the built in meter really low like 1.2 the red antenna warning lights comes on full brightness. But when the meter shows 3.0 the light barely comes on when I modulate and power knob at max. Lower power setting and it does not come on. What's up with that? I would think the light would come on only with a very high SWR.

I am using a hand me down base antenna that was free, and I do have very good reason to believe its ready for the land fill. But I don't understand why my needle and light are contradicting themselves. Also let me add that I am calibrating the swr meter each time I check it.

most of those internal SWR bridges require to be properly calibrated from
time to time. sounds like your unit is in need of calibrating.

I highly recommend the use of an external SWR bridge (preferably a BIRD or
other similar high quality unit).

as I stated above, get an external unit and check to make sure that the unit
on board isn't fried. I have a radio here that has one of those. I've
checked it against 2 other units and have oft times found it to be lacking.

Let's eliminate the antenna from this equation... does it act the same
using a dummy load?

www.telstar-electronics.com

I think what you are seeing is normal. Go with the SWR reading as
being accurate.

The antenna warning light should be brightest with a disconnected
antenna and should be dimmest with a shorted antenna. It is not
directly related to SWR

We had snow here just north of Houston. Of course it didn't stick, but it's only the second time in history it's ever been this cold on this date.

I don't have a dummy load but I can say that the cb act different in the
pickup. low swr and no red warning light. plus when the wind blows my base
antenna the swr rocks from 1.5 to 3.0 telling me its junk. I just do not
know why the two antenna indicator on my radio are telling me different
situations with a bad antenna

As for the antenna type . its a two piece fiberglass big stick type. So I
say it cant be fixed. All I could do is clean and check the coax connector.
